casein-contg., effect of feeding excess glycine, arginine and methionine during, 4739*b*.
casein-contg., in protection against $CCl_4$ poisoning, 2292*g*.
casein (devitaminized) for, P 8072*f*.
casein-low, effect of gelatin on transformation of tryptophan to niacin on, 3500*a*.
casein salad oil and egg white-salad oil, vitamin A activity of, 9185*h*.
cereal-rich, protein requirements during, 5459*i*.
Chinese cabbage as supplement to cereal, 3892*g*.
chloride-low, effect in eczema, 4364*e*.
chlorine-free, 1471*i*.
cholesterol in, effect on metabolic rate and hyperthyroidism, 6709*a*.
choline, cystine and methionine effects in, 2681*gi*.
choline-deficient, effect of fats on tumor development on, 6295*g*.
renal lesions from, 4737*d*.
response of guinea pigs to, 3075*a*.
cod liver-rich, effect of vitamin B factors on nutritional hindrance from, 8021*h*.
complement in blood serum during vegetarian and omnivorous, 3892*f*.
corn, effect of penicillin on dental caries during, 6709*c*.
corn, nicotinic acid in tissue during, 3075*g*
cystine- and methionine-deficient, lanthionine availability for growth of rats when added to, 2295*d*.
cystine, nordihydroguaiaretic acid and vitamin C in, effect on vitamin E deficiency symptoms, 3902*f*.
deficiency in proteins and vitamins A and D, thymectomy on, 1093*h*.
deficiency syndromes in Indian soldiers, 4352*i*.
deficient, amino acid excretion during, 8470*e*.
lemon juice as stimulant of osteoclast formation in, 6295*a*.
yeast and skim milk as supplements to, 3897*a*.
density of, effect on food intake, 8478*d*.
dental caries and, 6295*f*, 9314*c*.
in dental-caries control, 7098*h*.
dental caries-producing, effects at various stages of pre- and postnatal development, 9187*i*.
*p*-dimethylaminoazobenzene-contg., levels of carcinogenic azo dyes in livers of rats fed, 2310*d*.
dog foods (canned and dry) in, 8071*a*.
edema from deficient—see *Edema*.
effect of previous, on metabolism during fasting, 8028*g*.
effect on alc. consumption, 9217*a*.
on alloxan diabetes, 4364*h*.
on alloxan poisoning, 2082*f*.
on anemia plus hypoproteinemia, 3500*c*.
on animal ability to do work during subsequent fasting, 1091*g*.
on choline lipides in potato beetle, 3532*d*.
on fat of turkeys, 1087*h*.
on glucose action in periodic paralysis, 3919*g*.
on lipide and nucleic acid concns. of thymoma, 5853*f*.
on liver regeneration after partial hepatectomy, 7100*f*.
on nephrosclerosis, periarteritis nodosa and cardiac lesions from endocrine kidney, 8043*d*.
on resistance to $CCl_4$, 3072*d*.
on riboflavin content and *N, N* dimethyl-*p*-aminoazobenzene destruction by liver, 8524*a*.
on susceptibility to pneumonia virus, 3080*a*.
on toxicity of dichloroethane and dichloropropane, 3077*c*.
on U deposition in bone, 1114*h*.
on uropepsin output in cats treated with caffeine and histamine, 297*h*.
energy and protein content of, effect on protein synthesis, 7100*c*.
energy balance with, 2297*b*.
enzyme content of pancreas and, 2682*h*.
fat and protein content of, in relation to fatty changes, fibrosis and necrosis of liver, 3904*d*.
at-high, effect in alloxan diabetes, 9234*c*.
effect on methionine excretion, 6307*b*.
liver diseases and, 1095*a*.
fat in, caloric efficiency of, 4741*i*.
economy of food utilization and, 5461*c*.
effect on growth and amino acid excretion, 7559*i*.
effect on growth and on food and water consumption during vitamin $B_1$ deficiency in relation to exercise, 9184*b*.
feces in, effect on biotin and folic acid requirements of rats, 5833*b*.
fluorine in, 1095*b*.
in formation of blood elements, 1467*a*.
glucose, starch and sucrose, caries-producing capacity of, 8474*h*.
glutamic acid and vitamin $B_1$ in, psychological effects of, 8467*h*.
growth and, 3078*b*.
hippuric acid producing, effect on penicillin retention, 9244*e*.
insulin sensitivity and, 734*i*
interrelations in, 1844*b*, 5099*c*.
iron absorption and, 8478*i*.
ketogenic, effect on excretion of substances regulating carbohydrate metabolism of anterior pituitary, 7096*i*.
lactic acid in, effect on dental caries, 6709*d*.
lactose-free, in treatment of galactemia, hepatomegaly and cataract, 2291*a*.
leucopenia from milk, effect of vitamin A and folic acid on, 2296*a*.
lipides in, alloxan toxicity and, 8485*b*
liver — see *Liver*.
liver cirrhosis and, 7097*d*.
liver injury and, 2699*b*, 3077*b*, 3080*e*, 4351*g*, 9195*b*.
liver injury from, effect of liver exts. on, 734*e*.
magnesium-deficient, rats on, 734*g*.
microorganisms in cecal contents of rats fed various, 2276*i*.
milk (evaporated), electrolyte-balance studies on premature infants on, 5100*s*.
monocrotaline toxicity and, 8535*h*.
nicotinic acid and tryptophan in, 1093*f*.
nicotinic acid-deficient, growth-retarding effect of corn in, and its counteraction by tryptophan, 2680*c*.
nicotinic acid-deficient, tryptophan in nutrition during, 3075*b*.
oxalate in, Ca metabolism and, 3802*e*.
pantothenic acid-deficient, ulcers from, 8469*a*.
phosphatide content of blood and liver in relation to, 5463*h*.
potassium and Mg in, growth rate and, 294*b*.
potassium- and Na-low, effect on cholesterol in adrenal gland, 7102*h*.
protein-free, nicotinic acid, riboflavin, D-amino acid oxidase and arginase in livers of rats fed, 2297*h*.
protein-high and -low, effect of 1,2,5,6-dibenzanthracene on growth of Walker carcinoma in, 306*f*.
protein-high and -low, effect of 1,2,5,6-dibenzanthracene on nucleic acid in livers of rats on, 306*d*.
protein-high, effect on hypophysis and genital tract as affected by age, 1842*i*.
effect on life cycle, 5461*e*.
hypophysis in, 734*a*.
kidney and liver of dogs fed alc. during, 7097*a*.
urea excretion in desert rodents during, 5476*a*.
protein-low, effect of choline on, 733*i*
effect of citrulline and ornithine on urea formation during, 9209*s*.
effect on liver, 7097*e*.
effect on oxidation of phenylalanine and tryosine by liver, 6296*e*.
effects of, 3076*g*.
in etiology of anemia of malignant malnutrition, 4352*f*.
loss of body proteins and antibody production on, 4352*c*.
nucleic acids in liver during, and during repletion, 5490*b*.
P metabolism on, 5465*b*.
renal lesions on, 4737*d*.
S balance on, 8022*d*.
protein-low or balanced, effect of folic acid on growth and blood during, 4352*d*.
protein optimal for, for children, 737*g*.
proteins and vitamin $B_6$ in, effect on body compn., 287*e*.
proteins (heated) in, growth and, 5458*g*.
proteins in, activity and, 6296*k*.
amino acid excretion in urine and, 4351*c*.
bones and, 5097*h*.
*proteins in*, caloric intake in relation to quantity and quality of, 6713*b*.
$CCl_4$ poisoning and, 3497*d*, 4737*c*.
effect on adrenocorticotropin secretion, 8035*g*.
effect on coenzyme A in liver, 9195*d*.
effect on N retention and wt. gain produced by hypophyseal growth hormone, 7561*a*.
effect on tumor genesis and growth, 4368*f*.
effect on turnover of phospholipides, ribonucleic acid and desoxyribonucleic acid in liver, 1844*e*.
effect on vitamin $B_2$ in skin diseases, 1471*h*.
in glomerulonephritis, effect on proteinuria and blood-serum protein, 2697*b*.
time factor in feeding supplementary, 1469*g*.
tuberculosis resistance and, 6293*i*.
urea in blood serum and, 6710*h*.
proteins in infant artificial, 9189*b*.
reproduction and lactation of rats receiving pork, 1089*h*.
restricted, effect of vitamins on, 8021*i*.
restricted, effect on gonadotropin and lactogen in pituitary of intact and ovariectomized rats, 5471*e*.
rice, effect on blood pressure, 8476*f*.
rice, nutritive effects of supplements on, 8028*d*.
self selection of, 5458*e*.
sodium low, in cirrhosis of liver, ascites formation and, 9225*a*
starch in, in celiac disease, fat absorption and, 8026*a*
supplements to, effect on nutritional life history, 5099*c*.
tooth compn. and, 2681*e*.
tryptophan in, nicotinic acid derivs., tryptophanlike compds., etc., in urine and, 3074*b*.
urinary excretion of 2,3-azotoluene split products in relation to, 6315*c*.
valine-deficient, motor disorders during, 9191*i*.
vitamin $B_2$ in, and in blood serum, red cells, white cells and urine, 265*f*.
vitamin C in, of lower-income Toronto families, 9195*a*.
vitamin efficacy of balanced, effect of adsorbent C on, 1846*a*.
vitamins B in tissues of pregnant rats fed satisfactory and unsatisfactory, 1089*d*.
xanthine oxidase of liver and, 3900*f*, 8469*h*.
yeast-contg., effect on tumor development by 2-acetylaminofluorene, 306*g*.
yeast (dried) in Army, retention of palatability and nutritive stability in, 9275*i*.
**Dietetics**, books: Hutchinson's Food and Principles of, 4396*f*; Rose's Lab. Handbook for, 8029*c*.
journal: Anales de bromatologia, 3539*i*.
milk in, and effect of preserving processes on its nutritive value, 6748*i*.
**Diethanolamine**. See *Ethanol, 2,2'-iminodi-*.
**3,10,5,8-Diethenodicyclobut[*b,i*]anthra-**

*3,10,5,8—[b,i]*

**3,10,5,8-Diethenodicyclobut[*b,i*]anthracene-4,9-dione, 2a,3,3a,4a,5,5a,-7a,8,8a,9a,10,10a-dodecahydro-**, 6198*d*.
**Diethylamine**, adsorption by activated C, 6037*e*.
adsorption by α-bromopalmitic acid monolayers, 8797*a*.
compd. with *p*-aminobenzenephosphonic acid, 1737*i*.
with coumarin derivs., 5399*f*.
with 3,5-diiodo-4-oxo-1(4*H*)-pyridineacetic acid, pharmacology of, 762*b*.
with 3-hydroxy-2,2'-methylenebis(1,4-naphthoquinone, 1385*a*.
with 2-mercapto-5,5-dimethyl-4(5*H*)-imidazolethione, 6171*e*.
with salicylic acid, effect of cation on permeability of animal skin and cells to, 3520*b*.
with salicylic acid, effect of cation on permeability of plant cells and skin to, 3495*f*.

*compd.* with α-tocopherol phosphate, P 4702*e*.
effect on blood vessels of frog prepns., 5493*b*.
formation of, from hydrolysis of $Et_3NO$-$SO_3$, 2574*h*.
identification of, 4630*c*.
lithium deriv., reaction with *p*-bromoanisole, 1348*b*.
lubricant from stearic acid, org. sulfonate and, P 9431*i*.
lyoparachor of, 2834*a*.
phys. constants of, 2956*g*.
reaction with 2-azetidinone, 8357*d*.
with 2-bromothianaphthene 1,1-dioxide, 8379*h*.
with α,α-dimethylsuccinyl chloride, P 6227*b*.
with isopropenylmethylmalonyl chloride, P 6226*g*.
with propylene oxide, kinetics of, 926*e*.
with $SiCl_4$ and with $SiS_2$, 4632*c*.
selenium (glassy) metallization in, 459*e*.
sepn. from its mixts. with triethylamine, P 3837*b*.
**Diethylamine, *N*-allyl-**. See *Allylamine, N, N-diethyl-*.

of gramicidin, gramicidin S and tyrocidine, 6043*c*.
by heat—see "thermal" below.
of heat—see *Heat*.
of helium, H and O through Al tubes, 6021*e*.
hydrocarbons (straight-chain) through rubber diaphragm to sep. from branched-chain hydrocarbons, P 7223*d*.
of hydrogen, in Fe, brittleness and, 7395*g*.
in Fe during annealing, 1701*c*.
in liquid Fe and Fe alloys with Cb, Ta and Ti, 2490*c*.
into metals, effect of metallic and org. films on, 6139*i*.
through Pt film, 4913*i*.
in steel, 2559*i*.
of hydrogen ion and O at Cu cathodes, 6052*a*.
of hydrogen peroxide vapor into air, 2056*i*.
in hydrogen removal, from reversible gas reactions, P 5031*c*.
of India ink in tissue in alloxan diabetes, effect of hyaluronidase on, 5483*d*.
interstitial, in metals, 7879*d*.
ionic, in sepn. of radioactive rare earths, 8295*e*.
in iron alloys, 3334*b*.
of iron(III) chloride solns. in photogravure, 5684*a*.
of iron(II) oxide in acid open-hearth process, 8327*e*.
in iron-Si alloys, 9001*b*.
in iron-Si compacts, 2562*d*.
of lead and Ag on galena, 6483*gh*.
of lead in radioactive minerals, 7379*h*.
in Liesegang-ring formation—see *Liesegang rings*.
measurement of, of antiseptics from ointment bases, 8093*e*.
app. for, 3*e*, 5655*a*.
in aq. solns., cell for, 21*h*.
in colored solns., app. for, 3667*g*.
in liquids in ultracentrifuge, 4537*g*.
in liquids with radioactive tracers, 2490*h*.
in metals, 2541*a*.
in soln., 3692*g*.
in media with variable properties and effect of variable diffusion coeff. on rates of absorption and desorption, 8789*f*.
metal-powder alloying by, 982*f*.
in metals, effect of plastic deformation on, 7394*e*.
of metaphosphates, 2070*d*.
mol.-wt. detn. by, for polymers, 2071*f*.
of nitrogen and O into Zr, 8910*g*.
in ore (replacement) deposit formation, 8322*b*.
of org. substances into tissue water of fish, 4387*f*.
of organophilic compds. through membranes in sepn. of colloidal and hydrophilic substances, 4077*e*.
of oxygen and its soly. in $H_2O$, 8823*h*.
of oxygen through Ag on Ag coated Cu wire, 5267*g*.
of palmitic acid in polar solvents, 5259*e*.
of penicillin, 4714*c*.
of plasticizers in polymers, 6460*i*.
of polonium amalgam into Hg, 7791*b*.
in porous catalysts, 7313*i*.
through porous membranes, 7778*d*.
of potassium chloride, in aq. solns., 4930*b*.
through membranes of $Cu_2Fe(CN)_6$, 5257*a*.
in $H_2O$, 7300*d*.
potential between concd. and dil. solns. contg. KCl plus $KNO_3$, 7789*g*.
potentials in nonisothermal electrolytic systems, 6492*h*.
of precipitates in metals, effect of elec. current on, 6056*a*.
in precipitation study, 7296*h*.
of protons in Fe, 7304*i*.
pumps—see *Pumps*.
radial, in gravitational field, 74*i*.
rate relations in, 9211*i*.
reaction rates controlled by, 7796*b*.
reactions at surface, theory of, 3694*d*.
reactions controlled by, reduction of Fe oxides as, 4932*f*.
reactor design and, 3247*i*.
in retardation of tangential movements of the surface of Hg drops by BuOH, 8911*g*.
rotatory, of flexible mols., 7781*d*.
in rubber, 8722*h*.
of salicylates in Salipec into skin, etc., 3562*h*.
sedimentation-, detn. of mol. wt. of polystyrene by, 4077*a*.
self-, in metals, 4917*b*.
in sintering metallic particles, 2557*d*.
of Na in NaCl, 4067*a*.
of silver into Cu, effect of Sb on, 7393*h*.
in soils—see *Soils*.
in solids, 8784*i*.
of solutes, in agar-agar gels, 7788*c*.
in nonelectrolytes, particle size and, 7299*g*.
through semipermeable membranes, 2486*g*.
steel deoxidation by, 88*i*.
of sucrose in aq. soln., 7780*e*.
in sugar manuf.—see *Sugar manufacture*.
surface, in NaCl crystn. from vapor phase, 8787*g*.
theory of, 8226*d*.
"thermal," 1638*b*, 8805*i*.
in analysis of hydrocarbon oils, 8123*c*.
in aq. solns., 2490*i*.
in condensed phases, 8835*c*.
distn. in relation to, 8774*d*.
of electrolytes, 5265*h*.
error in studies of gas-metal equil. from, 4932*h*.
in gaseous and liquid systems, 2480*i*.
in H-hydrocarbon mixts., 7281*d*.
in isotope sepn.—see *Isotopes*; and the individual elements.
of para-H into ortho-H, 3253*b*.
pressure and temp. in relation to, 8224*e*.
review on, 4530*c*.
and thermal diffusion, calcn. of, for gases and gaseous mixts., 4531*b*.
thermoeffect, 4082*e*, 6875*g*.
thermoelec., 8806*a*.
of transmuting particles, velocity of waves from, 2860*f*.
turbulent, 2056*c*.
of two components in same soln., 8807*d*.
of uranium compds. in polarography, 8928*f*.
of water, in packaging, 3615*a*.
in plant cell, 1464*a*.
through textiles and absorbents, 3623*e*.
in wood, 3607*d*.
of water (sea) into *Daphnia magna*, 4392*e*.
in wool dyeing with acid dyes, 7688*e*.
of zinc in Al and Al alloys, 5346.

**Diffusion** (*of rays*). See *Compton effect; Raman effect; Rayleigh radiation;* and under *Electrons; Gamma-rays; Ions, gaseous; Light; Neutrons; Ultrasonic waves; X-rays*.

history of, 6477*h*.
in classical Greece, 6419*h*.
with direct, S and vat dyes, 5951*i*.
of hosiery, 7232*e*.
hydrogen-ion concn. control in, 411*a*.
with insol. dyes, 4015*c*.
iron action on dyes in, $Na_2H_2P_2O_7$ and phosphates in prevention of, 4856*g*.
of leather, 1204*g*, 6853*a*, 8184*i*, 8721*d*.
with acid or direct dyes, 7736*f*.
pretreatment with cationic agents for, 7733*g*.
with sulfonated dyes, capillary-active agents for improving, P 2008*f*.
of leather and wool, protein chemistry in, 6828*d*.
of leather (sheepskin) and wool, 7233*c*.
of leathers (suede), use of polymers preventing crocking in, P 9512*c*.
of leather with hair or fur in acid bath, P 5982*h*.
with leuco esters of vat dyes on wool, 3621*a*.
leuco vat dye acid ester mixts. with org. bases or salts and org. acid amides for, P 9473*d*.
leveling agents for, evaluation of, 3624*b*.
lauroylphenylbiguanide methylated and sulfonated derivs., P 2442*d*, P 4878*i*.
monocarboxy - acylated hydrazine deriv. reaction products with saccharides, P 9497*h*.
*N*-polyoxyalkylamine deriv., P 4499*de*.
stearoylphenylbiguanide methylated and sulfonated derivs., P 4879*bc*, P 5199*e*.
stearoylphenylbiguanide methylated and sulfonated guanamine deriv., P 5216*e*.
trimethyl sulfo Na salt of 6 heptadecyl-1,2,3,4 - tetrahydro - 2,4 - diimino-1-phenyl-*s*-triazine, P 3474*c*.
of linen yarns, 7232*g*.
mercerization in increasing color depth obtained in, 3622*a*.
of mercerized cotton hosiery with naphthol and vat fast colors, 3620*i*.
of methyl methacrylate polymers for dentures, P 7268*b*.
microscopy (chem.) in, 6420*b*.
mordant, P 3206*e*.
mordants for—see *Mordants*.
with Neolan Red REC on wool yarns in pink shades, 8141*e*.
nitrogen-contg. fiber pretreatment with amino compds. and acids and, with direct cotton dyes, P 868*d*.
of nylon, 6829*g*.
with acetate dyes and steaming after-treatment, P 7712*a*.
with acid dyes, P 9473*a*.
with chrome dyes, 1569*h*, 9454*i*.
with direct cotton dyes and improving nylon dye affinity with HCHO-cyanamide condensates, P 2442*h*.
yellow, P 6428*a*.
of nylon and nylon blend yarns, 7232*g*.
of nylon hosiery, 6419*g*.
of nylon hosiery in presence of tannic acid, P 8692*c*.
of nylon, rayon and silk and dyeing after-treatments for photochem. oxidation testing, P 1192*e*.
of nylon-rayon mixts. with 3-nitro-4-amino-2′-chlorobiphenyl in green-yellow shades, P 2442*g*.
of nylon-wool blends, 6827*h*.
of nylon-wool mixts. with acid and chrome dyes, 7689*b*.
of Orlon, rayons, Vicara and Vinyon N, 9454*f*.
padding, of cotton, 1191*c*.
padding, pickup of liquors in, 3623*g*.
with pigment colors, 7689*g*.
with pigment dispersion in rubber emulsions in urea resin or protein dispersions, P 1990*i*.
of plastics, 7688*h*.
with prechromed dyes, boiling-off, exhaustion and leveling in, 5594*i*.
printing—see *Textile printing*.
problems in, 5952*i*.
properties of alginate rayon, improvement of, P 7712*d*.
of cellulose acetates during deacetylation by $NH_3$, 6423*a*.
of cellulose, dicyanodiamide-HCHO condensation product for improving, P 7238*b*.
of cellulose, orientation and, 6830*a*.
properties of cellulose textiles, improvement by steaming during scouring, P 5200*d*.
of cellulose textiles, improvement with strong hydroxide and acrylonitrile, P 6428*f*.
of cellulose textiles or rayon, improvement with amino groups, P 3208*b*.
of cotton yarns and textiles, improvement by mercerization, 6423*g*.
of Orlon acrylic fiber, 7232*h*.
of polymers, chem. constitution and, 9455*c*.
of rayon, effect of water absorption and swelling on, 9457*i*.
of textiles, improvement with alkali zincate solns. of cellulose ethers, P 6428*g*.
of textiles, improvement with polymeric vinyl isocyanate compds., P 6428*d*.
of viscose rayon with high swelling, 3200*h*.
of wool, effect of cross-linkage formation on, 9457*g*.
protein hydrolyzates as amphoteric materials and protective colloids in, 9454*f*.
of rayon, 411*b*, P 4488*f*.
in cake or package forms, 6828*f*, 7232*d*.
control in, 7689*b*.
to detect thin-walled fibers, 7689*c*.
with direct and vat dyes, 3200*i*.
rate of, in classification of direct dyes, 7688*f*.
swelling capacity and, 9454*h*.
of rayon and silk in skein form, 4469*f*.
of rayon-contg. textiles for two sides in differing colors, P 8693*a*.
of rayon crepe with Algosol or Indigosol acid or vat dyes, P 3206*g*.
of rayon (Fibro), 5190*h*.
of rayon (Rhofil), 6420*a*.
resinous products for, 5995*i*.
review on, 3619*g*.
of sausage casings from regenerated cellulose, P 7605*c*.
of soybean protein sheet material, 4790*a*.
spectrophotometer in, 6827*d*, 8685*a*.
stable prepns for, P 4488*e*.
steam use, etc., in, 8685*c*.
with Sulfur Black, alk. aftertreatments of cotton yarns in decreasing tendering by, 3621*f*.
surface-active sulfonation products for use in, P 9498*f*.
temp. control in, 8140*h*.
of tubular and warp-knit textiles and blends, 5953*b*.
two-stage, 3619*h*.
with vat dyes, 1191*e*, 4856*i*, 3620*e*, 6827*ef*.
on alkali-sensitive fibers by acid reduction, P 414*h*.
by jig and pad-jig methods, 6827*g*.
uneven shade and other faults in, 6827*g*.
of unwoven fibers in running lengths, P 2784*e*.
of vinyl resins, P 1217*d*.
waste liquors from, analysis for NaCl and $Na_2SO_4$, 6419*e*.
dye adsorption from, and reuse of, P 8174*f*.
treatment of, 3621*b*.
wetting agents for—see *Wetting agents*.
of wood, P 6390*f*.
of wool, 6829*b*.
with acid and chrome dyes, exhaustion, leveling and rate of, 4015*g*.
with azo dyes, P 7698*d*.
chrome and vat processes for, 3200*f*.
with chrome dyes, effect of metals on, 5953*b*.
continuous process for acid, 8139*i*.
with disazo dyes, P 7701*g*.
effect of lubricants, scouring agents and emulsifying agents on, 2780*d*.
effect on passage of air, heat, moisture and ultraviolet light, 8141*h*.
effect on susceptibility to raising, 6828*i*.
pH values, rate and temp. of acid, 7687*i*.
with indigo dyes from $NH_4OH$-$Na_2S_2O_4$ vats, P 415*i*.
with level-dyeing acid dyes, 5593*i*.
temp. effect on, 6828*f*.
of wool roots and tips with chrome dyes in neutral Cr salt solns., 2776*i*.
of wool unions, dye decompn. during, and Na perborate and urea in its prevention, 851*k*.
of zinc and Zn alloys, P 7894*i*.
**Dyeing apparatus.** (See also *Textile printing*.) 3619*g*.
for continuous dyeing, 8140*g*, 8685*b*.
for high-temp. use, 411*c*.
for hosiery, 7232*e*.
for insol. dyes, 4015*c*.
pad, 6827*f*.
for rayon in cake form, 7232*d*.
with steam-condensing means of producing vacuum, P 9472*fh*.
for testing dyes, 2776*h*.
for unwoven fibers in running lengths, P 2784*g*.
for vat dyeing of wool, 3200*g*.
**Dye intermediates.** See *Intermediates*.
**Dyes.** (*The entries under this heading are classified on the basis of chemical constitution, the dyeing method, kind of material dyed and color in this order. See also* Acridine Orange; Acridine Red; Acriflavine; Alizarin; Alizarin Red S; Amaranth; Auramine; Auxochromes; Benzopurpurin; Bismark Brown; Brilliant cresyl blue; Brilliant green; Bromocresol purple; Bromophenol blue; Bromothymol blue; Butter yellow; Caledon; Capri blue; Chlorazol Fast Pink; Chromophores; Chrysoidine; Cochineal; Color(s); Congo red; Congo violet; Cresyl violet; Crystal violet; Cyanines; Cyanol; Dyeing; Eosin; Erythrosin; Evans Blue; Flavone; Fluorescein; Fuchsin; Fuchsone; Gentian violet; Indicators; Indigo; Indigosols; Intermediates; Janus Blue; Janus Green; Janus Purple; Kamala; Lakes; Malachite green; Methylene blue; Methyl green; Methyl orange; Methyl red; Methyl violet; Naphthol Green; Naphthol Yellow S; Neutral red; Nile blue; Orange I; Orange G; Orange OT; Phenolsulfonephthalein; Phenosafranine; Phthalocyanines; Pigments; Pomiferin; Rhodamines; Rhodulin; Rose Bengal; Rubrophen; Safranine; Stains; Thionine; Titan Yellow; Toluidine blue; Toluidine red; Toluylene blue; Uranin; and "sodium salt" under Alizarinsulfonic acid.)
absorption and binding of anionic and cationic, by fibrins, effect of dye and salt concns. and pH on, 411*f*.
acenaphthenethianaphtheneindigo, vat, 4855*e*.
from acetamide, triethylenetetramine and HCHO, cotton, brown, P 1574*b*.
Acid Green LX, for making moisture-sensitive paper, P 1188*h*.
acid, level-dyeing, 5593*h*.
acid, reaction with wool, 7687*h*.
acridine (amino-) and diaminoacridine, color, fastness and dyeing properties of, 1189*i*.
from acridines, basic and vat, 7028*g*.
adsorption of acid and chrome, by wool, 4015*e*.
adsorption of anions of, by Ag halides, 4536*h*.
adsorption of, by clays, 2070*b*.
colloidal $Al_2O_3$ for, P 4820*i*.
by leaves, 1464*h*.
in presence of salts, 1624*i*.
adsorption of ions of, by $PbSO_4$ and AgBr, effect of excess ions on, 8790*g*.
in agar-agar gels during syneresis, 8793*e*.
Alizurol Purple SS, spectrophotometric detn. of, 7367*d*.
from *Amaranthus*, food, P 6371*f*.
amidinium vinylogs, 3359*f*.
amino acid reduction by coal-tar, 7136*a*.
aminoazo, intracellular compn. of liver after feeding, 7123*c*.
aminoazo protein-bound, formed from 4-dimethylaminoazobenzene and its monomethyl derivs., 8048*a*.
aminoazo, sulfonated, P 3203*f*.
aminoazo, sulfonated, wool, red, P 858*b*.
aminoazo, 1,2,4,2 *H*-thiadiazine-3,5(4 *H*,-6 *H*)-dione, nylon and rayon, yellow, P 4868*e*.
aminoazo, wool, green, for chrome dyeing, P 1988*bcd*.
4 - amino - 1,8 - naphthalimidedisulfonic acids, wool, yellow, fluorescent, P 7710*f*.
aminopolyazo, leather, brown, P 891*b*, 892*ab*.
aminotrisazo, sulfonated, leather, gray to green-black, P 428*h*.
in analysis (inorg. qual.), 6106*c*.

analysis of, hydrophilic solvents in, 1569*f*.
analysis of mixts. in soln., Beer's law and, 469*d*.
Anchusa red, from *Anchusa tinctorium* roots, 4596*h*.
Aniline Orange, chromatographic sepn. from malachite green, 8777*a*.
anthradiisothiazole, vat, olive, P 5601*d*.
anthrapyridazone, sulfonated, wool, orange to orange-red, P 8165*f*.
1,9 - anthrapyridone anthraquinone chrysene, vat, cotton, brown, P 7711*i*.
1,9-anthrapyridone, cellulose derivs., red and red-violet, resistant to acid fading and light, P 8165*a*.
anthrapyrimidine anthraquinone chrysene, vat, cotton, red-brown, P 7711*h*.
anthrapyrimidine fluoranthene, vat, P 5966*d*.
anthraquinone, P 1808*f*, P 1986*e*, P 8163*d*, P 9468*a*.
anthraquinone, acid, nylon, silk and wool, P 3205*f*.
anthraquinone acyl amino derivs., sulfonamide, vat, fast to bucking, Cl and washing, P 863*b*.
anthraquinone acyl amino derivs., vat, cotton, linen, rayon or regenerated cellulose, P 7705*g*.
anthraquinone 2-amino-1,2,3,4-tetrahydronaphthalene, sulfonated, animal fibers, blue to green, P 860*f*.
anthraquinone and Quinoline Yellow base, green smoke-producing compn from, P 8684*b*.
anthraquinone and related, contg. quaternary ammonium groups, P 8164*a*.
anthraquinone and related, sulfonium salt-contg., P 8164*a*.
anthraquinone, animal fibers, blue, P 5197*bfghi*, P 5198*a*.
anthraquinone aroylamino derivs., sulfonated, vat, P 802*g*.
anthraquinonebenzacridone benzanthrone, vat, cotton or regenerated cellulose, olive-gray, P 6427*c*.
anthraquinonebenzacridone fluoranthrene, vat, P 5966*d*.
anthraquinonebenzacridone, sulfonated, vat, cotton, blue or violet, P 7706*b*.
anthraquinonebenzbenzacridone, vat, P 8170*bd*.
anthraquinone benzacridone, vat, cotton, blue-red, P 1986*h*.
anthraquinone benzanthreneacridine, vat, cellulose fibers, gray, fast to light, peroxide and washing, P 7706*f*.
anthraquinone benzanthronedicarboxylic acid, vat, cotton or regenerated cellulose, yellow and green-yellow, P 6426*i*, P 6427*a*.
anthraquinonebenzanthrone, vat, P 8170*e*.
anthraquinone benzanthrone, vat, cotton and rayon, blue-violet, P 8170*i*.
anthraquinone benzanthrone, vat, cotton, olive-green, P 7236*a*.
anthraquinone 1,4-bis(2-hydroxyethylamino) derivs., bis(hydrogen sulfate), silk and wool, blue, P 4483*i*.
anthraquinone, blue, P 9467*e*.
anthraquinone, blue smoke-producing compns. from, P 8684*a*.
anthraquinone 2-*tert*-butyl derivs., 8139*g*.
anthraquinone, by acylating sulfonated 4-(*p*-phenylazoanilino)anthraquinones, wool, brown, fast to light and washing, P 3626*h*.
anthraquinone carbalkoxy amino sulfonamides, nylon and wool, blue, P 7709*k*.
anthraquinone carboxyphenyl amino sulfonamides, P 7709*i*.
anthraquinone - chrysene condensation product, acid, wool, P 7711*e*.
anthraquinone-chrysene condensation products, vat, cotton, P 7711*dfghi*.
anthraquinone, contg. trifluoromethyl group, P 7709*e*.
anthraquinone, Cu-contg., 6419*c*
anthraquinone, cotton, blue, P 9467*d*.
2,3-anthraquinonedicarbonitrile derivs., rayon, resistant to gas fading, P 8164*h*.
anthraquinonedisulfonic acid, animal fibers, linen and nylon, blue, fast to light and washing, P 4482*h*.
anthraquinone fluoranthene, vat, P 5966*cde*.
anthraquinone halogenated alkylphenylamino derivs., P 3205*a*.
anthraquinone halogenated amino derivs., sulfonated, Cu-contg., animal fibers, blue, P 7703*f*.
anthraquinone halogenated anilino derivs., red-blue, P 5197*a*.
anthraquinone indanthrene, vat, cotton or regenerated cellulose, blue-green, P 6427*d*.
anthraquinone, nylon and rayon, blue and blue-green, P 4483*b*.
anthraquinone oxadiazole, vat, red, P 4484*a*.
anthraquinoneoxazole naphthacridinetrione, vat, cotton, yellow-olive-green, P 7705*i*.
anthraquinone, *p*-phenylazoanilino derivs., sulfonated, wool, fast to light and wet treatments, P 8164*b*.
anthraquinone 1-(4-phenylsulfonylbenzamido)-4-benzamido deriv., vat, cotton, red, P 7706*d*.
anthraquinone, phthalic acid deriv., rayon, blue, P 4020*g*.
anthraquinone, rayon, blue, P 1986*f*, P 4483*h*.
anthraquinone, rayon, blue or blue-violet, fast to acid fading and light, P 9468*a*
anthraquinone, rayon, fast to gas fading and light, P 3205*b*.
anthraquinone, rayon, navy blue, P 6421*j*.
anthraquinone, rayon, violet, P 6832*e*.
anthraquinone, silk and wool, blue, P 9467*c*.
anthraquinone stilbene, sulfonated, nylon and wool, P 9467*f*.
anthraquinone, sulfonated, blue, P 8163*b*, P 9468*d*.
anthraquinone, sulfonated, cellulose acetates, blue and blue-violet, P 2783*i*, P 2784*ab*.
anthraquinone, sulfonated, cellulose acetates, red-violet and rose, P 2783*ghi*
anthraquinone, sulfonated, cellulose derivs., red-blue, resistant to acid fading, P 8162*i*.
anthraquinone, sulfonated, Cl-contg., silk and wool, green-blue, P 2782*i*, P 2783*cdefg*.
anthraquinone, sulfonated, Cu-contg., animal fibers, green-blue, fast to light and tanning, P 7703*c*.
anthraquinone, sulfonated, cotton, violet, P 4483*g*.
anthraquinone, sulfonated, halogen-contg., nylon and wool, blue, P 8164*d*.
anthraquinone, sulfonated, silk, wool, etc., red-blue, P 4867*f*
anthraquinone, sulfonated, wool, P 7704*a*.
anthraquinone, sulfonated, wool, blue, P 4183*f*, P 4867*eg*.
anthraquinone, sulfonated, wool, red violet, fast to light and wet treatments, P 8690*g*.
anthraquinone-2-sulfonic acid 1-amino-4-anilino derivs., 6193*g*.
anthraquinone, S-contg., rayon, P 4483*i*.
anthraquinone 1,2,3,7-tetrahydroxy-6-methyl deriv., wool, 210*d*.
anthraquinone thianaphthene, vat, cotton, pink, P 5967*a*.
anthraquinone thianthrene, vat, P 5966*g*.
anthraquinone thiazole, vat, reducing particle size and increasing uniformity of, P 3626*e*.
anthraquinone triazine, vat, cotton, blue-red, P 1575*e*.
anthraquinone triazine, yellow-green, P 9468*a*.
anthraquinone, vat, cotton, blue-red, P 5601*c*.
anthraquinone, vat, cotton, brown, P 5602*a*, P 7712*a*.
anthraquinone, vat, cotton, orange, P 4484*c*.
anthraquinone, vat, cotton, rayon and silk, Bordeaux, fast to alkali, Cl, light and wet treatments, P 1576*a*.
anthraquinone, vat, cotton, red and brown-red, P 5966*eg*.
anthraquinone, vat, cotton, scarlet-red, P 4484*e*.
anthraquinone, vat, cotton, yellow, P 4484*bdefgh*, P 8691*ef*.
anthraquinone, vat, prepn. by alkali fusion, 5189*g*.
anthraquinone, vat, solvation and stability to flocculation by electrolytes and relation to migration, 7232*c*.
anthraquinone, wool, blue, 1761*a*, P 7235*h*.
anthrathiazole benzanthrone, vat, cotton and regenerated cellulose, brown-orange, P 6427*c*.
anthrathiazole fluoranthene, vat, P 5966*d*.
anthrimidazole fluoranthene, vat, P 5966*d*.
anthrimidecarbazole, P 7704*g*.
anthrimidecarbazoleacridone, vat, cotton, olive, fast to Cl and light, P 9469*a*.
anthrimidecarbazole, cotton, brown, P 9468*g*.
anthrimidecarbazole, sulfonated, vat, P 8171*b*.
anthrimidecarbazolethiaxanthone, vat, vegetable fibers, orange to red-brown, fast to Cl and light, P 9468*h*.
anthrimidecarbazole, vat, vegetable fibers, violet-brown, P 7705*a*.
anthrimide, chlorosulfonated or sulfonated vat, cotton, gold-yellow, P 7708*b*.
azamethine, yellow to orange, P 8166*c*.
azo, 2611*i*, P 2634*h*, 4788*i*, P 8154*d*.
azo alkenyloxyaminodiphenylamine, ice color, cotton, P 856*d*.
azo, 6-alkoxy-2-naphthol, sulfonated, metallized, gray, olive and olive-green, fast to light, milling and potting, P 7698*a*.
azo, aminonaphthalenesulfonic acid, wool, red, P 5194*g*.
azo, 3-amino-2-naphthoic acid, sulfonated, wool, yellow-red, P 1987*g*.
azo, 3-amino-2-naphthoic acid, sulfonated, Cr-contg., wool, yellow-green, P 8690*i*, P 8691*c*.
azo, aminonaphtholsulfonic acid, cotton, red-brown, fast to light and washing, P 7235*f*.
azo, aminonaphtholsulfonic acid, wool, red, P 2440*cdefgh*.
azo, (2-amino-1-naphthylazo)phenolsulfonic acids, Cr-contg., wool, yellow green, P 8155*f*.
azo, analysis of, 6948*a*.
azo and azo stilbene, sulfonated, cotton, P 7694*j*.
azo and Ciba Blue 2B, improving color properties of blue, P 7712*g*.
azo and vat, lecture demonstrations on, 8762*d*.
azo, 4-(arylazo)-3-hydroxy-2-naphthanilides, cellulose and ink, fast to ultra violet light, nonbleeding, P 8155*f*
azo, 2-(arylazo) 1-(4 morpholinyl)-2 nitro propane, P 8154*a*
azoarylguanide derivs., P 7710*h*
azo, barbituric acid sulfonated, wool, green-blue, P 7697*f*.
azo, benzimidazole pyrazolone, cotton, orange, P 5194*f*.
azo, benzimidazole, sulfonated, wool, fast to ultraviolet light, P 9460*a*
azo, 1,3-benzodioxan, nylon and rayons, yellow to red-orange, fast to sea water and washing, P 8149*a*.
azo, benzodioxan, rayon, yellow, solvent sol., P 5194*ab*, P 7697*c*.
azo, *N*-benzodioxan-6-yl-3-hydroxy-2-naphthamide, P 8151*h*.
azo, *N*-benzodioxan-6-yl-3 hydroxy-2-naphthamide, lacquers, varnishes, etc., fast to light and washing, P 8152*a*.
azo, 1*H*-benzotriazole or naphthotriazole, cellulose esters, nylon, silk and wool, P 3625*d*.
azo, biphenyl, nylon and rayon, yellow and orange, P 5597*g*.
azo, *N*, *N* - bis(hydroxyethyl)aniline, rayon, orange, P 7696*f*, P 8689*i*.
azo, *N*, *N* - bis(hydroxyethyl)aniline, rayon, scarlet, P 4019*h*.
azo, *N*, *N*-bis(hydroxyethyl)-*m*-toluidine rayon, P 4020*a*, P 4474*ac*.
azo, *N*, *N*-bis(hydroxyethyl)-*m* toluidine, rayon, violet, P 7697*g*
azo, 4,4′-bis(3-methyl-5-oxo-2-pyrazolinyl)biphenyl - 2,2′ - disulfonic acid-derived, wool, yellow, P 1987*d*
azo, bisulfite derivs. of 1-nitrosonaphthol and of *p*-quinones in making, 2437*h*
azo, 4-butyl-1-naphthol, wool, P 4865*m*
azo, carcinogenesis from, blood-serum proteins in, 4370*c*.
azo, cellulose esters, nylon and vinyl polymers, orange, P 9461*i*.
azo, 4-chloro-6-amino-1-phenyl-2 sulfonic acid—8-amino-1-naphthol 4-sulfonic acid, Cu-contg., wool, yellow, P 2441*d*.
azo, 4-chloro-(or 3,4-dichloro)-5-nitro-2-aminophenol-6-sulfonic acid—5,8-dichloro-1-naphthol, wool, blue and blue-green, fast to light and water, P 2440*h*.
azo, color reactions with adsorbents, 8035*f*.
azo, color reactions with metal ions, 5066.

azo, constitution and indicator properties of, 3309*a*.
azo, 2,2 - dialkyl - 3,4 - dihydroxytetrahydroquinoline nucleus-contg., nylon, etc., P 8624*a*.
azo, diaminobenzenesulfonamide, wool, red-brown, P 6832*g*.
azo, 1-dibutylamino-2-nitrobutane, rayon, silk and wool, orange-yellow, P 8153*i*.
azo, dinitrobenzene, cellulose esters and ethers, nylon and varnishes, P 9462*e*.
azo, dustproofing with dialkyl carbonates, P 9474*a*.
azo, effect on cockroach, 8089*c*.
azo, effect on cotton destruction by sunlight and atm., 3622*f*.
azo, ethyl(hydroxyethyl)aniline—chlorosulfoacetic acid—nitroaniline, P 4019*e*.
azo, 4-ethyl-1-naphthol, wool, blue, P 4866*ab*.
azo, from 5-amino-1-naphthol and its derivs., potentiometric titration and structure of, 4467*h*.
azo, from aromatic amino acids and 1-(2-biphenylyl)-3-methyl-5-pyrazolone and its $SO_3H$ deriv., P 2238*g*.
azo, from diketones, 5778*f*.
azo, from 2-pyrrolesulfonic acid, 7016*b*.
azo, from sulfa drugs, 9047*g*.
Azogrenadin S, diffusion in agar-agar gels, 7788*d*.
azo, having hydroxy groups ortho to azo group, Cu-contg, 6418*i*.
azo, 7-hydroxy-1-naphthalenecarbamic acid, sulfonated, wool, blue and green, P 5960*hi*, P 5961*ab*.
azo, 4-hydroxy-1-naphthyl phenyl ketone, Cr-contg., lacquers, red-blue, P 7697*i*.
azo, maleamide, rayon, yellow, P 4474*c*, P 4475*ef*.
azo, manuf. by electrolysis, 4961*d*.
azo, metal-contg, P 9460*e*
azomethine, from acylacetamidobenzaldehyde acetals, P 8161*h*
azo, 2-*N*-methylanilinoethanol, rayon, scarlet, P 7697*h*.
azo, *N*-methylanilinoethyl $NH_4$ succinate, rayon, yellow, P 4471*f*.
azo, *N*-methylanilinoethyl chlorosulfoacetate, P 4475*a*.
azo, *N*-methylanilinoethyl chlorosulfoacetate, rayon, orange, P 4471*fg*
azo, morpholine salts, P 3300*gi*.
azo, morpholinylarylides of o hydroxy acids, orange to blue and brown, P 8162*d*.
azo, naphthalene, halogen-contg., hydrocarbon-sol., orange to brown, P 7712*e*
azo, naphthalenesulfonic acid, silk and wool, blue, P 7696*a*.
azo, naphtholdisulfonic acid, Cr-contg., wool, navy blue, P 5600*g*.
azo, 2-naphthol-6,8-disulfonic acid, cotton, orange, P 5960*a*.
azo, naphtholdisulfonic acid, wool, blue, P 5597*e*.
azo, 1-naphthol-4-sulfonamide wool, red-violet, fast to light and moisture, for chrome dyeing, 1987*b*.
azo, 2-naphthol-6-sulfonanilide, wool, orange or red, fast to fulling, light and potting, for chrome baths, P 1987*a*.
azo, naphtholsulfonic acid, cellulose and wool, brown, fast to Cl and washing, P 4475*gi*.
azo, naphtholsulfonic acid, Cr-contg., formic acid bath, wool, green-blue, P 6427*i*.
azo, 1-naphthol-8-sulfonic acid, Cr-contg., formic acid bath, wool, wine red, P 4805*g*.
azo, naphtholsulfonic acid, Cr-contg., wool, blue, P 4482*d*.
azo, naphtholsulfonic acid, Cr-contg., wool, blue-olive-green, P 4482*e*.
azo, naphtholsulfonic acid, Cr-contg., wool, gray, P 4482*d*.
azo, naphtholsulfonic acid, Cr-contg., wool, violet, fast to water, P 4482*c*.
azo, naphtholsulfonic acid, Cu-contg., cotton, black-brown, P 7697*b*.
azo, naphtholsulfonic acid, Cu-contg., cotton, red-violet, P 5597*g*.
azo, naphtholsulfonic acid, cotton, violet-black, P 4473*c*.
azo, naphtholsulfonic acid, green-blue, P 4473*c*.
azo, naphtholsulfonic acid pyrazolone, cellulose, brown-orange, P 5194*h*.
azo, naphtholsulfonic acid salicylic acid, cellulose and rayon, brown, P 5597*f*.
azo, naphtholsulfonic acid salicylic acid, cotton, orange-brown, fast to light and washing, P 4474*d*.
azo, 2-naphthol-6-sulfonic acid, wool, blue-green, P 1987*g*.
azo, 2-naphthol-4-sulfonic acid, wool, claret red, P 4864*a*.
azo, naphtholsulfonic acid, wool, dark brown, fast to fulling, light and potting, P 5959*i*.
azo, 1-naphthol-8-sulfonic acid, wool, green, violet and blue to gray, P 8148*a*.
azo, naphtholsulfonic acid, wool, olive-green, for chrome dyeing, P 1987*def*.
azo, naphtholsulfonic acid, wool, red-brown, P 6832*f*.
azo, naphtholsulfonic and phenolsulfonic acid, metal-contg., mordant, wool, blue-gray, blue and olive, P 7695*c*, P 9459*e*.
azo, naphthotriazole stilbene, sulfonated, Cu-contg., brown, P 5964*g*, P 5965*bcd*
azo, naphthotriazole stilbene, sulfonated, Cu-contg., olive, P 5965*c*.
azo, *N*-1-naphthylphthalamic acid derivs., sulfonated, Cr-contg., wool, P 8155*h*.
azo, nylon and rayon, P 7697*i*, P 8155*a*.
azo, nylon and rayons, fast to Cl, light, over-dyeing, S and washing, P 8144*i*.
azo, phenolsulfonic acid, Cr-contg., wool, olive-brown, P 4488*bc*.
azo, phenolsulfonic acid, wool, blue-red, P 6425*b*.
azo, phenolsulfonic acid, wool, violet-blue, P 7697*e*.
azo, phthalamide, rayon, yellow, P 4475*ce*.
azo, pyrazolone, 4272*c*, P 8149*d*.
azo, pyrazolone, acid, wool, yellow, fast to fulling, seawater and washing, P 6424*i*.
azo, pyrazolone, Cr-contg., resins, orange, P 1987*h*.
azo, pyrazolone, Cr-contg., wool, orange, P 4482*e*.
azo, pyrazolone, Cu-contg., for khaki pigment dyeing, P 7698*e*.
azo, pyrazolone, cotton, red, fast to washing, P 7697*d*.
azo, pyrazolone, halogen-contg., wool, yellow to orange, fast to fulling, light, sea water and washing, P 8149*g*.
azo, pyrazolone, maleic esters, sulfonated, rayon, yellow, P 8153*c*.
azo, pyrazolone, rayon, scarlet-red, P 7235*c*.
azo, pyrazolone, rubber and synthetic resins, yellow-red, P 7746*d*.
azo, pyrazolone, succinic esters, sulfonated, rayon, yellow, P 8153*b*.
azo, pyrazolone, sulfonated, Cr-contg., Aralac, leather, nylon and wool, P 8150*g*.
azo, pyrazolone, sulfonated, Cr-contg., wool, yellow-red, fast to light and washing, P 9461*c*.
azo, pyrazolone, sulfonated, Cu-contg., cellulose, P 9461*d*.
azo, pyrazolone, sulfonated, Cu-contg., cotton, red, P 7696*e*.
azo, pyrazolone, sulfonated, orange and yellow or yellow-brown, P 857*e*.
azo, pyrazolone, sulfonated, rayon, yellow, P 7235*b*, P 8146*c*, P 8153*d*.
azo, pyrazolone, sulfonated, vegetable fibers, green, P 3624*hi*.
azo, pyrazolone, sulfonated, wool, P 7698*d*.
azo, pyrazolone, sulfonated, wool, yellow, P 4020*f*, P 5961*b*, P 8689*h*.
azo, pyrazolone, sulfonated, wool, yellow, fast to light and perspiration, P 5600*h*.
azo, pyrazolone, vegetable fibers, red, P 5198*fg*.
azo, pyrazolone, vegetable fibers, violet-brown, P 5198*ef*.
azo, pyrazolone, wool, orange, P 4475*b*.
azo, pyrazolone, wool, yellow, P 4867*ghi*.
azo, pyridobenzoxazine, P 2781*e*.
azo, rayon, fluorescent, P 1986*c*.
azo, rayon, orange or red, dispersed in gas black dispersions, P 415*s*.
azo, rayon, yellow, P 8689*e*.
azo, reaction with antibodies, 3516*g*.
azo, salicylic acid, cellulose and leather, brown, P 4864*cd*.
azo, salicylic acid, sulfonated, cellulose, red-brown, fast to Cl, light, soap and soda, P 5597*a*.
azo, salicylic acid, wool, Bordeaux, P 4471*g*.
azo, stilbenedisulfonic acid, cellulose, Bordeaux, P 8144*c*.
azo, stilbenedisulfonic acid, cellulose, bronze, P 5194*c*.
azo, stilbenedisulfonic acid, cellulose, red, P 4863*e*.
azo, stilbenedisulfonic acid, cellulose, yellow, P 4863*ghi*, P 4864*a*.
azo, stilbenedisulfonic acid, Cu-contg., cellulose, brown, P 4485*efghi*, P 5198*cde*, P 8143*h*, P 8144*abcde*, P 8151*a*.
azo, stilbenedisulfonic acid, Cu-contg., cellulose, gray, P 4485*g*, P 5198*c*.
azo, stilbenedisulfonic acid, Cu-contg., cotton and rayon, yellow-orange, fast to light and washing, P 2784*c*.
azo, stilbenedisulfonic acid, Cu-contg., cotton, brown, P 1988*f*, P 4485*c*, P 4486*gh*, P 7235*g*.
azo, stilbenedisulfonic acid, Cu-contg., cotton, brown-red, P 4486*g*.
azo, stilbenedisulfonic acid, Cu-contg., cotton, golden-yellow, P 4486*h*.
azo, stilbenedisulfonic acid, Cu-contg., Glauber salt bath, cotton, red-orange, P 4486*ef*.
azo, stilbenedisulfonic acid, Glauber salt bath, cotton, orange, P 4486*i*.
azo, stilbenedisulfonic acid naphthotriazole, cellulose, olive, P 4474*g*.
azo, stilbenedisulfonic acid pyrazolone, cellulose, orange-yellow, P 4864*e*, P 5959*c*.
azo, stilbenedisulfonic acid pyrazolone, Cu-contg., cotton and rayon, yellow, P 4865*cfg*.
azo, stilbenedisulfonic acid pyrazolone, cotton and rayon, yellow, fast to light and washing, P 4473*d*.
azo, stilbenedisulfonic acid pyrazolone, cotton, brown, P 4472*ghi*.
azo, stilbenedisulfonic acid pyrazolone, cotton, yellow, P 4472*df*.
azo, stilbenedisulfonic acid triazine, cellulose and regenerated cellulose, yellow, P 7235*d*.
azo, stilbenedisulfonic acid pyrazolone triazine, cellulose, yellow, P 5194*d*.
azo, stilbenedisulfonic acid triazine, cellulose, orange, P 5198*a*.
azo, stilbenedisulfonic acid triazine, cotton, yellow, P 4472*fg*.
azo, succinamide, rayon, yellow, P 4475*g*.
azo, sulfamyl-1-naphthol-8-sulfonic acid, Cr-contg., wool, wine red and green-gray, P 5600*efg*.
azo, sulfanilamide derivs., therapeutic activity of, 3097*c*.
azo, 8-(*m*-sulfobenzamido)-2-naphthol, wool, red-violet, P 5597*i*.
azo, sulfonated, P 5199*b*.
azo, sulfonated, cellulose, P 8145*f*, P 8146*c*.
azo, sulfonated, Cr-contg., wool, blue-green, fast to light and wet treatments, P 8146*f*.
azo, sulfonated, cotton, yellow, fast to washing, P 9459*eghi*, P 9460*a*.
azo, sulfonated, rayon, blue, P 9495*b*.
azo, sulfonated, rayon, red-brown, P 9459*d*.
azo, sulfonated, rayon, scarlet red, P 9459*d*.
azo, sulfonated, rayon, violet, P 9458*f* P 9459*c*.
azo, sulfonated, rayon, yellow, P 8146*b*.
azo, sulfonated, wool, blue-red, P 9458*ghi*, P 9459*a*.
azo, sulfonated, wool, fast to milling, perspiration, potting and washing, P 8147*c*.
azo, sulfonated, wool, orange to brown, P 5960*f*.
azo, sulfonated, wool, red-violet, P 5960*d*, P 9459*ab*.
azo, sulfonium salts, cotton, yellow, fast to light, soda ash, soda boiling and washing, P 8146*h*.
azo, tetrahydroacenaphthenol derivs., red-brown, 4250*g*.
azo, 3-thianaphthenol derivs., 6204*f*.
Azotol, saving caustic in soln of, 3624*b*
azo, *o*-toluidinomethanesulfonic acid, rayon, yellow, P 8689*g*.
azo, triazine, cotton, orange-brown, fast to light and washing, P 4472*a*.
azo, triazine, naphtholsulfonic acid, Cu-contg., cellulose, fast to light and wet treatments, P 7699*a*, P 8161*h*.
azo, triazine, rayon, regenerated cellulose and vegetable fibers, green, P 4480*c*.
azo, triazine, vegetable fibers, blue-green, P 4479*i*.

azo, urea deriv., cotton, yellow, fast to washing, P 4487*g*, P 9459*ghi*.
azo, wool, for metachrome process, P 414*h*.
basic metachromatic, retardation of growth of transplantable carcinoma in mice fed, 1856*i*.
benzidine-peroxidase color inhibition by, 7521*c*.
benzimidazole, sulfonated, blue to violet, fluorescent, P 8173*i*.
benzothiazole, sulfonated, cellulose, yellow, P 5600*gh*, P 7705*d*.
binding by native and denatured proteins, 1073*g*.
by nerve cells, duration of stimulation and, 742*a*.
by tobacco mosaic virus proteins, 8407*h*.
by 2,6-bis(5-benzamido-1-anthraquinonylamino)naphthalene condensation, cotton, red-brown, P 1578*a*.
books: Chimica analitica applicata all'industria, 1573*i*; Química aplicada a la industria textil. T. 1. Quimica de las, 1980*b*; Fundamental Processes of, Chemistry, 4019*d*, Les couleurs, 5194*a*; Tech. Analysis in Production of—(in Russian), 5597*a*, Las materias colorantes, 6424*e*, History of, in Bombay Presidency, 7694*a*.
Brilliant Blue (FD & C Blue No. 1), Na acetate detn. in, 9452*b*.
British industry of, 3199*f*.
carbocyanine, 2617*a*.
cellulose esters, orange-yellow, P 9470*b*.
chem. constitution and color of, 942*c*.
Chlorazol Sky Blue FF and Chrysophenine G, adsorption by cellulose, 8234*a*.
2'-chloro-3-nitroxenylamine, nylon and rayon, green-yellow, P 2442*h*.
chromaticity distribution, gamut and luminous transmittance computation for cyan, magenta and yellow, 2775*f*.
chrome, metal salt-contg., P 8166*g*.
chrome wool, effect of heavy metals on colors of, 5953*c*.
chromium salicylate compds. for chroming sulfonated, animal fibers, P 6427*g*.
Chrysophenine, adsorption by starch, 8715*g*.
Chrysophenine G, effect of carboxyl groups in viscose sheet on, 4015*h*.
Ciba Blue 2B and Cibanone Orange R, effect on cellulose oxidation, 8671*i*.
Cibanone Brilliant Pink 2R Micro Paste, pink and red, fast to Cl, light and washing, 8141*f*.
Cibanone Green B, Indanthrene Olive Green B, Indanthrene Marine Blue and halogenated, vat, light fastness in yellow-orange-red by, 7687*f*.
Cibanone Orange R, photosensitization of oxidation and polymerization by, 4580*c*.
classification of direct, 407*h*.
from coal exts., alkali sulfide vat, cotton, brown to black, P 5602*b*.
compds. with nucleic acids, 8416*c*.
concn. and control of, radioactive materials in relation to, 8685*f*.
concn. of solns. of, by heating liquid-vapor interface, 7297*i*.
Coriacid or Igenal, leather, 6853*a*.
cosmetic, spectral identification of, 6364*c*.
cyanine, P 54*i*, 851*h*, P 2784*c*, 4211*h*, P 7846*c*.
cyanine and styryl, effect on glycolysis in muscle exts., 7581*f*.
cyanine, antifilarial action of, 2334*g*, 3930*b*.
cyanine, color and light absorption by, 407*i*.
cyanine, from 2,3-dihydro-1*H*-cyclopenta[*b*]quinoline, 3001*a*.
cyanine, from 2-methylbenzothiazolol isomers, 9453*d*.
cyanine, from (phenylselenyl)alkyl *p*-toluenesulfonates, P 7042*d*.
cyanine, from thianaphthene derivs., 2201*b*.
cyanine, of pyridine series, 7024*d*.
cyanine, prepn. of, 8291*f*.
cyanine (trinuclear), P 958*h*, 2527*i*.
cyanoacetanilide *p* - dialkylaminobenzaldehyde, nylon, yellow, P 6428*a*.
Czechoslovakian industry of, 4469*a*.
D&C Blue No. 1 and D&C Red No. 9, Pb detn. in laked, 7231*h*.
D&C Orange No. 4, detn. in FD&C Orange no. 1, 9452*d*.
D&C Red Nos. 6 and No. 7, *p*-toluidine detn. in rosinated, 7231*e*.
D&C Red Nos. 7, 8, 10 and 31, detn. in lakes and pigments, 7231*f*.
decompn. of acid and direct, in high-temp. dyeing, 411*e*.
decompn. of direct, during dyeing of wool unions, and Na perborate and urea in its prevention, 851*h*.
degradation (photochem.) of, 4015*c*.
dermatitis from, 5131*f*, 7693*f*.
detection in wine of, 8091*f*.
detn. in DHC Red No. 34 Ca Lake, D&C Red No. 14 Na Lake and Ext. D&C Red No. 2 Ba Lake, 9452*e*.
detn in textiles, 3201*d*.
from *o*-diacetylbenzene and amino acids, 1031*b*.
dianthrimideacridone, vat, cellulose, brown to gray to olive, P 9469*d*.
dianthrimideacridone, vat, cellulose fibers, violet to violet-brown, P 7708*h*.
dianthrimideacridone vat, cellulose, orange to scarlet to brown, fast to Cl and washing, P 865*d*, P 867*a*.
dianthrimidecarbazole, sulfonated, vat, cotton, orange-gold, P 7708*d*.
dianthrimidecarbazole, sulfonated, vat, cotton, red-brown and olive, P 7708*c*.
dianthrimide chlorosulfonated or sulfonated, vat, cotton, red-brown, P 7707*i*.
dianthrimide, sulfonated, wool, gray, P 3627*a*.
from diazonium salts, resonance theory of color of, 1191*a*
dibenzanthrone *bz* 2,2'-dihydroxy mixed alkyl derivs., sulfonated, paint, P 2788*i*.
dibenzopyrenequinone, vat, $H_2SO_4$ digestion to obtain fine particles, P 2442*b*.
6,9 - dichloro - 2,3 - dihydro - 2 - (1-oxonaphtho[2,1 - *b*]thiophen - 2(1*H*)-ylidene) - 1*H* benz[*e*]indol - 1 one, brown, P 8173*f*.
diffusion of, through cellophane, 7778*c*.
into cellulose, 1983*d*, 3199*g*.
through semipermeable membranes, 2486*f*.
in transfer of image in hydrotype method of color photography, 8921*d*.
*o,o'*-dihydroxy azo and *o*-hydroxy carboxy azo, Cr contg., mordant, acid, P 2441*f*.
dihydroxy azo, Cr-contg., wool, P 3626*c*
*o,o'* dihydroxy azo, esters, animal fibers, P 8153*e*
*o,o'*-dihydroxy azo, naphthalenedisulfonic acid, wool, blue, fluorescent, P 7698*i*.
*o,o'*-dihydroxy azo, naphthaleuesulfonic acid, Cr-contg., wool, green, P 7698*i*.
*o,o'* dihydroxy azo, naphtholsulfonic acid, wool, blue-gray, fluorescent, P 7699*a*.
*o,o'*-dihydroxy azo, naphtholsulfonic acid, wool, red-blue, fluorescent, P 7698*h*.
*o,o'*-dihydroxy azo, pyrazolone, wool, yellow-red, P 7698*fh*.
*o,o'*-dihydroxy azo, sulfonated, wool, P 5959*gh*, P 5960*b*.
from *N*, *N*-dimethylaniline and dimethyl-(*p* - nitrobenzoyl)phenylammonium chloride, violet, 4240*i*.
dioxazine, cotton, blue-green, P 5965*d*.
dioxazine (triphenodioxazine), sulfonated, cotton, blue, P 7236*i*.
diphenylamine 4 sulfonamide derivs., rayon, golden-yellow to brown, P 8143*f*.
diphenyl and triphenylmethane, pyridine analogs and leucobases, 410*c*.
diphenyl- and tripyridylmethane, tanned cotton and wool, 409*d*.
diphenylmethane, effect of substituents on color of, 2589*c*.
direct and S, 5951*i*.
disazo, 2-amino-6-chloro-1-phenolsulfonic acid anthranilic acid 1,3-bis(5-hydroxy-7-sulfo-2-naphthyl)urea, Cu-contg., cellulose, Bordeaux, P 2441*b*.
disazo, aminonaphtholdisulfonic acid, cellulose, green-blue, P 5598*c*.
disazo, aminonaphtholdisulfonic acid, rayon, blue, P 5598*i*.
disazo, aminonaphtholsulfonic acid, cotton, blue and green, P 4866*bc*.
disazo, aminonaphtholsulfonic acid triazine, Cu-contg., cellulose, blue-red, P 2780*h*, P 2781*ab*.
disazo, 8-anilino-1-naphthalenesulfonic acid, wool, blue, fast to fulling, light and sea water, P 5195*a*.
disazo, anilinonaphthalenesulfonic acid, wool, green-blue and red, P 5962*cf*.
disazo, benzimidazole, cellulose, yellow to orange, P 8145*g*.
disazo, bis(4-methyl-3-aminophenyl) sulfone 2 - amino - 8 - hydroxynaphthalene-6-sulfonic acid, wool, blue-red, P 1987*i*.
disazo, carbanilide, acid, cotton, green-yellow, P 5962*f*.
disazo, carbanilide, sulfonated, Cu-contg. cotton and regenerated cellulose, yellow to orange, fast to light and washing, P 8156*g*.
disazo, carbanilide, sulfonated, vegetable fibers, blue-red, P 8690*c*.
disazo, cellulose acetate and nylon, orange, P 7695*e*.
disazo, 6,6'-diamino-*m*,*m'*-biphenol derivs., P 8157*a*.
disazo, dihydroxybiphenyl, P 4476*abc*.
disazo, 3,3'-dihydroxy-4,4'-diaminobiphenyl, cellulose, blue and violet, P 8155*i*.
disazo, dihydroxynaphthalenesulfonic acid, Cu contg., cellulose, gray blue, P 5962*h*.
disazo, 3,3'-dimethoxybenzidine, sulfonated, Cu-contg., cellulose, blue, P 8158*i*.
disazo, from isomeric biphenyldiamines, P 8174*c*.
disazo, 4-hydroxy 3-methylbenzyl alcohol, paraffin oil, stearin and varnish, orange, P 8690*c*.
disazo, 7-hydroxy-1 naphthalenecarbamic acid phenolsulfonic acid, Cr contg., wool, blue-green, P 5598*h*.
disazo, 3-hydroxy-2 naphthoic acid-coupled, rayon, green, fast to Cl, light, overdyeing, S and washing, P 1571*b*.
disazo, 8 hydroxy 7 quinolinesulfonic acid, Cu-contg., cotton, yellow-red, fast to light and water, P 7700*n*
disazo, 6,6'-iminobis[1 naphthol 3 sulfonic acid], purple, P 5598*c*.
disazo, 2,7 naphthalenediol and 7 amino 2-naphthol, Cu contg., cotton, navy and marine blue, P 5598*f*.
disazo, 2,6 naphthalenediol, Cu contg., cotton, marine blue, P 7701*a*
disazo, naphthalenediol or naphthol, cellulose, navy blue, P 6421*g*
disazo, naphthalenesulfonic acid, Cu contg., cotton, blue, P 7700*e*
disazo, naphthalenesulfonic acid, lacquers, orange, P 7699*fh*, P 7697*a*
disazo, naphthalenesulfonic acid, wool, violet blue to navy blue, P 7701*c*.
disazo, naphthimidazolesulfonic acid, cellulose, P 5961*fgh*.
disazo, naphtholdisulfonic and naphthol sulfonic acids, Cu contg., vegetable fibers, blue, P 2440*i*.
disazo, naphtholdisulfonic acid, cotton, ruby red, P 4471*h*.
disazo, 1-naphthol-5-sulfonic acid, animal fibers and nylon, green to brown, P 8156*c*.
disazo, naphtholsulfonic acid, cellulose, P 5961*def*.
disazo, naphtholsulfonic acid, cellulose, red, P 5961*defgi*, P 5962*abcd*
disazo, naphtholsulfonic acid, Cu contg., cellulose, red, fast to light and washing, P 7700*g*.
disazo, naphtholsulfonic acid, Cu contg., cotton, blue, P 7700*cde*.
disazo, naphtholsulfonic acid, Cu-contg., cotton, purple, fast to light and washing, P 7701*c*.
disazo, 1-naphthol-3-sulfonic acid, cotton and rayon, blue, red or violet, P 8157*i*.
disazo, naphtholsulfonic acid, cotton and regenerated cellulose, red, fast to washing, P 8689*i*.
disazo, naphtholsulfonic acid, wool, blue-red, red and yellow-red, P 4476*cfg*.
disazo, naphtholtrisulfonic acid, Cu contg., cotton and rayon, blue, fast to light, washing and water, P 5598*d*.
disazo, pyrazolone, Cu-contg., cellulose, Bordeaux red, fast to light and washing, P 7700*f*, P 9402*i*.
disazo, pyrazolone, Cu-contg., cellulose, red, P 7699*i*, P 9462*g*.
disazo, pyrazolone, Cu-contg., cotton, wine red, P 7699*i*, P 7700*ab*.
disazo, pyrazolone, cotton, red, fast to washing, P 5958*ghi*, P 5959*ab*.
disazo, pyrazolone salicylic acid, plant fibers, red, fast to light and washing, P 5597*b*.
disazo, pyrazolone, sulfonated, silk and wool, P 9463*a*.

disazo, resorcinol phenolsulfonic acid, Cu-contg., P 5598*g*.
disazo, stilbene, cellulose, red, P 4863*b*.
disazo, stilbenedisulfonic acid, cellulose, P 4862*hi*, P 4863*abg*.
disazo, sulfonamido, cellulose derivs., cotton and wool, P 858*f*.
disazo, 6-sulfosalicylic acid, cotton and rayon, red-yellow, P 5195*c*.
disazo, 5,5'-ureylenedianthranilic acid pyrazolone, cotton, brown-yellow, P 4864*b*.
Dispersol, Duranol, Solacet and S.R.A., effect on photochem. degradation of rayon and nylon, 853*i*.
drying of, 8685*a*.
Durazol Blue 3R-200, adsorption by rayon, 2777*b*.
Echinoidea, 2608*h*.
effect of acetate, on viscose rayon and wool flotability, 6421*c*.
effect of azo and new, on tubercle bacilli, 7545*h*.
effect on cell division, oxidations and, 773*e*.
on internal photoeffect in semiconductors, 7349*d*.
on light transmission in textiles, 3201*f*.
on photochem. degradation of cellulose irradiated by Hg spectrum, 412*f*.
on reduction of methemoglobin in red blood cells, 6732*c*.
on tubercle bacilli, and its relation to metachromasia, 4330*f*.
on water detn. in textiles, 2780*a*.
as elec. semiconductors, 1272*g*.
in electrocapillary analysis of soil, 3127*a*.
emulsion (oil) stabilization by, 5975*g*.
excretion from animal after aminothiazole administration, 8029*d*.
fastness of—see also *Fading*.
fastness of, on cotton, 3203*b*.
and its detn., 3619*f*.
in textile industry, 852*h*.
on textiles, light-sensitive papers as controls in testing, 1572*g*.
Fast Red, adsorption by burnt pholerite prepns., 6035*h*.
fat-sol., in fat detn. in milk, 8067*i*.
flavanthrone, vat, cotton, yellow and yellow-orange, P 8172*c*.
fluorescein (4,5-dimethyl-) and its halogen derivs. and diacetates and dibenzoates, 1983*g*.
of fluorescein type, identification of, 9453*a*.
fluorescence of, effect of antioxidants on, 947*d*.
quenching of, 498*i*, 7347*a*.
fluorescent, and their uses, 4015*b*.
fluorescent, detn. in urine, 264*e*.
food, chromatography of, 777*c*.
food, effect on animal organism, 1488*e*.
formazyl, Cu-contg., wool, blue, P 5198*h*.
2-furaldehyde nitrosophenol S $Na_2SO_4$, alkali-sol., P 1988*e*.
in gelatin isoelec.-point detn., 6884*d*.
for hair, 9386*h*.
and danger therefrom, 2373*h*.
pyrogallol detn. in, 9368*d*.
Hansa Orange (Ext. D&C Orange No. 1), spectrophotometric analysis of, 7231*e*.
"hemicyanine," 633*a*.
history of, 6418*i*, 6477*h*.
history of immedial, 851*f*.
hosiery, 7232*e*.
Höchst Yellow R and U and Indigo Yellow 3G, 7930*c*.
β-hydromuconononitrile derivs., P 3847*i*.
o-hydroxy azo, naphtholsulfonic acid, fading-resistant, P 5597*h*.
identification and classification of, 2437*i*.
Indanthrene Blue RS, transformations in, 2483*e*.
Indanthrene Printing Violet BF, vat, identification of, 851*f*.
indanthrene, vat, prepn. by alkali fusion, 5189*gh*, 5190*g*.
indanthrone, 3400*f*.
indigoid, history at Badische Anilin- and Soda-Fabrik, 407*h*, 9451*d*.
indigoid, naphthothioindoxyl, vat, cellulose fibers, P 9470*d*.
indigoid, reactions of, 6614*e*.
indigoid, vat, cellulose fibers, fast to Cl, light and washing, P 7700*g*.
indophenol, light absorption by, 7231*i*.
in influenza-virus-infection control, 7589*c*.
infrared-sensitive, 8291*b*.
for inks (stamping), 1992*c*.
iron salt inactivation in making acid, azo and chrome, 4856*k*.
lead detn. in, 9451*i*.
leather, 6853*a*, 7733*g*, 8721*d*.
measuring light fastness, penetration and soly. of, 7736*e*.
recovery from leather scrap, P 4505*a*.
leuco anthraquinone azo $H_2SO_4$ esters, vegetable fibers, P 7703*h*.
leuco anthraquinone $H_2SO_4$ esters, Cu-contg., red, P 415*g*.
leuco anthraquinone $H_2SO_4$ esters, vat, P 3205*h*.
leuco compds. of algol and indanthrene vat, enol-keto rearrangement of, 3199*g*.
leuco compds. of Calcosol Red BN and Indanthrene Brilliant Green B for alk. vat dyeing, rayon, P 9471*a*.
leuco soln. prepn. from Brilliant Violet K, chloroindanthrene and Golden Yellow polycycloketone, 3619*d*.
merocyanine, P 1988*d*.
merocyanine, polarity and resonance in, 4910*g*.
methine, sulfonated, rayon, green-yellow, fast to light, P 8691*cd*.
methine-type, rayon, green-yellow, P 5600*i*.
2,2'-methylenebis[5-acetylthiophene] and derivs., P 6238*d*.
2-methyl-2-*o*-nitroanilino-1,3-propanediol derivs., yellow, P 7694*b*.
methylpteridine red cryst., cotton and wool, 9452*h*.
Methyl Violet 2RR, poisoning from, in indelible pencils, etc., 7595*b*.
of Mexico (pre-Columbian), 4469*b*.
Monastral (Fast Blue BS, Fast Green G and Fast Green GS), for inks and paint, 7715*i*.
Naphthochrome Green G prepn. of, and use in Be detn., 1681*h*, 7862*b*.
Naphthol AS—see *2-Naphthanilide, 3-hydroxy-*.
Naphthol AS-RL—see *2-Naphth-p-anisidide, 3-hydroxy-*.
of Naphthol AS type, identification of, 5344*c*.
Naphthol Blue Black (D&C Black No. 1) and Toluidine Maroon (D&C Red No. 38), detn. of 3-nitro-*p*-toluidine and *p*-nitroaniline in, 9454*d*.
Naphthol Blue Black (D&C Black No. 1), *p*-nitroaniline detn. in, 7231*i*.
naphthoquinone imine leuco or hydro compds., P 8166*i*.
naphthotriazole, chrome, wool, yellow, P 2784*b*.
naphthoylenebisbenzimidazole and perylenetetracarboxylic diimide, vat, finely divided, P 9469*i*.
National Brilliant Oil Blue BMA, surface-active agent detection by solubilization of, 4497*e*.
nitrogenous tar-oil products for making, P 4451*f*.
nitro, sulfonated, animal fibers, brown, P 7236*e*.
occlusion by sucrose crystals during growth, 2003*i*, 2004*i*, 2005*a*.
Orange II—see "sodium salt" under *Benzenesulfonic acid, p-(2-hydroxy-1-naphthylazo)-*.
orientation of mols. of, by illumination, 6080*b*.
for paper-pulp and paper manuf., 5948*h*.
for paper treatment, P 1188*h*.
pentaanthraquinonetetracarbazole, vat, P 1576*h*.
pentamethinecyanine, 6928*d*.
periodicals for industry of, 5953*a*.
petroleum chemicals in industry of, 1172*h*.
phenolic, in fiber protection from bacteria, 8141*h*.
photocond. of, used as photographic sensitizers, 6074*e*.
for photography—see *Photography*.
phthalocyanine azo, green, fast to wet treatments, P 7694*h*.
phthalocyanine, contg. quaternary ammonium, ternary isothiouronium or sulfonium groups, Cu-contg., blue or green, P 8172*g*, P 8173*b*.
phthalocyanine, Cu-contg., P 8169*a*.
phthalocyanine hexadecachloro deriv., Cu-contg., coatings, green, P 7705*c*.
phthalocyanine polyhydroxyalkylsulfonamides, blue to green-blue, stable to alkalies and light, P 8168*h*.
phthalocyanine sulfonamides, cotton, ink, silk and wool, blue, P 8692*h*.
phthalocyanine, sulfonated, cotton, blue or green, P 7704*e*.
phthalocyanine, sulfonated thio ethers, cellulose, silk, etc., green, P 4487*e*.
phthalocyaninesulfonic acid hydrazides, ink and silk, green, P 4487*b*.
phthalocyanine thio ether, Cu-contg., green, P 7710*e*.
for plastics, 7688*i*.
polyazo, 8-amino-1-naphthol-3,6-disulfonic acid, cotton, blue-green, P 2440*bc*.
polyazo, aminonaphtholsulfonic acid salicylic acid, cellulose, green to gray-blue, P 5600*b*.
polyazo, aminonaphtholsulfonic acid triazine, cotton, brown-orange, P 5963*efgh*.
polyazo, carbanilide, cellulose, red, P 4020*a*.
polyazo, naphthalene, metal-contg., P 4482*g*.
polyazo, naphthalenesulfonic acid, cotton and rayon, red-brown, P 5196*h*.
polyazo, naphtholsulfonic acid, cellulose, brown, P 5196*g*.
polyazo, naphtholsulfonic acid, Cu-contg. cotton, orange-brown, fast to light and washing, P 7703*a*.
polyazo, naphtholsulfonic acid, cotton, red-gray, P 4480*h*.
polyazo, naphtholsulfonic acid, cotton, violet-black, P 4472*i*.
polyazo, naphtholsulfonic acid·salicylic acid, cellulose, red to green-gray, P 3204*c*.
polyazo, naphtholsulfonic acid triazine, cotton, orange-brown, P 5963*efgh*.
polyazo, of benzene, naphthalene or pyrazolone series, benzidine, cellulose, red, P 8148*e*.
polyazo, pyrazolone, cellulose, brown, P 9466*b*.
polyazo, pyrazolone, sulfonated, cellulose and rayon, red-brown, P 5599*g*.
polyazo, stilbenedisulfonic acid, cellulose, yellow, fast to wetting, P 7234*i*.
polyazo, stilbenedisulfonic acid, cotton, red, P 9466*a*
polyazo, stilbenedisulfonic acid, rayon and vegetable fibers, yellow, P 5195*gi*, P 5196*ab*.
polyazo, sulfonated, P 9464*a*.
polyazo, sulfonated, alc.-sol., orange, P 9465*aef*.
polyazo, sulfonated, alc.-sol., red, P 9465*cdh*.
polyazo, sulfonated, alc.-sol., red-brown, P 9465*h*.
polyazo, sulfonated, cellulose and regenerated cellulose, deep blue, P 6426*f*.
polyazo, sulfonated, cellulose, blue, P 9466*i*, P 9467*a*.
polyazo, sulfonated, cotton and rayon, marine blue, P 9466*g*.
polyazo, sulfonated, cotton and regenerated cellulose, brown, P 3204*h*, P 4482*g*.
polyazo, sulfonated, cotton, linen and rayon, P 9464*f*.
polyazo, triazine cotton, brown, fast to light and washing, P 4866*gi*.
polyazo, triazine, cotton, green-yellow, fast to washing, P 4478*i*.
polyazo, triazine, cotton, yellow, fast to washing, P 4479*abcdefgh*.
polycladin, cotton, yellow, 8101*i*.
Ponceau R, effect on benzidine-peroxidase color, 7521*d*.
Ponceau 2R, 4R and 6R, for foods, and their estn., 7595*a*.
Ponceau 3R (FD&C Red No. 1), for food, and its estn., 7595*a*.
Ponceau 3R (FD&C Red No. 1), measuring pseudocumidine boiling range in, 7231*b*.
Ponceau 4R, adsorption by $CaCO_3$, 8791*h*.
Ponceau SX (FD&C Red No. 4), in identification of procaine solns., 3563*d*.
prechromed, and their leveling properties, 5594*i*.
for printing, 5953*d*.
production in France, development of, 6417*i*.
pyranthrone, vat, particle-size control by $H_2SO_4$, P 3205*g*.
pyrimido-2'-cyanine, for roundworm infestations, P 8167*d*.
Quinizarin Green (D&C Green No. 6), and its detn., 9452*i*.
quinoid and triphenylmethane, fungistatic action in relation to constitution and oxidation, 8435*eg*.
Quinoline Red, quenching of fluorescence of, 7346*i*.

quinone imine, blue to green, fast to wet treatments, P 8167*f*.
quinone imine, S and thiazole, 407*i*.
radioactive, in localization of brain tumors, 1856*f*.
from *Raphiolepis umbellata* bark, for pongee, 851*i*.
rapid, 7687*e*.
rayon, 6828*g*, 6820*a*, 7232*d*.
for rayon (acetate) printing, 4460*f*.
rayon, fluorescent, P 3628*a*.
recovery from spent dye liquors, P 8175*f*.
reduction (photochem.) by chloroplasts, effect of photosynthesis inhibitors on, 8019*e*.
of *Relbunium atherodes* and *R. hypocarpsum* roots, 1569*e*, 1983*g*.
for resins on textile fibers, 7233*b*.
retention in frogs, effect of saponin on, 5870*f*.
reviews on, 407*h*, 7689*i*.
Roccelin, prepn. by electrolysis, 2876*c*.
selectivity for fibers and penetration into fibers, 3619*g*.
sensitizing—see *Photography*.
for smokes (pyrotechnic), P 5190*e*.
solubilization by detergents, 7780*d*.
by penicillin G solns., 4926*i*.
by soaps, 9492*a*.
testing colloidal solns. by, 6041*h*.
sorption of, in padding, 1191*e*.
spectra of, 1653*i*, 2864*h*
effect of ionization on, 3714*d*.
in sol. silicate solns., 2093*f*.
from starch chlorination products, P 428*e*.
stilbenedisulfonic acid benzobistriazole, cellulose, yellow to brown-red, fast to light and moisture, P 1574*e*.
stilbenedisulfonic acid naphthotriazole, cotton, red-yellow, fast to light, water and washing, P 4486*a*.
stilbenedisulfonic acid triazine, cellulose, P 5965*efghi*, P 5966*ab*.
stripping from fibers, nonionic compds. for, 7690*a*.
stripping vat, lauroylphenylbiguanide methylated and sulfonated derivs. for, P 2442*d*, P 4878*i*.
stripping vat, phenylstearoylbiguanide derivs. for, P 4879*bc*, P 5190*e*, P 5210*e*, P 7727*e*.
Sudan III adsorption by $Al_2O_3$, 6035*c*.
sulfur, P 4020*h*.
Sulfur Black, cotton-yarn tendering by, 1192*h*, 3621*f*.
sulfur, brown, P 5958*e*.
sulfur, reduction with $Na_2S$, 3619*i*.
sulfur, $Na_2S$ vat, brown, P 7705*b*.
sulfur, solns in alkylolamines, P 8169*i*.
Sunset Yellow (FD&C Yellow No. 6) and C I. No. 26, and their analysis and prepn., 9451*e*.
tetrakisazo, aminonaphthalenesulfonic acid, cellulose and rayon, blue-gray, P 4478*fh*.
tetrakisazo, aminonaphthalenesulfonic acid, cellulose and regenerated cellulose, gray-green, P 4478*a*.
tetrakisazo, aminonaphthalenesulfonic acid, cellulose, gray-blue, P 4478*c*.
tetrakisazo, aminonaphthalenesulfonic acid, cellulose, green, P 4478*d*.
tetrakisazo, aminonaphthalenesulfonic acid, cotton and rayon, green, P 4478*e*.
tetrakisazo, aminonaphtholsulfonic acid, cotton, blue and violet-black, P 2781*cd*.
tetrakisazo, carbanilide, sulfonated, cotton, red, P 5963*a*.
tetrakisazo, cellulose, red-brown, 4867*d*.
tetrakisazo, 1-(*o*-hydroxyphenylazo)-2-naphthol-4-sulfonic acid, metal-contg., cotton, linen and rayon, blue-gray, fast to light and wet treatments, P 8161*a*.
tetrakisazo, naphthalenesulfonic acid, cotton and regenerated cellulose, yellow-brown, P 4867*a*.
tetrakisazo, naphtholdisulfonic acid, cellulose, gray, P 5597*c*.
tetrakisazo, naphtholsulfonic acid, cellulose, marine blue, P 5196*e*.
tetrakisazo, naphtholsulfonic acid, Cu-contg., vegetable fibers, red-gray, P 4477*i*.
tetrakisazo, naphthylamine, cotton and regenerated cellulose, blue-gray, P 4478*g*.
tetrakisazo, stilbenedisulfonic acid, cellulose, blue-red, P 4863*cd*.
tetrakisazo, sulfonated, cellulose, orange-brown, P 4867*e*.
tetrakisazo, sulfonated, Cu-contg., cellulose, marine blue, P 8144*efghi*, P 8691*b*.
tetrakisazo, sulfonated, cotton and regenerated cellulose, orange-brown, P 4867*cd*.
tetrakisazo, sulfonated, cotton, black, P 6426*ce*.
tetrakisazo, sulfonated, cotton, blue, gray-blue and red-blue, P 6425*efghi*, P 6426*d*.
tetrakisazo, sulfonated, cotton, violet, P 6426*bd*.
tetrakisazo, sulfonated, cotton, violet and violet-brown, P 6425*bf*, P 6426*ad*.
tetrakisazo, sulfonated, food and leather, gray or black, P 5222*b*.
tetrakisazo, sulfonated, green, P 860*i*.
textile-finish effect on, 6423*h*.
thianaphthene, vat, cotton, red, P 4867*i*.
thianaphthene, vat, cotton, rose, P 6427*e*.
*o*- and *p*-toluidine detn. in, 9454*e*.
trianthrimidecarbazole, sulfonated, vat, cotton, red, P 7708*g*.
trianthrimidecarbazole, sulfonated, vat, cotton, red-brown, P 7708*e*.
triazole, mordant, sulfonated, Cr-contg., wool, yellow, fast to light, P 8691*d*.
triphenylmethane, 184*c*, P 861*d*.
triphenylmethane, cotton, silk and wool, violet-blue, P 4484*i*.
triphenylmethane diamino derivs., spectra in concd $H_2SO_4$, 5306*i*.
trisazo, aminonaphthalenesulfonic and aminonaphtholsulfonic acid, cellulose, gray, fast to boiling, P 4866*cfg*.
trisazo, aminonaphtholdisulfonic acid, cellulose, green-marine blue, P 5963*h*.
trisazo, aminonaphtholsulfonic acid, cellulose, gray, P 5599*a*.
trisazo, aminonaphtholsulfonic acid, cellulose, marine blue, P 5964*abcef*.
trisazo, aminonaphtholsulfonic acid, cellulose, red-marine blue, P 5961*abdfg*.
trisazo, aminonaphtholsulfonic acid, Cu-contg., cellulose, violet-brown, P 6832*h*.
trisazo, 5 - amino - 1 - naphthol - 3 - sulfonic acid, cotton, dischargeable, olive-black, P 2440*a*.
trisazo, aminonaphtholsulfonic acid triazine, cotton, gray, fast to light and boiling, P 5599*d*.
trisazo, aminonaphtholsulfonic acid triazine, vegetable fibers, gray, fast to light and washing, P 5599*b*.
trisazo, Cu-contg., Glauber salt bath, cotton, P 4480*i*, P 4481*cde*.
trisazo, cotton, blue, P 4477*fgh*.
trisazo, naphthalenediol salicylic acid, cotton, brown, P 5195*e*
trisazo, naphtholsulfonic acid, P 7701*g*.
trisazo, naphtholsulfonic acid, cellulose, blue, P 7701*i*.
trisazo, naphtholsulfonic acid, cellulose, blue-green, P 7701*h*.
trisazo, naphtholsulfonic acid, Cu-contg., cotton and rayon, blue, fast to light and washing, P 4481*fg*
trisazo, naphtholsulfonic acid, Cu contg., cotton, blue and gray, P 4482*ab*
trisazo, naphtholsulfonic acid, Cu-contg., cotton, blue-gray, P 4481*hi*.
trisazo, naphtholsulfonic acid, Cu-contg., cotton, red-blue, P 4481*h*.
trisazo, naphtholsulfonic acid, cotton and regenerated cellulose, red-blue, P 7702*i*.
trisazo, naphtholsulfonic acid, cotton, blue, P 4477*ce*.
trisazo, naphtholsulfonic acid, cotton, blue-black, brown-violet, violet and violet-brown, P 7702*cefg*.
trisazo, naphtholsulfonic acid, cotton, brown, P 4477*b*.
trisazo, naphtholsulfonic acid, cotton, violet, P 4476*g*, P 4477*abc*, P 5962*i*.
trisazo, naphtholsulfonic acid, cotton, violet-black, P 4477*d*.
trisazo, 1-naphthol-3-sulfonic acid derivs., cellulose, P 8159*g*.
trisazo, 1-naphthol-3-sulfonic acid triazine, cotton and regenerated cellulose, P 8160*h*.
trisazo, naphtholsulfonic acid triazine, cotton, gray, fast to boiling and light, P 8159*d*.
trisazo, naphtholsulfonic acid triazine, cotton, olive-gray, P 4480*g*.
trisazo, naphtholsulfonic acid urea, cotton, gray, P 4480*efgh*.
trisazo, phenolsulfonic acid, cotton, red-brown, P 7702*h*.
trisazo, pyrazolone, cotton, red, fast to washing, P 5959*bc*.
trisazo, pyrazolone, cotton, violet-brown, fast to washing, P 5958*i*.
trisazo, sulfonated, cellulose, blue, P 9463*cefgh*.
trisazo, ureylenebis[naphtholsulfonic acid], cotton, gray, fast to washing, P 4480*bd*.
trypanocidal, 3147*b*.
tumors in industry of, 8073*g*.
Turkey Red, effect of Fe sulfates in, on rubber, 4870*g*.
ultrasonic-wave effect on, 1460*i*.
Ursol A and D, mol. wts. and solubilities of oxidation products from, 6419*d*.
Ursol D, spectra of oxidation products of, and their exts., 6419*c*.
vat, 6417*i*, 6827*g*.
vat, cotton sensitized by, $H_2O_2$ and photochem. degradation of, 412*b*.
vat, dyeing *vs.* printing suitability of, 3620*e*.
vat, effect on photochem. degradation of nylon, rayon and silk, 412*d*, 1192*a*.
vat, esterification of, P 2242*f*.
vat, heat resistance of, 3199*g*.
vat, photosensitization by, 4580*b*.
vat, stability at high temps., reduction reactions, detn. of strength of reducing soln. and dextrins in stabilizing reduced dyes, 4856*f*.
viscosity of solns. of, effect on duration of their metastable states, 7828*b*.
waxing of powd., P 1884*b*.
wool, effect on pattern-raising susceptibility, 6828*h*.
in wool stabilization to sunlight and weather, 3622*h*.
Yellow AB (FD&C Yellow No. 3) and Yellow OB (FD&C Yellow No. 4) compn. for margarine blocks, P 1124*e*.
**Dynad**, the term, 920*g*
**Dynamics**. (See also *Electrodynamics*, *Kinetics*; *Mechanics*.)
of beam in linear accelerator, 4093*b*
of fluids in bubble-plate columns, 4001*i*
quantum—see *Quantum mechanics*

measurement of, of bated skins, 7735*f*.

*measurement of*, of bricks, 829*g*.
of colloidal systems with pendulum, 2072*e*.
of concrete, 4398*i*.
of cords and yarns, 2439*d*.
of crystals, 5251*g*, 8787*b*.
of gels, 6047*d*.
of glass fibers, 7654*g*.
of incendiary gels, 4015*a*.
of knitted fabrics, 3202*b*.
of paper and paper products, 4788*b*.
of phenolic resins, 3229*i*.
of plastic materials, 1603*c*.
of polymers, 6045*a*.
of rheonomic systems, 4540*g*.
of rubber, 3643*g*.
of solids by ultrasonic methods, 2482*g*.
of thermostat metals, 4615*g*.
measurement of shear, of liquids at ultrasonic frequencies, 4065*c*.
of metals, 9001*g*.
of mixts. of potassium chloride with Na oleate and water, 2488*b*.
of nickel single crystals, 7768*c*.
of oleate systems with KCl, 6491*f*.
of oleate systems with KCl and KOH, 4080*g*.
of paper, vulcanization effect on, 8136*d*.
of plastics, 1601*g*, 2027*f*.
of polyisobutylene, 4510*e*.
polymerization degree and, 7294*h*.
of polymers, cross-linking and, 5227*cd*.
nomenclature of, 6490*h*.
structure and, 2810*c*, 2071*h*.
of polymer solns , 467*a*.
of polyvinyl chloride plastic extruded forms, improvement of, P 4507*d*.
of protein monolayers, thermal denaturation and, 2487*d*.
of rayon, 3202*f*.
of rayon (HCHO treated), 1192*g*.
of rayon staples spun in cotton yarn spinning mill, 5191*i*.
of rennet curd, 4393*h*.
of rennet curd, effect of pasteurization and cooling on, 4394*c*.
residual strain energy and, 7768*e*.
Rochelle-salt-single-crystal anomalous, 4071*f*.
of rubber—see *Rubber; Rubber, substitute and synthetic*.
of sodium bromate and $NaClO_3$, 8228*c*.
of steel, effect of inclusions on, 2560*i*.
of steel, temp. and, 7396*a*.
temp. and, 5715*b*.
of textiles and effects on stress strain relations in polymers, 1573*e*.
theory of rubberlike, 4079*g*, 8238*i*.
of thioplast impermeable films, improvement of, P 4507*e*.
of wheat gluten, 7595*g*.
of wool, effect of melamine resins on, 7691*h*.
of zinc crystals, orientation and, 6482*b*.
of zinc single crystals, 83*i*.

**Elastic materials or products.** (See also *Plastic materials; Resilient materials; Rubber, substitute and synthetic; Yarns.*)
from *N*-alkoxymethyl polyamides, 3653*b*.
carbonic acid mixed esters with alkenols and hydroxy derivs. of hydrogenated thiophene 1,1-dioxide for use in, P 691*c*.
chem. constitution and properties of, 9455*d*.
in chem. engineering, 8745*c*.
dynamic modulus of, app. for measurement of, 1573*f*.
elasticity of, theory of, 4079*g*.
flow and microfluid state of aggregation of, 3643*b*.
force-deformation law for viscous, 7768*a*.
from gluten, P 3241*h*.
hardness of, expression of, 2462*d*.
martensitic crystals, 6880*h*.
mol. structure and phys. properties of, 2071*h*.
phenyl-1,2-ethanediol esters as plasticizers for, P 6663*h*.
phys. behavior of fibrous visco-, 4042*e*.
reflection and refraction of plane shear waves in viscoelastic media, 4067*b*.
resinous fibrous, for shoe soles, etc., P 4507*c*.
review on, 5003*a*.
rubber-backed, P 1194*g*.
structure mechanics of viscous, 4540*f*.
systems with gases, equil. and transport phenomena in, 8730*a*.
textiles—see *Textiles*.

**Elastic relaxation.** See *Relaxation*.
**Elastin, amino acid compn. of**, 4708*f*.
fibers of, structure of, 468*c*.

of titanates at ultra-high frequencies, 2877*g*.
of trimethylsilyl group, 8222*i*.
of tungsten(VI) oxide, 8783*i*.
of unimol. film of palmitic acid, effect of adsorption of multivalent cations on, 6038*f*.
of vinyl chloride polymers plasticized with mixed esters of multivalent alcs., P 4895*c*.
of vinyl polymers plasticized with air-blown exts. of mineral-oil fractions, P 5998*h*.
of water vapor to microwaves, 6019*h*.
of zinc silicate phosphors, 2515*g*.

**Electric relays**, spark quenching in d.-c., 3732*a*.

**Electric resistance.** (See also *Conductivity, electric*.)
of alloys, effect of pressure and temp. on, 5678*i*.
of alumina films, 5251*a*.
of aluminum, effect of V on, 533*h*.
of aluminum-Mg-Si and Al-Mg-Zn systems, 4534*i*.
of ammonium dihydrogen phosphate crystals, control of, P 368*i*.
of antimony single crystals, effect of magnetic field on, 5243*f*.
calcn. of, of metals at low temps., 8771*c*.
of carbon, graphitization and, 4072*e*.
of chloroethylene polymer, increasing, P 5642*d*.
of chromium alloys, 2561*c*.
of cobalt-Fe alloy, 4060*b*.
of cobalt-Fe-V alloys, 8338*b*.
contact, between piston ring and cylinder wall of running engine, effect of lubricating oils and additives on, and measurement of, 8658*g*.
of copper-Au alloy, 6915*a*.
of copper-In-Mn alloys, 4618*f*.
of cylindrical conductors in transverse magnetic field, 4069*b*.
of electrolytes, effect of rapid changes in pressure and temp. on, 3692*i*.
of electrolyte, shape, dimensions and disposition of electrode in relation to, 2874*b*.
of elements, temp. and, 2501*c*.
of ferromagnetic Mn-Sb alloy in magnetic field, 7278*g*.

of films of Cu and Cu oxide, 6531*i*.
of gallium, 8781*a*.
of germanium at low temps., 4066*c*, 8288*i*.
of glass, effect of electrolysis on, 6379*f*.
of gold at low temps., 8784*a*.
of gold in Ag, 3683*g*.
of gold-Pt system, 2853*g*.
of helium I and He II, 455*d*.
of insulating couplings for underground cable and pipe lines, 6090*d*.
of insulators at high frequencies, effect of humidity on, 2054*a*.
of iron alloys and Ni, 6961*d*.
of iron, effect of strain aging on, 7881*c*.
of iron for magnetic app., increase by Mo, P 9020*h*.
of iron of high purity, 2559*b*.
of iron-Si compacts, 2562*d*, 9001*b*.
of iron wire during cementation, 6018*f*.
of Isabellin, effect of thermal treatment on, 2149*b*.
of lacquers in calcg. chem. resistance, behavior under stress and porosity, 3213*d*.
of lead sulfide contg. Pb, 4532*i*.
of magnesium compds. with Pb and Sn ($Mg_2Pb$ and $Mg_2Sn$), 475*a*.
magneto-, in Bi, 10*g*, 4066*f*.
of manganese, 6555*h*.
of manganese-Ni alloy in magnetic field, effect of ordered phase on, 1231*b*.
measurement of, app. for, 1125*f*.
of contact and resistance materials, standards for, 4615*g*.
of lubricant film, app. for, 4842*c*.
of phenolic resins, 3229*h*.
of plasticized polyvinyl chloride, 2465*f*.
of rubber and rubberlike materials, 4788*b*.
of sheet plastics, 9521*i*.
of metal films, 2836*c*, 6026*c*, 8771*e*.
of metallic solid solns., 2836*d*.
of molybdenum, 4901*d*.
of nickel electrodeposits, 2100*i*.
of nickel oxide and $SrTiO_3$, effect of $Li_2O$ and La ion, resp., on, 6015*h*.
of perchloric acid in aq. soln. and solns. contg. Pb, 4929*h*.
of petroleum shales, detn. of connate water by, 2757*h*.
of platinum foil, effect of atm. on, 6481*g*.
of polishing (electrolytic-) cell, anode surface and, 2522*e*.
of psilomelane and pyrolusite, crystal structure and, 1063*i*.
ratio between a.-c. and d.-c., for Cu, iron and manganin, 5679*g*.
of rubber, and its measurement, 1207*i*, 8722*h*.
of rubber (ebonite) surface, in light, effect of light-absorbent pigments on, 8729*f*.
of rubber, effect of stearic acid adsorption by C blacks on, 1599*h*.
of rubber (Na-butadiene) filled with channel black, 8188*c*.
of rubber (S-polymer), 5988*e*.
of rubbers vulcanized at high pressures, 4888*f*.
of selenium (annealed and crystd. in amines), 459*f*.

arsenic, from arsine, 8904*i*.
as metal-metal oxide O electrode, 8904*g*.
properties of $As_2O_3$ and, 8905*b*.
battery, from coated sheets, P 7360*d*
bismuth, in pH detn , 8900*ac*.
calomel reversible, P 8290*e*.
carbon, P 509*b*, P 7359*e*.
cyclone scrubber for elimination of tar fog from manuf. of, 4405*f*.
production in lab. furnace, 8899*d*.
purification of, 5336*i*.
from rubber, P 5092*f*.
from carbon (active), 5572*g*.
carbon for, ash removal from coal for 1940*h*.
carbon for, from coal, 5927*d*, 375*f*.
in cells with solid electrolytes, C and Pt as, 7351*e*.
ceric-cerous, temp. coeff. of, 4961*b*.
complex with unsolvated ion, energy-distance curve of, 5315*c*.
condenser, P 509*i*.
corrosion-measurement reference, half-cells as, 6092*e*.
cylindrical and plane, electrolyte resistance and, 2874*b*.
depolarization (electrolytic) of—see *Depolarization, electrolytic*.
direct-current amplifier with resistance, for pH measurements, 6525*f*.
dropping-Hg, holder for, 4056*d*.
dropping-Hg, Hg compd.-tube formation on, 48*g*.
dropping, polarographic studies with—see *Polarography*.
elec. capacity in $Na_2SO_4$ soln., effect of org. compds. on, 5316*c*.
elec. double layer on ideal polarized, thermodynamics of, 1625*i*.
elec. double layer on polarized, 2101*d*.
for electrolytic cells, P 1666*b*.
electron, in liquid $NH_3$, 1270*i*.
electron-tube, P 1274*e*
coating of, P 6529*a*.
for high-pressure discharges, P 7840*d*.
make-alive, P 2518*d*.
from Pt-W alloy, P 6530*a*.
electroplated, spectra of, 4090*h*.
for ethyl ether, 2075*h*.
furnace, for glass making, P 6386*c*, P 8632*i*.
for melting scrap metal, etc., P 509*a*.
Söderberg system of, 4959*e*.
getters for, 2877*b*.
glass, P 4441*b*.
chem. durability and voltage anomalies of, 3728*a*.
*glass*, glass for, 827*d*.
in pH detn., 8255*d*.
for pH detn. in blood, 4316*b*.
pH response of, 6051*f*.
protective devices for, 6008*i*.
theory of, 4960*i*.
thickness of inhibiting films on, 4083*i*.
for titration of weak org. acids in nonaq. solns., 59*e*.
for heat-treating app., P 4151*c*.
holder for, for setting of micro-spark gap, 2541*a*.
hydrogen, concn. of dissolved H and, 7790*g*.
effect of ultrasonic waves on potential of, 7301*d*.
mechanism of overvoltage at, 8284*h*.
potential in org. solvents, 8907*hi*.
-ion complexes in electrode process, energy *vs* distance in, 4149*c*.
for ionization chambers, P 5357*f*.
iridized, polarization of, 2521*i*.
iron and Hg, detn. of Townsend coeff. in discharge tube with, 6906*h*.
lead-in, P 3164*f*.
lead, in polarography, 4149*f*.
manuf. of, 8899*b*
mercury-Hg(I), phosphate, 5677*a*.
mercury multicapillary tube, in polarography, 8946*f*.
mercury, O reduction at, 8912*f*.
movable, for study of gas discharges, 6905*i*.
overvoltage on—see *Overvoltage*.
piezoelec. crystal, P 3735*a*.
platinum, automatic recording in polarography with, 7355*f*.
polarographic analysis of fused salts with dipping solid, 8947*b*.
reactions of U(VI) U(IV) system at, 8270*i*.
platinum dipping solid, and its use in polarography, 8946*i*.
polarization of—see *Polarization, electrolytic*.
polarography with solid, 8947*d*.
polarography with solid Pt, Ag or amalgamated, 8946*f*.
porous, for electrolytic cells, P 6097*e*.
potential—see *Potential, electric*.
for potentiometric titration of thiosulfates, 6934*e*.
pretreatment of, spurious counts in Geiger counters and, 8853*d*.
quinhydrone, in analysis of acid mixts., 5696*a*.
reactions at, kinetics of, 2523*a*, 4931*e*, 6893*h*.
rectifier, app. for making contact with Se, P 6529*e*.
from CuO, P 2525*g*.
electroforming of, P 2526*d*.
liquid treatment of Cu-oxide, P 4590*a*.
from Se, P 2525*h*, P 2526*ae*.
Se counter, P 2526*b*.
salt-bath, P 3734*c*.
prevention of corrosion of, P 4153*g*.
replenishment of, P 4154*a*.
sealing of, in capillary tubing, 3665*f*.
selenium, heat-treatment of, P 5682*e*.
semicond. of liquids and, 8780*d*.
silver-$Ag_2C_2O_4$, 2101*g*.
silver-$Ag_2O$, photoelectrochem. processes on, 2503*f*.
single, effect of temp. on potential of, 7836*f*.
sodium, shale barriers as, 2757*g*, 3177*f*.
spacing of, effect on current efficiency, 1270*e*.
spark-plug, P 1712*b*.
spark-plug, from sintered precious metals, P 7403*a*.
spectrochem. - analysis, porous - cup, 8945*b*.
spectrographic C, purification of, 3732*b*.
spectrum from elec. arc, between Pt, 40*a*.
standard, container for, P 6097*f*.
storage-battery, Ca-Pb-Sn alloys for, P 1665*b*.
expander for, P 8920*f*.
from Pb (sponge) or $PbO_2$ in coke, etc., P 8292*a*.
of light metal coated with Pb, P 4590*f*.
of Ni and Cd, 954*e*.
paste for, P 826*f*.
reconditioning of, P 957*a*.
tungsten, uniting to backing member, P 5001*f*.
vapor jets from, production by arcs and sparks, 1664*b*.
vibrating, in polarography, 4*i*.
voltage required by pointed and spherical, to ignite gases, 407*d*.
for welding, P 1308*i*, 6561*d*, P 6565*f*.
basic - coated, deep - penetrating, 4208*c*.
borax in coating of, 7401*d*.
coatings for, 8342*h*, 8630*a*.
covered with slag-forming mixt., P 5002*h*.
coverings for, 8342*c*.
effect of Mn-contg., on health, 6561*e*.
effect of various elements in coating of, 4208*a*.
effect on impact and tensile strength of welds, 553*a*.
effect on N and O, 987*a*.
by elec. resistance, 8342*e*.
electron-emissive coating for, P 6566*c*.
fumes from coatings on, 9017*e*.
function of coatings of, 1707*c*.
German, 4208*b*.
for hard-facing, P 6565*d*.
for high-strength steels, 6963*e*.
of light metals, P 2924*b*.
N absorption by welds and, 9017*c*.
from N-contg. Cr-Ni steel, 2912*i*.
of nonferrous metals, coating for, P 4212*f*.
nongassing Fe-Mn for, P 3344*c*.
plasticity of ceramic coatings for, 8628*a*.
powders for, measurement of particle size and surface area of, 6883*i*.
self-starting, P 1308*h*.
silicone-resin coatings for, P 7896*e*.
standards for, 4614*i*.
for use under $H_2O$, P 7405*e*.
of zinc on Pt, prepd. by sublimation, 5314*i*.
zinc-ZnO, photoelectrochem. process at, 2858*h*.
**Electrodialysis**. See *Dialysis*.
**Electrodynamics**, quantum, application of renormalization of charge and mass to divergences in, 5277*d*.
quantum, interaction of H-like atoms with radiation field and, 5659*h*.
**Electroendosmosis**. See *Osmosis*.
**Electroforming**. See *Electrodeposition*.
**Electrokinetics**. (See also *Electrophoresis;* and "electro-" under *Osmosis*.)
of antibiotics, effect on action, 1458*h*.
of capillary systems, 7290*h*.
of phase boundary, 3265*g*.
potential—see *Potential, electric*.
**Electrolysis**. (See also *Electrodes; Oxidation; Reduction;* and such headings as *Copper, metallurgy of;* also various substances commonly electrolyzed commercially as *Sodium chloride;* and the electrolytic products, as *Chlorine* and *Sodium hydroxide*.)
in acetic anhydride, 2876*f*.
analytical, servo instrument for, 5647*d*.
app. for—see also *Cells, electrolytic*.
app. for, for scale prevention in water containers, P 509*e*.
of aqueous solns., P 8918*g*.
basic-salt colloidal soln. formation during, 5675*h*.
bipolar, app. for, P 6098*a*.
books: Electrolytic Reactions, 1432*b*; Diafragmy dlya elektroliza vodnykh rastvorov, 2524*d*.
at controlled potential, analysis by, and uses of, 8946*e*.
convection (natural) in, 4584*i*.
corrosion—see *Corrosion*.
current thermal variations in, 5676*a*.
deburring of laminated magnetic cores by, P 8919*c*.
electrode processes in, 7351*e*.
of fused salts, current efficiency in, 949*i*.
in glass, 6379*e*.
with high-frequency current, 6520*c*.
internal, in analysis, 8946*d*.
in Cu detn., liquid amalgams in, 7863*g*.
with protective films, 8285*d*.
Sn detn. in Sn concentrates by, 8956*h*.
of keratin-water system, 3689*a*.
Kolbe synthesis by—see *Kolbe's electrochemical reaction*.
with mercury-cathode cell, 7354*c*.
microapp. for, 6525*a*.
output and work of, 3725*h*.
polishing by—see *Polishing*.
quinoline salt for, P 5682*c*.
restoration of corroded Ag-Cu alloys by, 5679*e*.
reversed-current, P 7838*i*.
sepn. of isotopes and metals by, P 4963*e*.
by silent discharge, 8910*d*.
of slightly sol. salts, 8905*d*.
in solid intermetallic phases, heteropolarity and, 6136*e*.

stray-current, 6092*f*.
tin-plate stripping by, P 1065*g*.
ultramicroscopy of, of $CuSO_4$ solns., 950*g*.
water transference by, membranes for detn. of, 8245*a*.
**Electrolytes**. (See also *Acids; Amphoteric substances; Bases; Conductivity, electric; Mineral elements; Osmosis; Salts; Solutions*.)
in blood plasma and brain, electroshock-seizure thresholds in adrenalectomy in relation to, 6304*i*.
book: Conductimetric Titrations of Mixed, 2126*h*.
in brain after cerebral concussion, 5111*f*.
coagulation of colloids by—see *Colloids*.
colloidal, diffuse ionic layer in relation to lamella micelles in aq., 6886*i*.
effect of salts and chain length on critical concn. of, 20*a*.
effect of temp. on cond. and crit. concn. of, 2071*d*.
effect on bacteria, 9143*e*.
elec. cond. and osmotic activity of, 20*c*.
properties of, 6887*a*.
Na triisopropylbenzenesulfonate as, 6041*e*.
structure of, 7780*f*.
condenser—see *Electric condensers*.
diffusion of, into nerve fibers, 4744*a*.
diffusion of strong, concn. differences from, and effect of glass diaphragms on diffusion rate, 8773*g*.
diffusion of, through org. membranes, 6480*i*.
dry-cell—see *Cells, voltaic*.
effect on anthraquinone vat dye migration and solvation, 7232*c*.
on color value of enamels, 9406*g*.
on crit. concn. and solubilization of dimethylaminoazobenzene, Orange OT and *trans*-azobenzene in detergent solns., 4876*c*.
on crit. micelle concn. of soaps, 2823*h*.
on elec. cond. of aq. dodecylammonium chloride, 8810*d*.
on grinding of refractory materials, 5562*b*.
on naphthenic emulsions for defatting hides, 6447*i*.
on periodic ppts. of Ca phosphate in agar gels, 7788*g*.
on reaction between iodide and persulfate, 8236*f*.
on saponification of glycerides in emulsions, 8795*c*.
on stability of nitrocellulose lacquer emulsions, 5607*a*.
on stability of S sols, 4926*d*.
on virus-host cell combinations, 1482*i*.
elec. cond. of, 6892*d*.
app. for measurement of, 5234*d*.
detn. by difference of internal resistances, 7302*c*.
effect of rapid changes in pressure and temp. on, 3692*i*.
elec. cond. of strong, theory of, 4544*b*.
extracellular depletion of, effect on brain electrolyte pattern and electroshock seizure threshold, 5849*b*.
flow between surfaces in close proximity, 4927*a*.
glass as, in e.m.f. measurements on alloys, 6092*a*.
hertzian-wave absorption by, 6081*c*
imbalance, effect on adrenal gland, 7102*h*.
interactions in, 7301*e*.
ionization of—see *Ionisation, electrolytic; Ions, electrolytic*.
ion migration in counterflowing, as basis for electrochem. exchange process, 6091*f*.
long-chain, dimensions of charged mols. in, 6050*e*.
properties in $H_2O$ mixts. with org. solvents, 7303*d*.
solubilization of polar-nonpolar substances in solns. of, 6041*c*.
mixts. of, activity coeffs. of, 6048*h*.
mixts. of, refractive index of, 6049*e*.
in moving-boundary systems, 4082*f*.
nonpolar-polar org., physiol. effects of, 2325*e*.
nonstationary phenomena in, 4544*a*.
osmotic coeffs. of strong, calcn. of, 4929*i*.
oxidation-reduction reactions in solns. of, 409*s*.
paraffin-chain, high-field conductance of, 7836*b*.
partition between cells and surrounding [illegible], 7107*d*.
partition between liquid and solid phases, 6885*i*.
penicillin G as, and colloidal electrolyte, 4926*i*.
permeability to—see *Permeability*.
for polarographic detn. of As-subgroup cations, 7377*b*.
poly-, 1626*b*, 7785*g*, 8242*b*.
electrostatic interaction with simple electrolytes, 4078*f*.
viscosity of, and mixts. with simple electrolytes, 7299*c*.
viscosity of solns. of, ionic strength and, 7783*c*.
$H_2O$-insol., from BuBr and 4-vinylpyridine polymers, 4892*e*.
pressure-temp.-vol. relations in, 7298*c*.
properties of, 2491*d*, 3268*i*, 5265*d*, 6892*b*, 8810*fgi*, 8811*b*.
properties of, and elec. cond. of long chain electrolytes in aq. MeOH, 1243*i*.
properties of, degrees of dissocn. and, 4544*f*.
properties of strong, extrapolation of, 7298*i*.
reaction of org., with proteins, 3050*d*.
resistance of, electrode dimensions, disposition and shape in relation to, 2874*b*.
rotation in magnetic field, 4066*b*.
salting-out by—see *Salting-out*.
in serums, removal or replacement of, P 3153*h*.
solid, piles with, 7351*d*.
solid, potential of piles with, 8914*e*.
solid, potential of piles with (electrodes given in abstract by mistake), 6020*d*.
solubilities of strong, calcn. of, 8805*c*.
soly. in multicomponent systems, calcn. of, 2844*c*.
of storage batteries—see *Storage batteries*.
in sulfur dioxide (liquid), 8935*g*.
theory of concd. solns. of strong, 6892*e*.
thermal diffusion of, 5265*b*.
thermal diffusion potentials in nonisothermal systems of, 6492*h*.
thermal properties of, Debye-Huckel theory and, 7317*h*.
thermodynamic properties of, in formamide, 470*h*.
ultrasonic-wave absorption by, 7765*a*.
ultrasonic waves in study of, 7301*b*.
in urine, diet in relation to adrenocorticotropic hormone effect on, 7098*f*.
in edema of various origins, 4758*b*.
in hepatic cirrhosis, 4758*d*.
voltaic cells with solid and molten, 8288*e*.
weak, in moving-boundary systems, 8808*c*
for zinc-anode batteries, P 7360*d*.

magnetism and, 4941*e*.
in 7-methylene-1,3,5-cycloheptatriene, 6918*g*.
in NiAl crystals, 6030*i*.
in nonbenzenoid hydrocarbons, 5650*i*.
periodic system and, 6014*h*.
polarity of aromatic hydrocarbons, hydroxy compds. and acids in relation to, 2093*a*.
in quinones and quinonoid compds., 4954*h*.
in solids, 931*i*.
spectra and prediction of, 3715*d*.
in styrene derivs., 3293*g*.
from copper ($Cu^{64}$), ratio to no. of positrons, 1259*e*, 4583*f*.
cosmic-ray, 4103*c*, 4558*e*, 4943*c*, 6504*acf*.
in bursts and showers, 6504*d*.
energy of, 2859*b*, 5284*b*.
ionization by, 4092*f*.
production in showers in Pb, 8848*h*.
showers of, at high altitudes, 4093*i*.
in stratosphere, 4557*h*.
counters for—see *Counters*.
detection of, in photographic emulsions, 8921*f*.
diffraction of, and app. therefor, 1256*h*.
diffuse background in, 4556*d*.
flint-glass films as film supports in,
*diffraction of*, by $C_2Cl_4$, hindering potential barrier and, 4527*e*.
high-temp. furnace for study of, by films, 7323*h*.
internal rotation and, 8880*c*.
by metals, polishing for, 8910*a*.
photography with, 8259*b*.
in steel analysis, 7397*b*.
in study of structures of crystals and mols.—see *Crystal structure; Molecules*.
surface examination and, 4939*g*.
diffusion (ambipolar) of ions and, 4091*g*.
diffusion in He, measurement of, 6504*i*, 8774*g*.
effect on energy levels and thermionic emission of oxide cathode coatings, 934*c*.
effect on incident particles, 4559*c*.
elec. conduction by, thermomechanics of, 5250*d*.
electrodes, in liquid $NH_3$, 1270*i*.
emission const. for, 481*cd*.
emission (delayed) of, from cathode in counter operated above plateau, 4945*h*.
emission of—see also *Auger effect*.
emission of, 5659*d*.
and band overlap therein, 3704*i*.
from Ba-Sr oxide cathodes during space-charge-limited operation, decay of, 4095*d*.
from $B_2O_3$ bombarded by K ions, 1256*f*.
by $Cs_2O$ photocathode, 7767*f*.
by light—see *Photoelectric effect*.
from metal crystals, 6492*ef*.
by Mo, 3758*d*.
from oxide-coated cathodes, 4095*d*, 4560*a*, 8856*i*.
by oxide-coated cathodes in gaseous conduction devices, 4092*h*.
by oxide-coated Ni cathodes, 4091*c*.
emission (secondary) of—see also *Matter effect*.
emission (secondary) of, 4101*f*.
from Sb-Cs cathodes, 3704*g*.
from conducting films of $SnO_2$, 4092*a*.
from ionium, 2859*d*.
in mol. gas discharges, 4941*i*.
from Mo and Ni by action of neutral atoms of Hg and K, 4100*h*.
from solids, 5660*g*
emission (simultaneous) of 2, in decay of $Rb^{87}$, 8867*f*.
-emitting electrodes—see *Cathodes; Electrodes; Filaments*.
energy levels or states of, in conjugated mols., 3713*ab*.
effect on dielec. const. of phosphors, 8893*i*.
electromagnetic shift of, 4135*a*.
of org. mols., 1653*f*.
in simple crystal models, 4092*g*.
energy loss by, without light emission in (Zn, Cd)S, 8894*g*.
energy of, in Al, 4131*a*.
in hydroquinones and quinones, 6524*g*.
in metals, calcn. of, 8784*g*.
energy of mobile, in graphite crystallites, 2484*d*.
energy of photo-, emitted from semiconductors exhibiting photoelec. effect, 482*e*.
energy of photo-, from As, Sb and Bi, 8257*h*.
energy (proper) of, 6905*a*.
energy-range and other relations for, 8851*e*.
energy-range relations, 2859*c*.
equations of motion of, 4554*i*.
exchange or transfer of, between dihydrodiphosphopyridine nucleotide and O, esterification of inorg. phosphate coupled to, 6256*b*.
exchange or transfer of, during HCl secretion by stomach, 3506*i*.
-exchange polymers, 5263*c*.
excitation energy of, transfer between mols., 5667*d*, 6079*i*.
in ferromagnetic crystals, spin-inversion of, 7767*h*.
in field of neutral atom, continuous wave function of, 4097*c*.
gas—see *Electron gas*.
gyromagnetic ratio—see *Gyromagnetic ratio*.
from hafnium ($Hf^{176}$), 4124*a*.
heavy—see *Mesotrons*.
history of study of, 1255*b*.
in hydrocarbons (unsatd.), 7279*g*.
interactions of, in crystals, discontinuities in at. distances from, 6030*g*.
with neutrons, 4096*c*, 6908*d*, 7321*b*.
in nonbonded systems, 6918*e*.
interference in waves of, in small crystals, 8858*i*.
interference patterns of, at high potentials, 7324*b*.
interference patterns of, through thin plates, 6907*a*.
in intermediate compds. and superlattice alloys, 7770*g*.
internal-conversion, 6075*i*.
from $Ba^{139}$, 1260*i*.
calcn. of coeff. for production of, in *K*-shell, 479*d*, 4565*a*, 6073*e*.
measurement of energy of, 7329*g*.
from neutron-bombarded Te isotopes, 8268*a*.
from neutron-bombarded V, 8872*c*.
from Rb, 4120*f*, 4122*f*.
from $Sc^{46}$, 3285*b*.
from $Ta^{181}$, 3285*f*.
from Tm isotopes, 5297*a*.
from iodine ($I^{131}$), 3285*c*.
ionization by, 4092*g*, 6503*c*.
ionization by and energy loss of, 34*d*.
ionization of Hg vapors by, 7324*f*.
ionization potentials of *K*- and *L*-, 4131*d*.
in iron alloys, 8338*a*.
light-emitting, theory of, 483*f*.
magnetism and, 6877*c*.
mass spectra of elementary particles and theory of, 6904*i*.
measurement of pressure of, in C arc, 940*g*.
from mesotron-bombarded elements, 6504*g*.
from mesotron decay, 933*g*.
energy of, 1256*i*, 4943*g*, 7325*f*.
in Mg, time distribution of, 8866*f*.
momentum of, 479*e*.
penetration of, 4104*f*.
mesotron production by, 5293*c*, 8849*a*.
in metals, 8765*c*.
mobility of, effect of pos. ions on, 5660*d*.
moments in atoms, 3703*d*.
motion of, in deflecting field of magnetic dipole, 4095*c*.
neutron (delayed) production by, 4122*h*.
nonlocalized, 2479*a*.
one-, state of diat. mols., 3290*h*.
orbitals—see *Proper functions*.
orbits in solids, number of movements corresponding to, 4916*b*.
orbits of, of N in org. compds., deformation of, 4570*d*, 7340*g*.
org. chemistry and, 470*e*.
-pair production, effect on equation of state of electron gas, 5660*b*.
-pair production, internal, 8855*d*.
pairs, angular distribution of, 3702*h*, 5297*h*.
capture of, from internal conversion, 4950*i*.
emission of 3 photons in annihilation of, 6501*f*, 8854*d*.
passage through boundary layers, 3732*e*.
in periodic system, 916*f*.
photographic emulsion sensitive to, selective development of fission tracks in, 3287*b*.
photographic emulsions sensitive to, calibration of, 8921*f*.
in photographic plates, from x-ray action, 5300*a*.
photographic tracks of, development of, 4560*i*.
photographic tracks of, methods of producing, 4109*e*.
photography of, 51*i*.
photography of, fine-grain emulsions for, 2527*b*.
photomicrographs of tracks of, 3700*g*.
$\pi$-, charges due to, of atoms in cyclic N compds., 4670*e*.
notation showing the position of, 40*e*.
reactivity and structure of dienes and their polymers and, 2017*a*.
steric hindrance because of, in bicyclic unsatd. ketones, 7908*h*.
from platinum ($Pt^{193}$), 37*a*.
polarization of, 6907*a*.
of acrylonitrile, 1594*g*.
reflection-transmission effect in, 3705*f*.
positive—see *Positrons*.
-positron ratio in decay of $Cl^{36}$, 4118*f*.
pressure, gas pressure and, in stellar atms., 6916*c*.
properties of one-dimensional crystal model, 6026*f*.
properties of solids, catalytic activity and, 8251*d*.
in proteins, energy distribution and, 3481*g*.
quantum states and optical transitions of,

in polarons and in crystal color centers, 3717*d*.
radius of, 4953*a*.
range in Al, 8861*f*.
in reflection by metals, 480*f*.
scattering (Coulomb) of relativistic, 1642*c*.
scattering cross sections for, 4098*e*, 8847*e*.
scattering of, 8269*g*.
by Cu single crystal, 6907*g*.
by crystals, Kikuchi envelopes in, 6072*i*, 6073*ab*, 8843*a*.
effect in stellar atms., 5662*c*.
in Au, 6911*i*.
by H atoms, 8849*g*.
secondary, effect in Geiger-Müller counters, 5288*g*.
secondary, in photoelec. conduction, 6074*i*.
shells in mols., 3672*f*.
shells, spectroscopy of, 3701*h*.
in solids, 14*i*.
source of, 3704*e*.
spectral lines and vibratory, 480*c*.
spin states of, ionic structures and the method of, 3672*a*.
states of, in solids, 5659*f*.
stopping effects for, 4099*g*.
in sun's atm., 4134*b*.
synchrotron as generator of, 8850*e*.
from tellurium ($Te^{121}$), 3285*e*.
from tellurium ($Te^{125}$), 486*c*.
from thallium, 4564*e*.
theory (Dirac) of, 5660*c*.
theory of, in org. reactions, 555*i*.
theory of, in quinoline condensation reactions, 8386*f*.
theory of valency—see *Valency*.
tracks of, in contaminated cloud chamber, effect of α-particles on, 7812*d*.
transitions in colored NaCl crystals, 3718*h*.
transitions in precision thermometry, 2501*c*.
trapped, binding energy of, in KCl, 4096*a*.
binding energy of, in NaCl, 1641*c*.
energy levels of, in ionic solids, 5311*d*.
trapping of, in AgCl, 3205*b*.
-trap process in phosphors, 1659*a*, 3720*a*.
traps, infrared stimulation of phosphors and, 7826*h*.
traps, in zinc fluoride phosphors, thermoluminescence and, 8281*g*.
valence, loss in isomeric nuclear reactions, 7332*i*.
normalized wave functions for different states of, 6511*b*.
thickness of atm. of, in metals, 8911*a*.
velocity distribution in celestial gaseous assemblies in radiative equil., 5302*e*.
wave functions of, 2827*d*.
wave mechanics and, 8274*d*, 8862*h*.
waves, properties of de Broglie, 2084*f*.
work function of—see *Work function*.
in zinc, heat capacity and no. of, 4061*a*.

**Electron tubes, Electric discharge devices or Thermionic valves.** (See also *Accelerators; Betatron; Cathode-ray tubes; Cells, photoelectric; Cyclotrons; Electric converters; Electrons; Filaments; Lamps, electric; Rectifiers; Transistor; X-ray tubes.*) P 2518*f*, P 7832*g*.
book: Anwendung der, 4958*h*.
cements for, 2020*h*.
coating of inner surface of, with Ba, P 8284*c*.
double diode and vacuo-junction detectors, Joshi effect and, action of, 2523*i*.
electrodes for—see *Cathodes; Electrodes*.
electronic intensity regulator for H-contg., 942*a*.
electron multipliers, 8259*a*.
α-ray-counting, 4094*f*.
931-A type, as scintillation counter, 6076*f*.
checking linearity of circuit of, 3282*e*.
in spectral analysis, 8297*g*.
fluorescent substances for—see *Fluorescent substances*.
gaseous-discharge triodes, P 956*g*.
gases from metals in, microanalysis of, 5646*e*.
getters for—see *Getters*.
glass for, P 5917*h*.
glass-to-metal seals in, 4823*c*.
laminated envelope structure for, P 2518*c*.
luminescent substances for—see *Luminescent substances*.
for measurement of Townsend coeffs., 6906*e*.
melting points of alloys, ceramic materials and metals for, 49*g*.
molybdenum in, 3758*e*.
painting (electrostatic) of, 2523*h*.
from porcelain, 4439*a*.
for radar, $Cd_2P_2O_7$ phosphor for targets of, P 6518*b*.
raw materials for, sources of, 5708*d*.
review on, 4525*i*.
secondary-electron-emission, BeO on polished electrodes of, 2482*d*.
thyratron contg. H, 4941*f*.
thyratrons in electrolytic polishing of magnetic materials, 5354*h*.
transient (pos.-ion) in Townsend, 4091*g*.

cytochrome oxidase accumulation in chick, 4712*d*.
deformities in chick from biotin and insulin, 8466*e*
dicoumarol effect on liver and spleen of, 761*a*.
differentiation in, of amphibian, 3530*b*.
of ascidian, apyrase activity and, 5124*a*.
physiology of, 5467*a*.
effect of benzopyrene and methylcholanthrene on, 3516*e*.
effect of desoxypyridoxine and vitamin $B_6$ on development of, 6293*g*.
effect of folic acid, 4-aminofolic acid and related substances on chick, 9186*g*.
ephedrine effect on blood sugar in chick, 5868*i*.
erythropoietins in blood plasma from sheep, 8504*d*.
folic acid antagonists and chick, 7097*b*.
genital tracts of chick, effect of bisdehydrodoisynolic acid on, 1474*c*.
glycogen in liver of, effect of decapitation on, 7104*e*.
hemoglobin in human, 3904*g*.
hemoglobin of sheep, 4360*h*.
hemoglobin specificity of cattle, 1850*c*.
hemopoiesis in chick, effect of liver ext. and folic acid on, 3869*a*, 9131*e*.
hypophysis of, adrenotropin production by, 295*d*.
hypophysis of, diabetogenic activity of, 1854*b*.
indicator oxidation in *Triturus*, during development, 3530*f*.
insulin action on chick, effect of adrenal cortical exts. on, 8033*h*.
insulin action on, effect of nicotinamide and α-ketoglutaric acid on, 4776*h*.
insulin micromelia in chick, hypoglycemia in, 3872*b*.
iodine 131 fixation by thyroid of, 7060*b*.
juice, calcification of cell cultures in presence of, 8409*b*.
of *Lymnaea*, 4778*a*.
malformations in, from pantothenic acid deficiency in maternal diet, 2683*a*.
metabolites in, in pigment synthesis, 745*b*.
mitosis and O consumption in brain of chick, effect of acridine compds. on, 7135*g*.
neoplasms in, 1103*i*.
nucleic acids in brain of chick, 3502*f*.
nucleic acids in, during development, 3502*h*.

nutritive requirements of early chick, 5465*c*.
organization in, 4710*g*.
organizer of, 3529*g*.
oxygen consumption of blocked and active cells of, effect of urea, thiourea, phenylthiourea and thiouracil on, 3938*i*.
oxygen consumption of blood of sheep, 7108*f*.
oxygen consumption (total) of, integration from that of tissues, 747*d*.
oxygen starvation of chick, at high altitudes, 9273*d*.
oxygen uptake of *Asterias*, before hatching, 4777*i*.
papillary muscles of heart of, effect of ouabain on, 2318*h*.
phosphatase in membranes of, 5466*d*.
phosphatase in retina of chick, 8495*a*.
phosphoprotein phosphatase in, 5471*h*.
phosphorus distribution in, 3913*h*.
phosphorus 32 incorporation into nucleoproteins and phosphoproteins of sea-urchin, 7063*i*.
potassium equil. in muscles of, effect of temp. on, 4751*f*.
protein metabolism of amphibian, 4389*c*.
reproductive system and comb of chick, effect of sex hormones on, 5478*f*.
respiration by cells of, effect of amino acids on, 2307*c*.
effect of diethyldithiocarbamate on, 2331*f*.
effect of urethan on, 774*f*.
salicylate toxicity to, 6316*e*.
sex differentiation in, effect of hormones on, 5478*e*.
sodium azide effect on frog, 8563*e*.
steroid effect on amphibian, 4388*c*.
sulfonamide effect on *Ambystoma*, 4388*h*.
thyroid development in chick, effect of thyroxine and iodinated casein on, 8482*b*.
thyroid gland of, effect of thiouracil given to mother on, 8543*i*.
thyroid gland of, growth of and accumulation of thyroxinelike and other I compds. in, 8493*i*.
thyroid size and incubation period of, from hens given thyroxine, thiouracil and thyroprotein, 8531*f*.
vitamin A stored by calf, utilization after birth, 9188*a*.
vitamin $B_1$ in hen, 7559*eg*.
vitamin E metabolism between placenta and, 1851*c*.

**Emelista**. See *Cassia*.

**Emeralds**. (See also *Beryl*.)

naphthenic, for defatting hides, effect of electrolytes on, 6447*i*.
paint—see *Paint*.
of paraffin oil and water contg α-mono stearin and Na stearate and their phase sepn , 7725*d*.
of paraffins as water- and weather-proofing agents for fibers, 3623*g*.
of paraffin wax oily stock, prepn. and cryst. wax sepn. from, 5581*e*.
paraffin wax particle size measurement and correlation of gloss and stability of, 9491*f*.
pharmaceutical—see *Pharmaceuticals*
photographic—see *Photography*.
polymerization in—see *Polymerization*
of polymers, coagulation of, P 5635*g*.
of polysulfides, P 4876*i*.
saponification, 8795*a*.
silicon trihalide-, triethoxy deriv - of tripolyglycol ester-emulsified oil, I 9494*h*.
size—see *Sizes*.
spray—see *Sprays*.
stability of, in metal cleansing, 1705*a*
starch oxidation products for, P 7244*i*
structure of transparent, 18*c*.
tar, manuf. of, P 5171*h*.
for textile printing, from pigment dispersion in rubber soln and urea-HCHO protein dispersion, P 1990*h*.
theory of, 5250*f*.
of thermosetting plastics, P 6000*e*.
thickening solns for, P 4898*h*
of thiols (aromatic) for butadiene styrene polymer improvement, P 7258*b*
type of, elec. current in detn. of, 7290*e*.
factors affecting, 2072*a*
wetting of container and, 7776*b*.
from unsatd. polyesters with vinyl monomers, P 7264*f*.
vinyl acetate-polymer, P 7267*a*.
vinyl acetate-polymer, contg chromates, P 6001*d*
vinyl halide-polymer, P 5635*d*.
of vitamins and oil with glycerol, P 3572*g*.
water detn. in, 9374*e*.
waxes, sprout growth inhibition on potatoes with, P 7160*d*.
of waxes with salts of abietate maleic anhydride resin, P 9495*a*.
**Enameled ware**, acid resistance of, detn of, 8115*b*.
cleaning compns. for, P 3640*c*.
defects in, 1934*d*.
iron for, detn. of Ni on, 9406*i*.
sheeting, P 5566*g*.
stresses (residual) in, 830*f*.
welding of, 987*c*.
**Enameling**, 3585*f*.
of aluminum alloy, 7205*d*
app for, of thin sheets without impairing tensile strength, P 7240*d*.
of cast steel in chemical-equipment industry, 9407*b*.
fluorosis of farm animals from, 3508*h*.
furnaces for, instrumentation for measuring temp. in, 6802*c*.
furnaces for, operation of gas-fired, 3585*h*.
glycerol in, 9482*c*.
iron oxide pigments for, 8697*d*.
iron *vs.* steel for, 7205*e*.
of light metals, P 5001*g*.
of nameplates, 372*h*, 2302*h*.
oven for, conversion from producer-gas heated to coke-oven gas, 6394*i*.
steel for, 7650*i*.
steel for, pretreatment for, to avoid gas formation, P 1936*d*.
of titanium steel, 1934*d*, 5917*d*, 7206*a*.
**Enamels**. (See also *Coating(s); Glazes; Lacquers; Paint.*) P 6804*e*.
adherence of blue sheet-Fe ground coats, detn. of, 5165*b*.
for aluminum, 7205*d*, 7656*h*.
color of, effect of electrolytes on, 9406*g*.
in corrosion protection of ferrous metal, 6962*h*.
defects in, detection of, 3579*e*, 6802*e*.
finish of, evaluation of, by replicas, 5165*c*.
frits for—see *Frits*.
history of, 9406*g*.
for light metals, P 5001*g*.
lithium compds. in, 1544*a*.
mat-surface, P 5920*d*.
for metal-film resistors, P 4442*h*.
mottled, marblelike, 6802*c*.
for nails (finger and toe)—see *Nails (finger and toe)*.
opacification of, P 5566*f*, P 6804*e*.
opacifiers in, antimonates as, 2392*g*
pigments (Fe oxide) for, 5201*c*.
for railroad-signaling equipment, 3585*f*.
reaction with Fe, 2749*b*.
removal of, 5564*g*.
solder glasses, 3162*f*.
surface tension of, 1544*a*.
of teeth—see *Teeth*.
texture of, detn. of, 7656*h*.
titanium, contg. Li compds., 7206*b*.
decolorization with $MoO_3$, 2749*a*.
effect of $Li_2O$, $K_2O$ and $Na_2O$ on, 4439*c*.
review on, 2749*a*.
for titanium steel, 5917*d*.
weather resistance of, 2392*h*, 4430*b*.
**Enanthaldehydo**, acylhydrazonest, 6972*beh*, 6973*bei*.
compds. with amine bisulfites, 3350*c*.
decompn. of, 7-tridecanol formation in, 1715*d*.
formation in autoxidation of peanut oil, 5972*i*.
hydrazone, reaction with $N_2H_4.H_2O$ (attempted), 123*c*.
identification of, 3003*c*.
3-methoxypropylene cyclic acetal—see *1,3-Dioxolane, 2-hexyl-4-(methoxymethyl)-*.
polymerization of, 3791*a*.
in racemization of, 2-methyl-1-butanol, 4215*c*.
rancidity and, 3217*c*.
reaction with HCHO, 6576*a*.
reaction with olefins, 4637*b*.
solubilization of, with Na secondary alkyl sulfates, 466*a*
system: $C_7H_{15}OH$–, f.p. compn. of, 5740*c*.
**Enanthaldehyde, α-bromo-**, diethyl acetal, 3791*a*
——, **α-hydroxy-**, oxidation-reduction of, 3790*i*
**Enanthamide**, manuf. of, P 2233*d*, P 3028*a*.
prepn on, 3774*e*.
reaction with 5-chloro- and 3,5-dichlorosalicylaldehydes, 6182*c*.
reaction with cinnamaldehyde, 2600*g*.
——, **α-amyl-α-butyl-**, 568*f*.
——, ***N*-(5-chlorosalicylidene)-**, 6182*d*.
——, ***N*, *N'*-cinnamylidenebis-**, 2600*g*.
——, **α,α-diamyl-**, 568*f*.
——, ***N*, *N'*-(3,5-dichlorosalicylidene)-bis-**, 6182*e*.
——, **α,ε-dimethyl-**, 2586*b*.
——, **α-(*N*-ethylacetamido)-*N*, *N*-dimethyl-**, P 251*b*.
——, **α-ethylamino-*N*, *N*-dimethyl-**, P 251*b*.
——, ***N*, *N'*-(3-propylpropylidene)bis-**, 2601*a*.
**Enanthic acid** (*heptanoic acid*), adsorption by active carbons from phenol-aldehyde resins, 6037*c*.
adsorption by active C, structure of C and, 7289*d*.
antibacterial activity of, 3879*h*.
benzylamine salt, 3351*f*.
erythrocyte penetration and hemolysis by, 8502*b*.
ester (tri-) with 2-amyl-2-(hydroxymethyl)-1,3-propanediol, 6578*c*.
ester with 2-chloroallyl lactate, P 5037*a*.
ester with methyl salicylate, P 4701*i*.
ethyl ester, formation from ethyl oleate oxidation, 3612*a*.
ethyl ester, kinetics of, 7418*e*.
fatty-acid adsorption by, effect of ultrasonic waves on, 7774*g*.
foams, 2841*h*.
identification of, as its 2-(1-naphthylmethyl)-2-thiopseudourea salt, 5654.
manuf. of, P 2632*g*.
methyl ester, 2590*d*.
and 1-methylheptyl ester, formation in pyrolysis of 2-octanol nitrite, 3779*b*.
from 5-oxoenanthic acid, 3792*c*.
phys. constants of, 2950*b*.
potassium salt, solubilities of alcs. in, 6041*d*.
prepn. of, 3774*e*.
surface tension of aq., 8797*f*.
**Enanthic acid, α-acetyl-**, ethyl ester, cyanoethylation of, P 4689*h*.
——, **α-acetyl-α-(2-cyanoethyl)-**, ethyl ester, P 4689*h*.
——, **α-acetyl-α,ε-dimethyl-**, ethyl ester (omitted from abstr.), 7911*f*.

—, α-acetyl-ζ-dimethylamino-δ-oxo-, ethyl ester, oxalate, 7432g.
—, α-acetyl-ε-methyl-, ethyl ester (omitted from abstr.), 7911f.
—, α-amino-, DL-, 4223b.
—, ζ-amino-, lactam—see *Heptamethylenimine, 2-oxo-*.
—, α-amino-α-amyl-, 1323a.
—, α-amyl-α-butyl-, 568h.
—, ζ-benzoyl-, and semicarbazone, 3366g.
—, γ-benzoyl-γ-ethyl-, 2932a.
—, γ-benzyl-γ-ethyl-, 2932b.
—, α-(carboxymethylmercapto)-ζ-phenoxy-, and diethyl ester, P 7504g.
—, ζ-chloro-, *p*-phenylphenacyl ester, 109g.
—, ζ-(chloroformyl)-α-methyl-, ethyl ester, 1381d.
—, ζ-chloro-ε-oxo-, ethyl ester, 7905a.
—, α-cyano-, hydrazides and other derivs., 4222f.
—, α,γ-diamino-, and hydrochloride, 5005d.
—, α,α-diamyl-, 568h.
—, α,γ-dibenzamido-, 5006b.
——, α,α-dimethyl-, 2-diethylaminoethyl ester, P 3443h.
——, α,ε-dimethyl-, 1335c, 2586b.
——, γ, δ(and γ,ε)-dimethyl-, 1373i.
——, α,α-dimethyl-ε-oxo-. See *Geronic acid*.
——, β-ethyl-, triglyceride, metabolism of, 6165g.
——, β-ethyl-γ-methyl-, 1374b.
——, α-hydroxy-, 3791b.
——, ε-hydroxy-, ethyl ester, 2176a. hydrazide and ε-lactone, 8358h.
——, ε-hydroxy-α,γ-dioxo-, ethyl ester, 1406g.
——, γ-hydroxy-β-methyl-, derivs., 4254f.
——, γ-hydroxy-ε-methyl-, γ-lactone, 3786e.
——, β-hydroxy-β-methyl-δ-oxo-, β-lactone, P 1055i.
——, β-hydroxy-β-methyl-ε-oxo-, β-lactone, P 1056b.
——, ζ-mercapto-, esters (mixed), P 4290d.
—, α-methoxy-, and bismuth salts, 2488i.
——, β-methyl-γ-oxo-, 4254g.
——, γ-methyl-β-oxo-, (+)-, methyl ester, 6160d.
——, ε-methyl-γ-oxo-, and semicarbazone, 6625b.
——, ε-methyl-δ-oxo-γ-phenyl-, 2932c.
——, ζ-naphthyl-. See *Naphthalene enanthic acid*.
——, δ-oxo-, reduction of, 3792b.
——, ε-oxo-, 2173f, 2174g.
——, β-oxo-ζ-phenyl-, ethyl ester, 3392i, 3393a.
——, β,β′-oxydi-, P 5037e.
——, β-phenyl-. See *Hydrocinnamic acid, β-hutyl-*.
——, γ-propyl-, 1374b. and triglyceride, 6165d.
——, ζ-thenoyl-. See *Thiophenecaprylic acid, η-oxo-*.
——, thiol-, benzyl ester, hydrogenation of, P 3445c.

**iso-Enanthic acid.** See *Isoenanthic acid.*

**Enanthole.** See *Enanthaldehyde.*

**2-Enanthonaphthone** (*hexyl 2-naphthyl ketone*), 9424f.

——, 5,6,7,8-tetrahydro-, 9424f.

**Enanthonitrile,** phys. consts. of, 2592b.

——, α-amino-β-ethyl-, and hydrochloride, 3409i.

——, α-amyl-α-butyl-, 568d.

——, α,α′-azobis[α-methyl-, decompn. kinetics of, 3354g.

——, α-butyryl-γ-oxo-, 2938f.

——, α,β-diamyl-, 568d.

——, α,ε-dimethyl-, 1335c.

——, β-ethyl-α-hydroxy-, 3409h.

——, ε-methyl-γ-oxo-, and semicarbazone, 6625b.

——, ε-methyl-δ-oxo-γ-phenyl-, 2932c.

——, γ-propyl-, 6165d.

**Enanthophenone** (*hexyl phenyl ketone*), 2,4-dinitrophenylhydrazone, 6991b.

——, 2,5-dimethyl-, 6090g.

**Enanthotoxin,** from *Oenanthe crocata*, 6368b.

**Enanthyl chloride,** α,ε-dimethyl-, 2586b.

——, β,γ(γ, δ and γ,ε)-dimethyl-, 1373i.

——, γ-propyl-, 1374b.

**iso-Enanthyl chloride.** See *Isoenanthyl chloride.*

**Enanthylic acid.** See *Enanthic acid.*

**enantiomers.** See "stereo-" under *Isomers.* (See also *Allotropy; Isomerism.*)

of ammonium acid malate, 8762d.
of crystals, 7770b.
theory of, 6482a.

**Enargite,** 6543d.
of Idaho (Boise Basin), 4981d.

**Encephalartos altensteinii,** lignins in, 2283b.

**Encephalitis,** cholinesterase in blood in, 5857f.
from corneal inoculation of hyaluronidase-treated rabbits, 5857i.
Darvisul in treatment of, 5496h.
post-vaccinal, 3916f.

**Encephalomyelitis,** blood in equine, 7122e.
meningo-, pyribenzamine in beeswax in protection against, 1113c.
virus (mengo) of, 4757de.

**Enchresy,** the term, 1637i.

**Enchytraeidae,** insecticide toxicity to, 2728f.

**Enchytraeus,** control of, 9354a.

**Encyclopedias,** books: Modern Drug, and Therapeutic Index, 1158a; of Chem. Technology, 4791b.

**Endamoeba histolytica.** (See also *Entamebiasis.*)
effect of exts. of *Jacaranda decurrens, Nectandra pichury* and *Simaruba officinalis* on, 8550f.
phosphatase in, 270a.
therapy of infection by, 9265g.

**End body** or **End piece.** See *Complement.*

**Endellite,** of Indiana (Gardner Mine Ridge), 3751d.
the name, 2130b.
thermal analysis of, 8987h.

**Endive,** calcium in, utilization by rats, 288c.
germination of, effect of *Digitalis* ext. on, 5829e.
photosynthesis by, 2281i.

**Endocardiograms.** See *Heart.*

**Endocarditis,** glutathione in blood in, 3093g.
sodium salicylate in treatment of, 1105g.

**Endochin.** See *4-(Quinolinol, 3-hepty-7-methoxy-2-methyl-.*

**Endocrine glands.** See *Glands;* and the specific glands, as *Adrenal glands.*

**Endocrinology,** books: Essentials of Gynecologic, 3915b; Practice of, 3915b.

**Endoenzymes.** See *Enzymes.*

**Endoethylenecyclopentane.** See *Norcamphane.*

——, 1,2,3,6-tetrahydro-. See *Bicyclo-[2.2.1]-6-heptene-2-carboxylic acid.*

**3,6 - Endomethylenecyclohexane - 1,2-dicarboximide.** See *2,3-Norcamphanedicarboximide.*

theorem of Carathéodory and, 8838*d*.
of thiophene, 6069*i*.
of tobacco mosaic virus, 1461*g*.
transport in thermodynamics, 7317*h*.
of 1,1,1-trifluoroethane, 1656*h*.
of tritium and TH, 476*c*.
of vanadium carbide and VN, 3275*h*.
of vaporization, calcn. of, 8775*g*.
of MeOH, 8765*i*.
of $TaBr_5$, 8224*i*.
of vinyl halides, 4553*c*.
-vol. diagrams, interpretation of states of gas mixts. by, 4914*b*.

**Enuresis**, proteins in blood in, 8050*h*.

**Enynes**. See "acetylenic ethylenic" under *Hydrocarbons*.

**Enzymes**. (See also *Amidases; Amylases; Antienzymes; Carbohydrases; Carbonic anhydrase; Carboxylases; Catalases Coenzymes; Deaminases; Diastases Emulsin; Esterases; Fibrinolysin; Glycolysis; Growth substances; Guanase, Histaminase; Kynureninase; Lipases, Lysins; Nucleases; Peroxidases; Phosphatases; Phosphorylase; Proteases, Proteinases.*) 9110*d*.
accessory, in butanol and acetone manuf. from starch or sugars, P 1148*c*.
acetylsalicylic acid hydrolysis by, 7983*f*.
acidoproteolytic lactic, 6265*e*.
action of, 2252*d*, 8801*g*.
on air-dried proteins, 9108*g*.
on blood serum vasoconstrictor, 1075*i*.
bromomethane effect on, 2338*b*.
on cardiac glycosides, 4679*i*.
kinetics of, 9100*g*, 9211*i*.
mechanism of, 9125*b*, 9160*h*, 9162*a*.
mol. structure and, 7988*h*.
prevailing direction of, as index of drought resistance in cultivated plants, 728*d*.
on rickettsia, 1455*h*.
on vitamin $B_{12}$ and pteridine, 9196*b*.
adaptation by, 1447*e*.
adaptive, formation in mycobacteria, effect of various compds. on, 6274*f*.
formation in mycobacteria, streptomycin effect on, 714*d*.
uronic acid utilization by *Escherichia coli* and, 4333*i*.
adsorption by yeast, 8003*d*.
adsorption of bacterial, by whiting, 5448*i*.
adsorption sepn. by salting-out, 1624*f*.
amino acid liberation from raw and heated casein by, 1819*b*.
in anaphylaxis and immunity, disease treatment and, 1854*i*.
in aorta, 3906*f*.
aspartic acid oxidation by, 3051*g*.
assay of, 4425*g*.
in auxin formation in oat coleoptiles, 3071*b*.
of bacteria, 2277*i*.
effect of bacteriophage on, 1831*c*.
genetic and chem. factors in synthesis of 9158*g*.
BAL effect on metal contg., 6739*e*.
bates—see *Hides*.
benadryl degradation by tissue, 7524*d*.
of blanched fruits and vegetables, nutritive value and quality in relation to, 9320*e*.
of blood, 5811*h*, 6268*c*.
in blood serum in perforated peptic ulcers, 8522*b*.
books: Chemistry and Technology of, 709*i*; Les diastases, 1074*i*; Wasserstoffübertragende Fermente, 1075*b*; Untersuchungen über Kohlenhydrate and, 1432*b*; La recherche de l'unité en Biologie, 5815*e*; Schwermetalle als Wirkungsgruppen von Fermenten, 6268*h*; Anderson's Respiratory, 6683*a*; Vitamine, ormoni e fermenti, 7197*g*; Fermente, Hormone, Vitamine und die Beziehungen dieser Wirkstoffe zueinander, 7531*b*; Wirkstoffe, Fermente, Vitamine, Hormone, 9125*h*.
brewing problems, 2365*f*.
in canned foods, effect of processing, time and temp. on, 9275*g*.
of carbohydrate metabolism, effect of Na *p*-dimethylaminobenzenediazosulfonate on, 4381*f*.
of carbohydrate metabolism, effect of tobacco on, 8407*a*.
carbon dioxide fixation by, in α-oxoglutaric acid, 2249*c*.
cell, 7064*b*.
in chemotherapy, 3147*b*.
in clarification of fruit juices, 8069*h*.
in clarification of fruit juices and liquors, 261*f*, 3855*b*.
citric acid synthesis by condensation of acetate and oxalacetate by, 6080*e*.
concn. or drying of, P 4784*c*.
copper, in chloroplasts, 2287*b*.
in corn, effect of steam on, 5875*i*.
cycles of, 259*b*.
cytochrome oxidase activity of prepns. of, measurement of, 9104*a*.
DDT effect on systems of, 5146*c*.
dehalogenation of brominated and chlorinated compds. by, 1815*i*.
development and, in embryos, 5467*b*.
dextran breakdown by, 4307*g*.
digestive, effect of $CS_2$ on, 7577*e*.
2,4-diketo acid hydrolysis by, 705*g*.
disease diagnosis by, 8408*b*.
in dough, inactivation by metal salts, 4781*g*.
effect of drugs, pressure and temp. on, 4717*a*.
exo-, in bacteria in fermentive refining of plant fibers, 724*i*.
fermentation—see *Fermentation*.
from fish entrails, for hide maceration and tanning, P 4881*i*.
folic acid-attacking, 4308*g*.
formation by lampbrush chromosomes, 7150*b*.
formation of, inhibition by arsenate, 2275*b*.
in formation of lignin, 1029*c*.
in fruits and vegetables, 7603*b*.
galactose transformations into glucose derivs. by, 6680*f*.
galacturonic acid liberation from fruit products by, decompn. detection by, 7155*f*.
in gene control of biochem. reactions, 2260*e*.
during germination, 8451*i*.
glycogen breakdown by, 4307*e*.
of glycolysis, inhibitors of, in cancer treatment, 5856*g*.
for glycolysis in tumors, 7575*h*.
glycolytic, in fractions of tissue homogenates, 2652*b*.
gonadotropin inactivation by, 5060*d*.
hematopoietic, from stomach, bivalent cations as inhibitors of, 5430*c*.
hemin, in N fixation by *Azotobacter*, 7172*h*.
histidine active, 722*b*.
histo- and cytochemistry of, 5432*i*.
hormonal effects on, 5467*d*.
in hydrocarbon oxidation by bacteria, 6281*h*.
hydrogen-activating, during insect metamorphosis, fluctuation of pH, buffer capacity and pH dependence of, 2333*d*.
hydrolysis of amidine bonds by, 3790*f*.
hydrolyzing, in laundering, 3203*b*.
α-hydroxy acid oxidation by, from plants, 6267*a*.
3-hydroxyanthranilic acid conversion to nicotinic acid by, 6266*f*.
(*p*-hydroxyphenyl)pyruvic acid inactivating, 4300*d*.
inactivation of, in fruits and vegetables, P 5882*c*.
by heat, 323*c*.
by light in presence of riboflavin, 6264*g*.
3-indoleacetic acid inactivation by, 1465*e*.
industrial, 1146*i*.
inhibition of, as basis for chemotherapy, 8413*a*.
inhibition of, in biol. processes, 7067*a*.
inhibitors, effect on psittacosis virus, 305*h*.
interaction with small ions, 4311*a*.
intestinal, hypercalcemia effect on, 8050*g*.
intracellular distribution of, 1853*e*, 3913*a*.
from kidney, fatty acid oxidation by, 1449*h*.
of kidneys, renal hypertension and, 302*c*.
kinetics and mechanism of processes involving, 7526*a*.
lactic, 718*c*.
lactic-mannitol, action on pyruvic acid, 9358*f*.
liver, action on quinoline derivs., 6267*f*.
in liver tenderizing, P 5512*e*.
of maple and birch saps, 8455*a*.
in melanotic and amelanotic granules of melanomas, 8047*a*.
metallo-, 9123*i*.

metal-protein, prosthetic group of, 6267e.
Michaelis consts. of, with respect to two substrates, detn. of ratio of, 7984i, 9118g.
of microörganisms grown in cold, 5825g.
milk-coagulating, of *Ficus carica*, 11196.
in milk, effect of $H_2O_2$ treatment on, 3115a.
and models thereof, 5813g.
monophenol oxidation by, 2251f.
morphine ester hydrolysis by, 702b.
mucolytic, 2696i, 3094gi, 9222h.
of *Mycobacterium tuberculosis* and other acid-fast bacteria, 4324i.
New York expt. station reports on, 9329a.
nonoxidative, nonproteolytic, 9123a.
in nuclear membranes, 704g.
in organisms during evolution, 8414i.
ovomucoid-digesting, from snails, 3481e.
oxidation and reduction by, 1447e.
oxidation of carotenoids and unsatd. fats by, 8406b.
oxidative, in clover, winter hardiness and, 1084b.
oxidizing—see *Dehydrogenases; Oxidases*.
pancreatic, dietary factor regulating, 2682h.
in hydrolysis of proteins, P 1880e.
in soaking and cleaning textiles, 8711e.
in pancreatic tissue of dogs killed under various conditions, 4746b.
pantothenic acid liberation from biol. materials by, 2249f.
in peaches (frozen), effect on oxidation of thiourea, 7155f.
pectic, fortified with pectin esterase, P 2656c.
pectin-decompg.—see also *Pectase; Pectinase*.
pectin degradation by, prepn. of galacturonic acid by, 5432h.
pectolytic, in wine manuf., 5901f, 6780d.
peptide hydrolysis by, 258c.
phosphate, of plants, effect of 2,4-dichlorophenoxyacetic acid on, 8009a.
phosphorylation by—see *Phosphorylation*.
for photochem. reactions in chloroplasts, 8019i.
pituitrin-destroying, in blood of pregnant women, 1488d.
in placental metabolism, 8509b.
in plants, adaptability and, 4731f.
poisoning, colchicine and colchicine-like reactions as response to, 2678h.
polymetaphosphate breakdown by, 8403h, 8404a.
precursors and activity of, 1083g.
pressor amine formation from amino acids by, 8061a.
propylene glycol effect on, 1070d.
protective against streptococci and bacilli, in urine, 751i.
proteins of, resistance of pneumococci to drugs in relation to, 2673a.
proteins partially decompd. by, and seasoning agents for food, P 9294c.
protein synthesis and, 4710f.
in psychotic states, 5486h.
from pyloric ceca of fish, 1815f.
reaction mechanism of, detn. of, 7987h.
reactions of, long-range forces in, 1479f.
receptor-destroying, effect on pituitary and chorionic gonadotropins, 5474i.
effect on serum inhibitor of hemagglutination, 7120i.
of *Vibrio cholerae*, inactivation by immune serum, 6279g.
of *Vibrio cholerae*, inactivation of gonadotropin by, 1102c.
from *Vibrio cholerae* in influenza treatment, 3511c.
recovery from aqueous solns. and product therefrom, P 1451c.
reduction of retinenes to A vitamins by, 5837b.
regulation of, 9100g.
in reproduction, hormones and, 5467c.
respiratory, in animal tissue, 5059f.
blocking by thiocyanate in relation to toxic action, 7582e.
inhibition by derivs. of sulfuric acid, 8417c.
of stenothermophilic bacteria, temp. activation of, 2671e.
trace elements in, 1816g.
of retina, 8040c.
reviews on, 259c, 5814a, 9100g.
ribonucleoprotein degradation in chromosomes, nucleoli and cytoplasm by, 4717a.
-rich food, from koji, P 5132d.
sanguanarine effect on, 361e.
Schardinger—see also *Xanthine oxidase*.
Schardinger's, of milk, effect of *p*-aminobenzoic acid and sulfonamides on, 5429d.
sensory substance-destroying, 5842c.
in size removal from textiles, 2439g.
sodium nitrite effect on, that reduce trimethylamine oxide in fish, 6751g.
starch-converting, demand and supply of, for pulp and paper manuf., 5948h.
starch degradation and synthesis by, 8181d.
starch hydrolysis by, P 3540b.
starch-splitting and ring-closing action of, from *Bacillus macerans*, 9111g.
stereoisomeric forms of, morphological inversion of organisms and, 3861f.
from stomach mucous membrane, P 7991c.
streptomycin effect on, 719b.
structural analogs in studies of, 2244g.
study procedure for, 1816g.
sulfhydryl, inhibition by α-, β- and γ-rays, 6682e.
sulfhydryl, reagents inhibiting, effect on smooth muscles, 1485h.
suramin effect on, 6257b.
synthesis of compds. of nucleic acids and adenine with amino acids by, 8410g.
in tallow, inhibition of hydrolyzing and oxidizing, by buffered solns., 8177f.
in textile processing, 6829c.
trace elements and, 1820b.
triacetic acid-hydrolyzing, purification and properties of, 6266i.
triacetic acid lactone degradation by, 9211a.
triphosphopyridine nucleotide specific, catalyzing decarboxylation of malic acid in plants 9168e.
tryptophan conversion to auxin by tobacco, 2288g.
in tryptophan oxidation by bacteria, 8005d.
uranium ion effect on, 9118h.
urethan effect on, 9258c.
in vanilla, inactivation and vacuum infiltration of, 7157h.
viruses and, 9165f.
in virus from jaundiced silkworms, 3051f.
vitamin $A_1$ alc. esterification by animal tissue, 2294h.
vitamin $B_6$ and its derivs. in reactions of, 8028b.
vitamin C-oxidizing, of honeybees, 3113e.
as water-softening agents, 5977b.
x-ray action on, 4716c.
of yeast cells, effect of ionizing radiations on, 7081h.
yellow—see also *Flavoproteins* and "$B_1$," "$B_2$," "$B_3$ complex," etc., under *Vitamins* this year.
yellow, suppression of, 1449i.

**Eosin**, accumulation in yeast cells, 8436c.
adsorption by AgBr, 4536i.
in cosmetics, tetrahydrofurfuryl esters as solvents for, 9365c.
derivs., spectra and toxic action of, 8532d.
detn. in lip rouge, 8095i.
effect on internal photoeffect in semiconductors, 7349e.
retention in tissue in frogs, effect of saponins on, 5870f.
sepn. from methylene blue by paper chromatography, 8777b.

——, **iodo-**. See *Erythrosin*.

**Eosin Bluish**, effect on benzidine-peroxidase color, 7521e.

**Eosinophiles**. (See also *Leucocytes*.)
anaphylactogenic property of, transportation of, 4757a.
effect of adrenaline, ephedrine or sympathol on, 2327f.
in tissue bordering cancerous growth, 4362h.

**Eosinophilia**, in trichinosis, effect of cortical exts. and other agents on, 7105b.

**Eötvös constant**, of water, pressure and, 7283f.

**Eötvos law**. See *Laws*.

**Epanutin**. See "sodium deriv." under *Hydantoin, 5,5-diphenyl-*.

**Eperua**, resins from wood of, coke from, 379d.

**Ephedra**, alkaloids in Indian, 1910c.
*fragilis*, lignins in, 2283b.

**Ephedrine** (*α - (1 - methylaminoethyl)benzyl alcohol*). (See also *Pseudoephedrine*.)
-adrenaline group, 5542e.
amine oxidase inhibition by, antifibrillatory action of, 758
*α*-bromoisovalerate, P 7647f.
camphorsulfonate, 7642c.
cardiovascular effects of, 8546c.
compds. with sulfanilamide derivs., P 9388g.
compd. with sulfathiazole, P 9389h.
derivs., 604i.
detection of, and derivs., 1529e.
detn. of, 7640h.
*d-* and *l-*, salts with *d-* and *l-*, α,γ-dihydroxy - β,β - dimethylbutyric acid, P 3448gi.
*dl*, hydrochloride, crystallography of, 8611e.
detn. of, 168b.
effect on Cl and water excretion and on blood pressure, 8052b.
identification of, 1907i.
monograph for, 8103c.
*d-*, salt with *d-β*-ethyl-6-methoxy-α,α dimethyl - 2 naphthalenepropionic acid, 6608a.
disinfectant sols (ozone-liberating) contg., P 1532g.
effect on adhesion of epithelium to stroma in cornea, 7c.
on blood pressu 9249c.
on blood sug in chick embryos, 5868i.
on carbohydrate metabolism, 5403h.
on circulation, effect of dibenamine on, 7140i
on circulatory system in typhus, 8535h.
on coagulation time of blood plasma, 7136i.
on convulsant threshold with and without diphenylhydantoin, 4765e
on diuresis, 8542g.
on eosinophiles, 2327g.
on heart, 1489f.
on intracranial hypertension, 765e
on male frogs and toads, 8566b
on mimosa leaves, 3475i.
on narcosis by chloral hydrate and medinal and on latent reflex time and body temp., 7141gi
on nervous system of segmented worms, 316e.
on onion cells and root growth, 9171g
on respiration, 5863e.
on retinal arterial pressure, 6735a
on smooth muscle of elasmobranch and teleost, 4763d
on stomach muscle, 4771b.
on synephrine action on blood pressure, 7137b.
on unimol. films of lecithin, 7526e
fluorescent substance from, 708h.
folic acid prepn. contg., 355h.
hydrochloride, crystallography of, 8611e
hydrochloride, detn. of, 168b.
identification of, 1907i, 3563i
penicillin salt of *l-*, pharmacology of and chemotherapy with, 4382c.
pharmacology of, 1489c.
[*p* - (2 - pyridylsulfamyl)anilino]methanesulfonate, P 4298d.
reaction (attempted) with $CO_2$, 1351g
sulfate, detn. of, 4810f.
tetraethylammonium effect on action of, 8552a.

**Ephedrine, desoxy-**. See *Phenethylamine, N,α-dimethyl-*.

——, **dihydroxy-**, bronchospasmolytic contg., 4426e.

——, **3,4-dihydroxy-**, vascular effects of, effect of ergotamine on, 3028f.

——, ***N*-ethyl-**, identification of, 3564a

——, ***p* - hydroxy-**, bronchospasmolytic contg., 4426e.
detn. of, 168b.
effect on heart, 1489f.

——, ***N*-methyl-**. See *Norephedrine, N, N-dimethyl-*.

**ψ-Ephedrine**. See *Pseudoephedrine*

**Ephedronium sulfathiazole***, P 9389h.

**Ephestia**, proteins of $a^+a^+$ and *aa*, 9278b

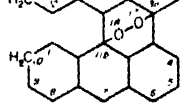
**Ephestia elutella and(or) Tobacco moth**, control in cereals by DDT-impregnated sacks, 347d.

**Ephestia kühniella and(or) Mediterranean flour moth**, control in rye flour, P 8604f.
control of, 2360g.
toxicity to, of S compds., 4415c.

**Ephetonine**. See "*dl-*, hydrochloride" under *Ephedrine*.

**Epiallobiotin** (*trans - hexahydro - 2 - oxo - 1H - thieno[3,4]imidazole - 4 - valeric acid*), P 4388a.

**Epiallocholesterol**, 243f.



**Epiallopregnan - 3 - ol - 20 - one***, 821c.

**Epicatechin**. See *Epicatechol*.

**Epicatechol**, adrenaline potentiation by, 5116*h*.
chronaximetric antagonism with vitamins, 284*d*.
effect on acid-base balance, 1092*g*.
(−)-, and derivs., 3394*a*.
**Epicauta**, control of, R. B. 1018 in, 4806*a*.
**Epichlorohydrin**, anion-exchange resins from polyamines and, P 5518*a*, P 6339*e*.
compd. with styrene-maleic anhydride polymer, 8202*i*.
condensation products from phenols and, P 1996*d*.
effect on seeds, 4733*i*.
reaction product with *p*,*p*′-isopropylidenediphenol, P 5999*d*.
reaction with phenols, P 5421*h*.
with phenols in the presence of $BF_3$, 6173*g*.
with S compds., 7420*h*.
**β-Epichlorohydrin**. See *Propane, 1-chloro-1,3-epoxy-*.
**Epicholestanol**, and acetate, 3831*g*.
chromatographic sepn. of cholestanol and, 2894*f*.
**Epicholesterol**, and acetate, 1784*a*.
chromatographic sepn. of cholesterol and, 2894*f*.
**Epicoprostanol**, in oxidation-reduction reactions in the presence of Raney Ni, 191*e*.
**Epidermis**. See *Leaves; Skin*.
**Epidermomycosis**. See "diseases of" under *Skin*.
**Epidermophyton**, hexylresorcinol effect on, 1827*a*.
**Epididymis**, seasonal changes in, of deer, 8490*c*.
**Epidiorite**, in serpentinite at Harper's, N. Z., 4610*d*.
transformation of, of Tawaewae Point, New Zealand, 8314*h*.
**9,10-Epidioxyanthracene**,

*9,10-*

——, **9,10-dihydro-**. See "peroxide" under *Anthracene*.

amino acid oxidases of, 6281*d*.
amino acids in acid-hydrolized, 138*d*.
2-amino-5-heptenoic acid effect on, 574*g*.
*p*-aminosalicylic acid effect on, 8001*i*.
antibacterial-agent effect on, 5444*h*.
arginine decarboxylase from, 3065*e*.
arginine decarboxylation by, effect of pH on, 8446*g*.
aspartic decarboxylase in, 8440*a*.
bactericidal action of quaternary $NH_4$ compds. against, 3884*e*.
bactericidal activity of ethylene glycol and monoalkyl ethers against, 1827*c*, 7079*e*.
*coli,* bacteriophage action on, effect of acriflavine and phosphine GRN on, 3066*c*.
bacteriophages active on—see *Bacteriophages*.
in beverages, source and prevention of, 4423*a*.
biliary-acid effect on, 7077*h*.
$CO_2$ effect on, 715*i*.
$CO_2$ fixation in α-oxoglutaric acid by, 2249*c*.
$CO_2$ production from aspartic acid by, after incubation in phosphates and effect of biotin thereon, 1833*f*.
$CO_2$ replacement in metabolism of, 5445*c*, 8435*b*.
in chlorinated water, secondary appearance of, 1886*i*.
chlorophyll conversion to phylloerythrin by, 5832*e*.
coagulation of citrated plasma by, 1830*i*.
colchicine effect on, 3062*d*.
colicin-producing, 9163*c*.
colloid (metal) adsorption by, 274*g*, 4726*d*.
compn. of, 3875*g*.
Cu effect on, 9154*i*.
cozymase decompn. and synthesis by, 2670*f*.
degradations and syntheses effected by, 8431*e*.
dehydrogenase activity of degenerative forms of, 5078*f*.
dehydrogenase system of, effect of sulfanilamide and derivs. on, 9154*g*.
detection in frozen concd. orange juice, 8571*i*.
detn. in beer, 1147*c*.
effect of anionic, cationic and nonionic agents on growth of, 4330*d*.
effect of cysteine and other thio derivs. on respiration of, 5078*b*.
effect of (methylsulfonyl)$_2$ derivs. of amidines and amines on, 1740*d*.
effect of quindolinium and quinindolinium salts on, 2305*h*.
2- and 6-fluoronicotinamide effect on, 4267*b*.
formic hydrogenase in, 4341*b*.
glucose fermentation by, 5080*i*.
glycolysis by, effect of fatty acids on, 717*i*.
gram staining of, effect of desoxyribonucleic acids on, 273*e*.
hemolytic activity of food products infected with, 7601*g*.
$H_2O_2$ action on, 9159*h*.
indole production by, 721*e*.
infections with, treatment by immunization with glucidolipide, 5483*b*.
inhibition by 2-chloro-4-aminobenzoic acid, effect of pantothenic acid on, 3497*f*.
inhibition by growth substance from sheep cardiac muscle, 1849*e*.
inhibition by hydroxy sulfones, 9376*e*.
inhibition by iodonium compds., 2684*i*.
inhibition by serine and production of serine-resistant mutants, 5826*e*.
inhibition of, effect of Ca, Mg, Mn and Ba on, 1826*a*.
lactase from, 267*g*.
lactic and pyruvic acid formation from $CO_2$ and alc. or AcOH by, 8443*f*.
lysis by amino acids and bacterial exts., incubation temp. and, 715*f*.
lysis by *Bacillus subtilis* ext. and norvaline, effect of oxidation-reduction potential of medium on, 715*h*.
lysis by norvaline mixt. with *Bacillus subtilis,* effect of bacterial no. and amounts of peptones on, 715*e*.
from mastitis, effect of antibacterial agents on, 3880*i*.
in meat, effect of $NaNO_2$ on, 9284*h*.
$HgCl_2$ fixation on, 715*h*.
Hg-compd. effect on, 1138*f*.
6-methyl-3-sulfanilamidopyridazine effect on, 178*e*.
in milk, effect on sol. N, 8067*g*
mutant produced by glycine, 4
mutants resistant to colicins, 4330*h*.
mutation by cancerigenic and non-cancerigenic substances, 2275*e*.
mutation during growth of, 2671*i*.
mutation during growth of biochem. mutants of, consequences of, 8439*e*.

*coli*, mutation to streptomycin resistance and dependence in, 6280*h*.
nicotinic acid and nicotinamide deficiency in, 3885*h*.
nitrogen mustard effect on, 273*g*.
nucleic acid synthesis by, 9155*d*.
nucleosides as growth promoting substance for, 716*g*.
nutrient effect on growth of streptomycin-sensitive, -resistant and -dependent strains of, 3061*b*.
oxidases of, effect of amidines on, 9154*c*.
oxidation-reduction phenomena in relation to reproduction and variation, 717*c*.
P (radioactive) uptake by, 8436*a*.
proline synthesis and bacteriophage resistance of, 5821*e*.
purine-requiring strain of, 3883*c*.
pyrophosphatase of, 9145*c*.
pyruvate synthesis in, acetyl precursor in, 1829*h*.
resistance of, to mutagenic agents, 5075*i*.
respiration in presence of hexose phosphates, permeability in, 8002*h*.
respiration of, effect of amino acids on, 6274*i*.
respiratory coeffs. of, 4332*e*.
salicylic acid toxicity for, effect of pantonine and pantoic acid on, 715*b*.
selenate inhibition of, and its reversal, 9157*g*.
Ag-ion effect on, 2277*g*.
streptomycin action on, effect of nucleic acid on, 5447*i*.
sulfonamide binding by, and effect on growth, 9142*g*, 9143*b*.
sulfonamides effect on, 173*i*.
threonine oxidation by, effect of streptomycin on, 4334*a*.
ultraviolet action on, recovery from, 5062*c*.
urea-deriv. effect on, 6279*i*.
uronic acid utilization by, adaptive enzyme formation in study of, 4333*i*.
utilization of amino acids and peptides by mutants of, 9148*c*.
vitamin $B_{12}$ in filtrates of, 3062*c*.
colicins from, 1456*ab*.
*freundii*, from urine of typhoid patients, 5444*e*.
α-methylglucoside fermentation by, 5082*f*.
sensitivity to penicillin, streptomycin and sulfadiazine, 4336*g*.
in sugar mills, 887*a*.

from 2-ethyl-1,3-hexanediol and dicarboxylic acids, as plasticizers for amide-aldehyde condensation products, P 2814*a*.
ethylidene and vinyl, P 3838*d*.
ethyl, of coconut-oil fatty acids, prepn. of, 881*e*.
of fatty acids of soybean oil extd. by alcoholysis, 5209*f*.
of fatty acids of tall oil, autoxidation of, 9442*f*.
of halo carboxylic acids, reactivity of halogen in, 4638*e*.
of stillingia oil acids, chromatographic absorption in concg. optically active acid from, 7721*c*.
exchange of radicals of—for this year see "re-" under *Esterification*.
of fatty acid, in blood serum, 9197*e*.
condensation products with $C_2H_4O$ for textile industry, 4016*c*, 5953*e*.
with hexitol anhydride and with polyoxyalkylene derivs. of hexitol anhydride, lubricants contg., P 5938*e*.
with inner ether of hexitols, ethylene oxide condensation product of, for conditioning rayon, P 3207*e*.
in paraffin oxidation residues, 1993*b*.
fatty-acid partial, with polyhydric alcs. from highly esterified polyhydric alc. esters, P 9494*c*.
films (unimol.) of di-, 4537*d*.
of fluoro alcs., 6163*h*.
fluoro, and their polymers, P 5413*a*.
fluoro derivs., insecticidal, P 6358*e*.
of formaldehyde-ketone condensation products, P 9527*h*.
free energy of bonds in, 3276*h*.
glyceryl—see *Ester gums; Glycerides; Glycerol*.
glycol and polyglycol, of fatty acids, phys. properties and solubilities of, 2002*g*.
of glycol ethers as azeotropic agents in styrene recovery from hydrocarbon oils, P 5582*h*.
of glycol ethers of lac for lacquers, paints or varnishes, P 4030*b*.
of glycol (mono-) ethers in azeotropic sepn. of xylene isomers, P 4007*c*.
of glycols, P 6652*a*.
with di- or hydroxycarboxylic acids, increasing heat stability of acyl peroxide-vulcanized, P 7746*a*.
mixed, P 1795*h*, P 7504*a*.
with naphthalenedicarboxylic acids, fiber-forming superpolymeric, P 7236*g*.
as plasticizer in GR-S, 3648*e*.
of 1,1-glycols, reduction of, in the presence of $NH_3$ or an amine, P 2630*g*.
Grignard reaction with allylic, 9051*d*.
of α-halo acids, P 2632*h*.
halogenated fatty-acid, lower homologs from, P 2794*c*.
halogenated, lubricant additives from metal carboxylates and, P 845*g*.
hydrogenation of, to alcs., 572*b*.
equilibria in, 2164*i*.
velocity of, 573*f*.
hydrolysis of—see *Hydrolysis*.
of hydroxy acids, P 670*f*, P 6224*a*.
hydroxy-acid, surface tension of, 8779*e*.
of hydroxy acids with amino acids, for use as local anesthetics, P 2913*h*.
of (hydroxyalkoxy) compds., P 6663*d*.
of *N*-(hydroxyalkyl) amides and fatty acids as plasticizers in butadiene elastomers, P 7258*h*.
hydroxyalkylamide semi-, of fat acids with dicarboxylic acids, P 7241*g*.
of α-hydroxy carboxylic acids, 188*a*.
of hydroxy carboxylic acids, cleaning compns. from, P 8714*b*.
of hydroxy carboxylic and sulfonic acids, for waterproofing textiles, P 418*e*.
hydroxycarboxylic - polycarboxylic, P 9529*c*.
of hydroxy fatty acids, dehydration of, P 2220*g*, P 6220*b*.
of hydroxy fatty acids, oxidation of, P 676*h*.
of hydroxy nitriles, P 2631*g*, P 3027*f*.
ignition temps. of, 5658*b*.
of imidic acids, for thiol removal from hydrocarbon distillates, P 4844*c*.
of iminodi, oxydi and thiodi carboxylic acids, as fungicides and insecticides, P 5152*e*.
ionization in $H_2SO_4$, 8808*d*.
of β-isonitroso acids, Beckmann rearrangement of, 1723*g*.
from kerosene oxidation, prepn. of film-forming and ester mixts. from, 3181*i*.
-ketone mixts., reduction of, 2944*c*.
of lac resins with monohydric alcs., rubberlike materials by polymerization of, P 5991*g*.
lubricant pour-depressants from fatty-acid, 2416*c*.
lubricants from, P 393*b*, 2417*c*, 5936*d*, 8660*b*, 9423*i*.
maleic anhydride-styrene sulfonated copolymer half-, as fat-liquoring agents, P 7738*c*.
manuf. and sapon. of fatty-acid, P 1586*fh*.
manuf. of, P 5412*d*.
by oxidation of heavy alkylate hydrocarbons with per compds., P 5584*c*.
from reaction of CO with alcs. or ethers, P 3443*b*.
from soaps of resinous and fatty acids from wood, P 1200*e*.
from synthetic fuels, 8646*g*.
manuf. of mixed, of polyhydric alcs. with drying oil and mercapto acids, P 9081*f*.
of mercapto dicarboxylic acids with dihydric alcs., satd. poly-, and coatings therefrom, P 3633*b*.
methyl, of bonito-oil unsatd. acids, lubricating oil by polymerization and hydrogenation of, 2416*f*.

*methyl*, of coconut-oil acids, hydrogenation to higher fatty alcs., 5208*e*.
detn. of, 1687*i*.
dielec. loss, microwave absorption and relaxation time in, 6018*h*.
of dimeric fat esters of linseed and soybean oils, prepn., hydrogenation and polyesterification with glycols, alkanolamines and diamines, 8699*c*.
of 2- and 5-ketohexonic acids, detection and detn. of, 1689*h*.
of linseed, perilla and tobacco seed oils, adsorption of Me linoleate and Me linolenate on silicic acid from, 6840*a*.
polybromide yield and Me arachidonate estn. in mixed, 2791*g*.
prepn. from soap-boiling fractions and analysis of, 3218*i*.
prepn. of, 567*a*.
of soybean-oil fatty acids, reaction with *tert*-butyl hypochlorite, 5204*f*.
mixed, for use as drying oils, P 876*gh*.
mixed, for use as drying oils, and polymers with vinylidene compds. and esters of butenedioic acids, P 1995*e*.
of (4-morpholinyl) alcs., P 9086*g*.
multivalent-alc. mixed, plastic compns. from, P 4895*b*.
of naphthene oxidation products with polyhydric alcs. for drying oil use, P 3633*b*.
of α-nitro carboxylic acids, 127*c*.
nonionic surface-active, of fatty-acid polymers with polyalkylene glycols or oxides, P 6439*d*.
optical rotation of, 4680*e*.
organosilicon, P 3441*f*.
ortho, and related compds., 3359*h*.
ortho, reactions of sugar acetates with $NH_3$, 5747*g*.
reaction with Grignard reagents, 5365*g*.
reaction with ketenes, P 1055*f*.
of sugars, mol. structure of, 2964*h*.
oxidation of thiol, with peroxyacetic acid, 6975*e*.
oxidation of unsatd., carotene in, 9076*f*.
of β-oxo acids, acetylation with ketene in the presence of tertiary amines, P 6655*a*.
from acylpyruvates, 139*i*.
bromine migration in, 7908*i*.
cyanoethylation of, 2582*d*, P 4689*g*.
formation in Reformatskiĭ reaction, 613*b*.
reaction with aromatic amines, 228*d*, 1416*b*.
of oxo acids, reaction with ketene, P 3840*c*, 5366*i*.
of oxo acids, reaction with ketene and its derivs., P 1436*b*.
β-oxo α-nitroso, oximes of α-oxo esters from, 1746*e*.
of palm-oil fatty acids, as Diesel motor fuels, 2402*e*.
paraffin-wax soly. in, 8126*d*.
of pentaerythritol-thiodiglycol reaction product, P 9081*e*.
peroxide structures in oxidized, polarograph in distinguishing, 2789*i*.
of peroxy acids, as catalysts for polymerization of ethylene, P 3238*f*.
of phenol-formaldehyde polymers, as detergents, P 1588*a*.
of phenols, Fries rearrangement of, 2187*a*.
of phenols in cottonseed treatment, 3133*e*.
of phenols with carboxylic acids, P 6234*h*.
of phenyl-1,2-ethanediol derivs. as plasticizers for elastomers, P 6663*g*.
of phosphorus acids, 121*b*, 1314*d*, 8350*h*.
phys. properties of, 2590*d*.
physical properties of naturally occurring fatty-acid, 2164*g*.
plasticizers from phenols and, P 2034*a*.
poly-, P 1056*i*, P 4897*h*.
acylated azelates and suberates for manuf. of, P 6226*c*.
of adipic acid with ethylene glycol or 1,10-decanediol, 6578*c*.
from α-alkyl ether of glycerol and dicarboxylic acid as plasticizer for amide-aldehyde coatings, P 2814*c*.
———, *sz.*, crystn., 4530*c*.
catalyst effect on formation of, 4891*g*.
coating from, P 3242*b*.
condensation products with polyamides, P 4517*g*.
constitution and properties of, 9455*d*.
in crumbible form, P 2032*e*.
crystallinity and dilatometric properties of, 9045*d*.
*poly-*, crystn. of aromatic, 6045*e*.
depolymerization of, 4542*b*.
of dicarboxylic acids with glycols, $Fe_2O_3$-reinforced peroxide-cured rubbers from, P 432*d*.
of dimethylene-D-gluconic acid, P 2816*h*.
of ethylene glycol, with soybean-oil dimerized acids, reaction products with rosin and triethanolamine, P 896*c*.
fibers from, 2778*c*.
of glycols with terephthalic acid, sizing yarns of, P 3628*a*.
from hydroxy acid formed by hydrogenation of acrolein-eleostearic acid reaction product, P 3039*f*.
isocyanate-modified, or polyester amides, mixts. of polyvinyl acetal and, P 3661*a*.
linear, P 1223*g*, P 6236*d*.
manuf. of, P 6865*f*.
molding glass-fiber laminate contg., 2029*g*.
mol. wt. distribution of, 4228*a*.
org.-peroxide catalysts for curing unsatd., 4892*h*.
as plasticizers, P 4894*e*, 5627*f*.
as plasticizers for melamine and urea resins, P 4513*c*.
as plasticizers for melamine-HCHO resins, P 9527*b*.
polymerization with vinyl compds., P 1220*b*.
from *trans*-quinitol, P 7755*a*.
review on, 5996*e*.
of sebacic acid, in surface coatings, 6462*i*.
of terephthalic acid, degradation of, P 4519*a*.
unsatd., and their polymers, P 4298*g*.
uses of, 5993*f*.
of polyalkylene glycols, with fatty acids, P 5792*e*.
polyamide, P 7266*e*.
polyamide, compn. from, P 9537*f*.
polyglycol, P 6652*f*, P 7726*i*.
of polyglycols, polyhydric aliphatic alcs. or condensates, in heat-stabilization of vinylidene chloride polymers, P 3233*f*.
of polyglycols, with fatty acids, emulsification with metallic soaps, P 4876*i*.
polyhydric alc. mixed, P 4290*c*.
with benzoic acids and monocarboxylic acids, P 422*d*.
from kerosene oxidation products and rosin, P 3634*c*.
polymers with styrene, P 1223*a*, P 4051*h*.
with 2 unsatd. carboxy acids, P 1557*c*.
polyhydric alc. partial, of fat acids, 137*d*.
of polyhydric alcs. with fatty acids, and their condensates with ethylene oxide in drying of rayon, P 2785*g*.
with fatty acids as drying oils, 6432*c*.
with fatty acids as ointment-base constituents, hydrophilic properties of, 8610*a*.
manuf. of, P 5794*d*.
with α-olefinic dicarboxylic acids, polymerization with ethylenic monomers, P 906*e*.
with poly-unsatd. fatty acids, as plasticizers for polyvinyl-acetal resins, P 3655*h*.
with resin acid-styrene copolymers, resinous, P 2448*e*.
with unsatd. acids, 9078*i*.
with unsatd. monocarboxylic acids, for use as drying oils, P 3634*a*.
polymer compatibility in, 6862*d*.
polymerizable, P 2819*b*, P 7502*i*, 8352*e*.
polymerization of, amines as promoters of, P 5230*d*.
of drying-oil acids, 2787*g*.
of fatty acids with monovinyl aromatic compds. and monocarboxylic olefinic acids, P 5972*c*.
of unsatd. alcs., P 443*f*.
of unsatd. alcs. with α,β-unsatd. dicarboxylic acids, with olefins, P 3236*c*.
of unsatd. dicarboxylic acid and unsatd. monohydric alcs. with halopenes, P 4891*a*.
of unsatd. fatty acids, 5974*g*.
polymerized, as lubricant additives, P 6821*c*.
polymers of, diisocyanate-modified, vulcanization with S, P 4046*g*.
polymers of maleic anhydride and unsatd. polycarboxylic, P 9532*i*.
polymers of unsatd. dicarboxylic acid, with vinyl chloride, sponge compn. from, P 3239*f*.
polyolefinic, polymers with Et acrylate, 5988*h*.
poly-, or polyesteramides, compns. with diisocyanates, increasing soly. in org. liquids, P 7753*a*.
of polyoxyalkylenediols, P 3446*c*.
1,2-polyoxypropylene monoalkyl ether, with fatty acids, P 1562*e*.
prepn. of, $ClSO_3H$ in, 127*e*.
prepn. of fatty-acid, for film study, 3631*a*.
prepn. of mono-, from fat acids and polyalcs., 6842*h*.
pseudo, 140*b*.
pseudo, of dicarboxylic acids, 8368*f*.
of *p*-quinonedioxime in vulcanization of Butyl rubber, 5623*cf*.
reaction of di-, of 1,1-alkanediols with $H_2S$, P 5418*e*.
reaction of, with acetylene, 7453*b*.
with amines, 2926*e*.
with $NH_3$ or amines, P 4289*a*.
with biguanide, P 1814*d*.
of fatty acids, with aromatic hydroxy compds., drying oils by, P 9481*i*.
with ketones, 4253*g*.
with methyl 2-thienyl ketone, 629*g*.
with sulfanilamide, 2597*i*.
of thio phosphoric acid, with acyl and alkyl halides, 560*g*.
of unsatd. carboxylic acids, with phenols, P 5044*g*.
of vinyl alc. derivs. with amines, P 6652*c*.
reaction of unsatd., with biguanide, P 3854*f*.
with H halide, P 7954*b*.
with α hydroxy nitriles, P 4288*g*.
with nitro paraffins, 1319*g*.
reactivity of tertiary alkyl, 3776*g*.
recovery from fruit juices, etc., P 330*i*.
recovery of fatty acid mono-, with polyhydric alcs., from oils and waxes, P 2794*e*.
reduction of, P 3835*g*, P 7497*c*.
with alc. and alkali metals, P 5216*a*
of α-amino acids, 1723*a*.
of fat acids, Raney nickel as catalyst in, 5303*f*.
of unsatd. fat acids to unsatd. alcs., catalysts in, 5363*d*.
removal from glycerol alc. solns., P 3638*e*.
removal from higher alcs. by hydrogenation, P 5032*e*.
resinous, P 6464*c*.
resinous, of fatty acids with pentaerythritols, P 3232*g*.
resinous products from unsatd., P 7750*g*.
rust-preventing compds. from thioether substituted org. acids and fatty-acid, with polyhydric alcs., P 7224*f*.
sapon. of molten fatty-acid, P 3638*c*.
sepn. from reaction products of hydrogenation of CO, P 7213*f*.
sodium salts of alkyl, of *l*-pimaric acid-maleic anhydride addn. product as emulsifiers in GR-S rubber polymerization, 7252*h*.
solid solns. in hexacosane or paraffin wax, dielec. relaxation times of, 3676*g*.
solns. in polyisobutene and polythene, dipole orientation in, 6019*i*.
as stabilizing agents for icings, P 6759*c*
steroid, P 6247*a*.
of steroids (hydroxy oxo) with polybasic acids, P 700*i*.
sterol, of perilla oils, 4032*b*.
of sulfo aromatic dicarboxylic acids, as textile assistants, P 6230*g*.
of sulfo carboxylic acids, for improvement of electroreduction of metals, P 4152*e*.
of sulfonic acids, as catalysts for curing urea-$CH_2O$ resins, P 4512*i*.
of sulfonic acids, with α-hydroxy acids or their derivs., 2941*g*.
of sulfur-contg. carboxylic acids, spectra of, 4215*hi*.
in sulfuric acid, behavior of, 568*i*, 623*a*.
of tall-oil acids, polyhydric alcs. and dibasic acids, and varnishes therefrom, 3212*i*.
of tall-oil acids with polyethylene glycols, oxidized mixed, P 1557*c*.
tall-oil fatty-acid mono-, with polyhydric alcs., cutting-oil base from rosin soaps and, P 4845*f*.
of tetrabasic pol———ids for use as resins, P 846*g*.

thermochor of, 8226*e*.
ω-thiocyanoalkyl, insecticidal, P 5152*h*.
of thioglycols, P 3662*b*.
of thiols, hydrogenation of, P 3445*c*.
of thiols (tertiary), P 3444*i*.
thio, of phosphorus acid, 1004*c*.
thorium nitrate partition between water and, 6890*e*.
ultrasonic velocity in, 8780*e*.
of α,β-unsatd. acids from esters of β-alkoxy acids, P 3442*e*.
unsatd. di-, P 3847*c*.
unsatd. dicarboxylic acid half-, with *N*-hydroxylalkyl amides of fatty acids, and their surface-active Na salts, P 4500*e*.
of unsatd. higher acids, P 6651*f*.
of unsatd. tricarboxylic acids, as disinfectants, fungicides and insecticides, P 7634*d*.
vapor pressure at crit. point, 4063*c*.
vapor pressures of high-boiling, 3677*i*.
vinyl—see *Vinyl alcohol*.
of vitamin A and their biol. activity, 5371*i*.
of wax-substituted hydroxyaromatic compds. for hydrocarbon oil stabilization, P 1562*a*.
of wool fat, detn. in wool, 6423*c*.
in wool wax, 6491*e*.
yeasts forming, 3560*i*.

**Estilbin "MCO."** See *4,4'-Stilbenediol, α,α'-diethyl-*.

**Estol H**, in potato-late-blight control, 9338*g*.

**Estradiol** (*dihydrofolliculin, dihydrotheelin, dihydroxyestrin*). (See also *Estrogenic hormones*.)
α- and β-, bis(*p*-phenylazobenzoates), 5787*g*.
benzoate, age factor in breast cancer formation by, 2305*i*.
carcinoma of uterine cervix in mice treated with, 2311*a*.
effect of 2-acetylaminofluorene and, on Wistar rat, 305*h*.
effect of ultraviolet irradiation on, 7521*g*.
effect on Ca deposition in femora of chick embryos, 7579*g*.
effect on castrated women, 1486*a*.
effect on cholesterol deposition in corpus luteum, 8033*b*
effect on dietary fatty liver, 7560*c*.
effect on hemopoiesis in frogs, 3530*f*.
effect on mammary gland, 9206*b*.
effect on mammary glands of parabiotic rats, 4750*g*.
pathological conditions from, and attempts to modify, 1854*c*.
standards for, 3561*h*.
and benzoate, assay of, 7994*c*.
3-benzoate β-maltoside heptaacetate, P 5428*c*.
conversion to estrone by streptomyces, 4331*b*, 9147*h*.
cytostatic action in prostate carcinoma, 9263*h*.
detection of β-, in presence of α-estradiol, 7865*c*.
detn. in urine, 9136*f*.
detn. of α- and β-, 8427*e*.
diacetate, spectrum of, 3018*i*.
dipropionate, effect on gonads of eels, 8481*g*.
effect on liver, 1474*d*.
effect on mammary tumors *N*-fluorenylacetamide, 2698*e*.
and dipropionate, effect on male rabbits, 4776*f*.
effect of, alone and with testosterone on body and organ wts. and arginase and phosphatases of organs, 3090*a*.
effect on adrenal cortical tumor formation, 7124*g*.
on artificial premature climacteric of gonadal origin produced by ovariectomy in rats, 2301*d*.
on corpora lutea, mammary gland, etc., 7436.
on differentiating gonads of frogs, 7104*b*.
on frogs, effect of 4-aminopteroylglutamic acid and pteroylglutamic acid on, 1474*f*.
on granulation tissue, 8492*b*.
on growth, 3507*h*.
on lymphatic tissue of spleen, 6720*h*.
on metabolism in osteoporosis, 5487*i*.
on metamorphosis of axolotis by thyroxine, 324*e*, 9213*c*.
on nervous system of crab, 5506*g*.
on oviducts, effect of aminopterin on, 9202*h*.
*effect* on phosphatase activity in genital tract, 5840*g*, 5841*d*.
on phosphatase in kidney, 2302*c*.
on phosphatases in blood serum before and after castration, 8500*f*.
on prostate gland, effect of 4-aminopteroylglutamic acid on, 8508*f*.
on respiration of brain homogenates, 7579*e*.
on sensitivity of uterus to hypophysin, adrenaline and histamine, 1848*f*.
estrogenic activity of, and of its benzoate and dipropionate, 3508*d*.
estrone reduction to, by vitamin C, 4357*h*.
as fattening agent for broilers, 9290*b*.
feminization of plumage of capons by, and its benzoate, 1098*c*.
growth stimulated by, nucleic acids and phosphatase in tissue during, 2686*a*.
inactivation by liver, 8486*a*.
inactivation products of, effect on pituitary gonadotropic content and secretion, 3083*i*.

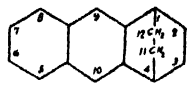
——, 1(and 2)-(*p*-*tert*-butylphenyl)-1,1,-2,2(and 1,1,1,2) - tetraphenyl-, 2608*a*.
——, 1 - (butylsulfonyl) - 2 - (2 - chloroethylsulfonyl)-, 2928*h*.
——, chloro-, adsorption by charcoal and graphite, 6036*h*.
adsorption by graphite, 1638*h*.
in air, max. allowable concn. of, 4401*a*.
decompn. of, kinetics of, 471*h*.
dehydrochlorination of, kinetics of, 7407*d*, 7408*d*.
effect on ignition pressure of H-O mixts., 406*i*.
effect on seeds, 4733*i*.
elec. breakdown in, 454*g*.
heat capacity of, 30*d*.
lyoparachor of, 2834*a*.
manuf. of, P 2217*h*, P 2628*c*, P 2629*b*, P 6218*g*, 6969*d*.
manuf. of, and alkylation of $C_6H_6$ with, P 4005*a*.
microwave absorption by, 6022*c*.
mixts. with org. vapors, adsorption by active carbons, 16*g*.
prepn. of, 5361*b*.
as promoter for $AlCl_3$-isobutane complex catalysts in alkylation of $C_2$-$C_5$ olefins, P 1956*g*.
reaction with Pb-Na alloy, P 8308*b*.
reaction with Pb-Na alloy in the presence of carbonyl compds., P 4287*de*.
spectrum of, 2867*h*.
——, 1-(3-chloroallylmercapto)-2-(2-chloroethylmercapto)-, 2928*b*.
——, 1-chloro-1,1-bis(*p*-chlorophenyl)-, as acaricide and insecticide, 3137*h*.
——, 2-chloro-1,1-bis(*p*-chlorophenyl)-, 5894*c*.
——, 2-chloro-1,1-bis(*p*-nitrophenyl)-, 4658*c*.
——, 1-chloro-2-diazo-, 4634*b*.
——, 2-chloro-1,1-diethoxy-†, as catalyst in $PbEt_4$ manuf., P 8398*c*.
reaction with glycols and with $NaOCH_2CO_2Na$, 2577*f*.
——, 1-chloro-1,1-difluoro-, 2925*c*.
chlorination of, P 3023*i*.
——, chlorodiphenyl-, insecticidal action of, 9332*c*.
——, 2-chloro-1,1-diphenyl-, nitration of, 4658*c*.
toxicity of, 345*e*.
——, 1-(2-chloroethoxy)-1-ethoxy-†, 6159*c*.
——, 1 - (2 - chloroethylmercapto) - 2-(ethylmercapto)-, (compd. omitted from abstr.), 2928*h*.
——, 1 - (2 - chloroethylmercapto) - 2-methylmercapto-, (compd. omitted from abstr.), 2928*h*.
——, 1-(2-chloroethylmercapto)-2-propylmercapto-, 2928*h*.
——, 1-chloro-1-fluoro-, P 2218*a*, 2925*c*.
——, 1-chloro-2-fluoro-, 6154*c*.
——, 1-(2-chloro-4-nitrophenoxy)-2-ethoxy-, P 5421*f*.
——, 1-(4-chloro-2-nitrophenoxy)-2-ethoxy-, P 1062*g*.
——, 1-(4-chloro-2-nitrophenoxy)-2-(2-ethylbutoxy)-, P 5421*f*.
——, 1-(4-chloro-2-nitrophenoxy)-2-(2-ethylhexyloxy)-, P 5421*f*.
——, 1-(4-chloro-2-nitrophenoxy)-2-methoxy-, P 5421*f*.
——, 1-(*o*-chlorophenoxy)-2-(1,2,2,2-tetrachloroethoxy)-, P 7188*c*.
——, 1-[*m*(*o* and *p*)-chlorophenyl]-1,1,-2,2-tetraphenyl-, 2607*h*.
——, 2-[*m*(*o* and *p*)-chlorophenyl]-1,1,-1,2-tetraphenyl-, 2607*i*.
——, 1-chloro-2-selenocyano-†, 2160*a*.
——, chlorotetrafluoro-, as pyrethrum solvent, P 351*f*.
——, 1-chloro-1,2,2-trifluoro-1,2-dinitro-, P 3025*a*.
——, 1(and 2)-*p*-cumyl-1,1,2,2(and 1,1,-1,2)-tetraphenyl-, 2608*a*.
——, 1(and 2)-cyclohexyl-1,1,2,2(and 1,1,1,2)-tetraphenyl-, 2608*a*.
——, diazo-, prepn. of, 4652*i*.
reaction with acyl chlorides, 1743*g*.
——, 1,2-di-2-benzimidazolyl-. See *Benzimidazole, 2,2'-ethylenebis-*.
——, 1,2-dibenzoyl-. See *1,4-Butanedione, 1,4-diphenyl-*.
——, dibromo-, fumigant from, P 6357*b*.
ultrasonic velocity in, temp. and, 7283*h*.
——, 1,2-dibromo-, compression and freezing under pressure, 4067*f*.
cotton wilt and nematode control with, 3134*f*.
dehalogenation by liver exts., 1816*a*.
dielec. properties and structure of, 4912*b*.
fluorination of, 3774*f*.
formation of, from reaction of $PhSO_2$-$CH_2CH_2Br$ with KF, 6154*e*.
in fumigation of pine nursery, 7179*e*.
heat capacity of, 30*e*.
heat of soln. of $AlBr_3$ in, 2851*f*.
isomers of, 5308*d*.
as lead scavenger in aviation gasoline, 11736.
lyoparachor of, 2834*d*.
manuf. from sea water, 4819*d*.
mixt. with chlordan in Japanese-beetle control on plant balls, 2361*i*.
with naphtha, in wireworm control on potatoes, 808*c*.
with $Et_4Pb$, effect on oxidation stability of aviation gasoline, and effect of antioxidants on storage time of, 5579*b*.
phys. consts. of, 2591*a*.
polarography of, 8916*i*.
Raman lines of, polarization and intensities of, 2514*a*.
reaction with $EtOCS_2Na$ and with $Na_2$-$S_2O_3$, 2569*i*.
in root-knot control in soil, 7186*h*.
as soil disinfectant, P 349*e*, 7178*i*.
soly. in Na xylenesulfonate solns., 1242*e*.
spectra (Raman and infrared) of, 2865*f*.
spectrum of, 4573*g*.
ultrasonic velocity in, 1232*g*.
in wireworm control in soil, 3139*i*.
——, 1,1-dibromo-2,2-bis(*p*-bromophenyl)-, P 5899*c*.
——, 1,2-dibromo-1,1-bis(*p*-bromophenyl)-2-chloro-, P 5046*g*.
——, 1,1-dibromo-1-chloro-2,2-bis(*p*-chlorophenyl)-, P 3969*c*.
——, 1,1-dibromo-2,2-diphenyl-, P 5899*c*.
——, 1,1-dibromo-2,2-di-*p*-tolyl-, P 5899*c*.
——, dibromotetrachloro-, vapor pressure of, 2924*e*.
——, 1,1-dibromo-2,2,2-trichloro-1-*p*-tolyl-†, 345*f*.
——, 1,1-dibutoxy-†, 995*g*, P 5034*f*, 5365*f*, 7426*b*.
hydrolysis of, 3272*b*.
phys. consts. of, 2590*c*.
——, dichloro-, ammonia partition between water and, 6891*i*.
condensation of, with $C_6H_6$ and alkylation of product with chlorinated paraffins in synthesis of lubricants, 1953*a*.
condensation of, with ethylbenzenes, lubricating oils by, P 1176*c*.
dehalogenation by liver exts., 1816*a*.
formation in chlorination of ethane, P 2217*h*.
halide cond. in, 7301*g*.
heat of reaction with $AlBr_3$, 2851*f*.
mixts. with benzene in testing fractionating columns, 2474*c*.
reaction (photochem.) with $Ph_2Hg$, 8895*c*.
reaction with $Na_2SO_3$, 396*g*.
system: $C_6H_6$-, 2474*b*.
systems with alcs., 1254*a*.
ultrasonic velocity in, temp. and, 7283*h*.
——, 1,1-dichloro-, azeotrope with $Me_2SiCl$ and with $SiCl_4$, 1716*f*.
manuf. of, P 5410*e*.
——, 1,1(and 1,2)-dichloro-, 5361*c*.



dehydrochlorination of, kinetics of, 7407*dk*, 7408*c*.
heat capacity of, 30*e*.
iodine soly. in, 2844*c*.
Raman spectra of, in solid state, 2514*c*.
——, **1,2-dichloro-**, 6154*d*.
adsorption by soil, 3960*h*.
anabasine distribution between water and, 6789*a*.
aromatic amine reaction with diketene in, 1247*d*.
chloroethylene from, P 1793*e*.
condensation of, with alkali metal polysulfides, rubberlike substances by, P 6456*g*.
in control of corn earworm and fall armyworm in corn, 3136*c*.
decompn. by heat, kinetics of, 7307*c*.
dehalogenation by liver exts., 1816*a*.
dehydrochlorination of, P 664*b*, P 3835*b*, 4628*h*, P 7951*b*.
dielec. const. and polarization in $C_6H_6$, 6480*e*.
dielec. properties and structure of, 4912*b*.
dipole moment, electron diffraction, entropy and spectra of, 8880*d*.
effect on seeds, 4733*i*.
in ethylene chlorohydrin recovery from aq. solns., P 2633*c*.
ethylene oxide formation from, 4638*g*.
fluorination (attempted) of, 3774*g*.
hydrochloric acid removal from, P 3024*f*
lyoparachor of, 2834*a*.
methyl ester prepn. in, 567*b*.
mixts. with $C_6H_6$, distn. of, 913*a*.
with C black, polysulfide rubbers from, P 2464*a*.
with $CCl_4$, from solvent dewaxing of lubricants, HCl removal from, P 5940*i*.
in peach-borer control, 8088*e*.
phys. consts. of, 2590*i*.
poisoning by, 2705*a*.
in potato-germination speeding, P 349*g*.
potential barrier in, 5308*f*.
Raman spectrum of, 42*f*.
reaction with $NCCH_2CO_2Et$ and $H_2C(CO_2Et)_2$, P 9475*i*.
reaction with sulfites, P 660*d*.
rotational isomers of, 5308*d*.
rotational isomers of, energy difference between, 5308*d*, 8872*h*.
as soil fumigant, 7186*e*.
soly. in water, vapor pressure and azeotrope with water, 3691*f*.
spectrochem. detn. of, 7367*a*.
spectrum of, 4573*g*.
systems with hydrocarbons, 4938*a*.
toxicity of, effect of diet on, 3077*c*.
to insects, route of administration and, 9340*h*.
nutritional factors affecting, 733*h*.
ultrasonic velocity in, 1232*g*.
——, **1,1 - dichloro - 2,2 - bis(chlorophenyl)-**, P 4300*b*.
——, **1,1 - dichloro - 2,2 - bis(*p* - chlorophenyl)-**, 5894*d*, P 5899*c*, 9333*f*.
as acaricide and insecticide, 3137*g*.
in alfalfa-snout-beetle control, 8599*e*.
in aphid control on celery, 346*e*.
in cabbage-caterpillar control, 3137*a*.
in caterpillar control on tomatoes, 3556*g*.
in confused-flour-beetle control, 2361*d*.
in control of citricola scale, citrus thrips and yellow scale, 4805*a*.
of corn earworm and fall armyworm in corn, 3136*c*.
of orange tortrix and Willamette mite on raspberries, 3137*c*.
of oriental-fruit moth and plum curculio on peaches, 7630*g*.
in corn-borer control, 6354*d*.
in corn-borer (European-) control, 1896*f*, 6354*e*.
in corn-flea-beetle control, 4416*i*.
effect on livestock, 1520*a*.
on respiration of *Orysaephilus surinamensis*, 9342*i*.
on wildlife, 1524*a*.
in fall-armyworm control on corn, 3136*e*.
in fly control, 5895*g*.
in fly control and its toxicity to man, 8601*d*.
in hairy-spider-beetle control in flour bags, 2729*b*.
in horn-fly control, 5895*h*, 9273*e*; 9342*d*.
on dairy cattle, 3135*g*.
effect on milk, 6355*g*.
as insecticides, 9331*g*, 9343*b*.
insecticides from dibenzo heterocyclic compds. and, P 4420*b*.
insecticides from $H_3PO_4$ diamides, P 4420*b*.
irradiation of, 4246*a*.
in Mexican-bean-beetle control, 810*f*.
in mosquito control, 1519*a*, 9345*ef*.
in mosquito control in snow water, 808*f*.
in orange-tortrix control on berries, 1521*i*, 5148*c*.
in potato-tuberworm control, 6776*g*.
in red-banded-leaf-roller control, 2720*f*, 5527*d*, 7628*c*.
residual toxicity of, 6354*g*.
reviews on, 9353*a*, 9353*h*.
in sheep-tick control, 8599*a*.
in sweet-potato-weevil control, 7183*c*.
toxicity of, 2705*e*, 4411*h*, 7627*h*.
to honeybees, 9349*i*.
to man, 8600*f*.
to termites, 347*a*.

——, **1,1,2,2-tetrabutoxy-†**, toxicity of, 4401*g*.
——, **tetrachloro-**, detection and detn. in air and organs, 974*a*.
reaction (photochem.) with $Ph_2Hg$, 8895*c*.
as solvent in Friedel-Crafts reaction, 209*h*.
styrene transfer consts. in, 5271*b*.
——, **1,1,1,2-tetrachloro-**, removal from $C_2Cl_4$, P 3137*g*.
spectrochem. detn. of, 7367*a*.
——, **1,1,1,2(and 1,1,2,2)-tetrachloro-**, dehydrochlorination of, kinetics of, 7407*e*.
——, **1,1,2,2-tetrachloro-**, in air, max. allowable concn. of, 4401*a*.
azeotrope with $CHBr_3$, 2834*f*.
elec. moments and rotational configurations of, 8770*h*.
heat capacity of, 30*e*.
lyoparachor of, 2834*a*.
spectrochem. detn. of, 7367*a*.
spectrum of, 42*d*, 4573*g*.
ultrasonic velocity in, 1232*h*, 7283*i*.
——, **1,1,1,2 - tetrachloro - 2,2 - bis(*p*-chlorophenyl)-**, 2359*h*, 5894*d*.
as acaricide and insecticide, 3137*h*.
insecticidal action of, 9343*b*.
rearrangement in the presence of $H_2SO_4$ to form 4,4'-dichlorobenzil, 199*b*
——, **1,1,1,2 - tetrachloro - 2,2 - bis(*p*-nitrophenyl)-**, 4658*e*.
——, **1,1,1,2 - tetrachloro - 2,2 - difluoro-**, P 5789*a*.
——, **1,1,2,2 - tetrachloro - 1,2 - difluoro-**, P 5031*i*.
——, **1,1,1,2 - tetrachloro - 2,2 - diphenyl-**, in European-corn borer control, 1896*f*.
mtration of, 4658*e*.
——, **1,1,2,2 - tetrachloro - 1 - fluoro-**, 2925*b*.
——, **1,1,2,2-tetrafluoro-1,2-dinitro-**, P 3025*b*.
——, **1,1,2,2 - tetrakis(*p* - bromophenyl)-1,2-dichloro-**, 7006*b*.
——, **1,1,1,2-tetraphenyl-**, 2-aryl derivs., dissocn. kinetics of, 194*d*.
——, **1,1,2,2-tetraphenyl-**, 188*e*.
formation in oxidation of $Ph_2CH_2$ and its oxidation, 2194*b*.
formation of, from reaction of $Ph_2C{:}NNHPh$ with NaOH, 1027*a*.
——, **1,1,1,2(and 1,1,2,2)-tetraphenyl-2-(and 1)-*p*-propylphenyl-**, 2608*a*.
——, **1,1,1,2 - tetraphenyl - 2 - *m*(*o* and *p*)-tolyl-**, dissociation of, kinetics of, 5387*f*.
——, **1,1,1,2(and 1,1,2,2) - tetraphenyl-2(and 1)-*p*-tolyl-**, 2608*a*.
——, **1,1,1,2 - tetraphenyl - 2 - [2,3-(2,4-, 2,5-, 3,4- and 3,5)-xylyl]-**, dissocn. of, 6496*d*.
——, **1,1,1 - tribromo - 2,2 - bis(*p*-bromophenyl)-**, effect on respiration of *Oryzaephilus surinamensis*, 9342*i*.
insecticidal action of, 9343*b*.
——, **1,1,1 - tribromo - 2,2 - bis(*p*-chlorophenyl)-**, 2359*h*.
effect on respiration of *Oryzaephilus surinamensis*, 9342*i*.
insecticidal action of, 9343*b*.
——, **1,1,1 - tribromo - 2,2 - bis(*p*-fluorophenyl)-**, P 351*a*.
insecticidal action of, 9343*b*.
——, **1,1,1 - tribromo - 2,2 - bis(*p*-iodophenyl)-**, insecticidal action of, 9343*b*.
——, **1,1,1 - tribromo - 2,2 - bis(*p*-nitrophenyl)-**, 4658*d*.
——, **trichloro-**, as solvent in degreasing pickled sheepskins, 4042*d*.
system: $MeNO_2$–, 4909*i*.
——, **1,1,1-trichloro-**, 3372*e*, P 7035*f*.
aryl derivs., P 351*b*, P 5040*d*.
2,2-bis(carboxyalkylaryl) derivs., P 2364*e*.
2,2-diaryl derivs., P 4420*c*, P 7968*h*.
prepn. by photochlorination of $C_2H_3$, P 2870*f*.
reaction with BuMgCl, 2925*g*.
——, **1,1,2-trichloro-**, in air, max. allowable concn. of, 4401*a*.
in 2-butanone drying, 8753*e*.
condensation products with anacardic material, P 904*e*.
dehydrochlorination of, kinetics of, 7407*e*.
elec. moments and rotational configurations of, 8770*h*.
manuf. of, P 3834*e*.
removal from $C_2Cl_4$, P 3437*g*.
spectrochem. detn. of, 7367*a*.
spectrum of, 42*d*.
in sugar-beet-nematode control, 3134*f*.
——, **1,1,1 - trichloro - 2,2 - bis(*p*-chlorobenzylmercapto)-†**, P 6358*h*.
——, **1,1,1 - trichloro - 2,2 - bis(4'-chloro - 4 - biphenylyl)-**, and derivs., 7927*e*.
——, **1,1,1 - trichloro - 2,2 - bis(4-chloro - 3,5 - dinitrophenyl)-**, as acaricide and insecticide, 3137*g*.
——, **1,1,1 - trichloro - 2,2 - bis[3(and 4)-chloro-4(and 3)-fluorophenyl]-**, P 351*a*.
——, **1,1,1 - trichloro - 2,2 - bis(1-chloro-2-naphthyl)-**, as acaricide and insecticide, 3137*g*.
——, **1,1,1 - trichloro - 2,2 - bis(2-chloro-1-naphthyl)-**, as acaricide and insecticide, 3137*g*.
——, **1,1,1 - trichloro - 2,2 - bis(4-chloro-2-nitrophenyl)-**, 2359*h*.
——, **1,1,1 - trichloro - 2,2 - bis(4-chloro-3-nitrophenyl)-**, as acaricide and insecticide, 3137*g*.
——, **1,1,1 - trichloro - 2,2 - bis(*p*-chlorophenyl)-(*DDT*)**, P 4299*h*.
as acaricide and insecticide, 3137*f*
in acarid control in orchards, 1523*b*.
adsorption of, and its analogs by chitin, 2254*g*.
aerosol of, effect on plants, 1523*e*.
aerosols contg. pyrethrum and, stability of, 9330*d*.

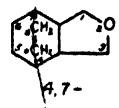
**Ethanodibenzanthracene**,



*7,14——[ah]*

**7,14-Ethanodibenz[*a,h*]anthracene-15,16-dicarboxylic acid, 7,14-dihydro-**, disodium salt, bacterial mutation by, 2275*f*.
**10,17-Ethanodibenzo[*a,c*]pentacene**,

*10,17—[a,c]*

**10,17-Ethanodibenzo[*a,c*]pentacene-19,20-dicarboxylic anhydride, 10,17-dihydro-**, 1364*d*.
**Ethanoic acid**. See *Acetic acid*.
**4,7-Ethanoisobenzofuran**,

*4,7-*

**4,7-Ethanoisobenzofuran-1,3-dione, tetrahydro-**. See *Bicyclo[2.2.2]octene-2,3-dicarboxylic anhydride*.
**Ethanol**. See *Ethyl alcohol*.
——, **2-(allylamino)-**, 7246*f*.
——, **2,2'-(allylimino)di-**, 7246*f*.
——, **2-(allyloxy)-**, phthalate, as plasticizer for vinyl chloride resins, P 7755*i*.
——, **2-amino-**, anthraquinone dyes from, P 7709*f*.
benzoate-HCl, 3014*f*.
butadiene sepn. from olefins by aq. solns of cuprous salts contg., P 6218*b*.
carbon dioxide absorption by, kinetics of, 23*g*.
cellulose degradation by, in encrustant removal from hemp fiber, 4858*f*
choline from, and D- and L-methionine, 6573*i*.
chromatography on starch columns, 5818*e*
compd. with dodecyl sulfoacetate, detn. of, P 6950*a*.
with 2-mercaptobenzothiazole, for addn. to drilling muds, P 6402*e*.
with 1-sulfanilyl-2-thiourea, P 6874
*N*-derivs., reaction with CNCl, P 252*e*
detection of, 2648*h*.
detn. in mixt. with di- and triethanol amine, 6364*e*.
*N,N*-dialkyl derivs, esters, 2190*f*
dialkyl, reaction with benzhydryl halide in the presence of alkali metal carbonate, P 1064*f*.
effect on blood vessels of frog preps 5493*b*.
on fat of turkeys, 1087*h*.
on heart, 9250*f*.
on lipide phosphorylation, 1843*f*.
on liver-phospholipide formation, 9264*g*.
ester (acid) with sulfuric acid, reaction with quinizarin derivs., P 9467*c*.
esters with 1,3-dimyristate and 1-erucate 3-stearate of 2-glycerophosphoric acid, 570*h*.
with 1,3-dipalmitate of 2-glycerophosphoric acid, P 1052*f*.
with fatty acids, hydrohalides, P 674*e*.
heat of ionization of ammonium ion from, 6904*b*.
and 2-hydroxyethylcarbamate (salt), 6157*i*.
in lipides of tissue, phosphatide content and, 4355*c*.
naphthoquinoneimide dye from, P 8167*b*
as peptizing agent in phenothiazine prepn., P 3572*c*.
pharmaceutical, monograph for, 4809*f*, 8103*c*.
phenylacetate-HCl, effect on penicillin production, 2269*h*.
phosphate, hydrolysis and synthesis by phosphatases, 9091*d*.
reaction product with coconut oil acid, cyanoguanidine, and glycidol or ethylene oxide, sulfuric acid esters, as textile aids, P 7727*ce*.
reaction product with paraformaldehyde and *N*-(hydroxymethyl)stearamide, P 1434*g*.
reaction with *o*-chlorobenzaldehyde and with salicylaldehyde, 4235*b*.
reaction with mustard gas, 6336*i*.
requirements of laying chickens for, 8466*g*.

salt with *p*-aminobenzenephosphonic acid, 1737*i*.
salt with *p*-[(2-hydroxyethylcarbamyl)-methoxy]benzenearsonic acid, 3364*g*.
sepn. of mixt. of, $(HOCH_2CH_2)_2NH$ and $(HOCH_2CH_2)_3N$ by azeotropic distn., P 674*c*.
system: $Et_2O$–pyridine–, 8833*b*.

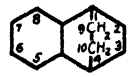
(2 - dimethylaminoethoxy)diphenylacetate (ester), P 3462*f*.
diphenylacetate-HCl, spasmolytic activity of, 8546*b*.
effect on lipide phosphorylation, 1843*f*.
ester(di-) with 1-benzyl-2,5-dimethyl-3,4-pyrroledicarboxylic acid, P 4302*i*.
ester(di-) with 5-carboxy-1,2,4-trimethyl-3-pyrroleacrylic acid, P 4302*i*.
esters, 2190*g*.
with derivs. of pyrroledicarboxylic acids, P 4302*g*, P 4701*a*.
with Et H 1,2,5-trimethyl-3,4-pyrroledicarboxylate, P 4302*h*.
with fatty acids and their hydrochlorides, 7940*b*.
with penicillin G, -HCl, 633*f*.
with 5,6,7,8-tetrahydro-1 naphthoic acids, and their hydrochlorides, 203*b*.
esters, derivs., 3392*b*.
α - methyl - α - propylvalerate (ester), P 3443*f*.
in nutrition of German cockroach, 3939*i*.
pharmacology of, 1861*e*.
α - phenylcyclohexaneacetate (ester), P 679*g*.
1 - phenylcyclopentanecarboxylate (ester), P 6655*h*.
3 - thiophenecarboxylate (ester) and -HCl, 630*g*.
1 - *p* - tolylcyclohexanecarboxylate, P 7959*c*.
——, **2 - (2 - dimethylaminoethylmercapto)-**, diphenylacetate (ester), citrate, 3395*b*.
——, **2,2' - [4 - (*p* - dimethylaminostyryl) - 6 - methyl - 2 - pyrimidyliimino]di-**, 3427*b*.
–, **2,2',2'',2''' - (3,3' - dimethyl - 4,4'-biphenylenedinitrilo)tetra-**, dipicrate, 7443*e*.
–, **2 - (2,2 - dimethylpropylamino)-**, 3421*c*.
–, **2 - [4 - (2,4 - dinitrophenylazo)-*N* - 2 - phenoxyethyl - *m* - toluidino]-**, sulfate (acid ester), P 8154*g*.
–, **2,2' - [*p* - (3,5 - dinitrophenylazo)phenylimino]di-**, and ester with chlorosulfoacetic acid, P 9462*f*.
–, **2-(dioxanyl)-**. See *Dioxanethanol*.
–, **1,1-diphenyl-**. See *Benzhydrol, α-methyl-*.
——, **1,2 - diphenyl - 1 - *p* - propoxyphenyl-**, P 6666*h*.
——, **1,1-di-2-pyridyl-**, 4266*b*.
and dihydrochloride, 2205*e*.
——, **1,1'-dithiodi-**, allophanate carbamate, 2945*d*.
——, **1-ethoxy-**, esters, 3786*a*, 6576*e*.
——, **2-ethoxy-**, P 676*d*, 6163*c*.
acetate, cholinesterase action on, 9122*b*.
bactericidal action of, 7079*e*, 9387*d*.
disinfectant contg., P 352*e*.
effect on ammonolysis of MeOAc, 6495*d*.
esters, behavior in $H_2SO_4$, 569*b*.
ester with γ-lactone of 5-hydroxy-2,3-norcamphanedicarboxylic acid, P 3032*i*.
fumarate, P 903*h*.
hydraulic fluid from blown castor oil and, P 1504*h*.
iron oxide pigment powder wetting by, 8697*h*.
lactate and its acetate, P 676*c*.
laurate, as plasticizer for polystyrene, P 8209*c*.
3-methoxysalicylate, 7455*h*.
3-methoxysalicylate and vanillate, 4241*i*.
naphthoquinone imine dye from, P 8167*h*.
oleate, reaction product with $H_3PO_4$, P 4877*g*.
phys. constants of, 2956*b*.
in plant extns., 9363*b*.
polyvinyl acetate solns. in, as hydraulic fluids, P 4791*f*.
reactions with phthalocyanine derivs., P 8173*f*.
in styrene recovery from hydrocarbon oils, P 5582*k*.
——, **2-(2-ethoxyethoxy)-**, arsenic compd of, as motor fuel additive, P 9431*e*.
chloroformate, condensation product with sulfonated 2 hendecylbenzimidazole, P 441*f*.
and derivs., 3784*d*.
as dolefin absorbent, P 7275*b*.
lactate acetate, P 676*e*.
maleate, as foam inhibitor, 7161*d*.
phthalate, as lubricant additive, P 1960*b*
system: cresol, 4063*e*.
vanillate, 4242*a*, 7455*g*.
——, **2 - [2 - (2 - ethoxyethoxy)ethoxy]-**, and *p*-toluenesulfonate, 3784*d*.
——, **2 - (2 - ethoxyethylmercapto)-**, (compd. omitted from abstr.), 2928*b*
——, **2-ethylamino-**, effect on phospholipide formation in liver, 6291*d*.
esters, local anesthetics, P 4430*d*.
——, **2-*N*-ethylanilino-**, azo dyes from, P 4019*e*, P 7235*c*.
1,3-benzodioxan-6-ylazo dyes from, P 8149*c*.
disazo dye from, P 859*e*.
——, **2-(2-ethylbutoxy)-**, vanillate, 4241*i*, 7455*g*.
——, **2,2' - (ethylenediimino)di-**, effect on perfused frog prepn., 5493*i*.
——, **2,2',2'',2''' - (ethylenedinitrilo)-tetra-**, dihydrochloride, 2927*d*.
——, **2,2'-ethylenedioxydi-**. See *Triethylene glycol*.
——, **2-(2-ethylhexyloxy)-**, acrylate, P 3030*i*.
lactate acetate, P 676*d*.
——, **2 - [2 - (2 - ethylhexyloxy)ethoxy]-**, acrylate, P 3030*i*.
——, **2-ethylideneamino-**, P 7955*e*.
——, **2,2'-(ethylimino)di-**, P 2633*g*.
——, **2-(ethylmercapto)-**, 7420*i*.
and esters, P 3447*g*.
——, **2 - [ethyl(1 - naphthylmethyl)-amino]-**, hydrochloride, antagonism to adrenaline and histamine, 2320*a*.
——, **2 - (1 - ethyl - 4 - piperidylamino)-**, and derivs., 2207*c*.
——, **2-(1-ethylpropylamino)-**, 3421*c*.
diphenylacetate-HCl, P 2639*h*.
——, **2-(2-fluorenylamino)-**, 7443*d*.
——, **2-fluoro-**, and esters, 6163*f*.
and esters, volatility and vapor pressure of, 8841*a*.
fluophosphate, 121*e*.
α-fluoroacrylate, P 6413*b*.
and 1-naphthalenecarbamate, 6163*c*.
2-naphthalenecarbamate, toxicity to rats, 348*g*.
reaction with hydroxyl ion, kinetics of, 2848*f*.
*p*-toluenesulfonate, 2927*g*.
——, **2-(2-fluoroethoxy)-**, 6163*cg*.
——, **2-(furyl)-**. See *Furanethanol*.
–, **2-guanidino-**. See *Guanidine, (2-hydroxyethyl)-*.
, **2-(hendecylmercapto)-**, 2928*g*.
, **2,2' - [[2 - [2 - (8 - heptadecenyl)-2 - imidazolin - 1 - yl]ethylimino]-bis(ethyleneoxy)]di-**, P 5180*e*.



—, **2,2′ - [2 - (8 - heptadecenyl) - 2 - imidazolin - 1 - yl]ethylimino]-di-**, P 5180*s*.
—, **2-(heptylmercapto)-**, 2928*g*.
—, **1-(heptyloxy)-**, acetate, 6576*f*.
—, **2-(hexyloxy)-**, bactericidal action of, 7079*f*, 9387*d*.
—, **2,2′-hydrazodi-**, reaction with glycidol or stearic acid, textile assistants by, P 2796*c*.
—, **2 - (hydroxy - *N* - 2 - phenoxyethyl-toluidino)-**, sulfate (acid ester), azo dyes from, P 8155*a*.
—, **2,2′-iminodi-**, alkyd resins from tetrachlorophthalic acid and, 8733*d*.
*N*-alkyl derivs., P 2633*e*.
and bis(2-hydroxyethyl)carbamate, 6158*a*.
chloro derivs., effect on heart, 2700*b*.
compd. (salt) with 3,5-diiodo-4-oxo-1(4 *H*)-pyridineacetic acid—see *1(4 H)-Pyridineacetic acid, 3,5-diiodo-4-oxo-*.
compd. with *p,α*-dimethylbenzyl camphorate, effect on albumin turnover, 7587*h*.
with maleic hydrazide, effect on plant growth, 6776*b*.
with 1-sulfanilyl-2-thiourea, P 687*a*.
with α-tocopherol phosphate, P 4702*e*.
detn. of, in mixt. with mono- and triethanolamine, 6364*e*.
3,4 - dihydro - 3 - iodo - 6 - methyl - 2,4-dioxo-1(2 *H*)-pyridineacetate, P 6241*f*.
effect on blood vessels of frog prepns., 5493*b*.
on liver-phospholipide formation, 9264*g*.
on phospholipide formation in liver, 6291*d*.
esters with fatty acids, hydrohalides, P 674*g*.
hydrochloride, as plasticizer for polyvinyl alc., P 9533*e*.
hydrogen sulfide absorption by, from natural gas, 3180*a*.
mono-*p*-butoxybenzoate-HCl, local anesthetic, P 4430*d*.
as peptizing agent in phenothiazine prepn., P 3572*c*.
reaction product with *p-tert*-butylphenol, HCHO and HCl, P 3186*d*.
reaction with nitriles and with KCN, 2579*c*.
sepn. of mixt. of, $H_2NCH_2CH_2OH$ and $(HOCH_2CH_2)_2N$ by azeotropic distn., P 674*c*.
-theophylline complex—see under *Theophylline*.
—, **2-(3-indolyl)-**. See *Tryptophol*.
—, **2-iodo-**, reaction with hydroxyl ion, kinetics of, 2848*f*.
—, **1-isoamoxy-**, acetate, 6576*f*.
—, **2-isoamoxy-**, phosphate (neutral), in mercerizing solns., P 9478*b*.
—, **2-(isoamylmercapto)-**, 7420*i*.
—, **1-isobutoxy-**, esters, 6576*f*.
—, **2-isobutylamino-**, *p*-aminobenzoate-HCl—see *Monocaine*.
*p*-ethoxybenzoate-HCl, local anesthetic, P 4430*e*.
—, **2 - (1 - isobutylisoamylamino)-**, esters, hydrochlorides, P 2639*h*.
—, **2-isopropoxy-**, esters, P 3030*i*.
lactate acetate, P 676*d*.
—, **2-(2-isopropoxyethoxy)-**, acrylate, P 3030*i*.
—, **2-isopropylamino-**, 6587*c*.
α-phenylbutyrate-HCl, P 2639*g*.
—, **2-(isopropylmethylamino)-**, 6587*c*.
—, **2-[2(1*H*)-isoquinolyl]-**. See *2(1 H)-Isoquinolineethanol*.
—, **1-mercapto-**, γ-1-mercaptoethylallophanate, 2945*e*.
—, **2-mercapto-**, 2935*g*.
derivs., 6573*i*.
detn. of, 6114*c*.
effect on chymotrypsin, chymotrypsinogen and trypsin, 2254*f*.
effect on polymerization of allyl and methacrylate compds., 8199*i*.
as stabilizer for polysulfone resins, P 9527*e*.
—, **2 - (2 - mercapto - 4 - pyrimidyl-amino)-**, 8395*d*.
—, **2-methoxy-**, and acetate, for azeotropic sepn. of xylene isomers, P 4007*c*.
and acetate, in styrene recovery from hydrocarbon oils, P 5582*h*.
bactericidal action of, 7079*e*, 9387*d*.
chloroformate, condensation product with sulfonated 2-heptadecylbenzimidazole, P 441*e*.
disinfectant contg., P 352*e*.
ester with diglycollic acid, 9032*e*.
iron oxide pigment powder wetting by, 8697*h*.
lactate acetate, P 676*d*.
methacrylate, P 5036*b*.
phthalate, effect on absorption value of pigments, 8698*d*.
phys. constants of, 2956*b*.
silicate, 2160*c*.
*p*-toluenesulfonate, as plasticizer for polysulfone resins, P 7751*e*.
vanillate, 4241*i*, 7455*g*.
—, **2-*m*-methoxyanilino-**, azo stilbene dyes from, P 8151*g*.
—, **2-*p*-methoxyanilino-**, 7442*i*.
—, **2-(2-methoxyethoxy)-**, effect on ammonolysis of esters, 6495*d*.
lactate acetate, P 676*e*.
as synergist for nicotine, 5894*a*.
system: cresol-, 4063*e*.
vanillate, 4242*a*, 7455*g*.
—, **2 - (2 - methoxyethylmercapto)-**, 2928*h*.
—, **2,2′-(methoxyimino)di-**, and picrate, 7422*g*.
—, **2-(methoxymethoxy)-**, ester with diglycolic acid, 9032*e*.
reaction with $C_2H_2$, P 1051*g*, P 9080*b*.
—, **2,2′ - (methoxymethylimino)di-**, P 3839*f*.
—, **2 - (*m* - methoxy - *N* - 2 - phenoxyethylanilino)-**, sulfate (acid ester), azo dyes from, P 8154*i*.
—, **2,2′ - (6 - methoxy - *m* - tolylimino)di-**, azo dyes from, P 8145*e*.
—, **2-methylamino-**, 572*i*.
effect on lipide phosphorylation, 1843*f*.
—, **2-*N*-methylanilino-**, azo dyes from, P 7697*h*, P 8145*e*.
and chlorosulfoacetate, azo dye from, P 4475*a*.
esters, azo dyes from, P 4471*f*.
—, **2-(1-methylbutylamino)-**, 3421*c*.
esters, hydrochlorides, P 2639*h*.

—, **2,2′-(methylimino)di-**, 2927*d*, P 3839*e*.
polyelectrolyte from, 1626*d*.
tissue culture expts. with, 5503*b*.
—, **2-methylmercapto-**, derivs., 2571*g*.
—, **2 - (2 - methylmercaptoethylmercapto)-**, (compd. omitted from abstr.), 2928*h*.
—, **1 - (*p* - methylmercaptophenyl)-1,2-diphenyl-**, 7467*f*.
—, **2-(4-morpholinyl)-**. See *4-Morpholineethanol*.
—, **2-(2-naphthoxy)-**, P 673*h*.
hypnotic contg., P 8105*b*.
—, **2 - [*N* - 2 - (1 - naphthoxy)ethylanilino]-**, sulfate (acid ester), azo dyes from, P 8155*a*.
—, **1-(naphthyl)-**. See *Naphthalenemethanol, α-methyl-*.
—, **2-(naphthyl)-**. See *Naphthaleneethanol*.
—, **2 - [*N* - 2 - (1 - naphthyl)ethylanilino]-**, sulfate (acid ester), azo dye from, P 8155*c*.
—, **2,2′-(1-naphthylimino)di-**, picrate, 7443*c*.
—, **2,2′-(2-naphthylimino)di-**, and picrate, 7443*c*.
—, **2,2′,2″-nitrilotri-**, alkyd resins from tetrachlorophthalic acid and, 8733*d*.
as butadiene-styrene rubber softener, P 3230*b*.
chlorinated paraffin wax stabilization by, P 1179*d*.
chloro derivs., effect on heart, 2700*b*.
compd. with 2-*sec*-butyl-4,6-dinitrophenol, as insecticide for fruit trees, 5897*h*, 5898*c*.
with coumarin derivs., 5399*f*.
with 2-cyclohexyl-4,6-dinitrophenol, in codling moth and mite control, 7630*c*.
with halogenated stearic acids as extreme-pressure agents in lubricants, P 6821*a*.
with maleic hydrazide, effect on plant growth, 6776*b*.
with naphthalenesulfonic acids, mixts. with Ca lignosulfonates for addn. to concrete, 2752*a*.
with sulfanilamide derivs., therapeutic activity of, 3097*d*.
with 1-sulfanilyl-2-thiourea, P 687*a*.
with tartaric acid, and its reaction product with $H_2SnO_3$, 6171*c*.
condensation products with *N*-(hydroxymethyl) amides, P 7728*e*.
as cutting-oil component, P 13075*b*.
detn. in mascara, 9368*c*.
detn., in mixt. with mono- and diethanolamine, 6364*e*.
(2,4-dichlorophenoxy) acetate (salt), effect on growth of pathogenic fungi, 3133*c*.
effect on blood vessels of frog prepns., 5493*b*.
on phospholipide formation in liver, 6291*d*.
on respiratory exchange of liver, 4385*i*.
on soly. of Cu(OH)$_2$ in $NH_4OH$, 2489*e*.
hydrochloride, as expectorant, 8615*i*.
lubricants from monocarboxylic acids, org. sulfonates and, P 9431*i*.
monoricinoleate, reaction product with diethylene glycol bis(chloroformate), as demulsifier, P 6818*e*.
oleate, effect on elec. cond. of transformer oil, 6039*h*.
oleate, mixts. with Aerosol OT and glycerol as antifoaming agents in oils, 6815*a*.
as peptizing agent in phenothiazine prepn., P 3572*c*.
as promoter for peroxide polymerization catalysts, P 1220*c*.
reaction products with polyesters and rosin, P 896*c*.
reaction product with tall oil, as activator for thiazole or thiuram vulcanization accelerators, P 4046*h*.
sepn. of mixt. of, $H_2NCH_2CH_2OH$ and $(HOCH_2CH_2)_2NH$ by azeotropic distn., P 674*c*.
soap in rubber dispersion, P 2463*b*.
for tech. and pharmaceutical use, 6789*f*.
textile agents from, P 8694*ef*.
—, **2,2′,2″-[nitrilotris(ethyleneoxy)]-tri-**, esters, P 9446*f*.
reaction product with *N*-(hydroxymethyl)oleamide, P 8712*f*.
—, **2-nitro-**, P 665*c*.
for insolubilization of polyvinyl alc. and esters, 9533*f*.
nitrate, P 5411*c*.

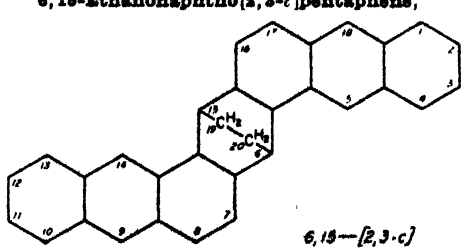
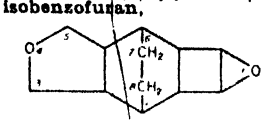
reaction product with pentaerythritol, esters of, P 9081*e*.
spectrum of, 8885*c*.
——, **2-toloxy-**, P 7960*c*.
——, **2-(*N*-2-*p*-toloxyethylanilino)-**, sulfate (acid ester), azo dyes from, P 8154*h*.
sulfate (acid ester) Na salt, azo dye from, P 8155*c*.
——, **2 - *o* - toluidino-**, toxicity of, 4401*h*.
——, **2,2′-(*m*-tolylimino)di-**, azo dyes from, P 7697*g*, P 8145*e*, P 9458*f*, P 9459*b*.
bis(hydrogen oxalate), P 1988*h*.
chlorosulfoacetate, azo dyes from, P 4474*b*.
——, **2,2′ - [*m*(and *p*) - tolylimino]di-**, 7443*a*.
——, **2,2′-(*o*-tolylimino)di-**, picrate, 7443*a*.
——, **2-*p*-tolylsulfonyl-**, 7421*b*.
——, **2-*s*-triazin-1(2*H*)-yl-**. See *s-Triazine-1(2H)-ethanol*.
——, **2,2,2-tribromo-**. See *Avertin*.
——, **trichloro-**, methacrylate, polymers of, P 4898*f*.
——, **2,2,2-trichloro-**, 2570*e*.
benzoate, behavior in $H_2SO_4$, 569*d*.
chlorobenzoates, 5764*h*.
methacrylate, fungistatic activity of, 9334*c*.
methacrylate, polymers of, P 4895*d*.
prepn. of, 5765*b*.
——, **2,2,2-trichloro-1-ethoxy-**, manuf. of, P 5412*e*.
reaction with carboxylic acids, P 5412*d*.
——, **2,2,2-trifluoro-**, sodium deriv., P 2219*f*.
——, **2-[2,3,5(2,4,5 and 2,4,6)-trimethylbenzyloxy]-**, as insect repellents, P 5153*e*.
——, **1,1,2-tris(*p*-chlorophenyl)-**, 7469*a*
——, **2,2,2 - tris(dimethylaminomethyl)-**†, 134*b*.
**Ethanolamine**. See *Ethanol, 2-amino-*.
——, **2-phenyl-**. See *Benzyl alcohol, α-(aminomethyl)-*.
——, **phosphatidyl-***, 4318*a*.
**Ethanolamines**. See *Ethanol, 2-amino-; Ethanol, 2,2′-iminodi-; Ethanol, 2,2′,2″-nitrilotri-*; and "amino" under *Alcohols*.
**Ethanolysis**. See *Alcoholysis*.
**1,3-Ethanonaphthalene**,



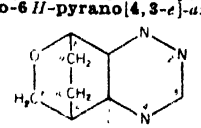
*1,3-*

——, **1,2,3,4-tetrahydro-**, 3399*a*.
**1,4-Ethanonaphthalene**,



*1,4-*

**1,3 - Ethanonaphthalene - 6 - sulfonamide, 1,2,3,4-tetrahydro-**, 3399*a*.
**1,3 - Ethanonaphthalene - 7 - sulfonamide, 1,2,3,4-tetrahydro-**, 3399*a*
**1,4 - Ethanonaphthalene - 5,6,9,10 - tetracarboxylic dianhydride, 8-(*p*-*tert*-butylphenyl) - 1,4,4a,5,6,7-hexahydro-**, 206*d*
——, **3 - chloro - 8 - (*p* - chlorophenyl)-1,4,4a,5,6,7-hexahydro-**, 206*e*
——, **8 - (*p* - chlorophenyl) - 1,4,4a,5,6,7-hexahydro-**, 206*e*.
——, **8 - *p* - cumyl - 1,4,4a,5,6,7 - hexahydro-**, 206*d*
——, **8 - (*p* - ethylphenyl) - 1,4,4a,5,6,7-hexahydro-**, 206*d*.
——, **3 - fluoro - 8 - (*p* - fluorophenyl)-1,4,4a,5,6,7-hexahydro-**, 206*e*.
——, **3 - fluoro - 1,4,4a,5,6,7 - hexahydro-8-*p*-tolyl-**, 206*e*.
——, **8 - (*p* - fluorophenyl) - 1,4,4a,5,6,7-hexahydro-**, 206*d*.
——, **1,4,4a,5,6,7 - hexahydro - 3-methoxy-7-methyl-**, 1757*b*, 2970*a*.
——, **1,4,4a,5,6,7 - hexahydro - 3-methyl-8-*p*-tolyl-**, 206*e*.
——, **1,4,4a,5,6,7 - hexahydro - 8 - *p*-tolyl-**, 206*b*.
**1,3 - Ethanonaphthalen - 4(1*H*) - one, 2,3-dihydro-**, and derivs., 3398*d*.
**6,15-Ethanonaphtho[2,3-*c*]pentaphene**,



*6,15—[2,3-c]*

**6,15 - Ethanonaphtho[2,3 - *c*]pentaphene - 19,20 - dicarboxylic acid, 5,6,9,14,15,18 - hexahydro - 5,14-dihydroxy-**, dilactone, 1365*b*.
**6,15 - Ethanonaphtho[2,3 - *c*]pentaphene - 19,20 - dicarboxylic anhydride, 5,6,9,14,15,18 - hexahydro-5,9,14,18-tetraoxo-**, 1365*a*.

——, **2-(2-chloroethylmercapto)ethyl methyl**, 2928*h*.
——, **2-(2-chloroethylmercapto)ethyl propyl**, 2928*h*.
——, **1-(2-chloroethyl)-3-phenyl-2-propynyl methyl**, 1021*b*.
——, **2-(2-chloroethylsulfonyl)ethyl propyl**, 2928*h*.
——, **2-chloroethyl 1,2,2,2-tetrachloroethyl**, P 7188*c*.
as insecticide, P 7634*i*.
——, **2-chloroethyl tolyl**, P 7960*c*.
——, **2-chloroethyl triphenylmethyl**, 4657*e*.
——, **2-chloroethyl vinyl**, polymers of, with Et acrylate, manuf. and curing of, 3646*i*.
toxicity of, 4401*f*.
——, **2-chloro-1-fluorovinyl phenyl**, P 9084*h*.
——, ***o*(and *p*)-(chloromercuri)phenyl phenyl**, 4236*f*.
——, **4-chloro-3-methyl-1,3-butadienyl methyl**, 5362*i*.
——, **2-chloro-3-methyl-2-butenyl ethyl**, 5362*f*.
——, **2-chloro-3-methyl-2-butenyl methyl**, 4362*f*.
——, **chloromethyl ethyl**, reaction with 1,3-butadiene, 6568*c*.
tion products with cyanoguanidine f softening and waterproofing textiles, P 6440*d*.
**chloromethyl isobutyl**, reaction with 1,3-butadiene, 6568*d*.
——, **chloromethyl methyl**, 7409*i*.
reaction with terpenes, 5017*g*.
——, **3-chloro-1-methyl-4-pentenyl ethyl**, 9025*g*.
——, **5-chloro-1-methyl-3-pentenyl ethyl**, 9025*g*.
——, **3-chloro-1-methyl-4-pentenyl isobutyl**, 9025*g*.
——, **5-chloro-1-methyl-3-pentenyl isobutyl**, 9025*g*.
——, **chloromethyl propyl**, dipropoxymethane from, 6568*e*.
——, **1-(6-chloro-2-naphthyl)ethyl methyl**†, 1756*c*.
——, **3-chloro-4-pentenyl cyclohexyl**, 9025*g*.
——, **5-chloro-3-pentenyl cyclohexyl**, 9025*g*.
——, **3-chloro-4-pentenyl ethyl**, 6568*c*, 9025*f*.
——, **5-chloro-3-pentenyl ethyl**, 6568*c*, 9025*f*.
——, **3-chloro-4-pentenyl isoamyl**, 9025*f*.
——, **5-chloro-3-pentenyl isoamyl**, 9025*f*.
——, **3-chloro-4-pentenyl isobutyl**, 6568*d*.
——, **5-chloro-3-pentenyl isobutyl**, 6568*d*.
——, **3-chloro-4-pentenyl methyl**, 9025*f*.
isomerization of, 130*g*.
——, **5-chloro-3-pentenyl methyl**, 9025*f*.
isomerization of, 130*g*.
——, **3-chloro-4-pentenyl 2-methylhexyl**, 9025*f*.
——, **5-chloro-3-pentenyl 2-methylhexyl**, 9025*f*.
——, **3-chloro-4-pentenyl propyl**, 9025*f*.
——, **5-chloro-3-pentenyl propyl**, 9025*f*.
——, ***p*-chlorophenyl 2,4(and 3,4)-dichlorobenzyl**, as acaricide and insecticide, 3138*b*.
——, ***p*-chlorophenyl dichlorovinyl**, P 7966*a*.
——, ***p*-chlorophenyl 2,2-dichlorovinyl**, P 7045*g*.
——, ***p*-chlorophenyl dodecyl**, as synergist for nicotine, 5893*i*.
——, ***o*-chlorophenyl α,α,α-trifluoro-*m*-tolyl**, P 6234*h*.
——, **3-chloropropyl ethyl**, hydrolysis velocity of, 129*c*.
——, **1-chloropropyl methyl**, 6974*e*.
——, **3-chloropropyl phenyl**, hydrolysis velocity of, 129*c*.
——, **2-chloro-1,3,3,3-tetrafluoropropenyl phenyl**, P 9084*h*.
——, **α-chloro-*p*-tolyl isopropyl**, 6587*e*.
——, ***p*-chloro-α-(trichloromethyl)benzyl ethyl**, as insecticide, 2359*h*.
prepn. and toxicity to insects, 199*e*.
——, ***p*-chloro-α-(trichloromethyl)benzyl methyl**, as insecticide, 2359*h*.
prepn. and toxicity to insects, 199*d*.
——, **cholesteryl ethyl***, 659*g*.
——, ***i*-cholesteryl ethyl***, 659*f*.
——, **cholesteryl methyl**, reaction product with $SbCl_5$, spectrum of, 5307*g*.
——, ***i*-cholesteryl methyl***, reaction with EtOH in the presence of *p*-$MeC_6H_4SO_3H$, 659*f*.
reaction with thiourea, kinetics of, 659*h*.
——, **2-(1-cyclohexen-1-yl)-3,7-dimethyl-2,6-nonadiene-4,5-diynyl methyl**, 1337*d*.
——, **2-cyclohexen-1-yl ethyl**, reaction with *N*-bromosuccinimide, 2174*a*.
——, **3-cyclohexen-1-ylmethyl methyl**, 7436*g*.
——, **cyclohexyl cyclohexylphenyl**, 6173*h*.
——, **cyclohexyl ethyl**, P 9087*b*.
phys. constants of, 2955*i*.
——, **cyclohexyl methyl**, phys. constants of, 2955*i*.
——, **2-cyclohexyl-1-methylpropyl methyl**, P 679*e*.
——, **cyclohexyl phenyl**, 6173*h*.
——, **cyclohexylphenyl phenyl**, as synergist with DDT, P 812*h*.
——, **cyclohexyl 1,2,2,2-tetrachloroethyl**, P 7188*c*.
as insecticide, P 7634*i*.
——, **cyclohexyl *m*(and *o*)-tolyl**, 6173*i*.
——, **cyclopentyl ethyl**, phys. constants of, 2955*h*.
——, **cyclopentyl methyl**, phys. constants of, 2955*h*.
——, **7-dehydrocholesteryl ethyl***, P 5810*e*.
——, **7-dehydrocholesteryl octyl***, P 5810*e*.
——, **7-dehydrocholesteryl tetrahydrofurfuryl***, P 5810*e*.
——, **β,γ-dibromo-α-(2-bromoethyl)-, cinnamyl methyl**, 1021*c*.
——, **β,γ-dibromo-α-(bromomethyl)-cinnamyl ethyl**, 1020*b*.
——, **β,γ-dibromo-α-(2-chloroethyl)cinnamyl methyl**, 1021*c*.
——, **3,6-dibromo-3,7-dimethyl-9-(2,6,6-trimethyl-1-cyclohexen-1-yl)-4,8-nonadienyl methyl**, 1339*e*.
——, **1,2-dibromoethyl ethyl**, 1019*i*, 7898*g*.
——, **1,2-dibromoisoamyl ethyl**, 2158*d*.
——, **2,3-dibromopropyl propyl**, 2159*c*.
——, **4,4'-dichlorobenzhydryl ethyl**, as acaricide and insecticide, 3137*i*.
——, **4,4'-dichlorobenzhydryl methyl**, as acaricide and insecticide, 3137*h*.
——, **2,4-dichlorobenzyl 2,4-dichlorophenyl**, as acaricide and insecticide, 3138*b*.
——, **1,2-dichloroethyl ethyl**, and reaction with 1,3-butadiene, 2158*h*.
——, **2,2-dichloro-1-fluorovinyl phenyl**, P 9084*h*.
——, **2,2'-dichloroisopropyl phenyl**, 570*a*.
——, **4,4'-dichloro-α-methylbenzhydryl methyl**, as acaricide and insecticide, 3137*i*.
——, **4-(dichloromethylene)-2-cyclohexen-1-yl ethyl**, 4636*i*.
——, **2,4-dichlorophenyl 2,3-dichloropropyl**, as insecticide, P 4808*a*.
——, **2,4(and 2,5)-dichlorophenyl 2,2-dichlorovinyl**, P 7045*g*.
——, **2,4-dichlorophenyl isobornyl**, 1355*a*.
——, **1,3-dichloropropyl methyl**, 1021*b*
——, **2,2-dichlorovinyl α,α-diphenyl-*p*-tolyl**, P 7045*h*.
——, **2,2-dichlorovinyl methyl**, 1404*a*.
——, **2,2-dichlorovinyl *p*-nitrophenyl**, P 7045*h*.
——, **2,2-dichlorovinyl pentachlorophenyl**, P 7045*g*.
——, **2,2-dichlorovinyl phenyl**, P 7045*g*
——, **2,2-dichlorovinyl 2,4,5-trichlorophenyl**, P 7045*g*.
——, **1,1-dimethylallyl methyl**, 113*d*, 114*d*, 6970*c*.
——, **4,8-dimethyl-10-(2,6,6-trimethyl-1-cyclohexen-1-yl)-3,5,7,9-decatetraenyl ethyl**, 1338*c*.
——, **4,8-dimethyl-10-(2,6,6-trimethyl-1-cyclohexen-1-yl)-3,7,9-decatrien-5-ynyl ethyl**, 1338*f*.
——, **3,7-dimethyl-9-(2,6,6-trimethyl-1-cyclohexen-1-yl)-2,4,6,8-nonatetraenyl ethyl**, 1339*f*.
——, **3,7-dimethyl-9-(2,6,6-trimethyl-1-cyclohexen-1-yl)-2,4,6,8-nonatetraenyl methyl**, 1339*e*, P 1801*d*, P 3152*f*, 5372*a*, P 6657*e*, P 9083*ci*, P 9391*b*.
——, **3,7-dimethyl-9-(2,6,6-trimethyl-1-cyclohexen-1-yl)-2,4,6,8-nonatetraenyl phenyl**, P 1801*f*, 5372*a*.
——, **3,7-dimethyl-9-(2,6,6-trimethyl-1-cyclohexen-1-yl)-2,4,6,8-nonatetraenyl triphenylmethyl**, P 3152*e*.
——, **3,7-dimethyl-9-(2,6,6-trimethyl-1-cyclohexen-1-yl)-2,6,8-nonatrien-4-ynyl ethyl**, 1339*e*.
——, **1,5-dimethyl-1-vinyl-4-hexenyl ethyl**, P 6219*g*.
——, **1,5-dimethyl-1-vinyl-4-hexenyl isobutyl**, P 6219*g*.

aryl, contg. one or more $CF_3$ groups, P 6234*f*.

assocns. between water and, effect of double bond on, 3671*h*.
as azeotrope formers in concn. of aq. solns. of HCHO, P 2221*d*.
azeotropes of, 2835*abc*.
benzhydryl amino, P 5803*g*.
benzhydryl 2-haloethyl, reaction with tertiary amines, P 2641*b*.
bromomethyl branched-chain alkyl, 2926*a*.
calcn. of free energy function, heat content, heat and free energy of formation of, 5658*e*.
in carbon black, 2068*g*.
of cardanol (hydrogenated) for sludging inhibition in hydrocarbon oils, P 8129*d*.
catalyst complexes of halides and, in alkylation and isomerization of hydrocarbons, P 8666*c*.
chloroalkenyl, 9025*d*
chloromethyl, of polyols, pyridinium salts, reaction with regenerated cellulose, 4010*a*.
*p*-chlorophenyl, P 6663*b*.
compds. with KOH as condensing agents, P 6664*g*.
cyclic, P 3030*d*, P 3042*h*.
anion-exchange resins from alkylene polyamines and, P 5518*b*.
condensation products with (hydroxyalkyl) amides for leveling and penetration of metallized acid dyes, P 9472*a*.
condensation with dimerized fatty acid alkylolamides, P 9472*c*.
in extn. of polyhydric alcs., P 3839*g*.
in fatty materials, detn. of, and oxirane O detn. in, 6841*b*.
Grignard reaction with, 3776*d*, 6155*b*.
hydration of, 1310*e*.
α-keto derivs., 139*c*.
lubricants from reaction products with alcs., unsatd. acids, maleic acid or anhydride, and aliphatic amines, P ¶379*a*.
manuf. from olefins, P 8399*b*.
manuf. from olefins, reactivating Ag catalyst from, P 9299*h*.
manuf. from olefins, Ag-surface catalysts for, P 4289*h*.
oxidation of, P 2224*e*, P 5415*b*.
peroxides of, as polymerization catalysts, P 1812*g*.
reactions with maleic anhydride copolymers, 8202*i*.
reaction with alkylenimines, P 7955*c*.
reaction with amines and $NH_3$, 926*d*.
reaction with HCN, P 1435*b*, P 6647*g*.
reaction with HF, 6163*b*.
reaction with phenol-HCHO polymers, surface-active agents by, P 1587*f*.
reaction with polyols and esterification with palmitic or stearic acid, P 886*e*.
reaction with S compds., 7420*e*.
reaction with thiols, 6574*a*.
reductive cleavage of, of steroid epoxides, 1786*f*, 1787*b*, 3830*e*, 5408*e*.
in stabilization of dichlorobutadiene resins, P 441*b*.
stabilization of protein-HCHO dispersions by, P 3120*b*.
treatment of alginate fibers with diepoxides, P 7237*a*.
vinyl chloride polymerization in presence of, P 7753*c*.
detn. of, 8974*e*.
dichlorovinyl, P 7045*f*.
2-dimethylaminoethyl, of α-phenyl-*o*-cresols, 2969*e*.
drying, P 4683*b*.
effect on acetate rayon, 2777*f*.
2,3-epoxyalkyl 3,3,5-trialkylcyclohexyl, P 2633*i*.
ester derivs. of, P 6224*a*.
ester formation from, by reaction with $AlCl_3$, 2931*f*.
of ethylene glycol with lac, manuf. and esterification with fatty or resin acids, P 4030*b*.
α-ethylpiperonyl, P 2639*c*.
fluorinated, P 2219*e*.
as foam inhibitors, P 4407*c*.
free energies of, 477*h*.
free energy of bonds in, 3276*h*.
of glycerol, naturally-occurring, 1997*a*.
of glycidol and polyglycerols, P 903*i*.
glycidyl, 2130*h*, 2131*bc*.
glycol, and ether esters as azeotropic agents in styrene recovery from hydrocarbon oils, P 5862*h*.
glycol dialkyl, complexes with KOH as catalysts in condensation of $CHBr_3$ or $CHCl_3$ with aldehydes, P 664*e*, P 4284*h*.
glycol mono-, and their esters as azeotropic sepn. of xylene isomers, P 4007*c*.
glycol mono-, for addn. to gelatin dynamite, P 3620*a*.
glycol mono-, pigment powder wetting by mixed monoalkyl, 8698*a*.
halo derivs., velocity of hydrolysis of, 128*i*.
halogenated aryl alkyl, as insecticides, P 5529*e*.
halogenation of unsatd., P 4682*g*.
α-halo, reaction with 1,3-butadiene, 6568*b*.
higher alkyl, of dimethylolurea, P 1200*f*.
hydrogenation of, of acetylenic glycols, 3782*d*.
of hydroxy acids, formation and decompn. in oxidation of paraffin wax with naphthenate catalysts, 4000*c*.
hydroxyalkenyl, 6157*d*.
hydroxy and keto poly-, as lignin models, 3610*e*.
hydroxy, complexes with halloysite and montmorillonite, 463*e*.
hydroxy-polyoxyalkylene, of sorbitan monooleate, lubricants contg., P 5938*f*.
imido—see "esters" under *Imidic acids*.
as insect repellents, P 5153*d*.
from *d*-limonene, 8368*h*.
of lupinine, 6210*b*.
lyoparachors of O in, 2834*d*.
manuf. of, P 9086*i*.
manuf. of, from alcs., catalysts for, P 9300*f*.
mercuri, prepn. of aromatic, by Nesmeyanov reaction, 4236*e*.
mixed, for treatment of wood pulp, P 1980*e*.
mixts. with alcs. and water, and their detn., 5273*g*.
monoalkyl, bactericidal activity against *Bacterium coli*, 1827*c*.
monoalkyl, of hydroquinones, 3386*g*.
nitroalkyl, P 665*d*, 1716*c*.
2-nitroethyl, manuf. of, P 5033*b*.
nitrophenyl, P 687*gi*.
2-norcamphanyl alkyl, P 3462*a*.
octane values of, constitution and, 3998*b*.
oxidation of, to aldehydes, P 8398*d*.
parachors of, 2057*g*.
paraffin-wax soly. in, 8126*d*.
phenol alkylation with, P 687*f*.
phenolic, cleavage of, 5758*i*.
condensation with ketones, 2970*a*.
manuf. of, P 7966*c*.
reactions with acid chlorides in the presence of $HgCl_2$, 183*b*.
reaction with β-aryl glutaconic anhydrides, 4639*i*.
reaction with cyclohexene and with epichlorohydrin, 6173*i*.
terpene, 1354*h*.
with unsatd. side chains, phenol condensation products of, P 4513*a*.
plasticizers, P 5421*e*.
polyalkylene poly-, for improvement of electrodeposition of Sn, P 6095*d*.
polyethylene, for foam prevention, 6815*c*.
of polyethylene glycols, derivs. of, 3784*b*.
polyglycol, effect on sewage treatment, 5140*e*.
polyhydric-alc., hydraulic fluid from, P 1504*d*, P 3949*i*.
polymers with $C_2H_4$, P 3235*h*.
polyolefinic, polymers with Et acrylate, 5988*h*.
polyoxyethylene, for salt manuf. from brine, P 6796*d*.
polyoxypropylene glycol mono-, esters of, as lubricants, P 1562*e*.
prepn. of symmetrical, from long-chain satd. alcs., 5003*d*, 6156*e*.
pyrolysis of, 7895*h*.
of *p*-quinonedioxime in vulcanization of rubbers, 5623*d*.
reaction with CO to give esters, P 3443*b*.
reaction with quaternary ammonium salts, 6622*c*.
reactivity of tertiary alkyl, 3776*g*.
solubilities of homologous, in water, 6889*i*.
soly. in water, heteroatom polarizability and, 3671*i*.
as solvents for org. finishes, 4028*d*.
spectra of *S*-contg., 4215*g*.
of stigmasterol and *i*-stigmasterol, 658*i*.
for sulfur removal from hydrocarbon distillates, P 4844*c*.
systems with $CCl_4$, $SiCl_4$, $GeCl_4$ and $SnCl_4$, 2535*ab*.
tetrachloroethyl aryl, insecticides and fumigants, P 763[illegible]
tetrachloroethyl, as insecticides, P 7634*i*.
thermochor of, 8226*e*.
(2,4,5-trihalophenyl), of glycerol and their derivs., P 675*e*.
ultrasonic velocity in, 8780*e*.
unsatd., dialkyl acetals of alkoxyacetaldehydes for, manuf. of, P 675*d*.
vinyl, P 4683*b*, P 5411*a*.
manuf. of, P 3839*a*.
manuf. of, $C_2H_2$ carburetion for use in, P 7036*f*.
polymers, P 664*f*, P 4051*c*, P 9471*c*.
and their polymers, P 9080*a*.
polymers of, chlorination of, P 5585*b*.
polymers of (Igevins), as adhesives, 8737*i*.
polymers of, stabilized with S, P 8210*b*
polymers with polyolefins, P 3660*c*.
vinyl alkyl, addn. reaction with monocarboxylic acids, 6576*d*.
detn. of, 68*i*.
hydrolysis of, P 7501*b*.
hydrolysis rates in aq. dioxane, 3272*a*
parachors, surface tension, etc., of, 455*h*.
polymerization of, P 2469*h*.
reaction with fatty acids, 3785*i*.
reaction with haldhydrins, 6159*b*.
structure of polymers of, 9523*i*.
of vitamin A and their biol. activity, 5371*i*.
of phenol-HCHO resins, P 5631*a*.

**Ethine.** See *Acetylene*.

**Ethionine.** See *Butyric acid, α-amino γ (ethylmercapto)-*.

**Ethiopine,** 1156*f*.

**Ethocel,** elasticity of, temp. and, 2027*g*

**Ethoxy group,** detn. in ethyl cellulose, 4845*i*.

**Ethyl** (*free radical*), conversion to $C_2H_6$ in hydrocarbon decompn., 5576*f*.
electronic structure of, 2512*a*.
formation from ethane and HO, 8820*h*
heat of formation of, 6470*c*.
reactions in gas phase, 5270*d*.

**Ethyl acetate,** acetic acid parachor in, 8805*b*.
ammonolysis in glycol, rates of, 6495*f*
cellulose nitrate solvation in, 3266*d*.
charcoal heat of wetting by, 8835*f*.
compd. with 3,4,7,8-tetrahydro-3,7 dimethyl - 1,9(2*H*,6*H*) - phenoxaselenindone, 7479*c*.
compression and freezing under pressure, 4067*f*.
corrosion by vapors of, 5721*c*.
decahydronaphthalene peroxide ester re arrangement in, 6188*i*.
effect on adhesive power of soybean protein, 1604*e*.
effect on plants, 2677*b*.
in ethylene chlorohydrin recovery from aq. solns., P 2633*b*.
evapn. rate of, 6048*c*.
fires in, extinguishing of, 6417*g*.
formation of, from EtOH, 8247*b*, 8252*e*
from EtOH oxidation in presence of bromate and Br, 7800*g*.
from reaction of amides with EtOH, 4221*d*.
from reaction of ethyl (trimethylsilyl) acetate with EtOH, 562*g*.
in Reformatskiĭ reaction with Br $CH_2CO_2Et$, 613*c*.
hydrolysis of, HCl effect on, 7303*a*.
kinetics of, 6064*i*, 8827*d*.
transient intermediates in, 5267*c*.
ionization in $H_2SO_4$, 8808*g*.
lyoparachor of, 2834*b*.
manuf. of, P 5412*d*.
mixt. with acetone, dielec. polarization in, 454*b*.
parachor and thermochor of, 2923*f*.
phys. consts. of, 2590*d*.
prepn. of, 127*f*.
pyrolysis of, P 6643*e*.
reaction with AcH to produce 1,3-butadiene, 1713*i*.
with BuOH, rate of, 8827*e*.
with Et formate in presence of Na or NaOEt, 5745*a*.
soly. in Na xylenesulfonate solns., 1242*e*.
solubilization with Na secondary alkyl sulfates, 466*e*.
solns. of ethylcellulose and nitrocellulose, in, expansion on dilu., 6044*h*.
sorption by $Fe_2O_3$, 1240*e*.
spectrum of, 1656*e*.
surface tension of, 8774*g*.
systems: $Et_2O$-, and PrOH-, foam

formation and duration, surface tension, viscosity and vol. contraction of, 8779*d*.
systems with other liquids, 2854*c*.
ultrasonic velocity in, 1620*e*.
vinyl acetate chain-transfer coeff. in, 5271*e*.
viscosity of, 2058*i*.
zinc sol in, autocoagulation of, 7292*b*.
**Ethylal.** See *Methane, diethoxy-*.
**Ethyl alcohol.** (See also *Distillery; Fermentation; Spirits;* etc. For derivatives, see *Ethanol.*)
absolute, P 6362*b*.
absorption by blood and lymph, 8537*a*.
absorption, excretion and oxidation of, effect of dinitrophenol and dinitrocresol on, 7127*c*.
from acetaldehyde, P 2219*a*.
acetoin formation from, by *Bacillus subtilis*, 5824*b*.
-acetone fermentation, effect of conditions of, 4421*i*.
-acetone fermentation, effect of sugar concn. on, 5529*h*.
addiction or habituation to, blood compn. and vitamin $B_1$ content of urine in, 2330*cd*.
genetotropic factors in etiology of, 9217*a*.
as metabolic disease, 9231*c*.
addn. to $(CH_2{:}CH)_2O$, effect of acid base nature of catalyst on, 2079*d*.
adsorption of aq., by catalysts, 2498*d*.
adsorption of, by charcoal, 3686*h*.
by $Ph_2NH$, 464*e*.
by macromols. in binary solvent mixts., 2066*g*.
by $SiO_2$ and $TiO_2$, 6034*c*.
sorbent structure and, 461*i*.
in air, max. allowable concn. of, 4401*a*.
ammonia elec. conductivity in, 5655*h*.
analysis of, for cations, solvents in chromatographic, 6537*c*.
analysis of, for Co and water, 8950*i*.
in *Azotobacter* nutrition, 5821*c*.
from *Balanites aegyptica*, 8572*c*.
from barley, 3561*c*, 6359*c*.
from *Bassia latifolia* flowers, 8605*f*.
from beet molasses, 4036*b*.
benzene detn. in, 2123*d*.
in blood after adrenaline injection and under low barometric pressure, 2691*c*.
in blood after street accidents, 8547*d*.
brain-respiration inhibition by, at varied temps., 1863*b*.
in butadiene and synthetic rubber prepn., history of, 3644*a*.
butadiene prepn. from, 1713*i*, 4213*g*, P 5410*d*, 5733*g*, 7898*c*.
piperylene formation during, 991*h*.
reaction mechanism of, 8349*g*.
calcium compd. removal from material for producing, P 3972*b*.
canned fuel from peat and, P 6810*h*.
from cannery wastes, 9358*h*.
capillary osmosis of, 7765*g*.
caproic and valeric acid synthesis from, by *Clostridium kluyveri*, 7077*i*.
carbon tetrachloride poisoning and, 3523*g*.
from cassava, 5530*i*.
cellulose acetate soly. in solvents contg., 1964*d*.
chlorination of, P 5412*eg*.
chlorophenols in manuf. of, P 6782*c*.
as citrus-seed disinfectant, 1516*g*.
cobalt halide and thiocyanate complexes in, 4070*g*.
cognac, Cu removal from, 5901*c*.
compn. of raw, effect of raw materials and distn. app. on, 9358*h*.
compd. with *N*-benzyladrenalone, 7456*d*.
with $BF_3$, as catalyst in alkylation of 2-methylbutane with propene, 1711*g*.
with *a*-fagarine, salts, 4280*g*.
with 6-iodo-6-desoxy-D-galactose, 150*g*
with sarothamnine, 5543*e*.
with $H_6TeO_6$, 8934*i*.
with 1,2,3,4-tetrahydro-1-pheuyl-2-(1-piperidylmethyl)-1-naphthol, P 5417*h*.
control of bacteria and molds with, in immersion freezing, 4391*d*.
cornea tolerance to, 771*b*, 3110*g*.
from corn fermented with moldy bran, 5901*b*.
decompn. of, by heat, 7899*d*.
by heat in butadiene synthesis with MgO catalysts, 2016*i*.
on $TiO_2$, 8828*b*.
dehydration and dehydrogenation on catalysts, 6407*i*.
dehydration by azeotropic distn. with $C_6H_6$ and system with $C_6H_6$ and $H_2O$, 2058*e*.
dehydration of, P 1434*h*.
on $Al_2O_3$ gels, 2080*e*.
by azeotropic distn., P 3836*a*.
to $C_2H_4$, 2498*c*.
dehydrogenase—see *Alcohol dehydrogenase*.
dehydrogenation of, 9028*a*.
dehydrogenation of, to EtOAc, equil. in, 8247*b*.
denatured, P 5902*a*.
analysis for acetone and iso-PrOH, 7377*g*.
detection of pyridine in, 3146*a*.
from desert plants, 6337*g*.
from deteriorated-cane blackstrap, 5615*d*.
detn. of, 6946*b*.
in blood, 7073*c*.
in grape residue, 5531*c*.
in infusions, 9370*h*.
in MeOH mixts., 522*d*.
in mixts. with essences, 8311*a*.
in spirit-water mixts., 1528*i*.
in tinctures, 6783*f*, 9365*i*.
in wine, 353*a*.
detn. of, and oxidation with $K_2Cr_2O_7$, 5702*f*.
in diabetic prepns., 7638*h*.
dielec. const. in waveguide, 4912*h*.
distn. of, app. for, 4902*i*.
app. for, pressure regulator in water-removing chamber in fractionating, P 5902*c*.
from azobenzene, 8762*c*.
in plate columns, 2043*i*.
in sieve-plate columns, 909*fhi*.
tower for, P 5902*c*.
in wetted-wall column, 1614*i*.
drops condensed between quartz lenses, size of, 6882*e*.
duration of action of, chronaxia and, 5499*i*.
effect of concn. of, on velocity of alcoholysis of soybean oil, 5209*c*.
effect on active substances in tinctures, 8094*c*.
on adhesion of epithelium to stroma in cornea, 709*a*.
on allergic reactions, 9252*g*.
on ascorbic acid oxidase, peroxidase and dehydrogenase of vegetables, 2251*g*.
on autodisplacement of Pb, 2846*c*, 8811*g*.
on conduction to third roots of crayfish abdominal ganglia, 9259*g*.
on d., moisture absorption and swelling properties of nylon, 5191*e*.
on dentine permeability to radioactive phosphates, 1863*d*.
on flame propagation limits of $C_4H_{10}$, H, $CH_4$ and $C_2H_4$ mixts. with air, 3617*g*.
on fluoroacetate poisoning, 3103*c*.
on formation of $H_2S.6H_2O$, 1672*g*.
on functional structure of reflexes, 763*h*.
on germination of seeds and growth of plants and bacteria, 2079*b*.
on H overvoltage on Sn cathode in HCl, 503*e*.
on ignition pressure of H-O mixts., 406*i*.
on immunity to *Trichinella spiralis*, 8516*e*, 9223*h*.
on intoxication with phenylcinchoninic acid, 2316*i*.
on invertase, 1817*f*.
on $Fe(OH)_3$ sols, 5259*d*.
on ketone metabolism, 4774*i*.
on kidney and liver during high-protein diet, 7097*a*.
on leucocyte motion, 9263*d*.
on long-chain electrolytes in aq. soln., 7303*f*.
on methyl alc. poisoning, 3105*e*, 3936*g*.
on N fixation by *Azotobacter*, 9160*b*.
on osmotic pressure of poly(4-vinyl-1-butylpyridinium bromide), 8242*b*.
on persons receiving antabuse, 9266*h*.
on plants, 2077*b*, 4349*d*.
on polarography of *p*-nitroaniline, 8908*b*.
on seeds, 4733*i*.
on serum amylase, 7592*d*.
on soly. of $Cu(OH)_2$ in $NH_4OH$, 2489*f*.
on stability of supersatd. solns. of $KNO_3$, 8805*h*.
on stomach lining and skin, 3106*b*
on surface tension of solns., 8794*f*.
on thixotropy of bentonite suspensions, 6885*d*.
*effect* on viscosity of poly(4-vinyl-1-butylpyridinium bromide) solns., 7299*d*.
esterification (inter-) of peanut oil with, with NaOH as catalyst, 3635*f*.
esterification of, kinetics of, 8252*e*.
esterification with AcOH in vapor phase over $NaHSO_4$, 7799*i*.
esters, spectra of, 1656*c*.
from ethylene, P 5032*h*.
catalyst for, P 5887*b*.
by hydration, P 7035*i*.
ethylene glycol manuf. from, P 1434*h*.
from ethyl sulfate, P 7498*ac*.
fires in, extinguishing of, 6417*g*.
formation, by acetone-EtOH bacteria from 3-C compds., 8446*h*.
during alanine fermentation by *Saccharomyces ellipsoideus*, 7541*g*.
by *Clostridium*, 1145*f*.
effect of proteolytic enzymes and yeast nutrients on, 351*i*.
by *Polyporus anceps*, 5094*b*.
from reaction of $Al_2O_3$ with ethylene oxide, 2624*i*.
from reaction of hydroxyl radical with ethylene, 6150*f*.
by *Saccharomyces cerevisiae*, N and, 9150*d*.
from starch by yeast, 6255*e*.
by tartrate-fermenting *Clostridium*, 274*a*.
by thermophilic cellulose-fermenting bacteria, 720*d*, 721*d*.
from *Urginea maritima*, 5092*d*.
free energy of C-OH bond in, 3276*g*.
fuels contg.—see *Fuels*.
gases contg., formation of supersatd. vapor and aerosol on mixing, 7775*d*.
gasoline octane no. extension by injecting $PbEt_4$ solns. in aq., 383*i*.
gel of, P 9299*b*.
from D-glucose-1-$C^{14}$, 3969*f*.
from grain, 9359*ab*.
halogenated, reaction with benzene derivs., P 4300*a*.
heat capacity of, 1638*d*.
heat of wetting of (activated) charcoal by, 8835*f*.
heat of wetting of agar, gelatin, $SiO_2$ gel and starch with, 7781*f*.
heat of wetting of dispersed systems by, 6042*i*.
hexadecanol sorption from, by MgO, 17*b*.
hydrocarbon oil (petroleum-like satd.) synthesis from, P 1955*d*.
hydrocarbons from, 558*c*.
hydrochloric acid acidity function and ionization in, and proton affinities of, 4544*hi*.
hydrogenation of, 5363*c*.
identification of, for use in operating room, 3563*c*.
internal-revenue regulations on, in Czechoslovakia, 5529*i*.
intoxication by, bisulfite-binding material and vitamin $B_1$ deficiency in, and its relation to polyneuritis, 8549*g*.
kojic acid formation from, by *Aspergillus oryzae*, 8007*a*.
labeled with $C^{14}$ in the 1 and in the 2 position, 9031*f*.
lactic and pyruvic acid formation from $CO_2$ and, by *Escherichia coli*, 8443*f*.
losses during fermentation of grape juice, 8090*h*.
from malt-converted corn mashes, enzymes in formation of, 8090*i*.
manganese sulfate ionization in aq., 8792*g*.
manuf. and use as antifreeze, 3117*i*.
manuf. of, P 3562*b*, P 4692*i*, P 5156*a*, 5507*g*, P 6645*e*.
app. for, P 6448*f*.
and app. therefor, P 815*e*.
from asphodel tubers or similar materials, P 5616*h*.
in presence of inorg. adsorbents, P 8094*a*.
removal of water-insol. impurities in, P 5790*f*.
in medicine, 1909*e*.
metabolism of, 3074*e*.
metabolism of, effect of insulin on, 2321*b*.
methanol detection in, 6541*h*, 9372*h*.
methanol detn. in, 68*b*, 1911*e*.
microwave absorption by, 5310*e*.
mixts. with AcOH, $Me_2CO$, $PhNH_2$, $PhNO_2$ and $CCl_3CHO$, mol. wts. in $C_6H_6$, 1252*c*.
with AcOH, $Me_2CO$ or MeOH, rheochors of, 2058*a*.
with acids and sugars, osmosis of, 7300*g*.

*mixts.* with acids, soybean treatment with, 1604*c*.
with air and $H_2O$ vapor, ionization by β-rays in, 3284*c*.
with $PhNH_2$, d., magnetic susceptibility, *n* and viscosity of, 8833*i*.
with $C_6H_6$, soly., swelling and $C_{10}H_8$ adsorption by butadiene rubber in, 8187*e*.
with $CHCl_3$, distn. of, 2060*h*.
with cyclic amines, ultraviolet absorption by, 4138*i*.
with dioxane and $H_2O$, swelling of agar and gelatin in, 7788*b*.
with formic acid, soybean-protein denaturation with, 1604*b*.
with iso-AmOH, iso-BuOH or PrOH, heats of vaporization and vapor pressures of, 477*b*.
with MeOH, pyrolysis of, P 4835*d*.
with org. vapors, adsorption by active carbons, 16*g*.
with pyridine, Raman spectra of, 7345*d*.
with NaCl and $H_2O$, ultrasonic velocity and intermol. action in, 5652*c*.
with toluidine isomers, d., magnetic susceptibility, *n* and viscosity of, 8834*a*.
with $H_2O$, mixt. law for rheochor of, 7283*a*.
and mixt. with methanol, blending octane values in gasoline, 7674*b*.
mobility of ions of, 4559*a*.
from molasses, by Arroyo process, 3141*b*.
detn. of yield of, 9504*b*.
lab. expt. on, 2477*h*.
yeast for production of, 3560*h*.
molasses extn. with, 6445*c*.
molasses stillage, scale formation in evaporators from, 4521*d*.
mold amylase in production of, 2363*h*.
naphthoquinoneimide dye from, P 8167*b*.
narcotic action of, in relation to action on cholinesterase in blood, 7142*e*.
optical activity of camphor and derivs. in, effect of $H_2O$ on, 8813*ad*.
oxidation of, to AcH, catalysts for, 8074*g*.
in liver, 9129*a*.
in presence of bromate and Br, 7800*g*.
parachor and thermochor of, 2923*e*.
parachor of aq., 8805*a*.
from peat, P 5156*b*.
in peppermint oil, 4427*f*.
from petroleum, 6568*b*.
-phenol-essential oil disinfectants, 9364*i*.
phys. constants of, 2956*a*.
pigment powder wetting by, 8698*c*.
potassium deriv.—see *Potassium ethoxide*.
purification of, for spectroscopic use, 7817*g*.
Raman effect and H bond formation in, 7345*g*.
reaction of equimol. mixt. of PrOH and, 992*i*.
reaction with acrolein, P 7497*h*.
with $NH_3$, P 7953*c*.
with Br, kinetics of, 7800*e*.
with 2-butanone, 993*d*.
with butyryl chloride, rate of, 6057*d*.
with 2-butyne-1,4-diol, P 5414*c*.
with $O_2NC_6H_4Cl$, P 687*ge*.
with *i*-cholesteryl methyl ether in the presence of *p*-$MeC_6H_4SO_3H$, 659*g*.
with 1,2-dinitropropane and with 2-nitroisopropyl nitrate, P 665*e*.
with $Et_2SO_4$, 3778*f*.
with ethyl (trimethylsilyl)acetate, 562*g*.
with $H_3O^+$ ion, 4545*c*.
with olive oil, 1715*f*.
with PhNCO, kinetics of, 7441*ae*, 7442*bd*.
with $SiS_2$, 4631*b*.
with $SiCl_4$ in the presence of $H_2O$, 2573*h*.
with $H_2SO_4$, rate of, 6057*c*.
recovery of, from fermentation $CO_2$, P 2366*f*.
in oil extn., P 2794*g*.
from pomace, distn. app. for, P 2734*f*.
from reeds, 9501*i*.
review on, 2326*f*.
rotation (hindered) in, 4527*f*.
Rush no. of phenols for, 8766*b*.
salting out of BzOH and 2-cinchonine from aq., 922*h*.
sensitization of organism to, drug for, 5501*a*.
sensitization to, by tetraethylthiuram disulfide, 4379*c*.
sepn. from aq. solns., P 1906*d*.
sepn. from MeCOEt, 2*k*.
from solutes by heating liquid-vapor interface, 7297*i*.
silver chloroacetate ionization in aq., 7793*e*.
sodium deriv.—see *Sodium ethoxide*.
soly. in aq., effect of supplementary component on, 6889*h*.
as solvent above crit. temp., 8779*e*.
as solvent for soap detn. in wool, 6423*d*.
solvolysis of *sec*-alkyl chlorides by, 7308*a*.
sorption by porous substances, 1240*d*.
spectrum of, 8887*b*.
from starchy substances, P 9362*c*.
from sugar-beet juices, 3141*f*.
from sugar beets, org. acids in, 3141*e*.
-sugar ratios in grape musts and sweet wine, 5901*a*.
from sulfite liquor, 399*af*, 3969*d*, P 4424*b*, 4851*f*, 7682*de*, 8091*b*, 8677*f*.
neutralization-temp. effect on yield of, 399*c*.
tanning material production from slops from, 6449*g*.
sulfur dioxide formation during manuf. of, 3141*a*.
surface tensions of, methylated spirits and EtOH-$H_2O$ mixts., 4064*e*.
system: dichloroethane–, 1254*a*.
system: dodecylammonium chloride-$H_2O$–, elec. cond. of, 4079*i*.
system: ethyl vinyl ether-$H_2O$–, 8833*b*.
system: glycerol-$H_2O$–, foaminess and foam stability of, 7775*h*.
system: MeOH–$H_2O$–, foam formation and duration, surface tension, viscosity and vol. contraction of, 8779*d*.
system: methylcyclohexane–, 8813*f*.
systems: $NH_3$–, and cyclic amine–, 5657*g*.
systems: $C_6H_6$–, cyclohexane–, toluene–, 2,2,4-trimethylpentane–, heptane–, and tetraethylsilane–, 6022*h*.
systems: cod-liver oil–cod-fat acids–, and hake-liver oil–hake-fat acids–, soly. diagrams for, 7724*c*.
system: Na palmitate–, x-ray diffraction by, 2793*b*.
system: $H_2O$–, 930*g*, 2854*b*, 3692*d*.
thermal cond. and viscosity of, 4065*c*.
thermal cond. of vapors of, pressure and, 4553*b*.
tolerance in subjects with chronic producer gas intoxication, 1866*e*.
toxicity of, 1867*g*.
trichlorobenzene electrolysis in, 7837*e*.
ultrasonic velocity in, 8786*c*.
vapor-d. distribution over surface of, 7282*i*.
vapor pressure of, temp. and, 8775*a*.
from vegetable wastes, P 3562*a*.
ventricular fibrillation from adrenaline and, 313*b*.
from viscose-industry wastes, 6408*h*.
viscosity (dilatational) of, 5249*g*, 8780*a*.
from wheat, 7635*c*.
in wine, effect of sugar addn. on, 7635*g*.
in wine grading, 8606*h*.
from wine residues and vine shoots, 6360*i*.
in wines (Italian), 6779*g*.
from wood, 1903*g*.
yield in fermentation, effect of DDT, hexachlorocyclohexane, α-chlorotoluene and α,α-dichlorotoluene on, 8089*g*.

**Ethyl-$d_1$ alcohol-*d***, deuterium exchange with org. compds. and, 5011*d*.

**Ethylamine**, adsorption by activated C, 6037*e*.
adsorption by α-bromopalmitic acid monolayers, 8797*a*.
as catalyst in hydrolysis of lactams, P 2225*b*.
condensation with amino aromatic aldehydes, antioxidants by, P 4460*b*.
as corrosion inhibitor for light metals, 4622*d*.
derivs., 2176*i*, 5782*g*, 7449*g*.
2-derivs., from α-amino acids (attempted), 6978*d*.
1,2-diaryl derivs., 7008*c*.
effect on blood vessels of frog prepns., 5493*b*.
formation from MeCN, 5367*c*.
β-halogenated derivs., effect on ventricular fibrillation and on heart, 7131*f*.
identification of, 4630*c*.
manuf. of, P 7953*c*.
reaction with propylene oxide, kinetics of, 926*e*.

**Ethylamine, 2-(benzhydryloxy)-**, 5783*a*.
derivs., P 3462*fi*.
—, **2-(benzhydryloxy)-*N*, *N*-dimethyl-**, 1104*g*.
antibacterial activity of, 9147*d*.
compd. with 8-chlorotheophylline, 7193*a*
identification and differentiation of 9366*e*.
pharmacology of, 6319*a*.
degradation by tissue enzymes, 7524*e*.
detn. of, 7535*h*.
effect on anaphylactic hypersensitive vascular and cardiac lesions, 3523*b*.
on blood vessels, 2704*g*.
on body temp. before and after adrenalectomy, 1808*i*.
on circulation in brain, 3520*d*.
on gastric secretion stimulation by Tween 20, 760*e*.
on hypotension, 3102*f*.
on intestine, effect of lysolecithin on 311*e*.
on stomach, 3106*c*, 4771*b*.
on tuberculin reaction, 3518*e*.
histamine-antagonizing and antispasmodic effects of, 3934*e*.
in histamine shock prevention, 6722*d*.
metabolism of, 7584*f*.
mixt. with aminophylline, pharmacology of, 3938*e*.
pharmacol. action of, 3934*c*, 5500*f*.
pharmacol. and therapeutic action of 3937*f*, 3938*bf*.
potentiation of sedative action of barbiturates by, 312*g*.
and related compds., 6587*i*.
salts, P 3462*h*.
and salts, P 1064*e*.
spasmolytic activity of, and related compds., 8545*i*.
vascular refractoriness produced by, 6320*b*.
—, **2-(benzhydryloxy)-*N*-methyl-**, hydrochloride, P 3462*h*.

from hexadecane, 3343*e*.
in $CH_4$-filled Geiger-Müller counters, 484*b*.
in pyrolysis of polystyrene, 2810*g*.
during reaction of 2-butanone and EtOH, 993*d*.
in reaction of EtI with Mg, 1717*f*.
from ripening avocados, 283*f*.
from vinyl radicals, 3694*d*.
fuel antiknock ratings of, 382*i*.
halogen derivs., polymers of, vulcanized fabric coatings from polyhaloprenes and, P 4508*e*.
polymers with vinylidene fluoride, P 5638*b*.
reaction with halo derivs. of $CH_4$, P 661*d*.
heat capacity of, 2758*g*.
heat of adsorption by active charcoal, 4939*d*.
heat of dissocn. of, 1250*c*.
heat of vaporization of, 8254*b*.
hydration of, P 4692*i*, P 5032*h*, P 6645*e*, P 7036*a*.
hydrogenation on Cu-Pt alloys, 4088*c*.
hydropolymerization of, 108*a*.
inflammability limits for mixts. of MeBr and, 3619*b*.
inflammability of mixts. of air with, effect of solid particles on, 6806*d*.
labeled with $C^{14}$, 37*i*.
magnetic susceptibility of, and chloro and fluoro derivs., 6016*f*.
manuf. of, P 4383*d*, P 6643*e*.
from $C_2H_2$, P 3833*i*, P 5030*b*.
by conversion of gaseous hydrocarbons, P 387*i*.
by conversion of hydrocarbon oils, P 388*k*.

*manuf. of*, by cracking of gas oils, P 8663*d*.
by cracking of hydrocarbon oils, P 386*h*.
by cracking of hydrocarbon oil vapors in steam, P 8129*g*.
from dihydropyran pyrolysis, P 1795*e*.
from $C_2H_6$, 5571*i*.
from EtOH, P 1434*h*.
from $C_3H_8$, P 7071*b*.
manuf., from cracked gases and alkylation of 2-methylpropane with, aviation gasoline blending stock by, P 5180*i*.
mixing with CO or N, temp. effects in, 8773*c*.
mixts. with $C_3$, $C_4$ and $C_5$ olefins, alkylation with isobutane with $AlCl_3$-isobutane complex catalysts, P 1956*h*.
with $C_3H_8$, conversion to higher-boiling products, P 3833*g*.
with gases, thermal diffusion of, 8224*f*.
mol., 557*a*.
neutron cross section of proton in, 4096*b*.
orbital mol. diagrams and, 6479*e*.
oxidation of, P 3028*i*, P 3446*a*, P 8399*h*.
to ethylene glycol, 6976*b*.
to ethylene oxide, P 4290*a*.
HCHO in, 6567*e*.
kinetics of, 26*d*, 927*g*, 6565*i*.
polychloro derivs., reaction with satd. hydrocarbons, 9024*e*.
polyfluoro derivs., reaction with $NH_3$, P 1444*e*.
polymerization of, P 906*a*, P 1218*ci*, P 1219*a*, P 3238*e*, P 5640*i*, P 5788*f*, P 6001*a*, P 8742*e*.
with azodisulfonic acid salts as catalysts, P 5642*c*.
with $H_3BO_3$-diatomite-$H_3PO_4$ catalyst to oils, P 3190*f*.
with ester catalysts, P 8742*f*.
with Grignard-type catalysts, P 9537*c*.
with imino compd. or nitrohydrocarbon catalyst, P 8666*h*.
with iodoso diacylate catalyst, P 5231*e*.
with isobutylene, P 1602*c*.
with isobutylene or propylene, P 5640*h*.
lubricants by, 384*d*.
with malonic acid derivs., P 4897*d*
with monohaloalkane or higher olefins, P 5640*f*.
with oxime catalysts, P 4515*a*.
and polymers, 6149*h*, 8198*a*.
polymers of, 437*a*, P 3235*h*, P 6000*i*.
with 1-[2-acetamido-2'-(acrylylamino)-isopropyl]-3-methylurea, P 9531*e*.
adhesion to metals, 3651*g*.
alkyl aromatic hydrocarbon derivs., P 6657*f*.
amorphous content of, detn. of, 6485*h*.
azo pyrazolone yellow-red pigments for, P 7746*e*.
brittleness at low-temps., 1209*a*, 8723*e*.
with butadiene, cracking of, P 1049*h*.
cable insulation from, P 3657*d*.
$CaCO_3$ in, P 4897*g*.
with $CO_2$, P 4515*d*.
with CO and propene or diethyl maleate, P 3236*h*.
cellular product from, P 6001*c*.
chlorinated, P 5642*g*.
and chlorinated derivs., adhesion to cellulose, 8133*d*.
and chlorinated derivs., $H_2O$ permeability of laminates with polyvinyl alc., 6862*d*.
chlorinated, dielec. and mech. properties of, 6019*g*.
chlorinated, elec. insulation from, P 9534*e*.
chlorinated, reduction of soly. and thermoplasticity of, P 9533*i*.
chlorinated, transparent products from, P 2039*a*.
chlorinated, with reduced soly. and fusibility, P 9534*c*.
coalescence of, 4892*h*.
coating and waterproofing textiles with, mixts. with metal naphthenate, P 4023*a*.
coating cable joints insulated with, with polyethylene and polyolefins, P 4046*a*.
coating (hot melt) from, P 1222*g*.
coating metal-powder-pigments with, P 6888*d*.
coatings with, 899*b*.
*polymers of*, coating with mixt. of polyisobutylene and, P 6003*f*.
constitution and properties of, 9455*d*.
covering cable or wire with strips or tapes of, P 5632*b*.
curing of, P 2038*d*.
decompn. by heat, 2015*a*, 8205*f*.
and derivs., dispersions of, P 6762*a*.
dielec. strength of, 2480*e*.
with di-Et fumarate and vinyl acetate, P 9531*h*.
with 1,3-dioxolane, P 2471*b*.
dipole orientation in solns. of esters in, 6019*i*.
effect of pressure on crystallinity, thermodynamic properties and vol. of, 5249*i*.
effect of relaxing and stretching on, 6045*h*.
elasticity of, temp. and, 2027*g*.
elec. insulating casing for dry-plate rectifiers from, 7360*b*.
elec. insulators from, 1604*h*.
elec. insulators from, and their attack by soil microörganisms, 9517*g*.
elec. properties of, 435*f*.
emulsions for fabric coating and impregnation, P 4869*c*.
emulsions of, P 1222*h*.
with ethers, P 3235*g*.
extrudable compn. from, P 444*d*.
fiber-forming properties and m. ps. of, 9455*i*.
fibrous-tissue stimulant from, 1483*h*.
films of, 7747*b*.
flame-spraying of, 6961*i*.
with fluoromethacrylate esters, P 6405*g*.
intravenous-tubing complications from, 899*f*.
light transmission and formation and decay of spherulites in, 8802*i*.
lining for chem.-plant app. from, 1214*f*.
lubricants for, P 4520*g*.
mixts. with bitumens, P 7224*i*.
optical and thermodynamic analysis of mech. properties, mol. processes and polymer structure of, 2801*b*.
O mask from, 4509*g*.
packaging with, 8136*g*.
with polyisobutylene, 9522*g*.
with polyvinyl acetal, P 444*e*.
powd., P 1610*i*.
powd., and dispersions therefrom, P 7755*a*.
pyrolysis of, and mass spectrometry and mol. wt. detn. of fractions, 7742*e*.
pyrolysis products of, 2810*g*.
resinography of, 6459*h*.
sepn. into mol.-wt. fractions, P 3236*i*.
soly. in xylene, 8804*h*.
spectra of, 6081*f*, 7822*c*.
structure of, 9523*h*.
with $C_2F_4$, dispersions of, P 444*b*.
tubing of, effect on penicillin, 4428*d*.
ultrasonic velocity in, 7782*i*, 8239*e*.
with vinyl acetate, alcoholysis of, P 6867*g*.
with vinyl acetate, antistatic coatings from sapond., P 4520*g*.
with vinyl acetate, hydrolyzed, P 1610*a*, P 5230*g*.
with vinyl chloride, adhesion to cellulose, 8207*b*.
with vinyl esters, P 7264*e*.
with vinyl esters, insolubilization of hydrolyzed, P 442*h*.
with vinyl esters, isocyanates of hydrolyzed, P 1219*e*.
with vinyl esters, mixts. of hydrolyzed, with polyamide derivs., P 443*a*.
with vinyl esters, tenaceous fibers from hydrolyzed, P 5603*a*.
with vinyl isocoumarans, P 7262*b*.
for water pipes, 7165*h*.
water-vapor permeability of, 8738*d*.
working of, P 9533*b*.
wrapping material from, 9522*f*.
x-ray transmission in, 8874*b*.
potential functions of, 2478*h*.
prepn. of, from $C_2H_4$, 7898*b*.
Prins reaction with, 6967*h*.
reaction of, and its halo derivs. with cycloalkyl halides, 3371*h*.
reaction with $NH_3$, P 3439*de*.
with Br, effect of neutron capture on, 2078*a*.
with CO and H, P 4685*d*.
with CO and $H_2O$, P 669*i*.
with $CCl_4$, free radicals in, 109*e*.
*reaction* with carboxylic acids to produce long-chain acids, P 670*b*.
with $Me_3CCH_2Cl$, 3372*f*.
with 2-chloro-2-methylpropane, P 7035*e*.
with $Bu_2S_2$, P 1794*d*.
with 1,3-diolefins, P 5418*f*.
with HCHO in presence of AcOH, 5367*d*.
with HBr in $SO_2$, P 3024*c*.
with H halides, P 6218*e*.
with $H_2S$ or thiols, P 7952*f*.
with OH, rate of, 8820*h*.
with $Hg(OAc)_2$ and amines, 7449*c*.
with $N_2O_4$, P 665*a*.
with $SO_2Cl_2$, 1249*a*.
with $C_2F_4$, 3370*c*, P 4294*c*.
and reaction with 1,3-butadiene, P 6656*c*.
recovery from coal gas and its utilization, 8119*a*.
sepn. from gases, P 7670*d*.
sepn. from hydrocarbon mixt., P 379*i*, P 1432*h*, P 4283*h*, P 6403*b*.
soly. in $H_2O$, 5264*d*.
spectrum of, 7818*e*.
strain in, 4059*i*.
structure of, wave function theory and, 492*b*.
system: butane-, 4937*b*.
system: naphthalene-, 4937*f*.
systems with org. compds., crit. phenomena in, 4937*e*.
tetrahalo derivs., reaction with S chlorides, P 6646*a*.
triaryl derivs., 7006*h*.
triaryl derivs., estrogenic action of, 4746*d*
virial coeffs of, 3677*d*

derivs., 9024f.
double-bond stretching of, interaction between deformation of terminal angles and, 8221b.
effect in thermal vulcanization of butadiene-Na rubber, 6858a.
formation from dichloroethanes, kinetics of, 7407eh, 7408c.
magnetic susceptibility of, 6016h.
manuf. and polymerization of, P 906g.
manuf. of, P 663i, P 1433e, P 1793d, P 2629ab, P 3024df, P 3437g, P 3835b, P 4284d, P 5790ab, P 6644i, P 7037d, P 7496h.
manuf. of, from acetylene, P 7951a.
manuf. of, from 1,2-dichloroethane, P 7951b.
microwave spectrum of, nuclear quadrupole effects in, 5310c.
polymerization of, P 901f, P 906b, P 2817g, P 6465h, P 7753c, P 8212d.
catalysis by $Bz_2O_2$ and polyvinyl chloride, 5272b.
from 1,2-dichloroethane decompn., 7307e.
in emulsions, P 6465h.
in emulsions, Ag-$NH_3$ ion as promoter for, P 7264i.
isoprene as inhibitor of, 5621h.
with malonic acid derivs., P 4897d.
peroxides of cyclic ethers as catalysts in, P 1812h.
in presence of epoxides, P 7753b.
in presence of seeds, 8735b.
stabilization during, P 5642d.
with vinyl β-alkoxybutyrates, P 7753g.
polymers of—see also *Igelites; Vinidur;* and "PeCe fiber" under *Rayon.*
polymers of, 6462h.
acyl derivs. of alkyl polylactates as plasticizers for, 3651e.
adhesion to Al and cellulose, 8206g.
adhesion to cellulose, 8133e.
with alkenyl silanes, P 1223c.
with alkyl ester of unsatd. dicarboxylic acid, sponge compn. from, P 3239f.
antiblocking agent for films of plasticized, P 5999b.
azo pyrazolone yellow-red pigments for, P 7746e.
blends with nitrile rubbers, 434h, 5980g.
bricks and plates from, P 4512a.
with butadiene and 1,1-dichloroethylene, 2017e, P 7259d.
with α,β-butenedioic ester, coatings for black and Sn plate from, P 9535e.
as celluloid like ——s, 3236i.
cementing layers of, P 4898c.
and their chem. resistance, 421d.
chlorination of, P 6907d.
Cl detn. in,
polymers of, with chloroprene, 1598f.
coagulation from aq. emulsions, P 2469d.
coalescence of, 4892h.
coating for glass fibers from, P 3987b.
coatings from, corrosion and, 2028f.
coating textiles with plasticized, P 4870d.
cold-fracture temp. of, 8199a.
compns. from plasticized, P 4895a, P 7755c.
compns. with butyl acetylricinoleate, 6861h.
compns. with colloidal $SiO_2$, P 5229d.
compns. with imidazolidines, P 8738g.
compns. with nitrilotriacetic acid esters, P 5229i.
compounding and curing of butadiene-acrylonitrile and -methacrylonitrile rubbers with, 3646b.
in corrosion prevention against chemicals, 6455f.
coverings for elec. conductors from, P 902d.
creep in plasticized, 6462a.
cross-linking, 7406h.
cyclopentanone or derivs. as solvents for, P 1126d, P 2817f.
degradation and stabilization of, 8737g.
depolarization of light scattered by solns. of, 7784d.
with dialkyl esters of maleic acid and vinylidene halides, P 2818c.
dicarbonate esters as plasticizers for, P 5998b.
with 1,1-dichloroethylene (vinylidene chloride)—see also *Saran.*
with 1,1-dichloroethylene, P 7265f, P 9530c.
with 1,1-dichloroethylene, adhesive from, P 7265c.
with 1,1-dichloroethylene, blends with vinyl chloride-vinyl acetate polymers, P 2471c.
with 1,1-dichloroethylene increasing tensile strength of thermosetting, P 5637h.
with 1,1-dichloroethylene modification with PhOH-HCHO resins, P 3239c.
with 1,1-dichloroethylene plasticized film from, P 8209a.
with 1,1-dichloroethylene plasticized with esters of 3,6-endomethylene-1,2,3,6-tetrahydrophthalic acid, P 2817h.
with 1,1-dichloroethylene prepn. of filaments and films from, and stabilization against heat and light, P 8741e.
with 1,1-dichloroethylene stabilization to heat and sunlight, P 8741gh.
with diesters of citraconic or mesaconic acid, P 2035e.
with diethyl fumarate, emulsions of, P 5635e.
with diethyl maleate, P 8742g.
with diolefins or acetylenes, reaction products with inorg. acids or anhydrides, P 2804c.
dispersion of, P 3233c.
dispersions of polystyrene with plasticized, P 2037f.
drying of, P 3660i.
dyeing Rhofil, 6420a.
dyes for, P 8166d.
effect of lubricants and stabilizers on coloring of plasticized, 5996c.
elasticity of, temp. and, 2027g.
as elec. insulators, 1604i.
emulsifier removal from, P 5230i.
esters of chlorophthalic acid for plasticizers of, P 3464a.
evaluation of plasticizers for, 2465d.
fibers from, 6421h.
filler from, P 5632f.
with α-fluoroacetoxyacrylonitrile derivs. and styrene, P 5636d.
with fluorohaloethylenes, P 9485b.
with fluoromethacrylate esters, P 6465g.
foam products from, 4893b.
with *N*-2-formamidoethylacrylamide and vinylidene chloride, P 9531e.
heat-stabilized compns. from, P 2037i.
hollow objects from, P 1607e, P 5633g.
hydrocarbon oil as filler and plasticizer for, P 2817i.
identification of, 893g.
improving elasticity of extruded plasticized, P 4507d.
infrared drying of coatings from, on paper and textiles, P 4870a.
polymers of, inks for writing on sheets of, P 4872i.
intramol. statistics, elasticity, double refraction and partition function of chain mols. in stressed, 6855g.
intravenous tubing of, 899g.
with isopropenyl acetate, P 3661c.
laminates with polyvinyl alc., permeability to $H_2O$, 6862d.
latex of, wrinkle-finish coatings for flexible materials from drying oils and, P 2790d.
Pb salt stabilizers for, P 4512g.
limestone impregnation with, 3590a.
linoleum compns. from coumarone or rosin and, P 4874f.
with maleic acid and vinyl acetate, alcoholysis or hydrolysis products from, P 2470e.
manuf. of articles and sheets of, by spraying, P 4511i.
membrane permeability to KCl solns., selectivity const. and ratio of mobility of cation and anion in, 8702g.
with Me acrylate, latex from, P 3232e.
with methyl methacrylate, sheet materials from, P 4052b.
with 2-methylpropene, P 1224e, P 4897c.
molding compns. from cracking-coil tars and, P 9538e.
molding powder from, P 5229b.
mol. wt. of, 435i.
oil-resistant adhesives for, 7261d.
optical and thermodynamic analysis of mech. properties, mol. processes and polymer structure of, 2801b.
phys.-mech. properties of leather substitutes from, 5981g.
plastic from asphaltic material and, P 8208f.
plastic from mixed esters of multivalent alcs. and, P 4895b.
plasticization of, P 4514c.
plasticization with air-blown exts. of mineral-oil fractions, P 5998g.
plasticization with chlorinated biphenyl, $(C_7H_7)_3PO_4$ and dibutyl phthalate, 436b.
plasticized, 5628h, P 5229g.
plasticized with dialkyl chlorophthalates, P 2817d.
plasticizer effect on, structure and, 5628d.
plasticizers for, 5627i, P 6002d.
porous materials from, P 6464i.
prevention of discoloration of, P 2468b, P 4049h.
printing on, P 4895f.
properties of plasticized, 5629a.
pyrolysis of, 2010b.
reducing cracking and wrinkling of coatings of, on rubber, P 895i.
review on plasticized, 1603c.
sepn. into mol.-wt. fractions, P 3236i.
softeners for, for artificial leather manuf., 6451e.
soil microorganism attack on elec. insulators from, 9517g.
sound-insulating pad from fibrous glass and, P 5518e.
spectra of, 6081f.
stabilization of, P 664c.
stabilization with alkali metal stannates, P 4898b.
stabilization with tetra-2-thienyltin, P 9530h.
stabilized to ultraviolet discoloration, P 2468a.
stabilized with o-sulfobenzimide or its derivs., P 3238i.
stabilized with tri(2-alkenyl) phosphites, P 1606r.
stable against thermal decompn., P 9530e.
stain-resistant coatings for fabrics from, P 1222e.
structure of, 9523i.
systems with phthalic acid esters, dynamic mech. properties of, 9524b.
tape from, P 3234g.
with $C_2F_4$, P 5410g.
textile coatings from Hycar OR-15, Neoprene and, P 2786f.
tubing of, effect on penicillin, 4428d.
use in packing industry, 8203e.
with vinyl acetals, porous compns. from, P 9535a.
with vinyl acetate, P 9532b.
with vinyl acetate, alcoholysis of, P 6867g.
with vinyl acetate, coating compn. from, P 3242b.

*polymers of*, with vinyl acetate, combustion-retarding coating from, 8075*f*.
with vinyl acetate, covering cables or wire with strips or tape of, P 5631*i*.
with vinyl acetate, dielec. strength of, 2480*f*.
with vinyl acetate, elec. properties of, 435*h*.
with vinyl acetate, fibers from, 2778*b*.
with vinyl acetate, flow of, 6860*i*.
with vinyl acetate, measurement of bearing strength of, 4892*e*.
with vinyl acetate, paper contg., P 9448*f*.
with vinyl acetate, plasticized with polyalkylnaphthalenes, P 9528*e*.
with vinyl acetate, plasticizers for, P 3242*h*, P 7752*e*.
with vinyl acetate, plasticizers in, 5627*c*.
with vinyl acetate, removal of stresses from calendered sheets of, P 901*h*.
with vinyl acetate, rubbery product from butadiene-acrylonitrile elastomer, phenolic resin and, P 2807*c*.
with vinyl compds., P 8741*a*.
with vinyl compds., self-lubricating products from rubberlike, P 7678*c*.
vol. effects in mixing with plasticizers, 1214*g*.
vulcanization of, P 901*i*.
$H_2O$-repellent, P 4898*a*.
water-vapor permeability of, 8738*d*.
wrinkle-drying coatings from conjugated double-bonded oils and, P 5972*e*.
polymers of, and copolymers with vinyl acetate, plasticized with diester amides, P 7750*i*.
polymers of, bonds with rubber, and rubber derivs. for their bonding, 4888*d*.
prepn. of, 4628*h*, 6154*d*, 6969*g*.
reaction with at. Na, 3694*c*.
with benzene in the presence of $AlCl_3$, 591*h*.
with cycloalkyl halides, 3372*b*.
with HCl to give $CH_3CHCl_2$, P 5410*e*
with Se and $SeCl_4$, 2159*e*.
with Si in the presence of Cu, P 6220*e*.
with $SO_2Cl_2$, 1249*a*.
with $C_2F_4$, 3370*e*.
sepn. from $C_2H_2$, P 3835*c*.
thermodynamic functions of, 4553*c*.
——, **2-chloro-1,1-bis(*p*-chlorophenyl)-**, as acaricide and insecticide, 3137*g*.

and derivs., 5227*b*.
formation from 1,1,2-trichloroethane, kinetics of, 7407*e*.
magnetic susceptibility of, 6016*h*.
polymerization of, P 6866*d*.
in emulsions, P 9530*c*.
in emulsions, Ag-$NH_3$ ion as promoter for, P 7264*i*.
with malonic acid derivs., P 4897*e*.
in presence of seeds, 8735*b*.
stabilization during, P 5642*d*.
with styrene, 6991*c*.
with vinyl β-alkoxybutyrates, P 7753*g*.
polymers of, with acrylonitrile, cellulose film coated with, P 3664*b*.
with acrylonitrile, coating compns. from, P 3242*c*.
with acrylonitrile, films from butadiene-acrylonitrile polymers and, P 2470*c*
with acrylonitrile, prevention of gelation in 2-butanone, P 7755*b*.
adhesion to cellulose, 8133*d*.
with alkenyl silanes, P 1223*c*.
with butadiene and chloroethylene, tear-resistant and of low-curing time, P 7259*d*.
with butadiene and Et acrylate, oil-resistant, P 7260*c*.
with butadiene and isobutene, of low internal friction, P 7259*b*.
with butadiene and α-methylstyrene, of good chem. resistance and elec. properties, P 7260*a*.
with butadiene and olefins, 2017*d*.
with butadiene and styrene, and films therefrom, P 8732*e*.
with butadiene and vinyl acetate, abrasion- and moisture-resistant, P 7259*c*.
cable cover from, P 5135*h*.
Cl detn. in, 1684*f*.
with chloroethylene(vinyl chloride)— see also *Saran*.
with chloroethylene, P 7265*f*, P 9530*c*
with chloroethylene, adhesive from, P 7265*c*.
with chloroethylene blends with chloroethylene-vinyl acetate polymers, P 2471*c*.
with chloroethylene, heat-stabilized compns. from, P 2038*b*.
with chloroethylene, increasing tensile strength of thermosetting, P 5637*h*.
with chloroethylene, modification with PhOH-HCHO resins, P 3239*d*.
with chloroethylene, plasticized compns. from, P 4895*a*.
with chloroethylene, plasticized film from, P 8209*a*.
with chloroethylene, prepn. of films and films from, and stabilization against heat and light, P 8741*e*.
with chloroethylene, stabilization of, P 8741*gh*, P 9530*i*.
cold-stretched films and tubes oriented in 2 directions from, P 2026*f*.
compounding and curing of butadiene-acrylonitrile and -methacrylonitrile rubbers with, 3646*b*.
contg. light stabilizer, P 7265*h*.
definitions and uses of, 875*f*.
with dialkyl esters of maleic acid and vinyl esters, P 2818*b*.
dicarbonate esters as plasticizers for, P 5998*b*.
with Et acrylate, Et maleate or vinyl chloride, plasticized with esters of 3,6-endomethylene-1,2,3,6-tetrahydrophthalic acid, P 2817*h*.
*polymers of*, fibers from, 2778*c*, P 8743*g*
with *N*-2-formamidoethylacrylamide and vinyl chloride, P 9531*e*.
measurement of bearing strength of, 4892*e*.
with methacrylate, P 8741*a*.
with Me acrylate, latex from, P 3232*e*
with 2-methylpropene, P 1224*e*, P 4897*c*.
review on, 4047*e*.
solns. in amides, P 4515*g*.
solns. in sulfoxy-group solvent, P 4515*i*.
stabilization to heat, P 3233*e*.
stabilization to light, P 2037*h*.
stabilization to ultraviolet light by $C_2H_2Br_4$, P 4520*d*.
structure of, 9523*h*.
with styrene, mixt. with butadiene-styrene polymers, P 2035*i*.
with $C_2F_4$, P 5410*g*.
translucent sheet from glass fibers and, P 908*d*.
tubing from, P 8209*i*.
with unsatd. ketones, P 9531*i*.
with vinylfuran, P 9532*f*.
with vinyl halide or ester, delustering filaments from, P 8693*f*.
reaction with alkyl and cycloalkyl chlorides, 3372*d*.
with benzene in presence of $AlCl_3$, 2193*c*.
with $C_2F_4$, 3370*f*, P 4294*d*.

with Fe and nioxime, 6932*b*.
order of stability of, 4969*c*.
with Pt, 1675*d*, 2538*c*, 4172*g*, 8942*b*.
with Pt, acidic properties of, 1673*g*.
with Pt, magnetic susceptibility of, 7278*a*.
with $Me_2PtI$, 6536*d*.
condensation products of, with dimerized fatty acids, coating compn. from, P 2037*c*.
with epichlorohydrin, anion-exchange resins from, P 6339*g*.
with $C_2H_4O$ or propylene oxide, 5995*h*.
with HCHO and naphthol or phenol carboxylic acid for lubricant improvement, P 2766*cf*.
derivs., P 682*h*, P 3028*e*, P 3039*a*, 6176*c*, 6587*a*.
derivs. (tetrasubstituted), P 5420*b*.
*N,N'*-di and *N,N,N',N'*-tetraphenacyl derivs. and their reduction products, 3800*d*.
dihydrobromide, in fireproofing fibrous material, P 4024*c*.
dihydrochloride, contg. $C^{14}$, 1324*g*.
dinitrate, crit. hot-spot temp. of, 4856*b*.
dinitrate, thermal decompn. of, 405*c*.
dyes from, P 5199*c*.
effect on blood vessels of frog prepns., 5493*b*.
effect on polymerization of allyl and methacrylate compds., 8199*g*.
heterocyclic derivs., 7023*d*.
hexachlorocobaltate, spectrum of, 5305*a*.
indium compds. of, 6932*g*.
oxidation of, 6570*b*.
as peptizing agent in phenothiazine prepn., P 3572*c*.
in photographic sensitization, P 53*e*.
polyamide resins from polymerized unsatd. fat acids and, P 440*d*.
properties of, 3256*h*.
reaction product with chlorinated paraffin wax as anion-exchange resin, P 6338*i*.
with paraformaldehyde and *N*-(hydroxymethyl)stearamide, P 1434*g*.
with phosphonitrile chloride trimer, 5364*i*.
with polymer of vinylphenyl isocyanate and ethyl acrylate, P 5423*a*.
reaction with $(NH_4)_2CO_3$, P 691*i*.
with α-(benzhydryloxy)thioacetamide, 4669*h*.
with $CO_2$ and then tall-oil fatty acids, amidoamine soaps by, P 5614*d*.
with cyanides and HCHO, P 3449*e*.
with 4,6-dichloroquinazoline, 5784*h*.
with $1\text{-}C_{18}H_{37}CH_2CO_2H$, P 692*c*.
with org. acids, 8832*e*.
with phenanthrenequinone imine, 7013*h*.
with Pt-pyridine complexes, 2887*c*.
reaction with $CO_2$ and formation of its carbonate, 6157*i*.

salts (insol.) with heteropoly acids and metallic cations, 1671*f*.
salt with 1-benzyl-3-sulfanilylurea, P 1061*c*.
systems: $Ph_2NH$–, $Ph_2CHOH$–, pinacol–, salicylaldehyde–, and $Ph_2COH$–, 2082*c*.
tartrate, elastic and piezoelec. coeffs. of, 7285*g*.
growing crystals of, 458*h*.
piezoelec. resonator of, 8227*c*.
Raman spectrum of, 4956*g*.
tellurate, 518*e*.
-theophylline—see *Theophylline*.
thiocyanate (mono-), 578*g*.
in vulcanization of halogenated vinyl resins, P 902*a*.

**monophosphate, acid hydrolysis of, 147*i*.**
**monosalicylate, 2603*f*.**
**monostearate, as ointment-base constituent, hydrophilic properties of, 8610*a*.**
**monothiocyanate and its carbamate, 2945*b*.**
**oxidation with ammoniacal Ag soln. and detection of, 2548*d*.**
**oxidation with $HIO_4$, detn. of acids from, 2006*e*.**
**pinene ether, effect on mosquitoes, 3965*i*.**
**poly—see "poly" and "polyethylene" under *Glycols***
**polyterephthalate, degradation of, 7292*h*.**
**prepn. of, 9031*d*.**
**properties of, and its solns., 7298*f*.**
**reactions with aliphatic or haloalkyl acid or aromatic amido acids, surface-active agents by, P 8712*d*.**
**with $(NH_4)_2CO_3$, P 691*i*.**
**with aromatic amines, 7026*i*.**
**with $SiCl_2F_2$, P 6220*a*.**
**resinous products from aryl polyoxy polycarboxylic acid and, P 5998*a*.**
**resinous reaction products with sulfates, for textile softening, etc., P 4870*b*.**
**sepn. from mixts. of polyhydric alcs., P 3839*g*.**
**soap-oil-dispersion peptization by, 4455*h*.**
**solubilities in, of $H_3BO_3$, KBr and succinic acid, 1241*h*.**
**solubilization in, 466*c*.**
**as solvent for extn. of aromatic hydrocarbons, P 8670*d*.**
**as solvent for org. finishes, 4028*d*.**
**superpolyesters with dimeric fat esters and adipic acid or sebacic acid, tensile strengths of elastomeric, 8099*c*.**
**surface potential of aq., 8797*h*.**
**system: montmorillonite–$H_2O$–, 463*f*.**
**terephthalate, sizing yarns of, P 3628*a*.**
**tetrachlorophthalate, resinous products from, P 3654*i*.**
**thermal cond. of, 6499*g*.**
**in tobacco smoke, 5905*e*.**
**toxicity of, 818*d*.**
**toxicology of, 5883*e*.**
**ultrasonic velocity in, 8239*f*.**
**vanillates, 7455*g*.**
**vapor pressure of aq., 2481*c*.**

**Ethylene glycol, dithio-.** See *1,2-Ethanedithiol*.

——, **monothio-.** See *Ethanol, 2-mercapto-*.

**Ethylene group** (—$CH_2CH_2$—). (See also *Double bonds; Olefins.*)
labilization of trans group in complexes by, 2854*g*.

**Ethylenelactic acid.** See *Hydracrylic acid*.

**Ethylene nitrate,** acetone vapor pressure over solns. of, 4928*c*.
combustion and detonation of, 1981*h*.
detonation of, parameters of, 6416*i*.

**Ethylene oxide** (*oxirane*). (For derivatives see *Oxirane;* and inverted "epoxy" entries under names of hydrocarbons and other compounds.)
cellulose ethers, urea as diluent of textile sizes from, 8687*c*.
compd. with styrene-maleic anhydride polymer, 8202*i*.
condensation of mixts. contg. propylene oxide and, P 4289*e*.
condensation products of, with alcs., amides or fatty acid esters for textile industry, 4016*c*, 5953*e*.
as detergents in worsted wool washing, 2451*h*.
with dimerized linoleic-linolenic acid mixt., stabilizing agent from, P 7267*b*.
with esters of fatty acids, in drying of rayon, P 2785*k*.
with fatty acid esters of inner ethers of hexitols, for conditioning rayon, P 3207*e*.
with sorbitan monolaurate, coating spinneret with, P 5593*c*.
condensation with *p*-(*N*-*n*-sorbitylamino)-oleanilide or -stearanilide, leveling agents by, P 4499*d*.
derivs., in fatty materials, detn. of, and O detn. in, 6841*b*.
manuf. of, P 3446*a*.
reaction with ally alc., 5741*d*.
reaction with peracetic acid, 8354*a*.
in splitting of alkyl halide addn. compds. with cinchona alkaloids, 5027*i*.
effect on germination in seeds and potatoes, 2338*b*.
entropy, heat capacity, heats of fusion and vaporization and vapor pressure of, 8837*b*.
explosion and pressure-temp. relations of, 5951*g*.
explosive polycondensation of, in cylinders, 8138*e*.
fluoro derivs., P 674*b*.
formation from $(CH_2Cl)_2$, 4638*g*.
hydration of, P 6652*f*.
hydration of, kinetics of, 4549*a*.
manuf. of, P 3028*i*, P 3445*i*, P 4290*a*, P 8399*e*.
manuf. of, reactivation of Ag catalyst from, P 9209*h*.
microwave absorption by, 5310*e*.
microwave spectrum, moment of inertia and Stark effect in, 944*a*.
mixt. with $CO_2$ as fumigant for grains, 9336*a*.
phenol condensation products of, lacquer from dicyanodiamide, aldehyde condensation product and, P 2448*d*.
polymers of, constitution and properties of, 9455*d*.
detection in textile auxiliaries, 1585*b*.
solubilization of dyes by, 7780*d*.
spreading rate on glass and paint, 1625*g*.
ultrasonic velocity in, 8239*f*.
poly-, surface-active esters with fatty acid polymers, P 6440*a*.
reaction of, and its derivs. with S compds., 7420*e*.
reaction product with coconut oil, cyanoguanidine, and ethanolamine, sulfuric acid ester, as textile aid, P 7727*e*.
with *N*-(hydroxyalkyl) derivs. of amides of dimers of unsatd. acids, P 9472*f*.
with palmitate of dehydrated sorbitol, P 5586*d*.
with 1,2-propanediol, fatty acid esters, P 3446*d*.
reactions of, 6163*bf*.
with $(NH_4)_2CO_3$, P 691*i*.
with aromatic hydrocarbons, 2182*d*.
with cellulose, P 5592*f*.
with coconut-oil fat acid, oleic acid or stearic acid, textile assistants by, P 7727*abc*.
with Et acetoacetate, P 678*a*.
with fatty acids, oxidation of paraffin wax, nonionic detergents from, 5213*f*.
with Grignard reagents, 6155*b*.
with HBr, P 3024*c*.
with HCN, P 1435*b*, P 3029*b*, P 3439*f*.
with $H_2S$, 1391*c*, 2624*g*.
with oxidized cashew-nutshell liquid, P 1557*f*.
with polygalacturonic acid, 140*f*.
with polyols and esterification with palmitic or stearic acid, waxlike compds. by, P 886*e*.
with stearic acid, P 6652*g*.
with stearic acid-glycidol reaction product or stearic acid hydrazide, textile assistants by, P 2796*d*.
with sucrose, 4635*c*.
resinous products from urea, amines, etc., and, 5995*g*.
in San José-scale control, 1144*k*.
sorption by fruit and seeds, 3962*k*.
spectrum of, 5305*g*.
structure of, 4576*b*, 5366*i*.
thermodynamic properties of, 2500*i*.

**Ethylene oxide, (chloromethyl)-.** See *Epichlorohydrin*.

——, **methyl-.** See *Propylene oxide*.

**Ethylene oxide-carboxylic acid.** See *Glycidic acid*.

**Ethylenephosphonic acid, 2-phenyl-.** See *β-Styrenephosphonic acid*.

**Ethylene polysulfides,** polymerized—see

also *Rubber, substitute and synthetic; Thiokols.*
polymerized, as plug-cock lubricants, P 7679*d*.
polymerized, emulsions of, P 5992*e*.
**Ethylene sulfide** (*thiirane*). (For derivs. see under *Thiirane.*)
and derivs., 7419*h*, 7420*h*.
poly-, spectra of, 7410*g*.
prepn. and reactions of, 2935*e*.
reaction with biguanide, P 1799*b*.
**Ethylene sulfite**, P 4853*b*.
hydroxyethylation with, P 673*g*.
**Ethylenesulfonamide, 2-phenyl-**. See *β-Styrenesulfonamide.*
**Ethylenesulfonic acid**, $CH_2:CHSO_3H$.
methyl ester, 7411*h*.
sodium salt, kinetics of, bromination of, 7408*g*.
——, **2-phenyl-**. See *β-Styrenesulfonic acid.*
**Ethylenetetracarboxylic acid**, tetraethyl ester, fungistatic activity of, 9334*c*.
tetraethyl ester, reaction with PhMgBr, 4227*i*.
**Ethylene tetrasulfide**, polymerized—see *Rubber, substitute and synthetic; Thiokols.*
**Ethylenethiol**. See *Ethenethiol.*
***N, N'*-Ethyleneurea**. See *2-Imidazolidone.*
**Ethylenic linkage**. See *Double bonds.*
**Ethylenimine** (*aziridine*). (For derivs. see under *Aziridine.*)
and derivs., reaction with cyclic ethers, P 7955*d*.
derivs., reaction with thiuram disulfides, rubber vulcanization accelerators and activators by, P 3229*g*.
derivs., rearrangement of, 3419*b*.
ketones, 3388*g*, 3389*ae*.
polymeric, for fireproofing, P 6428*i*.
polymers of, in wet-strengthening of paper, 403*g*.
**Ethylenimonium compounds**. See *Aziridinium compounds.*
**Ethyl erbium sulfate**, spectrum of, 5304*b*.
**Ethyl ether**, 2571*d*.
acetaldehyde detection in, 5341*d*.
adsorption by $SiO_2$ gel, lecture expt. on, 8232*i*.
in air, max. allowable concn. of, 4401*a*.
alkylation with, of indan and 1,2,3,4 tetrahydronaphthalene, 2197*e*.
anabasine distribution between water and, 6789*b*.
anesthesia by, effect on cervical lymph flow and protein content, 2329*c*.
effect on P fractions of blood, 4386*d*.
effect on sphincter of Oddi, 5867*g*.
effect on thrombin inactivation, 8548*d*.
effect on vitamin A in liver, 9181*f*.
assocn., compressibility, mol. size and sound velocity in, 7284*b*.
assocn. with water and properties of solns., 3671*h*.
benzene detn. in, 2123*e*.
in brain, blood and muscles during ether elimination, 2318*a*.
camphor optical activity in, effect of $H_2O$ on, 8813*a*.
catalysts of $BF_3$ and, in acetal formation from butyl vinyl ether and phenols, 3783*e*.
in acylation of furans and thiophene, 6204*a*.
in alkylation of thiophene, 1395*e*.
in polymerization of 2-methylpropene, 8829*h*.
for polymerization of 2-vinylfluorene, P 8740*g*.
in reactions of ketene, 5366*h*.
chlorination of, 2159*b*
compds. (mol.) of, 7409*a*.
compds. with 2-benzhydryl-2-chloro-1-hydroxy-3-oxo-1-indancarboxylic acid, 1384*f*.
compd. with $BF_3$, reaction with BzH, 3805*b*.
detn. of, and oxidation with $K_2Cr_2O_7$, 5702*f*.
detn. of concn. of, in drugs, 7639*b*.
dielec. absorption and const. of, 4912*h*.
in disinfection of skin, 3525*d*.
dotriacontane soly. in, 6890*c*.
effect on ascorbic acid oxidase, peroxidase and dehydrogenase of vegetables, 2251*g*.
on bile flow, 305*a*.
on carcinogenic potency and elimination of 3,4-benzopyrene, 307*f*.
on decompn. of benzyl *p*-toluenesulfonate, 7797*h*.
on elec. activity of brain, 9261*b*.
*effect* on flame propagation limits of $C_4H_{10}$, H, $CH_4$ and $C_2H_2$ mixts. with air, 3617*g*.
on gastric passage and intestinal absorption of glucose solns., 4767*g*.
on gastric secretory response to insulin, 8538*i*.
on histamine-produced granulopexy of endothelium, 4766*g*.
on polymerization of 2-methylpropene, 6061*c*.
on renin-hypertensinogen reaction, 1860*h*.
on sedimentation rate of serum albumin, 6264*f*.
on tropokinesis in onion meristems, 4348*i*.
on uptake of radioactive P by erythrocytes, 3103*h*.
elec. moment of vapor of, 6020*g*.
in ethylene chlorohydrin recovery from aq. solns., P 2633*c*.
explosion of vapors of, 8681*c*.
fires in, extinguishing of, 6417*g*.
fixation by blood serum, 3855*f*.
formation from $Et_2SO_4$ and EtOH, mechanism of, 3778*e*.
in German pharmacopeia based on B.P. 1948, 5551*i*.
in hafnium sepn. from Zr, 2883*c*.
identification of, for use in operating room, 3563*c*.
in ignition retarding of Diesel fuels, 6805*d*.
ion-concn. detn. in, 2075*h*.
lithium-salt elec. cond. and soly. in, 8790*h*.
lymph production after anesthesia by cyclopropane or, 1869*g*.
lyoparachor of, 2834*b*.
manuf. from $C_2H_4$, catalyst for, P 5887*b*.
manuf. in EtOH-MeOH decompn., P 4835*d*.
meniscuses of, 4064*c*.
mixts. with acetone, dielec. polarization in, 454*b*.
mixts. with org. vapors, adsorption by active carbons, 16*g*.
mol. assocn. and sound velocity in, 2835*e*.
narcosis by, effect on enzymic activity of pancreas of dogs killed by bleeding, 4740*c*.
occlusion of vapor of, from air current by layer of active C, 5255*c*.
octane value of, 3998*c*.
oxidation on catalyst, 928*b*.
parachor and thermochor of, 2923*f*.
peroxide in, effect on butterfat test, 5509*d*.
phys. consts. of, 2590*a*.
purification of, P 8620*b*.
for spectroscopic use, 7817*g*.
for use in Grignard prepn., 3780*d*.
reaction product with Br, 1313*b*.
recovery of, in 1,3-butadiene manuf from EtOH, P 7950*d*.
salt refraction and vol. in, 4543*c*.
solubilities of metallic soaps in, 1998*b*.
soly. in Na xylenesulfonate solns., 1242*e*.
solubilization of, with Na secondary alkyl sulfates, 466*a*.
as solvent for fatty matter in wool, 6423*d*.
spectrum of, 4573*h*.
sucrose-soln. interfacial tension against, 2845*b*.
sucrose-soln. work of adhesion in, 2845*d*.
system: acetone–, surface tension of, 2491*c*.
system: anthraquinone–, 4937*d*.
system: $C_6H_6$–, 4937*h*.
system: ethanolamine–pyridine–, 8833*b*.
system: $GeCl_4$–, 2535*a*.
systems: EtOAc–, MeOH–, and PrOH–, foam formation and duration, surface tension, viscosity and vol. contraction of, 8779*d*.
systems with methyl chlorosilanes, 2490*i*.
thermal cond. and viscosity of, 4065*c*.
thermal cond. of, 7284*d*.
uranyl nitrate fluorescence in combination with, 2512*c*.
uranyl nitrate partition between $HNO_3$ and, 3267*b*.
vapor-d. distribution over surface of, 7282*i*.
ventricular fibrillation from adrenaline and, 313*b*.
viscosity-vol. relation for, 2835*i*.
**Ethyl europium sulfate**, spectrum of, 2093*a*, 7337*a*.
**Ethyl fluophosphates**.
**$EtHPO_2F$**, 2-chloroethyl ester, volatility and vapor pressure of, 8841*a*.
**$Et_2PO_2F$**, 121*c*.
volatility and vapor pressure of, 8841*a*.
**Ethyl fluosulfonate**, volatility and vapor pressure of, 8841*c*.
**Ethyl fluothiophosphates**.
**$(EtOPF_2(:S))$**, 1313*i*.
**$(EtS)_2POF$**, 121*g*.
**Ethyl group**, detection in organosilicon compds., 3318*a*.
effect on curarizing power, 6592*e*.
removal from hydrocarbons, P 5584*a*.
ultrasonic velocity of, 8780*g*.
**Ethyl holmium sulfate**, spectrum of, 6917*h*.
**Ethyl hydrogen peroxide**. See *Ethyl hydroperoxide.*
**Ethyl hydroperoxide**, compds. with catalase, 260*g*.
reaction with enzymes, 9121*b*.
spectrum of, 3724*f*.
**Ethyl hyponitrite**, as catalyst for polymerization, P 5641*c*.
**Ethylidene diacetate**. See "diacetate" under *1,1-Ethanediol.*
**Ethylidene peroxide***, polymer, 5509*e*
**Ethylidenimine**, ***N*,1-difluoro-**, 6793*e*
——, ***N*-methyl-1-phenoxy-†**, and picrate, 2594*f*.
——, ***N*-methyl-1-*p*-toloxy-†**, and salts, 2594*g*.
**Ethyl iodide**. See *Ethane, iodo-.*
**Ethyl ketone**. See *3-Pentanone.*
**Ethyl mercaptan**. See *Ethanethiol.*
**Ethyl metaphosphate**, 120*i*.
acetyl esterase inhibition by, 259*a*
**Ethyl methyl fluophosphate**, volatility and vapor pressure of, 8841*a*
**Ethyl methyl triphosphate**, $Et_2MeP_3O_{10}$, cholinesterase-inhibiting activity and toxicity of, 1109*h*.
**Ethyl nitrate**, azeotropes of, 2835*c*.
catalyst of, and $Et_3PO_4$ in ketene manuf from AcOH, P 5413*e*.
decompn. of, kinetics of, 6901*i*
effect on combustion velocity and octane no., 6814*a*.
explosibility of, and effect on flame propagation limits of $C_4H_{10}$, H, $CH_4$ and $C_2H_2$ mixts. with air, 3617*g*.
ignition of vapors of, before decompn. and explosion of liquid, 8139*d*.
in ignition retarding of Diesel fuels, 6805*d*
**Ethyl nitrite**, azeotropes of, 2834*i*.
in deamination of α-amino alcs., 2600*e*
explosibility of, 3617*i*.
**Ethyl number**, the term, 6814*a*.
**Ethyl orange***, silica gel prepd. in presence of, 6480*c*.
**Ethyl orthoformate**. See "triethyl ester" under *Orthoformic acid.*
**Ethyl orthosilicate**. See *Ethyl silicate*
**Ethyl oxalate**. See "diethyl ester" under *Oxalic acid.*
**Ethyl peroxide**. (See also *Ethyl hydroperoxide.*)
effect on flame propagation limits of $C_4H_{10}$, H, $CH_4$ and $C_2H_2$ mixts. with air, 3617*g*.
spectrum of, 3724*f*.
**Ethyl phenyl triphosphate**, $Et_4PhP_3O_{10}$, P 9356*h*.
**Ethyl phosphates**, tetraethyl pyrophosphate detn. in mixts. of, 2125*a*.
**$EtH_2PO_4$**, acid hydrolysis of, 147*i*.
fertilizer expts. with, 3131*e*.
**$Et_2HPO_4$**, prepn. of (in high purity), 1315*a*.
**$Et_3PO_4$**, catalysts of, and nitric acid esters in ketene manuf. from AcOH, P 5413*e*.
elec. moment of, 2832*b*.
as foam inhibitor, 7161*d*.
in hexaethyl tetraphosphate, 4417*f*.
hydraulic fluid from diisobutyl ketone and, P 5519*b*.
in mercerizing solns., P 9478*b*.
reaction with $POCl_3$ and $P_2O_5$, 1004*g*.
**Ethyl phosphites**, platinum complexes of $Et_3PO_3$ and $Et_2HPO_3$, 4172*g*
**$Et_2HPO_3$**, 599*h*.
**Ethyl propyl thiophosphites**.
**$PrOP(SEt)_2$**, 1004*d*.
**$(PrO)_2PSEt$**, 1004*d*.
**Ethyl pyrophosphate** ($Et_4P_2O_7$), 120*h*, P 9357*a*.
in acarid control in orchards, 1523*b*.
acetyl esterase inhibition by, 258*g*.
in aphid control on flue-cured tobacco, 5897*c*.
cholinesterase-inhibiting action and toxicity of, 1109*h*.
cholinesterase inhibition by, kinetics of, 7528*f*.
compn. and hydrolysis rate of, 2077*f*.
detn. of, 4417*f*.
in com. products, 7375*e*.

*detn. of*, in Et phosphate mixts., 2125*a*.
in $Et_4P_2O_{11}$, 8976*f*.
effect on brain function and metabolism, 7147*g*.
on dehydrogenases of brain, 7066*f*.
on kalanchoe, 1898*b*.
on nerve-muscle prepn. and central nervous system, 7587*i*.
on pseudocholinesterase and acetylcholine 4305*c*.
on wildlife, 1524*a*.
in grasshopper control, 6353*f*.
in greenhouse-pest control, 1523*h*3.
in hexaethyl tetraphosphate, 3965*d*.
as insecticide, 3556*b*, 5146*e*.
in mite control on berry bushes and fruit trees, 1897*g*.
in pea-aphid control, 1897*a*, 9330*d*.
in peach-silver-mite control, 1523*e*.
in periodical-cicada control, 1899*b*, 7629*i*.
pharmacol. comparison with other anticholinesterases, 3930*f*.
pharmacology of, 7133*h*.
phosphorus detn. in, 6937*a*.
physiol. action of, and its use in myasthenia gravis treatment, 8556*b*.
in plum-curculio control on peaches, 5527*c*.
poisoning by, 9330*e*.
in potato nutrition, 1899*e*.
prepn. and hydrolysis of, 1314*h*.
in red-banded-leaf-roller control, 5527*e*.
review on, 9353*a*.
stability of, 5526*b*.
toxicity to citrus mite and greenhouse thrips, 3138*c*.
to flies resistant to DDT, etc., 8600*e*.
to honeybees, 9349*i*.
to man, 8600*f*.
toxicology of, 2705*d*, 4411*h*.
in two spotted-spider-mite control, 1523*e*.
in two-spotted-spider mite control, effect of dusts on, 2730*a*.
in vegetable-insect control, 1141*b*.
in Willamette-mite control on raspberries, 3137*d*.

**Ethyl selenide**, as chloroprene-polymerization inhibitor, 1598*f*.

**Ethyl silicates**, formation of $Et_6Si_2O_7$, $Et_8Si_3O_{10}$ and $Et_{10}Si_4O_{13}$, 2573*i*.
formation of $Et_6Si_2O_7$, $Et_8Si_3O_{10}$, $Et_{10}Si_4O_{13}$, $Et_{12}Si_5O_{16}$ and $Et_{14}Si_6O_{19}$ from $EtSiO_4$, 5738*f*.
mixts. of $MgCl_2$ with, as fire-resistant material, P 1050*c*.
paints from, 8695*d*.
prepn. of $Et_6Si_2O_7$ and $Et_{12}Si_5O_{16}$, 4631*h*.

**$EtSiO_4$**, azeotope with isobutyl isovalerate, 2834*e*.
elec. moment of, 2832*b*.
paper treatment with, 8136*e*.
polymerization of, P 6464*h*.
Raman spectrum of, 422*i*.
siloxanes from, P 3237*g*.
toxicity of, 4401*h*.
toxicology of, 1866*i*.
urea-HCHO resins contg., P 4894*c*.

**Ethylstibamine**, in schistomiasis mansoni therapy, 9266*g*.
trypanosomiasis therapy with, 1485*e*, 8528*b*.

**Ethyl sulfate** ($Et_2SO_4$). (See also *Ethylsulfuric acid*.)
as catalyst in ether formation from acetals, P 1050*a*.
in ethylcellulose prepn. under vacuum, 6824*b*.
hydrolysis and purification of, 4845*i*.
hydrolysis of, P 7497*i*, P 7498*c*.
reaction with EtOH, 3778*f*.
toxicity of, 4401*f*.

**Ethyl sulfide**. (See also *Ethyl disulfide; Ethyl tetrasulfide*.)
compd. with AuCl, 1313*d*.
as corrosion inhibitor against $CO_2$ in petroleum wells and processing, P 7221*h*.
effect on contact oxidation of vitamin C by Cu ions, 1097*a*.
manuf. of, P 7952*f*.
phys. constants of, 2956*e*.
reaction with *N*-haloamides, 172*d*.

**Ethyl sulfite** ($Et_2SO_3$), in cellulose treatment, P 4853*g*.
elec. moment of, 2832*b*.
ethyl alc. from, P 6645*e*.
rearrangement of, 1313*g*.

**Ethyl sulfoxylate**, $S(OEt)_2$, hydrolysis of, 2886*b*.

**Ethylsulfuric acid**, as catalyst in ether formation from acetals, P 1050*a*.

**Ethyl tetraphosphate** ($Et_6P_4O_{13}$), acetylesterase inhibition by, 259*a*.
aerosols of, effect on plants, 1523*e*.
in aphid control on celery, 346*e*.
in cabbage-aphid control, 5526*d*.
in cabbage-pest control, 5147*g*.
compn. of, 3965*d*.
effect on ileum in relation to its survival time, 761*i*.
on kalanchoe, 1898*b*.
on nerve-muscle prepns. and central nervous system, 7587*i*.
on pseudocholinesterase and acetylcholine, 4305*c*.
as fertilizer and reaction with aqua regia, 3131*c*.

cells of frog tadpole, effect of α-rays on, 1445*b*.
chemosis of rabbit, by mustard oil, effect of antihistamines on, 2315*d*.
conjunctiva, drug effect on, 756*c*.
conjunctiva, passage of sulfonamides into, 4771*h*.
cornea and lens, distribution of glutathione and vitamin C in, 1849*i*.
cornea, emetine effect on, 8057*h*.
cornea, injury by mustard gas and allied toxic agents, 766*i*, 8110*e*.
corneal epithelium, adhesion to stroma, compns. affecting, 768*d*,
*corneal epithelium*, adhesion to stroma, effect of histamine and related substances on, 769*c*.
adhesion to stroma, effect of mustard on, 769*d*.
effect of antihistamines on loss of adhesiveness of, after histamine administration, 2700*h*.
intercellular cohesion in, 8514*d*.
mitotic and wound healing activities of, in thiouracil treated and thyroidectomized rats, 7578*i*.
diseases of, aureomycin in treatment of, 6368*i*.
diseases of, lactoflavin and nicotinic acid in, 9196*g*.
dolantin effect on, 4771*f*.
drugs used on, effect on penicillin activity, 4772*d*.
effect of citral and β-ionone on, 1488*g*.
ganglion cells of retina in methanol poisoning, 1859*i*.
glycine effect on, of chicks, 2293*d*.
gold in, in arthritis, 763*e*.
hemato barrier, effect of antihistamines on permeability of capillaries of, 1107*i*.
in hydrocyanic acid poisoning, 3522*g*.
iris of, antagonism of acetylcholine and atropine in action on sphincter muscle of, 4381*b*.
iris of, effect of tetanus toxin on acetylcholine and cholinesterase in, 4761*e*
-irritating factors in smog, 7672*h*.
Kayser-Fleischer ring in, chem. nature of, 4762*c*.
lens of, albuminoids of, 1815*d*.
cancer and, 748*b*.
oxidative capacity of cataractous, effect of amino acids on, 8044*f*
oxidative metabolism of, effect of riboflavin on, 3503*e*.
readily available space of, 9207*b*.
transmethylation in, 7059*e*
lens substance, action of proteolytic enzymes on, 3512*i*
lesions of, from lewisite and other arsenical vesicants, BAL in treatment of, 4372*b*.
lipoid exts. from, effect on dark adaptation, 3933*i*.
mucoproteins of, 7525*e*.
myelin in optic tracts in underfeeding, 734*f*.
nerves—see "optic" under *Nerves*.
nutrition and, 8022*f*.
ointments for, 2734*h*.
in pantothenic acid and pyridoxine deficiencies, 5457*i*.
phosphate exchange between blood and, 1473*g*.
pilocarpine effect on glaucomatous, effect of pH on, 764*b*.
pressure in, effect of insulin on, 1106*i*.
prostigmine effect on, 4772*a*.
pupil, effect of asphyxia, anemia, anoxemia and $CO_2$ on, 4374*i*.
pupillary response to adrenaline, effect of low temp. on, 5053*b*.
retina, behavior of photographic plate and, 1276*f*.
cholinesterase in, 1473*e*.
effect of amphetamine, ephedrine and adrenaline on blood pressure in, 6735*a*.
effect of priscol on blood pressure in, 3522*g*.
glycolytic activity of, during dark adaptation, 3503*g*.
hemorrhages of, in avitaminosis K of newborn, 1486*h*.
metabolism and light sensitive substances of, 7107*c*.
phosphatase activity of, of chick embryo, 8495*a*
P compds. and enzyme systems of, 8040*c*.
respiration and glycolysis of, after section of optic nerves, 7105*e*.
vitamin $B_1$ in, 8514*f*.
retinenes in, reduction to vitamin $A_1$, 3077*e*.
sclera, mucoids of, 3506*b*, 5103*c*.
tension in, and retinal arterial pressure in acetylcholine shock, 6723*a*.
tension in, diencephalon in regulation of, 755*d*.
tolerance to Al and its alloys blood pressure in, 6735*b*.
tuberculosis of, streptomycin in treatment of, 6729*a*.
uranium compd. absorption through, and damage to, 8529*f*.
visual purple state in retina and scotopic dominator, 8503*f*.
vitamin A content of plasma in relation to, 5458*c*.
vitamin $B_1$ in, of fishes, 1117*a*.
vitamin C in cornea, corium and retina of, 5848*a*.
vitamin prepns. from, P 7198*b*.
wetting agents in treatment of, 3563*f*.
zinc sulfate effect on, 5860*c*.

**Eye-spotted budmoth.** See *Spilonota ocellana*.

**Eye washes.** See *Eye lotions*.

**Eykman formula.** See *Refraction*.

**Ezomatu,** lignin from, structure detn. by hydrogenation of, 2427*hi*.

**Faba vulgaris.** See "broad" under *Beans*.

**Fabiatrin,** and hexaacetate, 1770*d*.

**Fabrics.** See *Dyeing; Textiles*.

**Facsimile recording.** See *Recording*.

**Factice.** (See also *Rubber, substitute and synthetic*.)
adhesives for tape from, P 1610*i*.
compns. from polyisobutylene and, P 2040*b*.
dispersions (aq.) of, amine soap-contg., P 2463*b*.
emulsions in urea resin or protein for pigment printing and dyeing, P 1990*k*.
from isano oil, 3630*d*.
manuf. of, P 895*f*.
as plasticizer in synthetic elastomers, 2010*i*.
reaction products with inorg. polyisocyanates and polyisothiocyanates, P 9088*b*.

**Factor A.** See *Carotene;* and "A" under *Vitamins*.

**Factor $A_2$.** See "$A_2$" under *Vitamins*.

**Factor CH.** See *Growth substances*.

**Factor V** (*factor five*), prepn. and properties, 2255*c*

**Factor G P-1.** See *Folic acid*.

**Factor L.** See "L" under *Vitamins*.

**Factor I** (*factor one*). See "$B_2$ complex" and "$B_c$" under *Vitamins*.

**Factor PP.** See *Nicotinic acid*.

**Factor R.** See *Hyaluronidases*.

**Factor Rh.** See "Rh factor" under *Blood*.

**Factor VI,** identity with Ac-globulin, 1815*e*.

**Factor S. L. R.** See *Rhisopterin*.

**Factor $U_1$.** See *Ergosterol*.

**Fading.** (See also *Bleaching; Color(s); Dyes*.)
of army clothing by monochloramine-B in laundering, 1573*e*.
of astacin pigments in fish, effect of sulfa compds. on, 1498*e*.
effect in photometric detn. of Ni and Fe, 8208*f*.
measurement of, control of humidity and temp. in Fade-Ometer in, 8685*d*.
photochem. degradation of dyed nylon and rayon in relation to, 854*c*.

**Faeces.** See *Feces*.

**Fagara.** See *Zanthoxylum*.

**α-Fagarine,** 602*d*, 1778*f*.
compds. related to, 2211*i*.
compds. related to, pharmacol. action of, 2320*d*.
identity with α-allocryptopine, and derivs., 4280*g*.
pharmacol. action in toad, 7583*g*.
toxic action of, 7584*a*.

**γ-Fagarine,** from *Aegle marmelos*, 2993*g*.

**Fagarines,** II, and derivs., 4280*i*.
III, and hydrochloride, 4280*i*.

**Fagarol,** from *Zanthoxylum*, 5546*f*.

**Fagopyrum.** See *Buckwheat*.

**Fagus.** See *Beech*.

**Faience.** See *Ceramic ware*.

**Faktorovskya aschersoniana,** effect of minerals on fruit formation in, 8459*e*.

**Falkmanite,** identity with boulangerite, 8983*c*.

**Fall armyworm.** See *Laphygma frugiperda*.

**Fallopian tubes.** See *Oviducts*.

**Fallot's tetrad,** oxidation-reduction potential of blood serum in, 5483*f*.

**False spider mites,** control with parathion, 8088*i*.

**Fans,** flow in discharges from, 6871*b*.

**Fanweed.** See *Pennycress*.

**Fanyline.** See "phenylhydrazide" under *Acetic acid, fluoro-*.

**Faraday constant,** 4948*c*.

**Faraday effect.** See "magnetic" under *Optical rotation*.

**Faradiol,** and derivs., 1750*f*.

**Faradione,** 1750*h*.

**Farina,** mixt. with corn flour and wheat germ, 5-pentadecylresorcinol as antioxidant in, P 884*e*.
mixt. with sand, flow through screw conveyer, 6872*c*.

**Farinograph**, measurement of absorption of water by mixt. of flour and nonfat milk solids with, 2336*h*.
**Farma 939***, effect on hyaluronidase and staphylocoagulase, 3855*h*.
effect on lysozyme action, 3855*g*.
**Farnesal***, review on, 9375*h*.
and semicarbazone, 7900*f*.
**Farnesol** (*3,7,11 - trimethyl - 2,6,10 - dodecatrien-1-ol*), com. prepns., 2370*h*.
**Fasciola hepatica**, DDT effect on, 4414*d*.
effect of drugs on, 5503*h*.
vitellogens of, staining of, 3529*d*.
**Fassaite**, in marble from Tiree Is., Hebrides, 4606*c*.
**Fasting**. See *Inanition*.
**Fastness**. See *Dyes; Fading*.
**Fast Red**. See *Dyes*.

oxidation (aut-) of olefinic, 4493*g*.
oxidation of, 4311*b*.
in detn. of functional groups, 6840*i*.
inhibition of, 2449*e*.
lipoprotein in, 4311*c*.
in milk powders, detection of, 2707*h*.
in pharmacy, 3976*f*.
spectrophotometric studies on, 7987*c*.
oxidation of unsatd., by enzymes, 8406*b*.
oxidizability and action of antioxidants on, measurement of, 1583*g*, 2791*d*.
of ox, pig and sheep bodies, 2790*g*.
peroxide detn. in, 6840*g*.
peroxide structures in oxidized, polarograph in distinguishing, 2789*i*.
pharmaceutical use of, 5546*b*.
phase investigations of, 6839*a*.
in phosphatide-cerebroside fraction of nervous tissue, 703*h*.
in placenta during O starvation, 4359*c*.
from *Platonia insignis*—see "bacury" above.
processing of, 1497*f*.
production and uses of sol., 5609*h*.
-proofing—see "-proofing" under *Grease*; and "-resistant" under *Oils*.
rancidity detection or detn.—see *Rancidity*.
rancidity development in, packaging materials for prevention of, 3531*f*.
rancidity in eviscerated poultry, 1087*g*.
rancid, nutritive characteristics of, 9180*a*.
recovery from leather scrap, P 4505*a*.
recovery from waste waters, P 2720*c*.
recovery of—see also *Grease*.
recovery of monoesters with polyhydric ales. and of volatile nonsaponifiable matter from, P 2794*f*.
removal from bone liquor in glue prepn., 4504*g*.
from fuller's earth, P 7609*c*.
from pharmaceuticals, 1149*c*.
from rutin exts., P 1913*e*.
from wool-scouring wastes, 8080*dc*.
rendering, activated-sludge treatment of wastes from, 6767*g*.
rendering, in presence of hydrated silica, P 1585*h*.
reviews on, 4495*i*, 4595*f*, 4788*f*, 4789*a*, 5203*g*, 6433*g*.
of *Sapium sebiferum*—see "Chinese vegetable tallow" above.
sapon. of—see *Saponification; Saponification number*.
in seeds during germination, 8457*d*.
shea, analysis for double bonds, OH groups and branchings in C chains, 1173*f*.
shea, unsaponifiable matter of, 7462*i*.
sheep-body, 1997*b*.
of sheep, effect on utilization of energy and proteins in rations, 5130*d*.
sodium carbonate incorporation and, 7567*f*.
solvent fractionation of, P 1585*i*.
solvents for, effect on phosphatase activity of skim milk and buttermilk, 326*d*.
spoilage of, 5972*h*.
detn. of degree of, 1997*a*
$H_2O_2$ detection to test for incipient, 5205*h*.
stability tests for, 2791*d*.
stabilization of, P 4397*b*.
sterols from, P 9088*d*.
storage effect on cooking quality, 1497*h*.
substances accompanying, and phospholipide detn. in, 4029*h*.
as suppository bases, 3563*f*.
synthesis of, from coal, 6827*h*.
from coal by Fischer-Tropsch products and air by paraffin oxidation, 5878*a*.
by hydrogenation of sulfurated vegetable oils with Ni catalyst contg. S, P 5613*b*.
by oxidation of hydrocarbons, 7241*d*.
synthetic, from fat acids with odd nos. of C from oxidation of paraffins, 9487*e*.
injuries of nervous system after feeding, 9195*g*.
succinic acid in urine after eating, 5097*c*.
in thromboangiitis obliterans, 299*c*.
tissue—see "adipose" under *Tissue, animal*.
toxicity of 2,4-dinitrotoluene and trinitrotoluene in relation to, 9194*g*.
transformation of, 3-C-atom compds. in, 421*i*.
o-tritolyl phosphate detn. in, 1911*e*.
in turkeys, effect of diet on, 1087*h*.
utilization in liver, choline in, 1852*a*.
utilization of, effect of galactose on, 737*b*.
utilization of parenterally administered, 9189*c*.
water detn. in, 9366*e*.
whale—see also *Oils*.
from wine residues and vine shoots, 6360*i*.
wool—see *Wool fat*.

**Fatty acid oxidase.** See *Oxidases*.

**Fatty acids.** (*For the purposes of this index so-called unsaturated fatty acids, e.g., those commonly found in fats, are entered here as well as the true fatty acids* ($C_nH_{2n}O_2$). *See also* Acids. *For studies of general interest relating to analytical indexes, as methods for their determination see such headings as* Iodine number.)
of *Abrus praecatorius* seed oil, 4496*a*.
absorption of, 1842*e*.
in *Acanthias vulgaris* egg oil, 5210*h*.
acidimetric properties of, and derivs., 3269*h*.
acrodynia and, 3497*b*.
β-acyloxy, P 1053*d*.
adsorbed at $Ph_2NH$-air boundary, 1238*i*.
adsorption by C black, 7289*e*.
by C black, effect on C dispersion in rubber, 1599*f*.
by C, effect of ultrasonic waves on, 7774*f*.
of alfalfa-leaf meal, 1999*i*.
β-alkyl- and arylmercapto, P 1054*f*.
allergy from infection and, 5857*d*.
analysis of mixts. of, by extn. with immiscible solvents, 8976*i*.
analysis of mixts. of volatile, 8976*h*.
antagonism to surface-active agents on gram-positive bacteria, 5822*c*.
aquatic- and marine-animal fat complex unsatd., 8179*c*.
arsenic derivs. of Ph substituted, 4237*a*.
in arteries in diabetic gangrene, 8047*e*.
β-aryloxy, P 1053*i*.
aryloxy derivs., purification of, P 7045*e*.
in avocado pear pulp oils, 9489*i*.
of babassu oil, 5207*e*.
bactericidal and bacteriostatic action of, 5906*b*.
of bacury-seed fat, 7720*h*.
from basil-seed oils, 1582*d*.
of *Benincasa cerifera* seed oil, 6842*e*.
in blood of chickens and turkeys, effect of estrogens on, 7561*b*.
in blood plasma of allergic and normal subjects after administration of soy-bean oil, 5107*e*.
in blood serum in hypertony, 8522*a*.
in nervous diseases, 5110*f*.
during Vichy cure, 5500*a*.
book: Bijdrage tot de physiologie van de essentiële vetzuren, 8029*b*.
boundary-friction-coeff. lowering in polysiloxane lubricants by, P 5939*g*.
branched-chain, 2931*f*, 3780*f*.
branched, tuberculosis and, 1855*i*.
in bread, effect on consumer acceptability, 2336*c*.
breakdown of, 9198*d*.
in buffalo-milk fats, 7600*d*.
in butterfat, 8569*d*.
of butterfats, hydrogenated groundnut oils and mustard oil, 1997*d*.
of candlenut oil, 5203*i*, 7723*b*.
in caoba-seed oil, 7722*c*.
carbon$^{14}$ detn. in, 4719*h*.
from castor oil and their vitamin F activity, 1472*e*.
in cheese cultures, effect of temp. on, 1497*b*.
of *Chlorella*, 2679*c*.
chlorinated, degradation of, 2164*d*.
HCl removal from, P 7502*e*.
reaction with metal carbonates, 2164*f*.
(chloroaryloxy) derivs., P 2234*a*.

(chlorophenoxy) derivs., P 2233*i*.
in cholesterol soln. in blood, 9210*f*.
chromatographic sepn. and detn. of satd. $C_{11}$-$C_{19}$, 69*d*.
chromatographic sepn. from perilla oil, 4031*i*.
chromatography of, in acid fats and oils, 4029*g*.
cis-trans transformation of unsatd., in autoxidation of peanut oil, effect on mol. enlargement and viscosity, 5973*b*.
of citrus-seed oils, 880*f*.
in coconut, cottonseed and sesame oil fractions distd. under reduced pressures, 424*c*.
coconut-oil, condensation with acetone-sulfonic acid and hydrazine, wetting agents by, P 5216*i*.
reaction of hydrazides of, with glucose, foaming and wetting agents by, P 9497*i*.
reaction with $C_2H_4O$, textile assistants by, P 7727*a*.
complex with streptomycin, 2668*i*.
concn. of, P 3637*c*.
condensation products and syntheses of, in detergent industry, 3636*c*.
condensation products with amino alcs., analysis of sulfated, 8705*g*.
conversion to alcs., P 1202*c*.
in corn, effect of oil sepn. on, 5875*h*.
of corn oil, 2450*i*.
as corrosion inhibitors and detergents in turbine lubricants, 842*a*.
corrosion inhibitors for use in, dicarboxylic acid mixts. with alkyl acid esters of P acids, P 1180*c*.
cream and butter water-insol., 6749*h*.
of Cruciferae oils, 9487*i*.
from cuttle-fish oil, lubricant prepn. from, 9424*a*.
cyano derivs., P 7502*g*.
dehydrogenation of, 2940*i*, 3357*c*.
deposition of trienoic, in fats of pig and rat, 292*e*.
desaturase of, 9090*i*.
detn. of, 3483*g*.
in butter and cream, 9282*h*.
in fats, 423*a*.
in feces, 2658*g*, 4322*g*.
in glycero-phthalic resin mixts. with polyvinyl acetate, 5226*g*.
in liquid toilet soaps, 5976*g*.
in olive husks, 4875*d*.
in soap fractions and soap boiling process, 3218*g*.
in soaps and oil residues, 8710*c*.
in tall oil, 9442*f*.
detn. of free, and their solidification temp. in bone grease, 1581*d*.
detn. of free, and their solidification temp. in tallow, 1581*c*.
detn. of free, in fats and oils, 879*c*, 6838*i*.
in fatty acid chloride-peptide condensation products, 3217*h*.
in wool, 6423*c*.
detn. of sol. and insol. volatile, in fats and oils, 3634*g*.
deuterium incorporation into, in animal, thyroid effect on, 8030*f*.
α,α-dialkyl ethylenic, P 7037*g*.
α-(2,4-dichlorophenoxy) derivs., P 7045*d*.
digestibility of, effect of dietary Ca and Mg on, 5460*g*.
dimerized, condensation products with ethylenediamine, coating compn. from, P 2037*c*.
distn. of, P 671*d*.
distn. of, app. for, P 671*a*, 2449*b*.
distn. of satd., of hydrogenated oils, 5207*c*.
distn. pretreatment for, 6433*i*.
distn. *vs.* extn. from natural products, 4521*h*.
of *Dodonaea viscosa* seed oil, 2451*a*.
of drying and semidrying oils, polymerization rate consts. and, 5605*h*.
drying, mixts. with rosin, plasticizer for GR-S rubber by sulfuration of, P 8732*h*.
drying-oil, bonding agents for friction materials from sulfurized, P 3949*a*.
conjugation of, by isomerization, dehydration and oxidation, 4025*g*.
polymerization with monovinyl aromatic compds. and monocarboxylic olefinic acids, P 5972*a*.
polymerization with vinyl compds. and olefinic acids and then polyhydric alc. and polybasic acids, P 6433*b*.
reaction with alkylphenol-$CH_2O$ resin, coatings by, P 7720*a*.
*drying-oil*, replacing nondrying, by polymerized fatty acids, P 9483*e*.
resins from pentaerythritol condensation products and, P 3232*i*, P 3233*a*.
effect on aging and drying rate of inks and formation of free acids in inks contg. Co salts of fatty acids, 7717*e*.
effect on concrete, 2751*i*.
on elasticity of oleate systems with KCl, 6401*f*.
on fat absorption, 1842*i*.
on glycolysis by *Escherichia coli*, 717*i*.
on ketone body excretion in diabetes, 1479*i*.
on ketones in blood of ruminants, 9188*b*.
on metabolism of acid-fast bacteria, 5082*h*.
on metabolism of normal and diabetic sheep, 753*c*.
on O uptake of *Blastomyces dermatidis*, 3883*i*.
on tubercle bacilli development, 717*h*.
in eggs (dried), detn. of water insol., 6750*i*.
epoxy, P 3030*d*.
essential, 9180*a*.
esterification and sepn. from resin acid solns. in *sec*-AmOH, P 3637*e*.
esterification of, with glycerol, 5207*a*.
with glycerol, fluoride catalysis of, 4030*g*.
with higher alcs. from sperm oil, 5609*f*.
esters—see *Esters; Glycerides*.
ethers of hydroxy, in mercerizing solns., P 9477*f*, P 9478*a*.
from ether-sol.-ext. of fish eggs, effect of putrefaction on, 327*i*.
extn. from fish oils and soly. diagrams for, 7724*b*.
extn. of free, from olive oil by alc., 4031*d*.
fat synthesis from branched, 6164*g*.
filtration and liquid phase extn. in fractional sepn. of higher, P 2793*i*.
of fish-liver oils from Adriatic Elasmobranchia, 5210*e*.
fish-oil, complex unsatd., 8179*b*.
metallic imino derivs., P 5978*d*.
spectra of isomerized polyunsatd., 879*i*.
flavor defect in Cheddar cheese and, 6750*e*.
formation of, 7065*i*
from acetamide and pyruvamide in liver, 3074*a*.
in aorta, 7114*g*.
in cottonseed in storage, relations of molds and moisture to, 4875*e*.
in ghee, effect of curd storage and boiling of milk on, 9283*e*.
in liver in presence of heavy water or labeled acetate, 5481*a*.
from pyruvic acid, 3073*i*.
formation of conjugated tetraenoic and trienoic, in autoxidized linolenic and linoleic acids and oils during alkali isomerization, 5974*c*.
friction at m.p. and reaction with metals of long-chain, in lubrication tests, 2417*g*.
in fruit peel, removal from fruit juice, P 331*c*.
as fungicides, 9386*i*.
of *Galeorhinus australis* oils, 2451*b*.
of *Galsum verum* waxes, 424*i*.
German synthetic, for coatings industry, availability of, 2787*i*.
in ghee, 1579*h*.
in ghee, effect on keeping quality, 8569*f*.
of *Gmelina asiatica* seed oil, 5612*a*.
in green oils, 9480*a*.
β-guanidino derivs., 3793*a*.
of habilla-seed oil, 7722*d*.
β-halo, decarboxylation of, 7901*f*.
halogenated satd., lower homologs from, P 2794*c*.
halogen-substituted, Raman spectra of, 6082*g*.
α-halo, reaction with chlorocresol, P 7044*g*.
halo, reaction with Na deriv. of allylbenzene, 3351*f*.
of *Hemideina thoracica*, 8562*b*.
of hempseed oil, 5208*b*.
of herring oil, 2001*e*.
higher dibasic, uses of, 5206*i*.
high-temp. processing of, 9488*h*.
in horse bone and kidney fats and bone marrow, 6839*c*.
of horse-chestnut oil, 1498*i*.
hydrocarbon-fuel manuf. from, P 4835*a*.
hydrogenation of, P 5977*af*.
*hydrogenation of*, app. for, P 5977*e*.
distn. of hydrogenation-resistant substances before, P 4032*h*.
hydroxy, 3785*a*.
condensation products of, in asphalt emulsification, P 5186*c*.
dehydration of, P 2220*g*, P 6220*b*.
ω-hydroxy, from wool, esterification with hydrogenated oils to waxes, P 3220*g*.
β-hydroxy, manuf. of, P 7039*a*.
hydroxy unsatd. higher, manuf. of, P 5792*c*.
identification and detn. of, crit. mixing temps. of paraffin oil in, 8309*a*.
identification of, from black bear fats 879*g*.
identification of, in textile auxiliaries 1585*c*.
identification of type of, in soaps, 6434*i*.
iodine no. of liver, detn. of, 9131*g*.
ionization of, effect of H and OH ions on, 8793*h*.
of *Ipomoea muricata* seed oil, 8708*h*.
of isano oil, 3630*a*.
Japan wax (bleached), 5211*g*.
Japan wax (hydrogenated) $C_{16}$ and $C_{18}$, and dibasic acids, 5207*d*.
of *Jatropha curcas* seed oils, 5975*i*.
of kamala-seed oil, 4027*c*.
ketone manuf. from aq. mixts. of, P 7037*e*.
linoleic acid detn. in mixed, 7721*h*.
of linseed oil and oils from seeds of niger, rubber, safflower, *Stillingia sebifera*, sunflower and *Tetracarpidium*, 4026*b*.
in linseed oil, detn. of, and formulas for, 4496*b*.
from linseed oil, esterification with 2,2,6,6 - tetramethylolcyclohexanol, drying oils by, 4871*e*.
in linseed-oil films having coordinated soaps as oxidation catalysts, effect on drying properties, 6836*i*.
of linseed, rubberseed and soybean oils 7718*d*.
in lipides of tissue, phosphatide content and, 4355*c*.
long chain dibasic, manuf. by hydrogenation of drying oils, splitting oils and disruptive oxidation of free fatty acid recovered, P 5214*d*
as lubricant pour-point depressant 2416*c*.
of *Luffa aegyptiaca* seed oil, 6842*e*.
lysozyme inhibition by, 7981*a*.
of mahaleb oil, 2791*f*.
in malaria-infected red blood cells, 4167*e*.
in mamey-seed oil, 7722*e*.
manuf., hydrogenation and esterification of, 7239*h*.
manuf. of, P 669*d*, P 3838*b*, P 5035*d*
by products from, in paint and varnish industry, 4028*c*.
by fermentation, P 4810*b*, P 7638*e*.
from low-grade fatty materials by re esterification and distn. of esters, P 3637*d*.
from monoolefins, P 1066*a*.
by oxidation of Fischer-Tropsch waxes, 1200*h*.
from paraffins, 3633*c*, 9029*bd*, 9030*acghi*, 9031*b*.
from paraffin wax, P 3607*a*, 4000*h*.
from paraffin wax, leaching from reaction mass, P 8667*a*.
β-mercapto and β,β′-thiodi, P 1054*d*
α mercapto, dithiolcarbonates as corrosion inhibitors, P 7955*f*.
of *Mesua ferrea* seed oil, 8708*f*.
metabolism of, 290*g*.
metal compds. of unsatd., and effect of acidic group in autoxidation of acids 1907*i*.
microwave absorption and dispersion in, 4092*i*.
in milk fat, acetate as precursor of, in ruminants, 4358*f*.
in milk (sheep), casein content and, 9280*c*.
of millet (Italian) oil, 4496*g*.
mixed micelle formation by soap ions and, formed by hydrolysis, and dissocn consts. of higher acids, 8179*i*.
mixt. with paraffins, oxidation of, 9029*a* 9030*a*.
mobilization of, during physiol. and pathol. states, 9217*c*.
monolayers of, phase changes in, 8796*f*.
from muskrat scent glands, 1579*h*.
in mustard- and rape-seed oils, effect of refining and bleaching on, 1001*c*, 2000*h*.
of *Myrica cordifolia* fruit-coat fat, 3217*d*
of *Nandina domestica* seed oil, 8708*i*.

in napahuite-seed oil, 7722*a*.
nitriles from, 4629*f*.
from oils, alkyd resin modified with, P 2815*e*.
of okra-seed oil, 880*h*.
olefins from, P 7034*i*.
olive-oil, linolenic acid detn. in, 3635*e*.
of onion-seed oil, 6842*f*.
in ovaries in pregnancy, effect of gonadotropic stimulation on, 3910*g*.
oxidation (aut-) of unsatd., 1446*d*.
oxidation (biol.) of, 4755*c*.
oxidation of, 2248*dh*, 2249*a*, 9030*a*, 9122*h*.
by kidney enzymes, 1449*h*.
by kidney homogenates, effect of fluoroacetic and fluorobutyric acids on, 4709*f*.
by liver mitochondria, 7520*g*.
of nervous tissue, 3505*h*.
ω-oxidation of, carbohydrate metabolism and, 9179*g*.
oxidation of dienoic, in fat spoilage, 3217*a*.
oxidation of hydroxy, P 676*h*.
oxidation of long-chain unsatd., with $OsO_4$, 1319*d*.
oxidation of unsatd., 125*f*.
oxidation of unsatd., in normal and scorbutic animals, 3895*b*.
oxidation products of, pyrolysis of, 9030*i*.
oxo—see *Acids*.
palm-oil, 2792*c*, 4031*g*, 5208*d*.
palm-oil, system: MeOH–palm oil–, 8834*g*.
of paraffin oxidation residues, 1993*b*.
from paraffin oxidation, synthetic fats from glycerol and, 9487*f*.
from paraffin-wax oxidation, 4000*h*.
from paraffin-wax oxidation, reaction with ethylene oxide, nonionic detergents from, 5213*f*.
of pataua oil, 2792*e*.
of peanut oil, oxidation of, 5212*g*.
peanut-oil quality and content of free, 8178*i*.
of *Perilla frutescens* seed oil, 8709*a*.
peroxide (org.) desensitization with, P 1807*a*.
phenoxy, P 689*d*.
physiol. action of, and examn. and sepn. of constituents of unknown mixts., 6839*g*.
plaster of Paris contg., P 4444*h*.
polymerization of dienes and acrylonitrile or styrene in presence of, P 2819*f*.
polymerization of higher unsatd., to drying oils, 4872*d*.
polymerization of unsatd., in drying oils, 1997*c*.
polymerization, polyesterification and hydrogenation of, from linseed and soybean oils, 8699*a*.
polymerized unsatd., polyamide resins from ethylenediamine and, P 440*d*.
from polymyxin, 9386*f*.
in polymyxins A, B and D, 9386*e*.
poly-unsatd., effect on fat metabolism, 1093*f*.
in poppy-seed oil, effect of seed treatments on, 4031*h*.
potassium salts, for thiol removal from hydrocarbon distillates, P 4844*d*.
prepn. of higher, starting from crotonaldehyde, 5363*g*.
of rape-seed oil, 1201*a*.
reaction of unsatd., with thiols, P 2219*g*.
reaction products with acrylic esters, P 2034*d*.
reactions (addn.) of ethylenic, in their isolation, 565*i*.
reactions (addn.) with butyl vinyl ether, 7425*i*.
reactions with acetylene, P 7036*i*.
with alkyl vinyl ethers, 3785*i*.
with Al alkoxides, 3688*g*.
with $NH_3$, P 666*f*.
with chlorosulfonic acid, P 2220*c*, P 3220*h*.
with $CH_2O$, 567*c*.
with metals, formation of lubricating layers and, 8799*g*.
with $H_2SO_4$ and $HN_3$, 9027*bg*.
rearrangement of radicals of, in triglyceride fats, P 883*i*.
removal from fats and oils, *in vacuo*, 5609*c*, 8705*h*.
from fats, app. for, P 7242*a*.
from higher alcs. by hydrogenation, P [illegible].
from olive oil by alc.-$NH_3$ mixt., 5208*f*.
from rice oil, by vacuum distn., 8709*i*.
removal of free, from oils, P 9494*f*.
removal of vaporized, scrubbing app. for, 4405*i*.
requirements of *Clostridium sporogenes* for, 7083*e*.
resinous reaction products of, from drying oils with glycerol and maleic anhydride, P 3216*c*.
reviews on, 6433*g*, 9488*g*.
of rice-bran oil, 6842*d*.
from rice oil foot by hydrogenation and hydrolysis, 5611*h*.
in rice oil from stored polishings, 5610*a*.
in rice-oil wax, 5611*e*.
ruminant digestion of, 1475*c*.
salts—see *Salts; Soaps*.
of seal blubber oil and liver fats, 6839*e*.
segregation of fish-oil and soybean, by preferential neutralization, and drying oils by esterification of sepd. acids with glycerol, 6839*h*.
sepn. (fractional) of free, from oils by crystn. and vacuum filtration, P 884*f*.
sepn. of fish-oil unsatd., from mixts. with linolenic acid by Li and Na salt-acetone methods, 7721*f*.
sepn. of mixts. of, 7193*b*.
in shark-liver oils from Hamazame and Hosomezame, 7724*a*.
of sheep body fat, 1997*b*.
in soap manuf., P 8178*f*.
soap-oil dispersion peptization by, 4455*h*.
solubilization by soaps, 9492*a*.
solubilization with Na secondary alkyl sulfates, 466*a*.
of *Sophora japonica* seed oils, 2449*i*.
of sorghum-seed oil, 2450*g*.
in soybean oil during hydrogenation, 5209*h*.
spectra of, 7340*e*.
spreading of, on vaporized metallic films, 4923*g*.
stability of highly unsatd., 7721*d*, 9488*e*.
in steel cleaning, 1304*d*.
steel soln. in, rate of, 540*a*.
of stillingia oil, chromatography and spectrophotometry of, 7721*b*.
from *Stillingia sebifera* fruit-coat fat, 5206*h*.
strengths of, 470*c*.
structure of, nutritive value and, 9194*i*.
sulfated, in metal finishing, 4032*e*.
sulfation and sulfonation of vegetable-oil mixed, and stability and wetting power of products, 4031*b*.
sulfoaryl hydrazides, P 251*f*, P 6660*c*, P 7954*i*, P 7955*b*.
sulfo, as catalysts in ketone manuf. from anhydrides and olefins, P 3442*b*.
sulfurized, as corrosion inhibitors in lubricants, P 4459*c*.
in sunflower-seed oil, 882*h*.
tall-oil, 8676*f*.
autoxidation of, 9442*f*.
esterification with polyhydric alcs. to drying oils, 6432*b*.
oxidation of unsatd., 3611*g*.
in tangarine-seed oil, 7723*f*.
tanning (Fe) with aid of lower, from paraffin oxidation, 6852*d*.
tea-oil (hydrogenated Chinese) $C_{16}$ and $C_{18}$, 5207*d*.
ω 2-thienyl, 3817*f*.
thiodi, P 1054*h*, P 3840*e*.
titration of, and their mixts. with soaps, conductometric and potentiometric, 7239*h*.
titration (potentiometric) of higher, with $AgNO_3$, 4495*d*.
tocopherol destruction by, 737*e*.
transformation of, 3-C-atom compds. in, 421*i*.
unsatd., in oil, 7721*f*.
and their uses, 2449*b*.
of *Vatteria indica* seed fat, 4873*h*.
of whale oil (hydrogenated Antarctic finback), 5207*c*.
of whale oil, sepn. by crystn. from acetone and prepn. of Me esters, 2451*c*.
of wheat-germ oil, 7241*d*.
from wool fat, prepn. of specific hydroxy, P 3219*h*, P 3220*a*.

**Fatty degeneration or infiltration**, of liver—see *Liver*.

**Fatty materials**, antioxidants for, from vegetable oils, P 3637*fg*.
color of, measurement by photoelec. tristimulus filters, 7719*g*.
deodorization of, P 3638*a*.
detn. in wool, 6423*c*.
esterification (re-) with alcs. and acid and then alk. catalysts, P 3637*d*.
hydroxyl value of, 8177*h*.
oxidation of, in detn. of functional groups, 6840*i*.
oxidation of long-chain unsatd., to short-chain satd. compds., P 884*a*.
rancidification of, 1581*d*.
sepn. into components by filtration and liquid phase extn., P 2793*i*.

**Fatty oils**. See *Oils*.

**Faults**. See *Testing materials*.

**Favorskii-Babayan reaction**, 569*g*.

**Fayalite**, formation in Fe-cordierite synthesis, 5705*d*.
heat of soln. in HCl-HF mixt., 4187*h*.
in iron-O-Si system, 84*i*.
solid soln. with forsterite, heat of formation of, 3701*a*.

**F-centers**. See "centers of" under *Color(s)*.

**FD&C dyes**. See *Dyes*.

**Fear**, effect on HCl secretion by stomach, 5852*f*.

**Feathers**, amino acid compn. of, 4708*g*.
color pattern of, effect of thyroxine and antithyroid compds. on, 7455*b*.
feminization of capon, by hexestrol and estrogens, 1098*h*.
hydrolysis products of, P 6764*g*.
insecticides for, adipodinitriles, P 8604*f*.
isocyanate derivs. of powd., P 3241*e*.
pest control in, P 4422*e*.
pigmentation of, of bronze turkey, lysine in, 8466*a*.
pigmentation of, of vitamin D-deficient chicks, 284*i*, 8465*i*.
tract specificity, effect of estrogen on, 8508*c*.
water detn. in, 1824*c*.
water-repellence of duck, structure and, 1239*g*.

**Febrifuges**. See *Antipyretics*.

**Febrifugine**, and derivs., 5406*b*.
identity with β-dichroine, 1530*a*.
——, **dihydro-**, 5406*e*.
——, **nitroso-**, 5406*d*.

**Fecanin**, the name, 5099*g*.

**Feces**. (See also *Meconium*.)
acetylhistamine formation from histamine in, 3478*e*.
acholia of, 3918*e*.
amino acids in, 1852*h*.
amino acids in, effect of fat and diet on, 7560*a*.
analysis for fat and fatty acids, 4822*g*.
antianemic activity of ext. from, of pernicious anemia patient, 7586*f*.
antibiotic-producing organisms in, 4326*c*.
antigens in, in viral hepatitis, complement fixation with, 9223*b*.
arsenic excretion in, 3931*a*.
bilin in, of healthy children of countries with indigenous malaria, 3516*c*.
bilinogen in, of children, 2691*d*.
biliviolin-type spectra in, 3094*b*.
blood (occult) detection in, 7993*e*, 9139*b*.
calcium and P excretion in, in osteoporosis, effect of steroid hormones on, 5487*i*.
calcium, carbonates, chlorides and P in, of hens, 2291*b*.
calcium elimination in, 7556*h*.
carbon (radioactive and total) detn. in, 1285*h*.
chick growth factor from, 284*g*.
3-chrysenol isolation from, after chrysene administration, 9207*h*.
colicin-producing bacteria in, 9163*c*.
copper (radioactive) in, 3098*f*.
creatinine in, 2294*i*.
decompn. of, app. for collecting gases from, P 4837*a*.
diastase in, effect of penicillin treatment on, 9245*d*.
diseases borne by, control of, 9126*e*.
eating of—see *Coprophagy*.
effect on egg production, 294*i*.
fat detn. in, 4313*i*.
fat in, after cholecystectomy, 740*f*.
fats of, effect of feeding fats of different linoleic acid contents on, 3497*c*.
fertilizers contg.—see *Fertilizers*.
growth effects of methyltestosterone and, 1097*e*.
growth factor in cow, vitamin $B_{12}$ in relation to, 2298*b*.
iodoestradiol in, after administration, 3081*h*.
lignins of, 2285*a*.
lipide detn. in, 2658*e*.
lysozyme in, during breast feeding or artificial alimentation, 3898*b*.
male hormone of cow, effect of temp. and drying on activation of, 9126*d*.
microflora of hen, effect of carbohydrate and biotin-deficiency on, 736*e*.

microörganisms in, of rats fed carbohydrates and fats, 2276*i*.
nitrogen (endogenous) in, 4359*e*, 8025*c*.
pantothenic acid and vitamin $B_3$ in, 1094*c*.
phosphatase of, purification of, 9134*g*.
protein (metabolic) in, 5099*f*.
silver in argyrosis, and effect of BAL thereon, 7587*a*.
stomach chem. processes in relation to compn. of, 2687*c*.
streptococci from infants, and their tyrosine decarboxylase activity, 5080*b*.
sulfur (radioactive) excretion in, after administration, 4376*a*.
urobilinogen detn. in, 1452*i*, 4322*i*.
urobilinogen in, in hepatitis, 8522*g*.
vitamin $B_3$ in, effect of pteroylglutamic acid on, 5098*f*.
vitamin $B_{12}$ in chicken, 3062*c*.

**Fechner, G. T.**, biography, 7761*f*.

**Fecosterol**, 7493*c*.

**Feeding**. (See also *Diet; Feeding experiments; Feeding stuffs; Food; Nutrition, animal.*)
fat emulsion for intravenous, 5098*b*.
force, effect on N balance in burns, 7110*c*.
of premature babies, 8039*b*.
sham, gastric mucin secretion after, 8512*e*.

**Feeding apparatus**. (See also *Burners; Charging apparatus; Delivery apparatus; Dispensing apparatus; Stokers.*)
for chlorine to water, 334*h*.
for distn. column for petroleum, P 6403*d*.
for drum vacuum filters, P 4906*g*.
for gas, Hg cut-offs for introductor, 5646*h*.
for glass-melting tanks, P 9407*e*.
for lime soln. in purification of sugar juices, P 9506*c*.
metering, for solids, 3666*f*.
pneumatic, for finely divided solids, 6872*a*.
proportional, for chemicals to boiler water, 335*d*.
for sulfide ores to roaster, P 5727*h*.
for sulfuric acid in refining oils, P 4845*f*.
for water to recording calorimeters, 8217*c*.
for wood chips in continuous cooking of kraft pulp, 7681*h*.

**Feeding experiments**. (See also *Diet; Digestibility; Metabolism, animal; Nutrition, animal.*)
with alfalfa, corn and cottonseed hulls on lambs, 7158*e*.
with alfalfa hay contg. DDT residues on DDT content of milk, 8575*a*.
with alfalfa hay contg. fat-rich and fat-low concentrates, 8472*i*.
with alfalfa treated with toxaphene on cattle and sheep, 8600*g*.
with bagasse on rats, 1847*f*.
on beef, sheep and swine, 6711*c*.
with betaine, choline, methionine and fish products on chickens, 8465*c*.
with biotin on hens, 1088*g*.
with buffalo-milk fat and ghee, 7600*d*.
with calcium-diets on hens, 2291*e*.
with carotene-low rations on blood, milk and liver concns. of vitamins A and C in ewes and their lambs, 8467*c*.
with carotene on cattle, 6712*a*.
with carotenols on fowl, 1088*c*.
with cereal grains on fowl, 6292*h*.
on chicks over humidity and temp. ranges, 5459*e*.
with clover hay and timothy hay, 7604*c*.
with cobalt on sheep, 8071*a*.
with colostrum on dairy calves, 9193*c*.
with copper, 4410*i*.
with copper on growing foals, 8467*a*.
with corn (hybrid and other) on poultry, 2339*b*.
with cottonseed and soybean meal on chicks, 287*d*.
with cottonseed and soybean meals prepared in different ways on cattle, 6711*e*.
with cottonseed oils and purified and skim-milk diets on calves, 7604*a*.
on dairy cattle, 3941*d*.
with dried distillery feedstuffs on chickens, 285*g*.
on fat and vitamin A level of sow's milk, 3907*a*.
fat effect on energy and protein utilization by sheep in, 5130*d*.
with fat-rich rations and suboptimal levels of riboflavin on growth of chicks, 7580*h*.
with ferrophosphorus, 7159*a*.
fertilizer effect on feed in, on rabbits, 1091*e*.
with fiber on chickens, 1087*i*.
with fish and soybean meals contg. tryptophan, 2293*a*.
with flour-improving agents on dogs, 2707*h*.
with forage (preserved) on dairy cows, 9291*i*.
with forage (range) on beef cattle, 1501*d*.
with fortified all-plant rations on rats, 2293*a*.
with free-choice feeding of laying hens, 9192*h*.
with garbage on swine in Hawaii, 9292*hi*.
with glycine on chicks, 2293*d*.
with grapefruit peel on dairy cows, 785*i*.
with growing and fattening pigs, 9193*a*.
with growth factors (unidentified) on chicks, 284*h*.
Hawaii expt. station reports on, 9314*a*.
with hay (wild meadow) on beef cattle, 3946*c*.
with iodinated casein on cattle, 8474*d*.
with isopropanol-extd. cottonseed meal, effect on storage quality of eggs, 1497*c*.
with koa haole on chicks, 286*f*.
with leucine, methionine and tryptophan on egg production and hatchability, 286*g*.
with linseed oil, ethanolamine, etc., on turkeys, 1087*h*.
with magnesium on dairy cows, 7557*b*.
with mash, mash-grain and wet-beet pulp on cattle, 9313*f*.
with milk (filled) on dairy calves, 8473*b*.
New Jersey expt. station reports on, 9313*a*.
with oils (hydrogenated coconut and peanut) on buffaloes and cows, 1874*g*.
with oil supplements, effect on milk fat, 3943*g*.
Oklahoma expt. station reports on, 9330*c*.
with packing-house cooked feeds, 5464*h*.
with pantothenic acid on pigs, 8467*f*.
with pasture from fertilized and non-fertilized soils on cattle, 6711*g*.
with peanut hay, Cu residue and, 9329*g*.
with phosphorus (radioactive) in corn on poultry, 329*d*.
with prepartal rations on nitrogenous constituents of colostrum of cow, 740*h*.
with protein-factor supplements on pigs, 9293*c*.
with protein-rich feeds on fertility of hybrid bulls, 8038*d*.
with protein-rich rations on chicks and poults, 8465*e*.
with proteins on poultry, 6330*g*.
with proteins on wool strength of lambs, 7099*c*.
with protein supplements and roughages on cattle, 9292*b*.
with protein supplements on cattle, 6711*h*.
on chicks, 285*a*.
on hatchability of eggs, 285*c*.
with *Pteridium aquilinum* roots, 5880*g*.
with purified diet on turkey, 1088*d*.
with sawdust on rats, 1847*e*.
with seed cake on milk cattle, 9292*g*.
with sex hormones and thyroprotein on hens, 294*h*.
with silage and nonsilage rations on growth-factor content of milk, 3893*h*.
with silage on milk cows, 6756*c*.
with sodium chloride on growing chicks, 286*c*.
South Carolina expt. station reports on, 9328*g*.
with soybean meal (untoasted) on chicks, 287*b*.
with soybean proteins on rats, 1495*a*.
with soybeans and soybean meal on carotene and vitamin A in blood plasma and milk of cows, 8479*d*.
with starfish meal on rats, 1879*b*.
with substitutes for corn and cottonseed cake in fattening beef calves, 6712*b*.
with sulfaquinoxaline on chicks, 287*c*.
with sulfur on hens, 7563*h*.
with sweet-potato meal and winter pasture on dairy cows, 786*a*.
with sweet potatoes (dehydrated) on swine, 6775*a*.
with sweet potatoes on dairy cattle, 3946*g*.
on swine, 9192*b*.
with synthetic diet on pigs, 2680*d*.
thiouracil effect in, on turkeys, 8466*b*.
with thyroprotein during starting, growing and laying on chicks, 287*a*.
with thyroprotein on chickens, 285*i*, 294*g*, 9330*a*.
*with thyroprotein* on cows during lactation and pregnancy, 9313*h*.
on dairy cows, 3906*g*, 5468*a*.
with torula yeast on poultry, 8465*f*.
with 2,4,5-trichlorophenol derivs., 8071*b*.
with tryptophan on swine, 1466*f*.
with urea, on N balance of sheep, 3901*i*.
as protein supplement for cattle and sheep, 3496*f*.
in supplementing corn and dried sweet potatoes, 6712*a*.
on rabbits, 1843*c*.
with vitamin A and related substances on chicks, 2291*g*.
with vitamin B supplements on pigs, 2680*e*.
with vitamin concentrates on turkeys, 9193*e*.
with whole-wheat proteins on chicks, 286*h*.
on wool production by Merino sheep, 4859*b*.

**Feeding stuffs**. (See also *Alfalfa; Cereals; Grains; Grasses; Hay; Oil cake; Pasture; Silage;* and "forage" under *Plants.*)
amino acids in chick, 8469*h*.
analysis of, for carotene and vitamin A, 6756*h*.
analysis of, for sulfaguanidine and sulfaquinoxaline, 9291*a*.
from asphodel tubers, etc., P 5616*h*.
barley-bran-residue dried, 778*g*.
calcium phosphates in, 797*h*.
from *Calmagrostis, Carex* and arctic grasses in Europe, 7604*f*.
carotene detn. in, 9276*b*.
carotene in poultry, prevention of loss of, 3538*h*.
carotene preservation in dried, effect of water content and storage temp on, 1879*g*.
carotenoid- and vitamin A-contg., for chicks, 2291*f*.
cellulose in, treatment with chemicals and bacteria to aid digestibility, 8574*h*.
choline stability in, 1123*d*.

nitrogen detn. in, 3551*k*, 9325*e*.
nitrogenous, $NH_3$ and N-contg. solns. as, 797*a*
$(NH_4)_2SO_4$ as, 1135*h*.
anions and cations in cotton in relation to, 8017*i*.
Bermuda hay expts., 3552*d*.
effect of $(NH_4)_2SO_4$ and $NaNO_3$ on soils, 2352*b*.
effect on ascorbic acid in green plants, 3552*i*
effect on cotton and soil, 2354*f*
effect on Fe and Mg in pineapple, 8018*i*.
expts. with $NH_3$, 342*b*, 2723*i*
expts. with $NH_4$ and anions, 7171*b*
expts. with apple trees, 8083*b*
expts. with Burma paddy soils, 2352*e*
expts. with cereals, 7174*f*.
expts. with dry matter and protein of pastures, 340*i*.
expts. with millet, 7622*c*.
expts. with oats, 1890*k*, 2352*g*.
expts. with oats and peas, 800*e*.
expts. with peaches, 8593*g*.
expts. with potatoes, 8083*c*.
expts. with prunes, 8592*h*.
expts. with radioactive materials, 9330*b*.
expts. with *Strammonium*, 2724*b*.
expts. with sugar beets, 5142*g*.
expts. with sugar beets with Chilean nitrate, minor elements and, 799*h*.
expts. with sugar cane, 341*g*, 9501*g*.
expts. with wheat, 4801*b*, 9325*b*.
University of Ga. reports on, 9290*c*.
urea form prepns. as, 1514*g*.
nitrogenous and P, effect on vitamin content of peas, 9289*e*
expts. with potatoes, 2722*i*.
manuf. in Poland, 9325*c*.
percolation from soils, 4803*d*.
nitrogenous and K, expts. with carnations, 4804*c*, 9337*h*.
expts. with sugar beets, 7622*b*.
expts. with tung trees, 9324*h*, 9325*a*.
nitrophosphate, P 5160*g*, P 6374*h*, P 7176*bcd*.
orange, expts., 3130*b*, 9319*g*.
org., as growth substances, 3131*f*.
org., effect on auxin in soils, 3958*e*.
pasture, expts., 9320*f*.
peanut, expts., 1513*c*, 2722*c*, 8083*c*, 9322*e*.
peat-soil, expts., 7621*e*.
phosphate detn. in, 9324*d*.
phosphate rock as, 1133*h*.
phosphate soly. in, effect of K fertilization on, 7623*f*.
phosphatic, P 4412*e*.
adsorption by clay constituents of soils, 9315*d*.
analysis of, phosphate soly. and, 3958*k*.
*Apposphatic*, from apatite, P 3554*b*.
availability in soil, 2351*c*.
with available magnesia, 5142*c*.
Ca trimetaphosphate as, 7624*d*.
classification and flotation of, 802*b*.
contg. Mg, manuf. in elec. furnace, 7175*c*.
curing superphosphate-contg., 8595*c*.
effect of N salts, lime, K and org. matter on availability of P from, 1133*f*.
effect on P in starch of potatoes, 9323*i*.
effect on soil-phosphate uptake, 8084*f*.
effect on sugar in carrots, 7624*c*.
efficiency on calcareous soils, 6350*g*.
expts. in Eure et Loir, 797*g*.
expts. on Egyptian soils with superphosphate, 1891*a*.
expts. with, 5141*g*, 7624*c*.
expts. with alfalfa and subterranean clover, 8590*i*.
expts. with Al, Ca and ferric phosphates and Thomas phosphates, 798*d*, 799*a*.
expts. with loblolly and slash pine, 6350*i*.
expts. with New Jersey soils, 3956*d*.
expts. with oranges, 9323*i*.
expts. with org. phosphates, 3131*b*.
expts. with radioactive P, 793*a*.
fixation of, soil temp. and, 8082*d*.
with F removed, P 8596*e*.
granular and powd., P 3132*e*.
industry in Brazil, 8084*f*.
Fe compds. and, 2724*f*.
manuf. from olivine and phosphate, 45*d*.
manuf. in Canada, 2343*c*.
manuf. of, 7174*gh*.
manuf. of calcined, from phosphate rock, 7624*d*.
from phosphorites, P 8596*f*.
P content of soil and application of, 339*i*.
prepn. of radioactive, 7775*d*.
from Ranis Caves, Thüringia, 6126*c*.
serpentinites of Wairere, N.Z., as, 1092*h*.
soil P and, 1892*b*.
soil relation to raw phosphate, 3131*g*.
Supertomasyna, 8595*a*.
utilization by crops, 1134*g*.
utilization from green-manure crops, 6774*d*.
phosphatic and K, expts., 1510*e*.
expts. with legume hay, 2723*b*.
spontaneous mobilization of reverted soils, 8594*a*.
pine, expts., 4408*h*.
placement expts., 7173*d*.
*Plantoradon* as, 7174*a*.
Polish industry of, 2724*a*, 8594*gh*.
Polish research on, 8594*h*.
potash, effect on phosphate soly. in fertilizers and soils, 7623*f*.
expts. in tropics, 798*b*.
expts. with citrus, 1132*c*.
expts. with oranges, 1132*g*.
expts. with peas, 1513*f*.
expts. with tobacco, 4802*h*.
expts. with tung trees, 1136*e*.
manuf. from K silicates, P 6375*c*.
manuf. in Carpathian foothills, 2742*h*.
in Poland, 8594*f*.
K humate as, 2725*a*.
potash for, 341*g*.
potassium detn. in, 342*be*, 1136*c*.
potassium sulfate manuf. for, 1920*h*.
potato, expts. with slags, 7172*a*.
potato mineral content and, 2675*f*.
production in U.S.S.R., 3156*c*, 3958*e*.
from reeds, 9501*i*.
requirements of soils—see *Soils; Soils, analysis*.
reviews on, 1891*a*, 3131*f*.
rice, expts., 4803*b*.
sampling of, and segregation in, 802*c*.
sawdust as, 3130*e*.
from sewage and industrial wastes in Poland, 3547*a*.
sewage or sewage sludge as, 2346*g*, 3959*b*, 5143*b*, 8595*f*.
from sewage sludge, 3547*h*, 4795*k*, 7168*h*.
from silkworm pupae, P 4804*f*.
slags from blast furnaces and elec. furnaces as, 1135*i*.
sodium-contg., 7173*d*.
soil fertility and, 1129*d*.
soil losses and, 6771*i*.
soil management and, 9323*k*.
soil microflora and, 6350*b*.
South Carolina expt. station reports on,

spruce, expts., 3955*d*.
starfish as, 1892*a*.
sugar-beet, expts., 5142*ei*, 9326*bc*, 9503*c*.
sugar-beet, expts. with chlorides and sulfates, 5142*i*, 6350*i*.
sugar-beet quality and, 4411*f*.
sugar-cane, expts., 1136*h*, 9325*i*, 9326*c*.
sweet-potato, expts., 8082*d*.
for tobacco, 7624*e*.
tobacco and extd. residues as, 2373*b*.
tobacco, expts. with N, 2351*h*.
tomato, effect on mites, 5892*d*.
tomato, expts., 9322*ab*.
trace or minor elements as—see *Elements; Nutrition, plant;* and the individual elements, as *Copper; Manganese; Zinc*.
tung-tree, expts., 9324*f*.
two-spotted spider mite reproduction rate and, 6349*i*.
from urea, P 5524*d*.
urea as foliar, for peaches, 8594*i*.
from *Urginea maritima* fermentation by products, 5092*e*.
vegetable, expts., 1134*d*, 8083*h*.
water detn. in, 9325*g*.
weed-control, P 1904*f*.
wheat, expts., 8084*c*.
wheat nutritive value and, 5524*a*.
wheat take-all disease and, 9323*d*.
from wine residues and vine shoots, 6360*i*.
wood ash of Northern Rhodesia as, 337*g*.

**Fertilizin**, and its effect in sperm agglutination, 4390*a*.
from sea-urchin eggs, effect on blood coagulation and effect of basic proteins and cephalin thereon, 4390*f*.
of sea-urchin eggs, effect on coagulation compared with heparin, 4391*a*.

**Ferulaldehyde** (*4-hydroxy-3 methoxycinnamaldehyde*), color reactions of, 1181*i*.
in wood and lignin prepns., and 2,4-dinitrophenylhydrazone, 4461*g*.

**Ferulic acid** (*4-hydroxy-3-methoxycinnamic acid*), as lignin model, 4848*d*.
pigment precursors in tomato juice, 8459*c*.
in urine of pregnant mares, 2685*i*.

——, **α,β-dihydro-**. See *Hydroferulic acid*.

**Fescue**. See *Grasses*.

**Fesogenin**, and diacetate, 655*c*.

**Festuca**. See "fescue" under *Grasses*.

**Fetus**. See *Embryos*.

**Fever**. (See also *Antipyretics*.)

theory of, divergencies in, 5277*c*.
theory of, elimination of infinities in quantized, 6903*h*.

**Figs**, carotene and vitamin C in, 3536*a*.
juice, clarification of protein-contg. solns. by, 6749*a*.
juice, tenderizing meat with, P 1502*d*.
latex of, protease activators in, 9287*i*.
maturation of Calimyrna, effect of growth regulator on, 5893*c*.
maturation of Calimyrna, effect of hormones on, 2726*f*.
milk-coagulating enzyme of, 1119*c*.
parthenocarpy in, growth substances in induction of, 2287*i*.
vitamin $B_1$ in, 6753*i*.
vitamin C in, 5511*c*.

**Filaments**. (See also *Cathodes; Electrodes; Fibers; Threads*.)
boron-coated Mo and W, 6133*i*.
coating of, with metals, P 104*c*.
coatings for, chemically resistant, P 4284*h*.
dynamic properties of, at sonic frequencies, 4016*d*.
glass—see *Glass*.
nickel, P 5318*c*.
of polyacrylic acid, effect of ionization on, 8812*f*.
Portevin-Le Chatelier phenomenon in steel, 7883*a*.
rayon—see *Rayon*.
of silver, electrodeposition of, 953*b*, 7356*g*.
surface-active agents for manuf. of, P 9496*f*.
thoriated W, activity of, bombarded by alkali-metal ions, 7323*c*.
titanium nitride formation on hot, 2885*f*.
tungsten recovery from lamp, 6556*a*.
tungsten, reducing brittleness of carburized, P 102*b*.

**Filariasis**, cyanine dyes in treatment of, 2334*g*, 3930*b*.
ethyl 4-methyl-1-piperazinecarboxylate and its salts in treatment of, P 6671*f*.
hetrazan effect on, 1490*f*, 8540*e*.
1-piperazinecarboxamides in treatment of, P 6245*a*.

**Filberts**. See *Hazel*.

**Filling apparatus**. No entries this year. See *Feeding apparatus; Funnels*.

**Filling materials**. (See also *Caulking compositions; Impregnating materials; Molded products; Packing materials; Plastic materials; Putty; Rubber; Upholstery*.)
from bituminous-oil-distillate base and synthetic resins, P [illegible]
castor materials for, P [illegible]
for cellular rubber, $SiO_2$ aerogels as, [illegible]
cement contg. micro-, 1987*i*.

for cement, limestone as, 2751*f*.
for cracks, 7659*c*.
for engraving, paint-type, 5200*k*.
for GR-S rubber, effect on elasticity, 4045*c*.
for GR-S rubber, peat as, 2801*f*.
for joints from rubber-contg. bitumen, 4443*c*.
for joints in concrete masonry, P 5633*d*.
for lubricating greases, 8660*b*.
in lubricating greases, effect on wear of antifriction bearings, 7675*f*.
mixing slurry of, with bituminous material, P 2754*a*.
paper—see *Paper*.
for phenolic moldings, extractives in water-absorption test, 7261*e*.
for plastics from agricultural residues, 6862*d*.
for plastics, microscopy of, 2027*i*.
for polythene, $CaCO_3$ as, P 4897*g*.
for putty, wallboard or phonograph records from waste slate, 1939*b*.
for roads—see *Roads*.
from rubber and solvents, P 6859*a*.
for rubber, etc., C black-coated inorg. particles, P 7745*b*.
silica-aerogel, for life jackets, P 1506*a*.
for soap—see *Soap*.
for urea-HCHO condensation products, lignocellulose as, P 6865*e*.
for vinyl chloride polymers, hydrocarbon oil as, P 2818*a*.

**Film balances**. See *Balances*.

**Films**. (See also *Adsorbed substances; Coating(s); Sheet materials; Spreading; Surface; Wrapping materials;* and "sputtering" under *Cathodes*.)
from acrolein acetal polymers, P 5636*a*.

cleaning compns. for sand or stone beds of, P 3640*c*.
continuous, P 2824*a*.
corrugated, of metal powder, P 4056*i*.
for cottonseed oil, etc., P 2824*a*.
crucible, Gooch, as amalgam container in Cu detn. by electrolysis, 7863*i*.
crucible, stainless-steel, penetration by surface-active agents, 8791*d*.
with diatomaceous earth as filtering aid, P 2048*b*.
diatomite, with air-bump wash, P 6009*g*.
disk, P 6*g*.
disk, continuous-sectional, P 4056*i*.
drum, app. for feeding, P 4906*g*.
for dry-cleaning fluids, P 8757*f*.
for dust—see also *Dust*.
for dust and fog, 2041*g*.
for dust and smoke, 1*f*.
for dust, proportional-alpha counter for, 4521*i*.
elec.—see *Electric filters*.
for flue dust, P 6009*i*.
for formaldehyde removal from exhaust gases, 1547*i*.
frameless, P 4906*g*.
funnels—see *Funnels*.
for gas (natural), 5571*g*.
for generator gases, etc., P 2476*f*.
glass-fiber, P 3987*d*.
glass (sintered-), 8625*h*.
for iron removal from molten Sn, P 554*d*.
light—see *Light; Light, infrared; Light, ultraviolet; Polarization (of rays or waves.)*
for lubricating oils, cycle washing of spent percolation, with naphtha, 7218*b*.
in engines, P 4458*e*.
Fe detn. in, 6939*a*.
for milk before pasteurization, P 329*i*.
for nicotine, 9383*a*.
for oil, P 2048*b*.
by powder metallurgy, P 913*g*, P 5565*h*.
presses, P 6009*i*.
continuous, P 4906*h*, P 8758*a*.
for vegetable juice extn., etc., P 3541*c*.
vertical, P 3249*e*.
radial-fin-type, P 4056*h*.
for radioactive-tracer expts., 8746*b*.
rapid-sand, construction and operation of, 791*a*.
respirator—see *Respirators*.
for rock-salt solns., P 6378*f*.
rotary-drum, P 6*e*, P 913*g*, P 7273*d*.
blower for, 8213*e*.
scraper for, P 8759*a*.
Rupp-Frantz vibrating, 3665*b*.
sand, 909*d*.
self-cleaning, P 2476*d*.
self-cleaning, back-flow, P 7760*c*.
for sewage—see *Sewage*.
stainless-steel powder, P 3341*a*.
stainless-steel wire cloth, P 2476*e*.
streamline, 4541*e*.
suction, adapter for, 8213*c*.
for sugar manuf.—see *Sugar manufacture*.
suspension-using, P 6*h*.
trickling, for clarification systems, P 4406*h*.
trickling, vitrified-clay block for, standards for, 4785*i*.
ultra-, and dialyzer as artificial kidney, 8424*g*.
for viscose, 4010*a*, P 6873*g*, P 7228*i*.
for viscose, etc., P 913*e*.
for water purification—see *Water, purification of*.
of wire screen and zig-zag folded material, P 8758*a*.
for x-rays—see *X-rays*.
for zinc sulfate purification with Zn dust, P 8757*h*.

**Filtrate factor.** See "$B_1$ complex" under *Vitamins*.

**Filtration,** of air, oil, etc., 8745*h*.
of clay suspensions, app. for detg. rate of, 3665*d*.
of dust—see *Dust*.
effect in solns., 8213*d*.
enzymes—see under *Enzymes*.
history of, 1619*d*.
irregularities during, colloid flow and, 4541*c*.
at low temps., 3665*h*.
of lubricants—see *Lubricants*.
review on, 1227*h*.
of sewage—see *Sewage*.
of solute from solvent and its role in geology, 6124*b*.
in sugar manuf.—see *Sugar manufacture*.
suspension use in, P 6*h*.
vacuum, 8745*i*.
in water purification—see *Water, purification of*.

**Filtration effect,** the term, 6124*a*.

**Filtrol,** catalysts for cracking, pore size-surface area distribution of, 3180*g*.
catalytic activity for cracking of petroleum and crystal structure of, 1554*e*.
super, catalyst in synthesis gas manuf. from hydrocarbons, P 7213*b*.
zirconia catalyst diln. with, in decreasing losses in cracking of hydrocarbon oils, P 8665*g*.

**Fineness,** of particles—see "size of" under *Particles*.

**Fine-structure constant,** exptl. value of, 3279*c*.
in interaction in solids, 4916*a*.

**Finger and toe disease.** See *Clubroot*.

**Finger grass.** See *Grasses*.

**Fingernails.** See *Nails (finger and toe)*.

**Fingerprints,** developing of, Hg poisoning from, 9258*f*.

**Finishes.** See *Coating(s); Lacquers; Leather; Paint; Textiles; Varnish; Wood*.

**Fir.** (See also *Wood*.)
bark exts. of, tanning substance detn. in, P 3224*c*.
copper and Zn in twigs and wood of *Abies amabilis* in geochemistry, 3321*f*.
Douglas—see *Douglas fir*.
tar from stumps of, polycyclic hydrocarbons in lubricating oil from, 3182*f*.

**Fire boxes,** flow in locomotive, 6871*b*.

**Firebricks.** See *Bricks*.

**Fireclays.** See *Clays*.

**Firedamp.** (See also *Methane*.)
explosives proofed against, by inert salts, 3190*e*.

**Fireflies,** bioluminescence of, adenosine triphosphate in, 9101*f*.
light organ of, anatomy and physiology of, 4388*g*.

**Fire point,** detn. of, 382*e*.
detn. of, of drying oils, 5975*b*.
detn. of, of fats and oils, 6839*a*.

**Fireproofing,** agents for, P 4292*g*, 9298*a*.
agents for, bis(tetrachloropropoxy)methane and tetrachloropropanol, P 3835*i*.
from chlorinated paraffin wax, urea-HCHO condensation product, etc., P 3655*c*.
from Cl-contg. resin and ZnO or Zn(OH)$_2$, P 5232*h*.
from ethylene glycol tetrachlorophthalate, P 3655*a*.
hexahalo derivs. of 4,7-methanoindene, P 5797*c*.
octachlorobiphenylquinone, P 814*b*.
polyhydric. alc. reaction products with sulfates, P 4870*c*.
Si compds. as, P 8211*e*.
Th salts of org. acids as, P 3457*b*.
of cellulose, aminoplast resin powder mixts. with chlorinated org. compds. for, P 3210*a*.
of cellulose and textiles with $Sb_2O_3$, P 3210*c*.
coatings for, 4492*i*, P 6763*g*, P 6764*a*, 8177*b*.
of fabric-covered aircraft, 8074*g*.
from modified Si esters and a cellulose ester or ether, P 1050*b*.
of fibrous materials with melamine pyrophosphate, P 4022*i*.
of fibrous materials with polyamine hydrohalides, P 4024*c*.
of rubber, P 895*a*.
testing of, 8638*c*.
of textiles, phosphonic acid esters for, P 7600*b*.
with polyethylenimine and phosphoric ester derivs. of dipentaerythritol, P 5604*b*.
with $Na_2WO_4$ insolubilized by cyanamide-HCHO resin, P 3210*a*.
of textiles soaked in polyethylenimine solns. with pentaerythritol tetraphosphate, P 6428*h*.
of textiles, wood, etc., P 8138*c*.
with water glass mixt. with sea water, P 6764*c*.
of wood, P 6764*c*, P 7188*e*.
F compds. in, 8603*g*.
insecticidal value of Flamm Schutz Albert and Intravan N for, 5895*a*.
report on, 6351*i*.

**Fire-resistant materials.** (See also *Refractory materials; Solvents.*)
amylamine-tetrachlorophthalic anhydride reaction products with $PhNH_2$, P 2004*b*.
asphalt roofing, P 1940*e*.
barns, 9313*d*.
from bitumens, etc., P 334*c*.
for building—see *Building materials*.
chlorinated wax-polystyrene compns., P 5626*a*.
linoleum, P 3216*e*.
paper, P 9448*d*.
paperboard, P 7230*b*.
paper treated with sulfamic acid as, 8136*h*.
silicate cooking vessels, improvement of, P 5166*f*.
tests for, 4786*i*.
textiles impregnated with chlorinated paraffin and laminated with cellulose acetate soln., P 2443*c*.
trichloroethyl methacrylate polymer, P 4895*d*.
for wood, etc., P 1126*g*.
for wood, permanence of, 2712*c*.
wool (charred) and wool-asbestos unions as, 1192*i*.

**Fires.** (See also *Incendiary devices;* and "incendiary" under *Bombs*.)
book: Chemistry in Relation to Fire Risk and Fire Extinction, 1570*b*.
in copper mines, 1568*i*.
extinguishing, agents for, decafluorocyclopentane as, P 3844*c*.
in $C_6H_5$, foam in, 5189*d*.
with $CH_2ClBr$, and toxicity of products therefrom, 1983*a*.
with $CO_2$ and foam systems, 1984*a*.

herbicide effect on, 1139*b*.
irrigation of, 2286*f*.
middle lamella of fiber of, analyses of, and extn. to promote wet-spinning of unretted flax, 7690*i*.
middle lamella of fibers from, compn. and tensile strength of, 4016*g*.
pectins and treatments of, 2778*e*.
processing equipment for fiber, in U.S., 7690*i*.
retting of, bacteria in, and in liquor purification, 1985*c*.
retting of, with aeration of liquors, 2438*i*.
shives, adhesive extender from, 8738*a*.
spinning of, 7232*i*.
tendering in, distinguishing types of, 8686*f*.
wilting coeff. of, 4801*f*.
x-ray scattering by, 2091*f*, 4460*i*.

**Flax bollworm**. See *Heliothis ononis*.

**Flaxedil**. See "[*p*-phenenyltris(oxyethylene)]tris[triethyl— iodide] under *Ammonium compounds, substituted*.

**Flaxseed**, disinfection of, 1138*c*, 7179*b*.
feeds from, 3539*a*.
heating and deterioration in, effect of ethylene chlorohydrin and related compds. on, 4733*h*.
mucilage of, submicroscopic structure of, 4881*g*.
water detn. in, 8708*c*.

**Flaxseed meal**. See *Linseed meal*.

**Flaxseed oil**. See *Linseed oil*.

**Flea beetles**, control of, bis(2-hydroxy-3-nitro-5-chlorophenyl) sulfide for, P 1901*f*.
control with DDT, 9318*e*.

**Fleas**, control in clothing, agents for, 9349*c*.
control of, agents for, 6356*h*.
control of murine-typhus and plague, 3556*a*.
control on rodents, 7186*b*.
repellents for, P 4421*b*.

**Fleece worms**. See *Lucilia*.

**Fleming, John Ambrose**, biography, 915*f*.

**Flesh**. See *Meat*.

**Flexibility**, measurement of, of plasticized polyvinyl chloride, 2465*e*, 5628*e*.

**Flexible materials**, with wrinkle-textured coating, P 2790*c*.

**Fleximer**, materials for building industry, 7208*d*.

**Flies**. (*Entries referring to specific kinds of flies, with the exception of the housefly (Musca domestica), have been put under the common and scientific names.*)
alc. effect on, synergism in, 5525*g*.
biting, repellents and toxicants for, 7181*d*.
control of, aerosol-particle size and, 6777*f*.
agents for, 6356*h*, P 7634*g*, P 9358*b*.
agents for, and their toxicities to man, 8601*d*.
alkyldinitriles for, P 8604*g*.
with 2-alkyl-4-hydroxy-3-methyl-2-cyclopenten-1-ones, 5752*a*.
app. for, 5894*h*.
with aromatic unsatd. carbonyl compds. and pyrethrum, P 4420*g*.
arylidene-alicyclic ketone-pyrethrum compns. for, P 4420*i*.
2,2 - bis(*p* - methylthiophenyl) - 1,1,1-trichloroethane for, P 7187*f*.
in buildings, hexachlorocyclohexane in, 9341*i*.
chloralimine compns. for, P 5154*c*.
chlordan, DDT, hexachlorocyclohexane and methoxy analog of DDT in, 7629*d*.
chlorinated org. compds. in, 1518*g*.
compns. from ester of ether-dicarboxylic acids and, P 5152*g*.
DDT in, 1519*cfg*, 2728*a*, 6355*c*.
DDT-residue toxicity on surfaces in, 9344*g*.
DDT-sabadilla mixts. in, 7629*a*.
*tert* - diacylamine compns. for, P 4421*b*.
diaryl disulfide for, P 9358*d*.
3,4 - dichloro - 1 - (1 - chloro - 2,2,2,-trichloroethyl)-benzene, P 7188*c*.
effect of dispersing and spreading agents on toxicity of DDT spray powders in, 8087*h*.
effect of moisture and temp. on residual effectiveness of DDT in, 7628*i*.
effect of sun on toxicity of DDT deposits in, 5895*e*.
on farms, effect of chlorinated chem. residues, sanitation and weather on, 5895*f*.
halogenated-unsatd. compds. for, P 5899*a*.
insecticide residues in, 9345*c*.
α-methylbenzylidenemalononitrile, P 3461*b*.
methylenedioxyphenyl derivs. as synergists for pyrethrins in, 3555*b*.
(3,4 - methylenedioxyphenyl)propylene compds. for, P 1903*d*.
piperonyl chrysanthemumate for, P 2732*h*.
pyrethrin in, 2363*a*.
R. B. 1018 in, 4806*b*.
sesamin exts. for pyrethrins for, P 5151*b*.
in sewage with hexachloroethane, 5526*f*.
smokes of DDT or hexachlorocyclohexane in, 9342*c*.
supplements for DDT-pyrethrum formula for, 7184*a*.
testing DDT compns. in, 9342*f*.
testing larvicides for, 8602*d*.
tetrachloroethyl ethers of phenols for, P 7638*b*.
ω-thiocyanoalkyl ester compns. for, P 5153*c*.
control of larva of, 3555*h*.
DDT action on, 2359*a*, 3964*h*.
in DDT detection in milk, 6356*c*.
DDT-resistant, 6355*bc*.
control of, 8600*d*, 9344*i*.
effect of Gammaesan and Octa-Klor on, 3965*e*, 6355*a*.
effect of piperonyl butoxide, piperonyl cyclonene and pyrethrum applied to selected parts of, 8602*i*.
insecticide testing on, 7627*a*.
repellents for livestock, 8603*h*.

toxicity to, of azobenzene and related compds., 2727*b*.
of 2,2-bis(*p*-bromophenyl)-1,1,1-trichloroethane and 2,2-bis(*p*-bromophenyl) - 1,1,1 - trichloroethane, DDT and pyrethrins, 5147*e*.
of DDT and related compds., 7628*f*.
of DDT residues, 808*g*.
of *Derris* and *Lonchocarpus*, 5150*b*.
of org.-compds., chem. constitution and, 7625*i*.
of residues of DDT analogs and related chlorinated hydrocarbons, 6354*g*.

**Flint.** See *Quartz*.

**Floats**, oil removal from, P 3949*e*.

**Flocculation.** (See also *Agglutination;* and "coagulation of" under *Colloids*.)
of bitumens by liquids of low surface tension, 6816*i*.
of cellulose fiber suspensions, 1181*f*.
interfacial tensions of blood serum in relation to, 1823*d*.
optical d. during colloidal, 2070*i*.
of silver iodide, 8236*b*.
in water purification—see *Water, purification of*.

**Flocculation reactions**, cadmium reaction for blood-serum lability, 9225*d*.
cephalin-cholesterol and thymol, in catatonia, 3925*a*.
cholesterol-desoxycholic acid as, of liver dysfunction, 9225*b*.
in tuberculosis, 3517*f*.

**Floor polish.** See *Polishing materials*.

**Floors**, abrasion and corrosion of, in tanneries, 1589*f*.
cleaning compositions for—see *Cleaning compositions*.
concrete, chlorinated rubber coatings for, 1198*d*.
corrosion-resistance tests on, 2752*e*.
Pliolite S-5 enamel paint for, 5606*f*.
coverings for—see also *Carpets; Rugs*.
coverings for, P 2040*d*.
alkali-resistant, from phenol-modified coumarone-indene resin and cellulose ether, 2448*i*.
from chlorinated polythene, P 5642*i*. P 9534*be*.
leather waste-vinyl acetate plastic for, P 4506*b*.
tall oil-cellulose ether compn. as binder in, P 2436*a*.
waterproofed felt for, P 7720*f*.
driers for, 9480*h*.
linoleum for—see *Linoleum*.
linoleum substitutes for—see *Linoleum substitutes*.
mildew control on, amine salts for, P 6357*h*.
pigment (Fe-oxide) uses in, 5201*c*, 8697*d*.
rubber-cellulose ether molding powder for, P 2803*d*.
tiles for—see *Tiles*.

**Floor varnish.** See *Varnish*.

**Floor wax.** See *Waxes*.

**Floricin**, in lubricants, effect on elec. contact resistance between piston ring and cylinder wall, 8658*i*.

**Floriculture.** See *Flowers*.

**Florida earth.** See *Fuller's earth*.

**Florida red scale.** See *Chrysomphalus aonidum*.

**Floridose**, sodium mannoglycerate in, 8014*g*.

**Floridin.** See *Fuller's earth*.

**Floss**, milkweed, 9296*i*.

**Flotation.** (See also *Ores, treatment of; Separation; Separators;* and the specific ores, as *Copper ores*.) P 4057*d*.
agents for, aromatic alcs., P 4624*d*.
brine mixts. with fatty acid-amine salts, P 5519*d*.
citronella oil, P 3249*h*.
esters of (hydroxyalkoxy) compds., P 6663*g*.
of nonsulfide minerals, P 5725*d*.
of apatite and ilmenite, P 4624*b*.
of apatite from Ti minerals, P 5727*d*.
app. for, 7387*i*.
in lab., 4609*i*.
rotary, 3325*a*.
for sepn. of coke and cinder, P 1172*b*.
of arsenopyrite and pyrite, thiocyanates in, 979*e*.
of barite or $BaSO_4$, 2134*b*, 4611*b*, P 6402*g*.
of beryl, 3322*g*.
of beryl-mica ores, 4609*b*.
of bone particles from bone meal, P 1124*i*.
bubble formation in, 3325*f*.
of cellulose regenerating baths, clarification by, P 4014*c*.
of cement raw materials, 1546*e*.
conditioning for, P 5726*d*.
of copper, Au and Ag, effect of O on, 7875*f*.
of cryolite, 2379*d*.
of diaspore, 7655*h*.
of dolomite and magnesite, P 3160*f*.
of endellite, 3751*e*.
of fibers, 6420*i*.
with fluidized materials, P 8218*h*.
of fluorite, 6952*i*.
gas adsorption and, 3325*c*.
of glass sand, 7653*c*.
of graphite, 1924*d*, 2379*b*, 6125*h*, 6373*f*, P 7204*b*.
hydrogen-ion concn. and, 1227*i*.
hydrophobism of sulfide minerals in, 7875*e*.
lecture demonstration on, 8762*b*.
of limestone, 1938*e*.
of lubricating oils to remove metal particles, P 5183*c*.
of magnesium carbonate from $CaCO_3$, P 3984*g*.
of minerals, effect of gas liberated from soln. on, 3*g*.
mineral-surface pretreatment for, 6131*g*.
in pea cleaning, 9280*d*.
of phosphate minerals, 802*b*, 2378*i*, P 3160*cd*, P 3986*b*.
of quartz, 6953*i*.
radioactive tracers in study of, 8321*i*.
review on, 1227*h*.
of sheelite and sulfides, P 9018*b*.
of scheelite from cassiterite and heavy metal sulfides, 2139*i*.
sepn. factors in, 465*d*.
of sericite, 1503*e*.
of smithsonite, P 9018*c*.
of sphalerite, P 9018*c*.
of spodumene, 6546*a*.
of sulfur ore, 2379*c*.
surface-active substances in, 1707*g*.
theory of, Russian work on, 2140*h*.

**Flour.** (*Wheat flour is meant unless otherwise stated; see also* Baking; Corn flour; Dough; Meal; Oat flour; Rye flour.)
addn. of cereals, legumes and potato products to, 4393*a*.
adhesive from, P 4899*b*.
analysis of, 7153*f*, 8505*h*.
arsenic detn. in, 1118*d*.
ash and cellulose of, effect of *Tribolium confusum* on, 2335*i*.
bags for, insect-proofing of, 7186*c*.
baking properties and viscosity of, for cookies and crackers, 8566*e*.
baking qualities of, vitamin $B_1$ effect on, 6325*d*.
baking quality or strength of, diastatic activity and, 325*f*.
barley detn. in, 9277*c*.
beet addn. to, in bread manuf., 4392*i*.
benzoic acid detn. in, 9277*g*.
bleaching of, $Bz_2O_2$ compn. for, P 2710*d*.
broad-bean flour as addn. agent for, 4393*a*.
chlorine dioxide-treated, feeding tests with, 5101*g*.
definitions and standards for, and related products, 1495*d*.
dehydroacetic acid as disinfectant for, P 6758*b*.
detn. of cold-water-absorptive capacity of pregelatinized, 325*b*.
diastatic activity of, 7596*d*.
Dyox application to, 6325*e*.
enrichment with Chinese-tallow-nut flour, 785*a*.
extensograms of, effect of mixing, NaCl and consistency on, 4780*i*.
extn. degree of, ash content and, 777*i*, 7596*c*.
extn. degree of, detn. of, 9277*a*.
as flavor carrier for synthetic species, P 787*c*.
from flaxseed meal for adhesive manuf., P 9536*a*.
of France, British milling standards for, 777*d*.
grinding effect on, 6325*d*.
hairy-spider-beetle control in bags of, 2729*b*.
heat of hydration and specific heat of, 4391*h*.
improvement of, P 5130*g*.
for loaf vol.—see *Bread*.
manuf. and enrichment of, 7153*f*.
maturing agents for, 8565*i*.
millet, lipases in, 4709*a*.
milling procedures for, effect on chem., phys. and baking properties, 2707*d*.
mite-infested, effect on water content of sound flour, 2707*b*.
mixts. with baking powder, app. for detn. of $CO_2$ in, 3531*i*.
mixt. with nonfat milk solids, measurement of absorption of water by, 2336*h*.
mixt. with sucrose and wheat germ, food from, 777*f*.
moisture detn. in, 3532*g*.
nitrogen chloride treated, biol. effects of, 3499*a*.
convulsant action of, effect of $CO_2$ on, 3106*d*.
effect on animals and humans, 3532*i*.
effect on dogs, 2707*g*, 9233*i*.
physiol. action of, 1843*b*.
oxidation and reduction of, mechanism of, 2707*f*.
palm, of *Guilielma speciosa*, 3116*d*.
peanut and wheat, in diet, effect on hemoglobin and plasma-protein production, 3500*e*.
pentosan detn. in, and their relation to mineral matter, 4781*c*.
phosphate detn. in, 9277*f*.
phosphorus in, 5508*g*.
potassium bromate-starch mixts. for bleaching and maturing of, and explosibility of, 7230*f*.
protease detn. in, 9277*i*.
protein detn. in, 325*c*.
proteins of, hydrotropic action of urea on, 7595*e*.
quality detn. of, 7596*b*.
self-rising, $CO_2$ detn. in, app. for, 7153*h*
soybean—see *Soybean flour*.
sulfur dioxide in treatment of, P 786*e*.
tryptophan detn. in, 7153*e*.
vitamin $B_1$ detn. in, 2336*a*.
vitamins $B_1$ and $B_2$ in, 5508*f*.
water detn. in, 8971*b*.
wood compn. contg., P 1188*d*.

**Flour beetles**, control with MeBr, 1900*g*

**Flour substitutes**, of Morocco, 4391*g*.

**Flow.** (See also *Circulation; Fluidity, Thixotropy; Viscosity;* and "creep" under *Metals* and *Steel*.)
of adjacent disperse masses having properties of viscous-plastic body, 7271*e*.
of adsorbed mols., 6883*d*.
of air through small orifices, 8751*g*.
anisotropic plastic, 4614*d*.
app. for high-pressure treatment of gases or liquids, 2473*b*.
of asphaltic emulsions, 2420*d*.
through beds, 4906*d*.

**Flowers.** (See also *Buds; Pigments, plant.*)
anthesis in tomato, nutrient-element balance and time of, 9322*b*.
anthocyanins in Australian, 3068*e*.
aromatic principle extn. from, P 9391*a*.
auxin effect on initiation of, 5456*b*.
color of, pH of plant juice and ash content of flowers in relation to, 8450*ac*.
compn. of mango, 3070*i*.
2,4-dithiobiuret effect on, 2678*i*.
ethylene production by infected, effect on healthy flowers, 8458*e*.
formation of, by cotton, effect of mineral diet on, 3492*c*.
delay by 3-indoleacetic acid, 2357*i*.
by fruit trees near gas-producing boreholes, 5830*a*.
growth cycle metabolism in relation to, 9175*h*.
by tomatoes, effect of naphthaleneacetic acid on, 3494*f*.
in *Xanthium*, 729*i*.
in *Xanthium*, effect of auxin, 2,4-dichloroanisole and triiodobenzoic acid on, 6705*c*.
in *Xanthium*, effect of 2,4-dichloroanisole and triiodobenzoic acid on, 6705*d*.
-forming substances, 1083*h*.
hesperidin and neohesperidin in seed vessels and stigmas of orange, 6328*b*.
insect enemies of, 3554*h*.
keeping quality of cut, improvement of, P 4792*f*.
of Kentucky bluegrass, effect of photoperiodism and temp. on, 2287*h*.
morphology and biology of *Datura*, 5544*f*.
opening of orange, fruiting in relation to, 8020*b*.
poisoning (self-) of cut, 8458*g*.
preservation of, P 3950*g*.
sodium α-naphthylacetate effect on life of cut, 5092*b*.
stigmas of, germination-promoting substance from, 5089*f*.

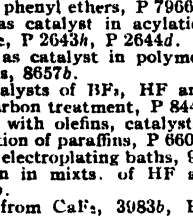
**Flowmeters.** See *Meters*.

**Flue dust.** (See also *Cement, hydraulic or structural; Precipitation, electric.*)
filter for, P 6009*i*.
lead oxide detn. in, 2121*c*.
nodulizing Fe, in rotary kiln, 7391*g*, 7878*h*.
use in cement, P 8116*h*.

**Flue gases.** (See also *Fumes; Precipitation, electric; Smoke.*)
analysis of, 9415*d*.
in automatic combustion control, 2403*g*.
from petroleum refineries, mass spectrometer in, 7673*b*.
for S and $SO_2$, 4601*d*.
boiler deposits from, 6808*b*.
carbon dioxide detn. in, P 914*h*.
carbon dioxide recovery from, P 8121*d*, P 8758*e*.
catalyst loss in, in fluid-catalytic cracking units, recorder for, 7217*e*.
cooling of, in regenerating catalysts from conversion of hydrocarbons, P 1956*c*.
corrosion by, and its prevention, 100*a*.
corrosion by, of water heater, 4622*a*.
cyclone for, P 7273*e*.
Dry Ice from, 9296*g*.
dust removal from—see *Flue dust*.
oxygen detn. in, P 4836*i*.
app. for, P 380*h*.
of cement kiln, app. for, 8115*h*.
from rotary kilns, 8116*f*.
precipitation of ashes, dust and soot from, P 5573*f*.
sulfur content of, effect on corrosion of boiler heating surfaces, 6808*e*.
sulfur dioxide recovery from, 368*h*.
sulfur dioxide removal from, P 7201*g*.
sulfur trioxide detn. in, 65*b*.
water detn. in, 8119*i*.

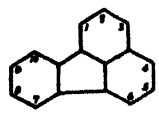
**Flues,** corrosion protection of, 100*d*.

**Fluid crystals.** See *Liquid crystals*.



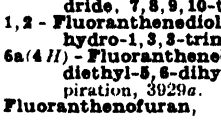
**Fluidextracts.** (See also such headings as *Cinchona; Hydrastis; Ipecac.*)
identification of, 1908*b*, 3145*h*.
thromboplastic action of, 5533*h*.

**Fluidity.** (See also *Flow; Viscosity.*)
of coal, combustion properties and, 5170*e*, 6392*a*.
elec. cond. and, of silicate melts, 4937*b*.
measurement of, of bitumens, P 3590*h*.
of cellulose-fiber dispersions, 4787*e*.
of ceramic bodies, app. for, P 6386*h*.
of cotton cellulose in cuprammonium soln., 7692*i*.
super-, review on, 7765*b*.
super-, theory of, 4063*hi*, 4064*a*.

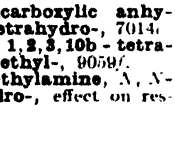


**Fluidization,** of anthracite coal, 6805*i*.
in calcite sepn. from EtOH, 7298*c*.
in coal gasification and catalytic processes, 9414*g*.
destructive distn. by, P 9426*i*.
flow in fluidized reaction systems, 4906*d*.
mechanism of, 6474*h*.
nomenclature and symbols for, 6474*g*.
in petroleum distn. from bituminous sand, 9421*d*.
pilot plants for, 1613*e*.
review on, 4906*d*, 9656*f*.
in zinc manuf., P 7892*i*.

**Fluidized solids,** catalysts, 8830*f*.
catalysts, history of, 8074*d*.
catalysts, regeneration of, P 9300*b*.
characteristics of systems of, 6805*g*.
in coal-gas purification, 3172*d*.
contact with fluids, P 8218*f*.
copper oxide, reaction with $CH_4$, 7199*h*.
flow in conduits, 6745*h*.
flow through beds of, 6475*f*.
gas drying by, P 7274*e*.
heat removal from beds of, P 6478*a*.
heat transfer by beds of, 6474*i*, 8753*g*.
mass and momentum transfer in beds of, 6475*d*.
mixing of gas and solid in, 6475*i*.
properties of, 6474*g*.
reactions using, app. for effecting, P 6873*f*.



removal of dust and mists from air by beds of, 6475*a*.
systems with gases, mass transfer in, 5646*i*.
vapor flow through, pressure drop in, 6476*c*.
in vertical tubes, pressure drop in, 6476*a*.
**Fluids.** (See also *Body fluids; Gases; Liquids.*)
compressibility of, in wells, 446*h*.
contact with fluidized materials, P 8218*f*.
dynamics of, review on, 1227*h*.
flow of—see *Flow*.
kinetic theory of—see *Kinetic theory*.
mixing (laminar) of compressible, 3667*b*.
**Flukes.** No entries this year. See *Fasciola; Liver flukes; Schistosomes; Snails*.
**Fluoaluminates.** (See also *Alkali metal fluoaluminates.*)
structures of, 960*c*.
**Fluoborates,** as catalysts, in reaction of ketene with carbonyl compds., P 1056*c*.
diazonium (heterocyclic), 5783*e*.
glass, P 5165*i*.
manuf. of, 3983*b*.
*p*-toluenediazonium, 7917*h*.
**Fluoboric acids,** as catalyst in acylation of alkyl phenyl ethers, P 7966*h*.
**$H_2BO_2F$,** as catalyst in acylation of thiophene, P 2643*h*, P 2644*d*.
**$H_3BO_2F_2$,** as catalyst in polymerization of olefins, 8657*b*.
**$HBF_4$,** catalysts of $BF_3$, HF and, for hydrocarbon treatment, P 844*d*.
compds. with olefins, catalysts for isomerization of paraffins, P 660*g*.
detn. in electroplating baths, 961*g*.
formation in mixts. of HF and $HBO_2$, 2494*b*.
manuf. from $CaF_2$, 3983*b*, P 4435*b*, P 6374*a*.
**Fluocolumbates(V),** of alkaloids, 5785*h*.
**Fluocuprates(II),** stability of, 4971*a*.
**Fluophosphates,** effect on brain function and metabolism, 7147*g*.
**Fluophosphoric acids,** alkyl esters, review on, 9027*i*.
as catalyst in acylation of alkyl phenyl ethers, P 7966*h*.
reaction products of $H_2PO_2F$ and $HPO_2F_2$ as catalysts in alkylation of paraffins, P 5583*c*.
**$H_2PO_2F$,** esters, 121*c*.
esters, toxicity and miotic action of, [illegible]
**$HPF_6$,** salts with sterols, 7494*a*.
**Fluoran,**



laxative activity of, 2319*e*.
——, **3′,6′-dihydroxy-.** See *Fluorescein*.
——, **3′,4′,5′,6′-tetrahydroxy-.** See *Gallein*.
**3′,6′-Fluorandiol.** See *Fluorescein*.
**1-Fluoranthenamine,** and complex with 2,4,7-trinitro-9-fluorenone, 7014*f*.
**Fluoranthene,**

3401*g*.
compression and freezing under pressure, 4067*f*.
derivs., 9059*b*.
and derivs., 7014*bd*.
Friedel-Crafts reaction with, 7473*c*.
indexes of free valences of, 3252*c*.
mol. structure of, 4569*c*.
reaction (attempted) with maleic anhydride, 2199*g*.
——, **acetyl-.** See *Ketone, fluoranthenyl methyl*.
——, **benzoyl-.** See *Ketone, fluoranthenyl phenyl*.
——, **8,9-bis(ethylmercuri)-7,10-diphenyl-,** 2614*f*.

of U.S.S.R. (Lower Artinsk layers of Tartaria and Chuvashiya), 7381c.
use of, review on, 1920i.
of Utah (Blue Bell deposit) and its flotation, 6952h.
violet, from Kopaliny, Silesia, and Fe compds. in its coloring, 8313a.
of Washington, 6547d.

**Fluoro-.** (See also entries beginning *Fluo-*.)

**Fluorocarbons.** (See also "fluorinated" under *Hydrocarbons* and *Paraffins*.)
aromatic, P 3845c.
compression and freezing under pressure, 4007f.
lubricants contg.—see *Lubricants*.
manuf. of, 2876d, P 3834g.
mass. spectra of, 3288f.
polycyclic satd., P 4300f.
purification of, P 749b.
reviews on, 2157a, 5554i, 7407a.
sepn. from hydrocarbon reaction mixts., P 7035d.
solubility and solvent action of, 3266h
ultrasonic velocity in liquid, 1232e.
-vapor balance, 1225g.
verdet constants of, 2924g.

**Fluoro-DDT.** See *Ethane, 1,1,1-trichloro-2,2-bis(p-fluorophenyl)-*.

**Fluoroform**, magnetic susceptibility of, 6016i.
microwave investigations of, 4141f.

**Fluorogesarol.** See *Ethane, 1,1,1-trichloro-2,2-bis(p-fluorophenyl)-*.

**Fluorolube.** See "fluorocarbon" under *Lubricants*.

**Fluorometers**, Klett photoelec., 6472d.
for thiamine detn., 8215g.

**Fluorone.** See *3-Isoxanthone*.

**Fluoropicrin**, prepn. of, 6793f.

**Fluoroprene**, manuf. of, P 660h, P 2218e, P 7035f.,
manm. of, catalyst for, P 1932d.
polymerization of, or its mixts. with 1,3-dienes or vinyl compds., 1598g.
reaction with $C_2F_4$, 3370e.

**Fluoroscopy**, compn. for use in, P 3153g.

**Fluorosis**, bones in, 5854d.
book: 7592i.
dental—see *Teeth*.
endemic, in U.S.S.R., 8582i.
of farm animals from industrial processes, 3508h.
nutrition and, 8473h.
in rats, 6742a.

**Fluorspar.** See *Fluorite*.

**Fluorylamine.** See *Fluoreneamine*.

**Fluosilicates**, amine and diazonium, 6992b.
effect on *Trichoderma viride* on wood, 7623i.
luminescence of, activated by Ti, 3723b.
in wood fireproofing and preservation, 8803g.

**Fluosilicic acid** ($H_2SiF_6$), anabasine salt, prepn. and decompn. of, 2481e.
effect on dialysis of $Cb^{95}$, $La^{140}$ and $Zr^{95}$ in $UO_2(NO_3)_2$ soln., 7814c.
glass attack by, 2385f.
manuf. in Canada, 2343c.

**Fluostannates(IV)**, luminescence of, activated by Ti, 3723b.

**Fluosulfonic acid**, as catalyst in acylation of alkyl phenyl ethers, P 7966h.
hydrofluorination of olefins in presence of, P 3834i.
recovery of, and use in DDT manuf., P 2732g.

**Fluotungstic acids**, $aWO_3.bWO_3.cHF$, 1671e.

**Fluouranates**, 6102d.

**Flushing oils**, for engines, P 6406de.

for titaniferous Fe ores, P 6142h.
for welding—see *Welding*.

**Fly.** See *Flies*.

**Fly ash.** See *Ash(es)*.

**Foam.** (See also *Foam volume*.)
of beer—see *Beer*.
colorimeter for, P 6012b.
detergents fractionated by, surface tensions of, 3687e.
fibrin, 3054h, 5543a.
fire-extinguishing, alkyl Si-emulsified, P 9495a.
history of, and MeI as, 5952e.
stabilized compns. for producing, P 5594f.
system protecting solvent process plant for pine stumps, 8681g.
use of, 1984a.
use with $C_6H_5$, 5189d.
heptylic-acid, 2841h.
liquids forming, measurement of film strength of, P 6764f.
in lubricating systems, 6815f.
prevention or removal of, from mercerizing liquors, phosphoric acid esters in, P 9478a.
production and stability of, of liquid mixts., 7775g.
production of, agents for—see also *Lathering agents*
agents for, P 441efgh.
agents for, from licorice root ext., P 6846c.
agents for, in clarification of cellulose-regenerating baths, P 4014c.
alkyl benzene sulfonates for, P 9496d.
Al soaps for, P 2452f.
amide derivs. for, P 5978e.
amino propionate ester salts for, P 5978c.
analysis and prepn. of fatty acid chloride condensation products with peptides for, 3217f.
2,3 - bis(caproyloxy)propanesulfonic acid for, P 5217a.
1,2 - bis(2 - hydroxyethyl)hydrazine-glycidol reaction product for, P 2796d.
bubble size and, 456c.
caprylate caprate of 2,3-dihydroxy-1-propanesulfonic acid for, P 4878f.
coconut fatty acid anilide condensation product with *N*-methylol chloroacetamide Na sulfonate for, P 886b.
by detergent in soap solns., effect of concn. on, 6435d.
on detergent solns., 8795g.
of fermented malt beverages, 8608f.
monocarboxyacylated hydrazine deriv. reaction products with saccharides for, P 9497g.
in oils in improving drying and degassing, P 3186c.
of proteins, 9098d.
by shaving prepns., 3977f.
by soap-synthetic detergent-electrolyte builder systems, 3635i.
Na salts of half esters of unsatd. dicarboxylic acids with *N*-hydroxyalkyl amides of fatty acids for, P 4500e.
*p* - stearoylaminobenzohydraside - glucose reaction product for, P 3639b.
fatty acids or their esters for, 4034e.
surface tension and viscosity in relation to, 8794f.
in textile industry, history of agents for, 4875i.

*production of*, vol. contraction of liquid mixts. and, 8779*c*.
in whipping foods, stearins in, 5971*h*.
of sea water, 2050*h*.
on sodium oleate solns., 8794*g*.
solid, transformation to fluid foam under shear, 6*c*.
stability in oils and effect of foam stabilizers on film viscosity, 6814*f*.
stabilization of, protein compn. for, 8075*h*.
syneresis of, 456*b*.

in alc. from sugar beets, 3141*e*.
1-alkoxyethyl esters, 3786*a*, 6576*e*.
allyl ester, polymerization of, P 8742*d*.
aluminum corrosion by, 5721*g*.
amyl and butyl esters, thermochors of, 8226*e*.
as antifreeze agent in polymerization of butadiene with styrene, 8728*d*.
arylazo derivs., reaction of Hg compds. with K salts of, 171*c*.
azeotrope with AcOH-$C_5H_5N$, P 2220*i*.
in blood, brain and urine in MeOH poisoning, 3869*h*.
in butane combustion, 3724*i*.
1-butoxyethyl ester, 7425*i*.
butyl ester, as azeotrope former for naphthenes, P 3670*d*.
butyl ester, in ethylene chlorohydrin recovery from aq. solns., P 2633*c*.
2-chloroallyl ester, polymers with butadiene, P 432*i*.
2-(*o*-chlorophenylhydrazide)†, 4260*c*.
chorion of *Rhodnius prolixus* penetration by, 5527*h*.
as citric acid substitute in Esbach soln., 6789*i*.
complex-ion formation with, in Al sulfate and chrome alum tanning solns., 9507*h*.
compds. (mol.) of, 7409*ac*.
compds. with antibiotics, P 1158*f*.
copper complex, stability of, 4971*a*.
crit. mixing temps. in identifying and detg. halogen derivs. of aliphatic hydrocarbons, 8309*a*.
cyclohexyl and cyclopentyl esters, phys. constants of, 2955*h*.
as dehydrating reagent in steroid differentiation, 7865*b*.
dehydration and dehydrogenation on catalysts, 6497*i*.
dehydrogenase of—see *Formic dehydrogenase*.
dehydrogenation on Cu-Pt alloys, 4088*c*.
dehydrogenation on Rh, effect of S on, 27*i*.
detection of, 5342*a*.
detn. of, 4807*i*.
in drugs, 7639*b*.
in mixts. of fatty acids, 8976*h*.
in mixts. with acetic, butyric and(or) propionic acids, 8977*a*.
in tan liquors, 1205*f*.
dicyclohexylamine salt, 3373*f*.
*p*,α-dimethylstyrene dimerization by, 7916*h*.
effect on elec. cond. of gelatin and nylon,
on protein fibers, 468*e*.
on silage prepn., 1879*c*.
on stability of supersatd. solns. of $KNO_3$, 8805*h*.
on stainless steel cooking utensils, 2707*a*.
erythrocyte penetration and hemolysis by, 8502*b*.
esters, 2576*i*, P 3027*g*.
with *N, N*-bis(2-hydroxyethyl)oleamide, P 4878*h*.
formation from CO and alcs., kinetics of, 3696*e*.
esters, with *N*-2-hydroxyethyloleamide, P 4878*g*.
with *N*-2-hydroxyethylstearamide, P 4878*h*.
with hydroxy steroids, 7941*e*.
lyoparachors of, 2834*b*.
parachors and thermochors of, 2923*f*.
phys. consts. of, 2590*d*.
with tertiary alcs., manuf. and decompn. of, P 1434*c*.
ethylene ester, P 7503*a*.
ethyl ester, condensation with Et homophthalate in prepn. of 1-oxo-2,1*H*-benzopyran-4-carboxylic acid, 1045*f*.
dilatational viscosity of, 5249*g*, 8780*a*.
effect on plants, 2677*b*.
in formylation of amines, 1336*a*.
reaction with AcOEt in presence of Na or NaOEt, 5745*a*.
reaction with 3-heptanone, 643*g*.
formaldehyde free of, anion exchange in manuf. of, 4632*e*.
formation of, in methanol poisoning, 7144*g*.
from reaction of hydroxyl radical with hydrocarbons, 6149*i*.
from sugars, 7730*i*.
by thermophilic cellulose-fermenting bacteria, 720*d*, 721*d*.
from tyrosine, 1746*a*.
as fungicide in fats and oils, 4413*d*.
gasoline treatment with, to lengthen catalyst life in alkylation of 2-methyl propane, P 3189*c*.
glass attack by, 2385*e*.
heat of wetting of activated charcoal by, 8835*f*.
hydrazide—see *Carbazaldehyde*.
hydrogenation of mesoxalic acid oxime esters and nitrosomalonic acid esters in the presence of, and its esters, P 3445*e*.
hydrogenlyase of—see *Formic dehydrogenase*.
identification of, as its 2-(1-naphthylmethyl)-2-thiopseudourea salt, 565*g*.
labeled with $C^{14}$, hypoxanthine formation from, in liver homogenates, 3869*c*.
in lubricant deterioration and deposit formation in motored engines, 4454*d*.
manuf. from its *tert*-Am ester, P 3026*h*.
metabolism of, in rabbits, dogs and men, 2317*efh*.
methyl ester, ammonolysis rate of, 6495*g*.
mixts. with alcs., osmosis of, 7300*g*.
with EtOH, soybean-protein denaturation with, 1604*b*.
with EtOH, soybean treatment with, 1604*c*.
with org. vapors, adsorption by active carbons, 16*g*.
as nutrient and energy source of *Bacterium formicum*, 7549*a*.
oxidation with Cl, kinetics of, 2495*i*.
penetration compd. with basic Cr sulfate, 8883*e*.
phenylhydrazide†, as insecticide, 5526*a*.
plastic materials from silicates and, P 6865*e*.
pyridine reaction with *p*-quinone in presence of, 5781*a*.
pyruvate synthesis by *Escherichia coli* in presence of adenosinetriphosphate and, 1830*a*.
reaction with cycloalkene with $H_2O_2$ in presence of, 2173*d*.
reaction of $H_2O_2$ with methylcyclopentenes in presence of, 2172*d*.
reaction with carboxylic acids in aldehyde manuf., P 5791*h*.
with diarylamines, 647*b*.
with 5,10-dihydrophenarsazine, 4675*f*.
with 2-methyl-3-butyn-2-ol, 3352*c*.
recovery from saccharification of cellulose, P 405*a*.
in saccharification of cellulose and wood, 395*e*.
serine and glycogen formation from glycine and, 3859*f*.
solubilities of $H_3BO_3$ and succinic acid in, 1241*h*.
sorption by anionites, 1238*c*.
spectra of, and its esters, 1656*c*.
spectrum of, 3724*g*.
steel soln. in, rate of, 540*a*.
systems of, refractive index of, 3678*f*.
systems with amines, 6066*b*.
2,4,5-trichlorophenyl ester, P 3459*h*.
2,4,5-trichlorophenyl ester, cottonseed treatment with, 8133*f*.
ultrasonic velocity in, 8786*c*.
uric acid synthesis from, 3501*g*.
and vinyl ester and its polymers, 567*e*.
vinyl ester, polymerization with ethylene glycol maleate, 439*a*.
in wattle bark tanning, 9510*c*.
yeast fermentation and respiration stimulation by, 5444*b*.

derivs., P 3627a, P 3848b.
spectrum of, in Na silicate soln., 2093g.

**Fuchsone** (*4-benzhydrylidene-2,5-cyclohexadien-1-one*). (For derivs. see also under *2,5-Cyclohexadien-1-one.*)
derivs., 5770h, 5771eh, 5772b, 8683dg, 9451b, P 9470c.
hydroxy derivs., dyes from, 5771eh, 5772b.
prepn. of, and its derivs. and hydrates, 8683g.
spectra and structure of, and its derivs., 9451c.

——, **hydroxy-***, and triacetate, 5772f.

**Fucose,** of blood group A substances, pptn. by anti-A, 2314d.
detn. in blood group substances, 4724a.
in egg jelly coat of various sea urchin species, 4389e.
L-, detn. and reducing power of, 7861c.
growth inhibition of *Eberthella typhosa* by, and its release by mutation, 8005i.
osazone (?), 1430d.

——, **2-desoxy-3-methyl-***, D-, identity of D-diginose and, 1727a.

**Fucoside, methyl 2,4-diacetyl-6-iodo-3-methyl-*,** α-D-, 4636d.

**Fucoxanthin,** in diatoms, 2281d.
in gametes of Fucaceae, 2677f.
from *Navicula* cultures, 3878g.
-protein complex, energy conversion by, 1834g.

**Fucus,** *evanescens,* utilization of fermentation products of, 1145i.
*serratus,* lignins in, 2283a.
*serratus, spiralis* and *vesiculosus,* fertilization of eggs of, 1081h.
*serratus, spiralis* and *vesiculosus,* seasonal variation in compn. of, 8457a.

**Fuel cells** (*containers*). See *Fuels*.

**Fuel cells** (*voltaic*). See *Cells, voltaic*.

**Fuels.** (See also *Ash(es); Briquets, fuel; Burners; Calorific value; Calorimetry; Carbonization; Cetane number; Coal; Coke; Combustion; Firing; Gas, fuel (manufactured); Gasoline; Hydrocarbon oils; Kerosene; Kindling; Kogasin; Lignite; Mazut; Naphtha; Octane number or value; Peat; Petroleum; Sapropel.*)
agglomeration of, P 1170e, P 3994a.
Alberta reserves of, 3989e.
aldehyde solid, P 7668i.
analysis and testing of solid, 3989h, 4827i.
analysis of solid, 2753h.
analysis (spectrometric) of, 3715f.
from asphodel tubers, etc., P 5616i.
atomization of liquid, for combustion, 4443g.
bauxite sludge treatment of solid, P 5928d.
books: 5928b; Les méthodes actuelles de l'industrie des, de synthèse, 1170d; Untersuchungsverfahren für feste, 1551g; Conversion of Petroleum—Production of Motor, 2421d; Diesel, Oils, 2703a; Brennstoffe-Kraftstoffe, 5173i; Für Verbrennungskraftmaschinen, 9419e.
from breeze, dust and waste of coal, P 9419c.
canned, from EtOH and peat, P 6810g.
cells, fitting compn. for, from butadiene-acrylonitrile elastomer and phenolic resins, P 2807c.
cells, interliners for, P 6466e.
cells (voltaic)—see *Cells, voltaic*.
ceramic-industry alternate, 2389a.
coking test for solid, 1947e.
combustibility and ignitability of solid, 5921h.
combustibility of solid, 1939g.
combustion calcns. for, nomograph for, 8751h.
combustion properties of liquid, app. for detn. of, P 8760a.
compn. and combustion tests of fossilized Triassic, 4984g.
consumption in glass-melting furnaces, 6379d.
-control valve of furnaces, 6469e.
cracking by Thermofor process in increasing yield of furnace-oil, 4839b.
decompn. of solid, by heat, P 3598i.
Diesel, 833g, P 6810e.
additives for improving cold starting of, 384f.
aromatic content reduction by $SO_2$ extn., 7674h.
auto-ignition temps. of, 2402d.
chem. compn. and inflammability of, 5569b.
colloidal, 5921c.
from cycloparaffinic hydrocarbons, P 5173i.
2,2-dinitropropane in improving cetane no. and reducing exhaust smoke from, 5930i.
by distn. of Chilean oil distn. residues, 3995f.
evaluation of, 2753e.
by extn. of brown coal tar distillates with HF, 6816e.
ignition quality of, test for, 4399f.
manuf. by Fischer-Tropsch process and hydrogenolysis, P 4834i.
pretreatment for addn. of peroxides or hydroperoxides, P 6810f.
for railroad locomotives, 6805e.
retarding ignition of, 6805d.
from shale oil of Fushun, 2419a.
S content and effect on engine deposits and wear, 6400i.
in tree control on southern upland, 6352i.
from wood tar oil, 6396a.
Diesel and heating oil, from high-pressure distn. of coal, 5570d.
distn. (low-temp.) of solid, P 838h.
distn. (low-temp.) of solid, plant for, 375a.
distn. of, retorts for, 2403c.
economy of, in cement manuf., 4825f.
in derived industries of org. chemistry, 3541g.
in dyeing of wool, 6828f.
efficiency in blast furnace, 4613d.
elec. resistance of combustion mixts. of liquid, 3591i.
elementary compn. of solid, in relation to calorific value, 2753h.
evaluation of, 6389h.
for flame throwers, rheological properties of incendiary gel, 4015a.
future and, 8637f.
gasification of, size effect in, 3596h.
gasification (pressure) of solid, with catalysts, P 6397c.
gasification (underground) of solid, P 1170g.
for gas producers (automotive), 1547gh.
for gas producers, peat charcoal as, 2407e.
gelation of incendiary, 3991f.
gel, from gasoline thickened by soaps, fats in preventing oil sepn. from, P 1960g.
gels (Al soap) for solid, P 2452f.
hydrogenation of—see *Hydrogenation*.
by hydrogenation of coal, 1549i, 1942i, P 6810f.
of coal and CO, 915d, 5921b.
of coal and C oxides, 5570i.
hydrogen detn. in solid, 5921i.
internal-combustion, 1951d, P 4835d.
airplane tanks for, coated or lined with polyamide mixts. with rubberlike polymers, P 6457b.
alc.-contg., with antioxidant and corrosion-inhibiting stabilizers, P 4446f.
alc. manuf. for use as—see *alcohol*.

*internal-combustion*, alc. mixt. with hydrocarbons as, P 6396*g*.
aldehyde and peroxide formation and proknock effects in combustion of isoöctane, 2411*c*.
by alkylation and isomerization of paraffins with HF-$BF_3$ catalyst, P 5583*i*.
by alkylation and isomerization with halide-ether complex catalyst, P 8666*b*.
by alkylation, halogen and HF removal from, P 4006*de*.
by alkylation of $C_4H_{10}$ with butenes and defluorination, P 1175*b*.
by alkylation of 2-methylpropane with butene, $C_2H_6$ elimination in making, P 2422*i*.
by alkylation of 2-methylpropane with butenes with HF catalyst, P 1175*k*, P 5583*g*.
by alkylation of 2-methylpropane with $C_3$-$C_5$ mixed olefins, P 1956*e*.
by alkylation of 2-methylpropane with cyclopropane, P 5583*d*.
by alkylation of 2-methylpropane with $C_2H_4$ in making 100-octane, P 5180*i*.
by alkylation of 2-methylpropane with $C_2H_4$ with HF-$BF_3$ catalyst, P 2422*h*.
by alkylation of paraffins, $AlCl_3$ complex catalyst for making, P 7677*e*.
by alkylation of paraffins with HF complex catalyst, P 389*h*.
by alkylation of paraffins with olefins, P 390*a*, P 3189*f*, P 5174*f*, P 5181*g*, P 7677*e*.
by alkylation with reduced contact time with catalysts, P 7223*b*.
from $NH_4NO_3$, urea and f.-p. depressant, P 1552*a*.
analysis by infrared spectroscopy, 2759*a*.
antiknock agents for, P 1558*d*.
antiknock agents for, from waste liquor from soda washing of petroleum, P 5939*h*.
antiknock agents for, olefins as intermediates for, P 1432*e*.
antiknock agents in, HCHO and $NO_2$ as, 5579*e*.
antiknock, by vapor-phase contact decompn. of naphtha and $C_3$-$C_4$ hydrocarbons, P 3605*d*.
antiknock-limited performance in supercharged CFR engine with aq. coolants, 839*i*.
antiknock no. and French industry of, 8654*h*.
antiknock no. of olefinic, improvement of, P 7677*i*.
with antiknock nos. above 100, classification of, 6813*i*.
antiknock nos., road-octane nos. and requirements of French cars for, 8655*d*.
antiknock properties, ignition and oxidation of vaporized rich-mixt., 7674*d*.
antiknock requirements of engines and base, 8655*b*.
antiknock value of, 3600*f*, 7673*i*, 8656*i*.
antiknock value of, hydrocarbon structure and, 7217*d*.
antiknock value of S-contg. leaded, improvement with esters, P 9431*d*.
antioxidants for, aldehyde-hydroxy aromatic compd.-N compd. condensation products, P 2766*b*.
antioxidants from bacterial action for, P 3193*e*.
aromatic, 2761*c*.
with aromatic amines as antiknock agents, trialkyl amine discoloration inhibitors in, P 4003*d*.
aviation, P 4835*a*.
aviation, from rubber, 5169*i*.
butane use in manuf. of, vapor pressure and, 375*c*.
catalyst for manuf. of, P 1931*d*.
from coal, P 4844*f*.
or constituent therefor, P 6818*g*.
consumption as, mean effective pressure of, 9422*g*.
by conversion of hydrocarbon oils, $NH_4$ ion-activated Mg silicate catalysts for, P 7224*e*.
by conversion of hydrocarbons, P 4448*a*.
corrosion by, 986*d*, 8128*a*.
test on Cu for, and corrosion inhibition by peroxide of cyclopentadiene or its dimer, 9426*c*.
cracked and reformed aviation, P 843*f*.
by cracking, and refining with regenerated powd. cracking catalyst, P 9429*b*.
by cracking of fluid-catalytic-cycle gas oil, 7218*e*.
cycloalkyl nitrites as ignition promoters for, P 4694*f*.
by dehydrogenation-isomerization of paraffins and alkylation of olefins, P 1955*i*.
dehydrogenation of hydrocarbon oils and hydrogenation of unsatd. hydrocarbons to 100-octane, P 5181*c*.
detonation of—see *Detonation*.
Diesel—see "Diesel" above.
distn. app. for, 4001*f*.
by distn. of synthetic hydrocarbons and catalytic treatment in vapor phase, P 2421*g*.
gas as—see *Gas, fuel (manufactured)*.
for gas turbines, 7662*g*.
gum and Pb-pptn. inhibition in leaded aviation, by salicylic acid, its esters and salts, P 4457*g*.
gum inhibitors from alkyl monoamines and fatty acid amides for, P 3193*e*.
heptane and isoöctane as reference fuels in knock testing, 383*f*.
by hydrogenation of CO, P 3174*g*, 3591*d*, P 5573*c*, P 5574*a*.
by hydrogenation of hydrocarbons, P 4843*i*.
hydrogenation of triisobutylene to 109-octane, P 4007*f*.
ignition and oxidation of, 2411*ei*.
injection of water or alc. with gasoline as, 2753*c*.
by isomerization of $C_4$ and $C_5$ paraffins, P 5182*g*.
isomerization of cracked benzene in making high-octane, P 3604*e*.
isononane aviation, P 1957*b*.
for jet propulsion, 4828*g*.
for jets, mixing of, 8123*a*.
knocking of—see *Detonation*.
leaded aviation, stabilized by hydroxy benzoic acid, esters or salts, P 8667*d*.
Mg corrosion by, prevention of, 4622*e*.
$CH_4$ (liquid) as, 2402*f*.
in 1949, 2753*b*.
optimum antiknock value of, 8655*g*.
paraldehyde blends stabilized with org. bases, antioxidants, etc., as, P 8130*bc*.
paraldehyde mixts. as noncorrosive additives for, P 8130*c*.
by polymerization of $C_2H_4$, P 1218*c*.
by polymerization of olefins, P 5939*c*.
polymerization of olefins for processing to, P 1218*f*.
polysulfide sealing compds. for tanks for, P 4508*gh*.
ram-jet performance and, 9411*d*.
refined with aluminate catalysts, P 3191*b*.
safety, butene-isobutene-cut polymerization with $H_2SO_4$ and hydrogenation of polymer for use in, P 7222*c*.
safety, by alkylation at low temps. with $H_2SO_4$-aliphatic catalysts, P 5181*e*.
safety, by alkylation with $H_2SO_4$ catalyst dild. with $C_2H_4$, $Et_2SO_4$ or di-Me ether, P 6404*b*.
safety, by polymerization and hydrogenation of $C_4$ hydrocarbon mixt., P 5174*c*.
safety, from S-free triisobutylene, P 5584*e*.
safety, ignition by secondary injection of ignition fuels, 2420*c*.
safety, Perbunan swelling in, aromatic content and, 2801*g*.
from shale oils of Australia, 3996*d*.
S-$Et_4Pb$ interaction in, effect on octane no. and Pb efficiency, 5579*b*.
Synthol, chromatography of, 1169*e*.
testing rich-mixt. performance and blending with synthetic isoparaffins in making 100-octane, 2415*d*.
$PbEt_4$-contg., history of, 6814*b*.
$PbEt_4$ detn. in, 4604*c*.
tetrahydrofurfuryl alc. for use in, 1719*c*.
turpentine oil for use in, 7663*b*.
vaporization in engines, 2756*k*.
*internal-combustion*, vegetable oils as, 4827*f*.
journal: Z. für Kohle, Gas Treibstoff und Elektrizität, 8120*e*.
liquid, in British economy, 2402*f*.
from coal, lignite, natural gas and oil shale, bibliography on, 9414*f*.
in Fe and steel works, 3591*c*.
metallurgical, use of O with low-grade, 8998*e*.
metering liquid, 8214*f*, 8756*g*.
methane as, 9415*g*.
molasses pyrolysis in prepg. liquid, 9422*e*.
in nonferrous metal industry, 8637*e*.
oil, as activator for coal, P 8651*a*.
antioxidants and surface-active substances for, salts of alkyl phenol sulfides, P 4458*i*.
in black-fly-larva control in Alaskan streams, 6354*c*.
calcn. of combustion vols. for, 2419*e*.
carbureting blue water gas by, 836*e*.
condensation products of hydroxy arylalkyl amines for stabilizing, P 1176*b*.
corrosion and oxidation inhibitors for, P 4008*b*.
emulsions and their breaking, 2419*e*, *f*, 5929*h*.
emulsions of sea water and, breaking with detergents, 3178*g*.
from fat acids, P 4835*a*.
firing with—see *Firing*.
gas from—see "oil gas" under *Gas, fuel (manufactured)*
heat exchange between water and, 5*f*
for oil-gas manuf., 1550*e*.
in open-hearth-furnace practice, 4613*c*, 5713*a*
resinous products from, P 4008*h*.
standards for, 4787*b*.
in the steel industry, and their replacement, 9818, 4193*h*.
supply in Britain, 3755*c*
tar from, in fouling heat exchangers, 8755*h*.
testing compatibility with creosote, 2731*c*
in weed control, 343*d*.
in weed control in guayule seedbed, 5145*d*.
in white-fringed-beetle control, 9317*c*
oxidants for—see *Oxidising agents*.
oxygen detn. in solid, 7661*c*
packaged, industry in 1946, 2127*c*
particles of, effect of sorption swelling on movement of, 1238*g*.
from petroleum-refinery sludge acids, P 3608*a*.
plastic materials and, 3229*i*.
powd., burners for—see *Burners*
powd., firing with—see *Firing*.
pumps for, Pb-plating of bronze bearings for, 4147*h*.
reactivity measurement of solid, 6805*f*
refractory manuf. and, 2392*a*.
review on, 4788*d*, 4789*a*.
for rockets, 833*c*, P 6811*d*, 9449*h*.
by blowing lubricating oil and $KClO_4$, P 8669*c*.
calcn. of impulse with various oxidizer ratios, 7229*g*.
combining chem. and at. energy, 5664*f*.
$H_2O_2$ as, 833*d*.
liquid H and O as, 833*f*.
manuf. of, 4466*i*.
shale clinker as, for shale-oil recovery, 3177*h*.
standards for, 4399*c*, 4786*i*.
statistical methods in technology of, 6389*i*.
stoking app. for—see *Stokers*.
strawboard-manuf. wastes as, 4796*g*.
for sugar factories, 6845*f*.
from sulfite waste liquors, P 1188*b*.
sulfur content of, effect on corrosion of boiler heating surfaces, 6808*e*.
sulfur detn. in solid, 3593*c*, 8117*e*.
supply in Great Britain, 7662*i*.
synthetic, 7209*e*.
synthetic, chemical manuf. from, 8646*f*
synthetic liquid, 2397*c*, 5921*b*.
manuf. from coal, 3989*g*, 6390*h*.
reformed natural gas for making, 3596*f*.
tanks (self-sealing) for liquid, P 7068*g*.
tar, testing of standards for, 1551*b*.
technology in U.S. and Great Britain, 8637*f*.
fly of, from 1750 to 1850, 4827*f*.
[illegible] for—see *Thermostats*.

use of solid, soln. of thermal problems in, 8637*g*.
water content of, effect on boiler performance, 5921*d*.
from wood waste, P 6416*e*.
**Fugacity.** (See also *Vapor pressure.*)
of associating gases, 3268*h*.
of benzene, 476*f*.
of detonation products, 407*e*.

resins from polyactylic acid, drying oils and, P 2813*f*.
salt with piperazine, 235*e*.
sodium salt, activity and osmotic coeffs. of, 22*d*.
sodium salt, effect on methemoglobin reduction in erythrocyte, 3048*g*.
soly. of, 8803*g*.
in succinate formation in plants, 8451*h*.
utilization by erythrocytes, 8509*e*.
utilization by heart, 9210*g*.
**Fumaric acid, bis(β-hydroxystyryl)-,** di-γ-lactone, 7192*h*.
– – –, **bromo-,** dimethyl ester, 8824*g*.
and esters, fungistatic activity of, 9334*f*.
———, **chloro-,** esters, fungistatic activity of, 9334*g*.
———, **dibromo-,** diethyl ester, fungistatic activity of, 9334*g*.
———, **diphenacyl-,** 7192*h*.
———, **(hydroxymethyl)methoxy-**(?),γ-lactone ethyl ester, 6980*i*.
———, **methyl-.** See *Mesaconic acid.*
———, **thiocyano-,** esters, fungistatic activity of, 9334*g*.
**Fumarine.** See *Protopine.*
**Fumaroles,** of Iwo Jima, 75*g*.
thermal changes of Etna, from lava eruption of 1947, 7385*e*.
**Fumaronitrile,** manuf. of, P 7498*h*.
polymers with styrene, P 4516*f*.
**Fumaryl chloride,** reaction with *o*-phenylenediamine, P 4303*c*.
**Fume hoods.** See *Hoods.*
**Fumes.** (See also *Clouds; Flue gases; Fog; Mists; Smoke.*)
air pollution from industrial, public health and, 7614*c*.
colorimeter for, P 6012*b*.
control of, in varnish manuf., 1993*c*.
effect on green plants and soil, 9313*cd*.
hoods for—see *Hoods.*
in lead metallurgy, scrubbing app. for removal of, 4405*g*.
metal-cutting, 9017*e*.
metallurgical, Pb and Zn recovery from, 3753*g*.
from oil and varnish, disposal by combustion, 1617*c*.
respirators for—see *Respirators.*
welding—see *Welding.*
**Fumigants.** (See also *Disinfectants; Fungicides; Insecticides; Parasiticides.*)
alkyl thiocyanates as, 2729*d*.
for cheese mite, bis(2-chloroethyl) ether as, 7186*h*.
detn. of, 3962*g*.
from dibromoethane and petroleum naphtha, P 6357*b*.
1,2-dichloropropene and 2,2-dichloropropane as, 5898*e*.
effect on food, 2338*a*.
for fire ants, 1897*f*.
for grain, 9336*a*.
for grain, detn. and recovery of methyl allyl chloride, 2123*b*.
halo nitro olefins, P 6646*i*.
for moths—see *Moths.*
pyrethrin dry-distn. product as, 812*d*.
for root-knot nematode on gardenias, ethylene chlorobromide as, 1139*e*.
for San José scale, 1144*g*.
for ships and warehouses, 9346*i*.
soil, chlorinated paraffin wax amines, P 349*h*.
chloropicrin as, 3960*f*.
for cotton nematodes and wilt, Dowfume W-10 as, 3134*f*.
$C_2H_4Br_2$ as, P 349*e*.
for nematodes, 9313*f*, 9329*h*.
tetrachloroethyl ethers of phenols, P 7633*a*.
toxicity to honeybees, detn. of, 9349*h*.
**Fumigation.** (See also *Disinfection.*)
chloropicrin, of corn and peanuts, effect on germination, 1900*g*.
of citrus, nylon tents for, 1524*h*.
for durra stem borer with MeBr, 2728*a*.
of fruit (dried) with MeBr, 9346*i*.
of lemons for post-harvest decay, 3133*i*.
methyl bromide, for carpet beetle, flour beetle and pink bollworm, 1900*f*.
mushroom-disease control by chloropicrin, 7180*d*.
of onion seeds, chamber for, 3139*i*.
of potato storage bins with S, 6329*g*.
for rice weevil with $CS_2$, 8603*e*.
of ships and warehouses, 8603*e*.
of soils—see *Soils.*
of tamarind seed for *Lasioderma serricorne* and *Colandra linearis*, 4018*g*.
tests on, 6351*e*.
**Fumitories.** See *Fumaria.*
**Funaria hygrometrica,** calcium oxalate in, 280*f*.
naphthalene acetic acid effect on germination in growth of leaf stalk of, 3493*f*.
**Functional group absorption coefficient,** the term, 1687*g*.
**Functional groups,** active to Grignard reagent, app. for detn. of, 1226*h*.
analytical chemistry and, 8947*g*.
characterization of, in steroids, 3018*i*.
detn. of, 1280*f*.
polarity of, 4059*e*.
reaction of, in amino acids with oleoyl chloride, 5368*g*.
**Functionality,** detn. of, in methylsilicone systems, 438*f*.
the term, 4048*f*.
**Fundulus heteroclitus,** effect of DDT on development of larvae of, 5507*a*.
effect of growth hormone on, 8563*f*.
**Fungi.** (See also *Aspergillus; Basidiomycetes; Botrytis; Dermatophytes; Lichens; Microörganisms; Mildew; Molds (II); Mushrooms; Neurospora; Oidium; Ophiobolus; Rhizopus; Smut; Verticillium.*)
acid-producing, detection and occurrence of, 7077*f*.
action on trees, indoleacetic acid and, 9177*b*.
amylase from, effect of pH on, 8414*e*.
antibiotics from, 275*f*, 8004*d*.

in apples, N content and, 9176*b*.
books: Mycotic Infections of Man, 1483*b*; Biology of Pathogenic, 4727*g*; Technische Mykologie, Hefen und Schimmelpilze, 5449*f*; Chem. Activities of, 5820*d*; Mycoses and Practical Mycology, 6701*i*; Elements of Medical Mycology, 8008*g*.
cellulose-decompg., effect of antibiotics in sawdust on, 9158*i*.
cellulose fiber-decompg. (ref. should be vol. 19), 9456*f*.
cellulose-splitting, of Palestine, 8444*e*.
chemistry of, 7459*h*.
control of—see *Anticryptogams; Fungicides*.
copper leaching rate from antifouling compns. to prevent settlement of, 3632*a*.
decompn. products of, prepn. by fermentation, P 816*a*.
2,4-D effect on, 3133*c*.
detn. in sugar, substrate for, 6446*c*.
diseases of seedlings and transplants from, 9176*g*.
exts. from, in fruit-juice clarification, 8069*i*.
fiber-deteriorating, 5953*g*.
germination of conidia of, effect of DDT, hexachlorocyclohexane, α-chlorotoluene and α,α-dichlorotoluene on, 8089*g*.
griseofulvin effect on, 3066*e*.
growth in acid media and concd. Cu sulfate, 720*g*.
growth substances and, 6704*h*.
of *Hevea*, 5891*i*.
infections by, classes of, and substances for their treatment, 9386*i*.
inhibition by humulone and lupulone, 9361*f*.
on leather, growing of, 9510*e*.
lipase from, P 8417*g*.
with lytic action against *Mycobacterium tuberculosis*, 5085*a*.
mutations in, from methylxanthines, 3881*e*.
oxygen action on, 5076*i*.
in paper pulp, 7227*h*.
pectin metabolism by, 276*g*.
pyrocatecholases of litter-decomposing and parasitic, 3886*a*.
pyrophosphate accumulation in, 2259*i*.
radioactive isotope effect on, 273*f*.
resistance of paper and paperboard to, measurement of, 1187*b*.
rubidium in, 4343*c*, 9166*a*.
sensitivity to thiourea and thiouracil, 4337*c*.
sexual reproduction of, $H_2O$-sol. vitamins and, 9313*g*.
snake venom effect on, 1455*g*.
in soils, effect of fertilizers on, 6350*c*.
effect of insecticides on, 1897*a*.
season and, 1512*i*.
straw decompn. by, 8001*a*.
sporulation of, *in vitro*, 9314*d*.
steeping agent from, 1571*h*.
streptomycin action on, 5079*d*.
sulfate metabolism by, 2670*i*.
textile proofing against, P 418*a*.
thiourea effect on, effect of protein fractions of blood, amino acids and thiol compds. on, 9152*c*.
tolerating low pH, 7548*b*.
trace elements and, 4339*b*, 9161*e*.
tropical deterioration of coatings and, 873*c*.
vitamin effect on pathogenic, 9147*b*.
wood, control of—see "preservation of" under *Wood*.
wood decay by, effect of submersion in water on, 1565*i*.
wool-rayon and -Tiolan blend damage by, 413*d*.
yeast-like, immersion in solid culture media, 5827*b*.
**Fungicides or Fungistats.** (See also *Anticryptogams; Disinfectants; Fumigants; Lime-sulfur; Molds (II); Parasiticides; Pests; Sprays.*) 5540*c*.
ylenic and ethylenic compds. as,
actidione as, 804*f*.
from actinomycetes, activation of, 9147*i*.
action of,
alc.-sol., 4425*b*, 8615*f*.
alkoxychlorobutene, P 3968*f*.
alkylidene-2-naphthalenesulfonic acid salts, P 5047*d*.
*N*-(alkylmercury) sulfonamides, P 1805*d*.
for *Alternaria* blight of petunias, 2725*e*.
from aluminum hydroxide and xanthone, P 852*e*.
aluminum sulfate as, 9341*e*.
amides of α,β-unsatd. acids, P 5413*e*, P 7634*b*, P 7954*f*.
amine compds. with phenol derivs. as, P 4298*e*.
amine salts, P 6357*g*.
*p*-aminobenzoic acid and related compds. as, 8443*g*.
*N*-(2-aminoethyl)formamide derivs. for manuf. of, P 3028*g*.
6-amino-3-picoline for prepn. of, P 7051*a*.
aminoplasts modified with nitro compds., P 4894*f*.
for anthracnose on dwarf beans, 7180*e*.
for anthracnose on tomatoes, 2356*e*, 3960*e*.
antimycin as, 7180*g*.
apomorphine, P 7198*a*.
for apple mildew and scab, mercurated Pb arsenate as, 2356*g*.
for apples, 804*c*, 2362*e*.
for apple scab, 4413*e*, 9347*b*.
for apple scab, effect on oystershell-scale populations, 7630*e*.
aromatic compns. as, chem. constitution and, 4803*g*.
from aromatic unsatd. carbonyl compds., P 4420*g*.
β-aroylacrylic acids, 607*g*.
from arylidene-alicyclic ketones, P 4420*i*.
for azalea petal blight, 802*g*, 1891*i*.
from *Bacillus subtilis*, 9141*e*.
for beech-bark disease and beech scale, 5895*b*.
bis(2-hydroxy-3-nitro-5-chlorophenyl) sulfide, P 1901*e*.
bis(tetrachloropropoxy)methane and tetrachloropropanol, P 3835*i*.
for blight of wax beans, 9273*e*.
books: Copper Compds. in Agriculture and Industrial Microbiology, 1146*b*; Chemistry of, 4804*e*.
from boric acid, DDT, paraformaldehyde, etc., P 5529*g*.
bromoacetamides as, 5081*g*.
bromo thiazoles, P 3042*c*.
for brown rot on lemons, 3553*h*.
for bulbs, 9338*a*.
2-butoxyethyl fluoroacetate, P 3140*i*.
butyl gallate as, 2253*g*.
for cabbage clubroot, $HgCl_2$ and trichlorodinitrobenzene as, 801*h*.
from calcium carbonate and $CuSO_4$, 1138*h*.
for cantaloupe decay, 3133*h*.
for canvas coverings on life-floats, 5143*i*.
castor oil and peanut oil distillates as, 8436*e*.
for cellulosic materials, P 1146*d*, P 7632*f*.
for *Cercospora beticola*, 3134*b*.
chloralimine-contg., P 5154*b*.
chlorinated paraffin wax amines, P 349*h*.
from chlorinated trimethylacetonitrile and paraformaldehyde, P 1525*d*.
chloro olefin ethers, P 4419*d*.
chlorophenyl camphorates, P 1901*i*.
chloropicrin as, 3960*h*.
for citrus canker, 5143*f*.
for citrus decay, P 4419*g*.
for citrus in storage, 2,4-D and 2,4,5-T as, 1517*b*.
colloidal Cu and S as, 803*h*.
from conifer-heartwood exts., 7679*e*.
copper, P 3140*g*.
from copper-Al salts and fatty acids or protein, P 1901*g*, P 3558*e*.
copper, oil and S as, 8597*b*.
from copper or Hg salt and peat ext., P 6778*g*.
copper 8-quinolinolate as, in coatings, 1993*d*.
from copper salts and thioureas, P 5529*e*.
from copper sulfate and molasses or sugar, P 5899*e*.
copper, use on vegetables, 4411*i*.
copper-Zn-soap, P 5151*g*.
for cork gaskets, 4803*i*.
for cotton fabric, 8085*f*.
for cottonseed, phenol esters as, 3133*g*.
for cranberry-fruit rot, 804*d*.
cresolic, melamine lacquers contg., P 6434*b*.
for cucumbers, lilies and sweet potatoes, 6775*d*.
for cucurbit downy mildew, potato and tomato late blight and tobacco blue mold, 2725*d*.
cuprammoniacal petroleum mahogany sulfonates, P 2424*i*.
cuprioxychloride, P 9355*e*.
cycloalkyl nitrites, P 4694*f*.
for dates, 4417*g*.
detn. of, 5083*h*.
detn. of, in varnishes and wood sealers, 9331*e*.
α,α-dibromoacetamides, 6975*g*.
5,5′-dibromosalicil, 5540*f*.
α,α-dichloroacetamide derivs., 1719*i*.
2,β-dichlorosuccinic acid dialkyl esters, P 8606*c*.
1,4-dicyano-2-butanesulfonate salts, P 3840*c*.
3,5-dihalosalicylamide derivs., P 7513*d*.
from dithiocarbamates, CaO and Zn salts, P 4418*g*.
dithiocarbamates of β-hydroxy acids and their derivs., P 7506*g*.
dithiocarbamic acid derivs. as, chem. constitution and, 3883*e*.
dithiocarbamic acid salts, P 5224*e*.
for downy mildew on Lima beans, 3959*h*.
dusts, detn. of particle-size distribution of, 2357*c*.
dust, with uniform particle size, 2357*a*.
effect on DDT in control of aphids on celery, 346*d*.
on DDT toxicity, 2728*e*.
on solids content of cantaloupes, 1515*i*.
for egg mold rot, 8597*d*.
emulsifiable oils for, P 2733*b*.
for ergot, 3959*g*.
from esters of ether-dicarboxylic acids, etc., P 5152*e*.
esters of unsatd. tricarboxylic acids, P 7634*d*.
expansin as, 8003*i*.
expt. station reports on, 2725*c*.
fats and oils as, 4413*cd*.
fluorohydracrylic acid salts as, P 2224*c*.
for food products from complex acetates, P 7606*f*.
for gladiolus, 3961*df*.
glycosides of 5-styrylresorcinol and its mono-Me ether, 5017*g*.
grape court-noué from Cu, 803*b*.
for grape mildew, 8596*i*.
for grape mildew, Na isopropylxanthate use in, P 4807*a*.
for grape root rot in soln. culture, Fermate as, 9351*b*.
for grapes, Al compds. as, 8596*h*.
for grease spot on passion vine, 7179*i*.
for halo-blight of beans, 8595*i*.
halophenyl acetals, P 3968*c*.
for hard fibers, Cu compds. and pentachlorophenol and its Na salt as, 6831*f*, 7693*b*.
for *Hevea*, 5891*i*.
hexylresorcinol as, 1827*a*.
hop-resin constituents as, 1525*f*.
hydroxyaryl amines as, P 1062*a*.
*p*-hydroxybenzoic acid esters as, 7193*d*.
imidodicarboxylic acid esters, 4228*g*.
impregnants, 5801*i*.
1-(4-isopropylbenzyl)piperazine as, P 3558*f*.
kojic acid heavy metal complexes, P 4419*a*.
from lactic acid and phenyl Hg salt, P 9355*g*.
for leather in tropical areas, 7734*b*.
for leather, *p*-nitrophenol-pentachlorophenol, 7733*i*.
for leather, paint and textiles, 2446*e*.
for lemon post-harvest decay, 3134*b*.
for lemons in storage, growth regulators as, 1516*h*.
lime-S as, 8085*a*.
manuf. of, pH control and measurement in, 1881*g*.
in medicine and pharmacy, 9386*i*.
for melanose on grapefruit, 3553*g*.
mercury compd., P 9355*h*.
metallic alkyl bis(dithiocarbamates) as, 9335*c*.
metallo derg., P 363*i*, P 690*ac*, P 7953*d*.
2,2′-methylenebis(4-chlorophenol) as, glucose effect on, 1515*f*.
2-methylmercapto-1,4-naphthoquinone, 4248*f*.
for mildew and mold, 9295*g*.
for mildew on leather, 6853*b*.
for mildew on leather and textiles, 9349*d*.
mixts. with alkyd resin and cellulose derivs., coating textiles with, P 3208*h*.
mixts. with hormones and insecticides, effect on tomatoes, 9337*e*.
for mummy berry on cultivated blueberries, 5143*g*.
nation-wide report on, 7176*h*.
New Jersey expt. station reports on, 9313*b*.
New York expt. station reports on, 9339*cf*.
nicotine double salts, P 8605*b*.
nicotine-heavy-metal silicates, P 7634*b*.
from nicotine sulfate and polyethylene polysulfide, P 5530*b*.

nicotinium salt compns., P 5151*h*.
nitrofuran derivs. as, 2669*d*.
nitrophenolic, detn. in felt, 1194*b*.
octachlorobiphenylquinone, P 814*b*.
Oklahoma expt. station reports on, 9330*d*.
for orange diplodia stem-end rot and molds, $NCl_3$ as, 9339*a*.
for orchard fruits, potatoes and turf, 6775*e*.
org. compds. as, 6351*e*.
org. thiomercury compds., P 6648*b*.
for paper and textiles, P 856*g*.
for paper, pentachlorophenol as, 8678*g*.
for peaches, lime-S as, 1515*h*.
for pear sooty-blotch disease, 9348*b*.
for pecan scab, 1139*a*.
in pectinate films for foods, 6747*g*.
phenolic invert soaps as, 7923*g*.
phenyl thionothiocarbonate salts, P 8604*h*.
from plants, 3885*b*.
polarography of, 5896*b*, 8602*a*.
for potatoes, Cu and Zn chromates as, 801*e*.
for powdery mildew of oriental magnolias, 7179*g*.
for powdery mildew on oranges, 2356*i*.
for Pythium root rot on aroids and Easter lilies, 3133*e*.
quaternary ammonium phenoxides as, P 5801*a*.
quaternary compds. as, in carbonated beverages, 4783*i*.
from 8-quinolinol halogen deriv., P 1902*a*.
quinone-resorcinol polymers, P 6452*e*.
reviews on, 804*g*, 1891*a*
rosin amine and acetate as, 9378*i*.
for rubber-HCl food wrappers, P 3227*e*.
salts of halogenated-polyphenol sulfides, P 2739*h*, P 6357*d*.
for *Sclerotinia* on apricots, 7179*h*.
on beans, 2355*g*.
on cabbage, 7179*h*.
silicon compds., P 8211*f*
for soil-cement mixts., Cu compds. as, P 5568*g*.
sulfones (monochlorocyclic), P 5185*g*.
sulfur as, particle size and soly. in relation to, 9333*h*.
sulfur as, reactivity and, 5143*e*.
surface tension in relation to action of, 5823*h*.
tar-oil components as, 4417*h*.
testing of, 3140*d*, 6351*d*, 7176*g*, 8095*f*, 9327*c*.
testing of, spiral plots for, 5891*h*
1*a*,5,8,8*a*-tetrahydro-1,4-naphthalenediones and 5,8-dihydro-1,4-naphthalenediols, P 7632*d*.
tetrahydrothiazoles, P 9356*f*.
tetrahydrothiophene-3-ol 1,1-dioxide esters, P 1441*e*.
for textiles, P 5528*g*.
Cu naphthenate-G-4 mixts. as, P 5200*f*.
Cu 8-quinolinolate as, 4018*h*.
phenyl mercurials as, 5523*f*.
for textiles and related materials, 413*i*.
ω-thiocyanoalkyl ester intermediates for, P 5153*c*.
thiones, P 350*a*.
thiourea and thiouracil as, 4337*c*.
thiourea as, 3880*b*, 7077*e*.
α-, β- and γ-thujaplicin as, 3554*e*.
for tobacco blue mold, 4412*h*.
tomatin as, 2280*e*.
for tomatoes, 4413*a*, 9338*i*.
for tomato late blight, 4412*i*.
for *Tilletia* on wheat, 3553*e*, 8085*e*.
toxicity to bees, 344*h*.
from 2,4,5-trichlorophenol, effect on cattle, 8071*c*.
2,4,5-trichlorophenyl esters, P 3459*f*.
trichothecin as, 4328*h*, 6277*h*.
for tropical use on army equipment, 873*d*.
wax coatings contg., for fruits and vegetables, P 5900*e*.
for wood—see *Wood*.
wrapping paper impregnated with, for citrus fruit 5591*d*.
zinc acetate (basic)-contg., P 1525*b*.
zinc caprylate-contg., P 7647*c*.
**Funnels**, dropping, without stopcock, 4053*g*.
insert for filter, P 4057*a*.
for liquids contg. noxious gases, P 4907*c*.
for low-temp. filtration, 3665*h*.
separatory, for microanalytical work, 8213*g*.
support for filtering and separatory, 1*e*.
**Furacin**. See "semicarbasone" under *2-Furaldehyde, 5-nitro-*.
**Fural**. See *2-Furaldehyde*.
**2-Furaldehyde** (*fural, 2-furancarboxaldehyde, furfural, furole*), acylhydrazones†, 6972*bei*, 6973*bfh*.
adsorption by lignin, 5254*i*.
amide polymer (contg. hydroxyl group) from, P 6866*h*.
in anthracene purification, P 2641*i*.
in apricots, effect on discoloration, 1120*f*.
bactericidal action of, 5446*e*.
1,3-butadiene manuf. from, P 5048*b*.
cathode ray (supervoltage) effect on, 5878*g*.
complex with $CdCl_2$, 7000*h*.
complex with Hg, anticryptogamic Granovit, 8595*h*.
compd. (addn.) with morpholine, 7030*b*.
compns. with ethylene glycol and PhOH-cresolformaldehyde condensation products, P 8740*b*.
corrosiveness and polymerization of, in hydrocarbon treatment, inhibition by mercaptobenzothiazole, P 9430*i*.
decompn., polymerization and systems with salts and $H_2O$, 6900*d*.
and derivs., in deterioration of dried fruits, 1121*b*.
derivs., spectra of, 1654*h*.
detn. of, 1688*b*, 7377*f*
in cellulosic material, 1975*g*.
in saccharification of agricultural residues, 6412*b*.
2,4-dinitrophenylhydrazone, detection of, 1121*a*.
dismutation by yeast, 4726*a*.
effect on heart, 1110*d*, 7138*h*
in ethylene chlorohydrin recovery from aq. solns , P 2633*b*.
formation from amino acids and sugars, 4501*i*.
furan manuf. from, P 5047*g*.
hydrazones and their derivs., 6591*h*.
hydrocarbon extractive distn. with, foam prevention in, P 914*b*.
hydrogenation of, 1718*i*, 1719*ac*, P 2219*a*, P 4301*i*, P 4700*f*, P 7049*a*.
on Pt, kinetics of 5657*d*
to sylvan in synthetic-rubber manuf., P 2805*b*.
in vapor phase, 7474*b*.
identification in dried fruit as 2,4-dinitrophenylhydrazone, 1120*h*.
as indicator in analysis of acetone, methanol and methyl acetate binary mixts , 6946*c*.
manuf. and uses of, 8669*g*.
manuf. of, P 3464*g*
from corncobs, oat hulls, wheat bran and wheat straw, 2171*c*.
from paper pulp-manuf. liquors, 4848*a*.
from plants or wood, P 3040*f*.
from sulfite liquor, P 4424*b*, P 4854*i*.
from wood waste, P 3618*a*.
octane value of, 3998*b*.
oxidation of, 3792*i*.
catalysts for, P 4700*h*.
electrolytic, 1271*e*.
phenylhydrazone, as polymerization stopping agent, 8727*i*.
phenylhydrazone, *p*-bromophenylhydrazone and α-naphthylhydrazone as softeners for Buna S, 2014*f*.
in pine-stump processing, fire-extinguishing system for plants using, 8681*h*.
plastic materials from, 6861*i*.
polymeric residue of high-boiling constituents in used, detn. of, 4184*b*.
polymerization with butadiene, inhibition of, P 7969*i*.
polymer of, with butadiene, formed in extractive distn. in sepg. butene and butadiene, 1597*f*.
prepn. of, 629*b*.
prepn. of, from bagasse, 628*h*.
Raman spectra of, 8888*ai*.
raw materials from, for prepn. of polyurethan resins, P 4511*g*.
reaction product with formamide and polyvinyl alc., P 6864*e*.
reaction with ketene, P 5037*g*, P 5415*a*.
with ketones, P 3234*c*.
with 2,4-thiazolidinedione and with pseudothiohydantoin, 3820*b*.
recovery from corn-starch manuf. and use, 5218*h*.
reduction of, P 3465*f*.
reduction of, to furfuryl alc., P 1065*a*.
removal from tetrahydrofurfuryl alc., P 1526*f*.
resins—see *Phenol condensation products; Resinous products; Urea, thio.*
soly. in Na xylenesulfonate solns., 1242*e*.
soly. of $C_{31}$ aromatic hydrocarbons and of lubricating oils in, aniline points and, 3602*g*.
as solvent in soybean-oil countercurrent extn., 4496*c*.
spectrum of, 2865*a*.
*p*-sulfamylphenylhydrazone†, 601*c*.
sulfate dye from nitrosophenol and, P 1988*e*.
system: butane–$H_2O$–, 475*g*.
toxicology of, 5514*f*.
and its use in nylon prepn., 9457*i*.
in wood-saccharification liquor, 2425*h*.
**2-Furaldehyde, (hydroxymethyl)-**, in cellulosic material and its detn., 1975*h*, 1976*eg*.
derivs., x-ray diffraction data for, 3795*b*.
detn. in wine, 3559*i*.
formation from sugars, 7730*i*.
growth and tumor inhibition by, in relation to substance from wheat middlings, 3479*d*.
hydrogenation of, P 4301*i*.
——, **5-(hydroxymethyl)-**, anthrone reaction with, 66*g*.
cathode ray (supervoltage) effect on, 5878*f*.
and derivs., formation in discoloration of apricots, 1120*h*.
2,4-dinitrophenylhydrazone, detection of, 1121*a*.
——, **5-methyl-**, identification in dried fruit as 2,4-dinitrophenylhydrazone, 1120*h*.
——, **5-nitro-**, derivs., in dental caries inhibition, 6735*g*.
2-hydroxyethylsemicarbazone, diacetate†, semicarbazone and semioxamazone, effect on viruses of psittacosis-lymphogranuloma group, 9249*h*.
2-hydroxyethylsemicarbazone or methylsemicarbazone, effect on acid production in saliva, 5497*b*.
oxime and hydrazone with hydrazide of (carboxymethyl)trimethylammonium chloride, fungistatic action of, 2669*e*.
semicarbazone, antibacterial action of, 9147*d*.
cardiotoxic effects of, 1110*d*.
in coccidiosis treatment, 5869*c*.
effect in appendicitis, 5869*i*.
effect on bacterial metabolism, 8000*i*.
effect on fibrosarcoma growth, 2322*b*.
effect on heart, 7138*h*.
in peritonitis control, 7143*a*.
reviews on, 315*g*, 5533*c*.
tuberculostatic effect of, 5445*a*.
——, **tetrahydro-**, and derivs., 9060*i*.
methacrylate, polymerization with butadiene, P 9519*d*.
**2-Furaldehyde, 5-nitro-**, derivs., 7015*b*.
**Furamide**, derivs., P 4301*d*.
**2-Furamide**, *N*-**5-acenaphthenyl-**, 4665*c*.
——, **5-*tert*-butyl-*N*-(*p*-nitrophenylsulfonyl)-**, P 7962*c*.
——, **5-*tert*-butyl-*N*-sulfanilyl-**, P 7962*d*.
——, *N*-**1(and 2)-naphthyl-**, 4665*c*.
——, *N*, *N'*-**2,4-tolylenebis-**, 4665*d*.
**Furan** (*furfuran*),

acylation of, 214*b*, 6203*i*.
acylation of, and its derivs., P 3464*i*, P 3465*ad*.
2-acyl derivs., 8367*f*.
alkylation of, with olefins with anhyd. HF catalysts, P 1174*g*.
and alkyl derivs., distn. (azeotropic) with, in drying org. compds., P 3835*i*.
2-anthryl derivs., 2198*h*.
chlorination of, P 3041*c*.
complex with $Ni(CN)_2.NH_3$, 5753*f*.
compressibility and ultrasonic velocity in, 4532*b*.
condensation with rosin with $BF_3$ catalyst and esterification of condensate to varnish resin, P 9486*f*.
derivs., P 1065*b*, 2987*g*, 4253*g*, 5022*f*, 7929*h*.
2-alkoxy derivs. of 1,4-butanediol and 2-butene-1,4-diol for, P 5414*d*.
bacteriostatic action of, 720*a*.
as base-exchange compds., P 2344*e*.
fungistatic activity of, 9334*b*.
manuf. of, P 5805*c*.
octane values of, butadiene bond and sensitivity to $PbEt_4$ in relation to, 3997*i*.
prepn. of, 1391*e*.
resinous products from, P 1605*c*, 8197*a*.
as solvents, 3118*f*.
and derivs., hydrogenation on Pt, kinetics of, 5657*d*.

and derivs., manuf. and hydrogenation of, P 4301*i*.
*p*-dioxin and, 3827*e*.
elec. moment and polarization of, 4913*d*.
formation of, from 2-alkoxy-3-halotetrahydrofurans, 5774*g*.
free energy of, 477*h*.
manuf. of, from 2-furaldehyde, P 5047*g*.
mol. diagrams of mesomerism and reactivity of, 5731*g*.
nitro derivs., in dental-caries inhibition, 6735*g*.
nitro derivs., pharmacology and clinical uses of, 315*g*.
oscillations of nucleus of, in 2-furaldehyde, Raman spectrum and, 8888*i*.
pyrimidyl derivs., 7929*i*.
reaction of, CO and H, P 4685*f*.
reaction with alcs. in presence of Br or Cl, P 7970*b*.
ring, effect on dehydration of polyhydric alcs., 4664*e*, 5391*i*.
lyoparachor of, 2834*e*.
substitution in, 5020*f*.
stabilization of, P 5805*b*
sulfanilamide derivs., therapeutic activity of, 3097*e*.
sulfonation of, 214*d*.
sulfonation of homologs of, 7015*d*.

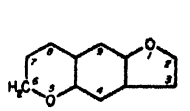
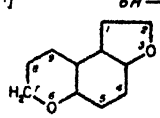
steel-manuf., stopper tubes for, 6383b.
for steel (stainless) cold forming, 4199i.
Stouff, for intensive combustion in aerodynamic suspension, 3991d.
stoves—see *Stoves*.
super-refractory use in gas-fired, 5563d.
tank, increasing output by thermal insulation, 6381f.
for tempering glass—see *Glass*.
thermoregulators for controlling—see *Thermoregulators*.
tuyères for—see *Tuyères*.
vacuum, for high-temp. microscopy, 2908c.
vacuum, tubes, 29g, 6053f.
zinc-bath, corrosion of, 9017b.
**Furnaces, blast.** (See also *Blast; Cupolas.*)
blowing in, P 6965.
bricks, detn. of disintegration of, 7655e.
charging (compensated) of, 8324d.
chem. and thermal processes in, 1227d.
coke for—see "metallurgical" under *Coke*.
controlled-atm., of nichrome resistor type, 45c.
design for, 4195d.
detn. of contour, gas compn. and movement in, 7878d.
dust from, Fe detn. in, 965i.
dust from, nodulization in rotary kilns, 7878h.
exptl., of Brit. Iron and Steel Research Assocn., 529h.
fuel efficiency in, 4613d.
gas from, detn. of excess air used in combustion of, 4445i.
gas-washing app. for, 4405g.
hearths for—see *Hearths*.
invertion of bosh of, 5713b.
linings of, C for, 7878d.
Fe and Mg cordierites in, 5705cf.
kalsilite, $KAlSiO_4$ and alkali metal aluminosilicates in, 5705f.
Zn damage in, 2907c.
operation of, charge-segregation effect on, 8999f.
coke ash and coke S in, 3598e.
coke permeability and efficiency in, 4195h.
coke quality and, 79a.
with O-enriched blast, oxidizing-zone change during, 2907i.
sinter properties and, 4196a.
operation of large, 4195d.
ore (Mesabi) prepn. for, 980g.
oxidization zone of, coke d. and, 4195d.
oxygen use in, 3755b, P 7891g.
in phosphoric acid manuf., 1533e, 9392f.
pyrite cinder for, 3992d.
refractories for, 9405g.
scaffolds in, 4613b.
stoves—see *Stoves*.
tapping hole of, 7389h.
top diam. of, dust behavior and, 7393a.
**Furnaces, electric.** (See also *Cells, electrolytic; Iron, metallurgy of; Kilns; Metallurgy; Steel.*)
alloy manuf. in, P 6094f.
alumina-melting, P 6925h.
for aluminum, P 4963a.
Soderberg system in, 45e.
of world, 7877i.
for aluminum refining, P 4963be.
for analysis (semimicro-) of C and H, 1267i.
atm. control in—see *Gases*.
atm. (protective or inert) for—see "protective or inert" under *Gases*.
barium-compd. manuf. in, 6519a, 7351d.
books: Nagrevatel'nye pribory v laboratornoĭ praktike, 2476c; 25 Jahre Heraeus-Vacuumschmelze, 6964d.
bottoms of, compn. for, P 3988d.
for brass founding, 2141e.
for calcium carbide manuf., P 7838a.
for calcium Mg phosphate manuf., 45d.
carbide, 8898i.
carbon monoxide manuf. in, for Fe reduction, P 2879e.
for ceramic research, 9402a.
for cermet fabrication, 4438e.
chromium-Ni steel manuf. in Demag, 5016.
chromomagnesite in arches of, wear of, 6383g.
for coking test, 1947g.
crucibles for high-frequency, 2391h
crucibles for melting metals, P 2878d.
crusts of carbides and ferroalloy charges in, app. for breaking, P 7357g.
Dinas brick for arches of, 6382e.
dolomite refractory for hearths of, 5554f.
electrodes for—see *Electrodes*.
flux for, from metallurgical slags, P 6144d.
glass-melting, P 4824b, 5163b, P 6386c, P 8632hi, 9399f, P 3587e
electrode system for, P 6386c.
with submerged C elements, P 8633a.
for glass-viscosity measurement at annealing temp., 7654d.
for heat-treatment of electroplate, P 4210i.
induction, 1268f, P 3732h.
intermittent-discharge induction, P 4151c.
for iron alloy manuf., P 2878c.
for iron and S recovery from sulfide ores, P 9018e.
in iron foundry, 4145a.
for iron manuf. from sand or powd. ore, P 6925h.
iron melting in, P 5680b.
for iron metallurgy, P 2524d, 8283g.
lab., 6519a.
lab. high-frequency induction, 4581e.
lab. Kryptol, 6089b.
for light-metal ingot foundries, 981d.
for magnesium thermal manuf., P 4587f.
for manuf. of $CaC_2$ and ferro alloys, P 3299e.
material- and heat-balance in ferrosilicon-smelting-arc, 3296i.
melting, arc, 45b.
for glass, etc., P 7357f.
for light alloys, 2097c.
for metal, P 7357d.
for refractory metal, 4581f.
metallurgical, P 7837i.
control of, 3297a.
heating elements for, P 3732i.
metal melting in, 8998i
with molybdenum heating elements, 6517i.
oxidizing smelting of sulfide ores of nonferrous metals in, P 6094f.
for oxygen removal from gases, 7758d.
Pechiney-Cartoux arc, 4959e.
for physicochem. measurements, 4901c.
recovery of V and other alloys in acid, 1661f.
reduction, hazards of, 6519b.
regulation of arc, P 6094e.
resistors for—see *Electric resistors*.
reviews on, 3725f, 4145d.
salt-bath, P 1665a.
silica-brick handling for, silicosis prevention in, 6921i.
for slag heating, P 3732i.
with Soderberg electrode, 4959e.
steel (Cr) manuf. in acid arc, 8283f.
for steel manuf., 4959e.
linings for basic, 9405c.
roof life in, 4989c
steel manuf. in, slag vol. in, 1267ghi.
in steel manuf., S removal in basic, 4581k.
for steel-melting, dolomite brick in, 3581d.
linings of high frequency, 6381h.
tridymite Dinas brick for, 5346h.
temp. measurement in basic arc, 8756i.
temp. of, control of, 4959f.
thermoregulators for—see *Thermoregulators*.
for volatile-metal reduction, P 2878e.
for zirconium casting, 8899a.
**Furniture.** (See also *Tables.*)
adhesive for, P 2458b.
finishing office, 875b.
kapok (second-hand) detection in upholstered, 5193f.
lacquers for, formulation and testing of, 8703e.
upholstery for—see *Upholstery*.
**Furniture polish.** See *Polishing materials*.
**Furosamide.** See *Furamide*.
**Furobenzopyran,**



5—[3,2-g][1]



7—[3,2-g][1]

9—[2,3-f][1]

delayed-action, alloy powder compns for gasless, P 4856*b*.
with core insensitive to moisture, compn. for gasless, P 2438*e*.
fast-burning, contg. powd. Zr and red Pb, P 9450*i*.
Pb 2,4-dinitroresorcinolate powder for, P 5190*c*.
red P powder compns. for gasless, P 5189*f*.
powder compns. for, for powder trains with definite burning-time interval, P 408*e*, P 3620*b*.
safety, black blasting powder for, 4467*c*.
safety, manuf. and uses of, 4467*c*.
water insensitive core of detonating, hexogen or pentaerythritol tetranitrate-coated, P 2438*d*.
**Fusibility**, measurement of—see *Melting points*.
**Fusicladium**, *dendriticum*—see *Apple scab*.
**Fusion**. (See also *Fluxes; Heat of fusion, Melting, Thawing*.)
alkali, of chlorinated fatty acids, 2164*d*.
curves or diagrams—see *Melting points*.
micro capsules for, 1613*h*.
**Fusite**. See *Fusain*.

**G**. See *Phenol, 2,2'-methylenebis[4-chloro-*.
**G 11**. See *Phenol, 2,2'-methylenebis[3,4,6-trichloro-*.
**G 410**. See *Phenol, pentachloro-*.
**Gabbros**, amphibolitic, in argillaceous formation near Zebedassi, Italy, 5709*f*.
of Annam, 2135*c*.
anorthositic and olivine, of mid-Atlantic ridge, 6548*c*.
anorthositic metamorphosed, in serpentinite at Harper's, N. Z., 4610*d*.
of California, 2904*h*.
of Celebes (eastern), 8320*a*.
of chromite vein in Itaú, Brazil, 2132*i*.
delimitation of, and related rocks, 4610*b*.
-diorites in Terska-Alatau Ridge, origin and transformations of, 7386*b*.
hornblende, from Mutotolwa, Katanga, 2136*a*.
hornblende-gabbro and, of Gosaisho-Takanuki dist., Japan, 6127*i*.
of Minnesota (Duluth area), 6548*e*.
norms of average analyses of, 2552*a*.
of Oregon (Kerby Quadrangle), 4984*h*.
-volcanic complex of Njombe dist., Tanganyika Terr., 5347*e*.
xenolithic, in groundmass of camptonites of Tyan-Shan, U.S.S.R., changes of, 6128*i*.
**G acid**. See *2-Naphthol-6,8-disulfonic acid*.
**Gadolinite**, of Italy (Baveno), 2129*f*.
recrystn. of metamict, 8983*i*.
**Gadolinium**. (See also *Rare earth metals*.)
bombarded by deuterons, neutrons and protons, Gd and Tb isotopes from, 4949*h*.
electrons and γ-rays from, from $Eu^{152,154}$, 486*i*.
isotopes of, 937*d*
magnetic susceptibility and purification of, 6479*i*.
neutron absorption by, 8854*i*.
neutron binding energy of, and energy of γ-rays emitted on neutron capture by, 8861*d*.
spectrum of, persistent lines in, 5337*g*.
**Gadolinium, analysis**, detection, 8948*h*.
detn. in rare earth oxide mixts., 2889*a*.
sepn from rare earths, 8301*a*.
**Gadolinium bromate**, $Gd(BrO_3)_3$, spectrum of, 2093*a*
**Gadolinium compounds**, nitriloacetate complex stability as function of pH and prepn. and decompn. by heat of ammoniate of $GdCl_3$, 8301*a*.
**Gadolinium hydroxide**, $Gd(OH)_3$, 2108*d*.
**Gadolinium nitride**, GdN, crystal structure of, 5252*i*.
**Gadolinium salts**, with 3,5-diiodo-4-oxo-1(4*H*)-pyridineacetic acid, 5780*g*.
**Gadolinium vanadate(V)**, $GdVO_4$, crystal structure of, 6033*b*
**Gadus**. See *Cod*.
**Gaffkya tetragena**, proteolytic effects of, 9152*e*
**Gahnite**, in granite pegmatite from Rosendal, Finland, 4605*d*.
origin of, in quartz sillimanite veins in Nigeria, 6117*i*
**Galactal <1,5>**, D-, and 3,4,6-triacetate, 1727*b*.
**Galactan**. (See also *Gelose, Mannogalactan*.)
in sprucewood, 395.
in vegetable foods and their alteration during digestion, 6753*e*.
**Galactemia**, therapy of, 2290*i*.
**Galactin** See "hormones of anterior lobe of, lactogenic" under *Pituitary gland*.
**Galactokinase**, 1070*f*.
differentiation from hexokinase, 6283*c*.
in galactose fermentation by yeast, 9154*b*.
**Galactolipides**, in phosphatide-cerebroside fraction of nervous tissue, 703*h*.
**Galactomannan**, of carob gum, 581*c*.
carboxyethyl and cyanoethyl ethers, P 4504*d*.
**Galactomutase**, glucose phosphate function as coenzyme of, 2258*i*.
**Galactonamide**, DL-, 8358*f*.
DL-, (?-pentaacetate, 8358*g*.
**Galactonic acid**, DL- and L-, γ-lactone tetraacetates, 8358*d*.
L-, pentaacetate, 8358*d*.
—, **2,3,6-trimethyl-**, derivs., 583*b*.
D-, lactone, 586*a*
**Galactonyl chloride**, pentaacetate, 8358*e*.
**Galactopyranoside, ethyl thio-**, α-D- and β-D-, and tetraacetates, 3367*i*.
—, **methyl 4(and 6)-β-glucuronoside-***, D-, 583*a*.
—, **methyl hexamethyl-6-β-glucuronoside-***, β-D-, amide, 582*i*.
—, **phenyl**, β,D-, and derivs., 1327*b*.
—, **phenyl 4,6-benzylidene-**, β-D-, and 2,3-diesters, 1327*b*.
—, **phenyl 4,6-benzylidene-2,3-dimethyl-**, β-D-, 1327*c*.
—, **phenyl 2,3-dibenzyl-**, β-D-, 1327*f*.
—, **phenyl 2,3-dibenzyl-4,6-dibenzylidene-**, β-D-, 1327*f*.
—, **phenyl 2,3-dimethyl-**, β D-, 1327*c*.
**Galactose**, absorption from intestines of normal and thyrotoxic subjects, 2684*a*.
*aldehydo*-D-, heptaacetate, 5009*d*.
from almond-tree gum, 1323*i*.
in bean rust, 1463*f*.
in blood, dietary fat effect on, 7557*h*.
as carbon source for *Bacillus subtilis* and its action in amylase formation, 2278*f*.
from carob gum, 581*ac*.
complex with borax, 6986*d*.
dehydration of D-, thermodynamics of, 2082*f*.
derivs., x-ray diffraction data for, 3795*b*.
detection of, 5704*b*.
detn. and reducing power of D-, 7861*c*.
detn. of, 4342*c*, 7378*d*.
detn. of, in sulfite waste liquor, 2434*g*.
distribution in eviscerated-nephrectomized dogs, insulin effect on, 8053*a*.
effect of D-, on vitamin C oxidation, 1016*f*.
effect on erythrocytes of turtle, 3939*c*.
on growth of plant tissue, 4349*a*.
on methemoglobin reduction in erythrocytes, 3048*g*.
on Takata-Ara reaction, 3480*h*.
*effect* on utilization of fat, 737*b*.
on wheat roots, 3493*i*.
in egg jelly coat of various sea urchin species, 4389*e*.
fermentation by yeast, pathway of, 9154*a*.
fermentation by yeasts, effect of arsenates on, 2275*c*.
glucose derivs. formed from, 6680*f*.
hemin compds. with, in liquid $NH_3$, 702*g*.
hepatic clearance of, 296*d*.
methylphenylhydrazone, in carbohydrates of pseudomucin, 3480*b*.
in mucoid of stomach, 3480*d*.
oxidation of D-, with $HNO_3$, $HNO_2$ and N oxides, 6823*d*.
pentanicotinate of D-, 1469*i*.
phenylosazone, detection of, anthrone reaction in, 66*g*.
phosphate—see *Galactose phosphate*.
reaction (color) with orcinol and $H_2SO_4$, 3795*i*.
in *Sterculia setigera* gum, 4881*c*.
tolerance to, citric acid and blood serum after tests for, 9226*e*.
tolerance to, in kala-azar, 3515*i*.
utilization by chick embryo, 5465*d*.
by *Drosophila*, 322*h*.
by erythrocytes, 8509*f*.
by *Lactobacillus bulgaricus*, 2669*h*.
by yeasts, 275*c*.
**Galactose, 2-desoxy-***, D-, 1727*b*.
**6-desoxy-6-iodo-***, D-, and derivs., 150*g*.
—, **6-desoxy-6-iodo-1,2,3,4-diisopropylidene-***, D-, 150*g*.
—, **2-desoxy-3-methyl-***, D-, 1727*f*.
—, **1,2,3,4-diisopropylidene-**, D-, and 6-*p*-toluenesulfonate, 150*e*.
—, **2,3(2,4 and 3,4)-dimethyl-**, oxidation of, with $HIO_4$, 1330*f*.
—, **4(and 6)-glucuronoside-***, and derivs., 582*g*.
—, **3-methyl-**, D-, 4636*e*.
—, **2,3,4,6-tetramethyl-**, D-, 586*a*.
—, **2,3,4-trimethyl-**, 1324*b*.
—, **2,3,4(and 2,3,6)-trimethyl-**, 583*b*.
—, **2,3,6-trimethyl-**, D-, 586*a*.
**Galactose anilide***, D-, prepn. of, 7906*c*.
—, **2,4-dimethyl-***, 583*f*.
—, **2,3,4,6-tetramethyl-***, 581*bf*, 5009*g*.
D-, 586*a*.
**Galactose phosphate**, phosphate bonds in, equil. values for, 6266*c*.
**Galactosidases**. (See also *Lactases*.)
in *Drosophila*, 322*i*.
**Galactoside, benzyl 2,3,4,6-tetramethyl-**, D-, 2954*c*.
—, **8-hydroxy-1-anthraquinonyl**, and tetraacetate, 5019*h*.
—, **methyl**, α-D- and β-D-, affinities of, for cuprammonium, 3368*e*.
—, **methyl 4,6-benzylidene-**, α-D-, *p*-toluenesulfonates, 1727*i*.
—, **methyl 4,6-benzylidene-3-methyl-**, α-D-, 4636*b*.
—, **methyl 4,6-benzylidene-3-methyl-2-*p*-tolylsulfonyl-**, α-D-, 4636*b*.
—, **methyl 4,6-benzylidene-2-*p*-tolylsulfonyl-**, α-D-, 4636*a*.
—, **methyl 4,6-(cyclohexylmethylene)-3-methyl-**, α-D-, 4636*b*.
—, **methyl 2-desoxy-***, α-D- and β-D-, 1727*c*.
—, **methyl 2-desoxy-4,6-benzal-***, α-D- and β-D-, 1727*c*.
—, **methyl 2-desoxy-4,6-benzal-3-methyl-***, α-D-, 1727*e*.
—, **methyl 2-desoxy-4,6-ditosyl-3-methyl-***, α-D-, 1727*f*.
—, **methyl 2-desoxy-4,6-hexahydrobenzal-***, α-D-, 1727*d*.
—, **methyl 2-desoxy-4,6-hexahydrobenzal-3-methyl-***, α-D-, 1727*e*.
—, **methyl 2-desoxy-6-iodo-3-methyl-***, α-D-, 1727*g*.
—, **methyl 2-desoxy-3-methyl-***, α-D-, 1727*e*.
—, **methyl 2-desoxy-3-tosyl-4,6-benzal-***, α-D-, 1727*c*.
—, **methyl 2-desoxy-4-tosyl-6-iodo-3-methyl-***, α-D-, 1727*f*.
—, **methyl 2-desoxy-6-tosyl-3-methyl-***, α-D-, 1727*g*.
—, **methyl 2,4-diacetyl-3-methyl-**, α-D-, 4636*c*.
—, **methyl 2,4-diacetyl-3-methyl-6-*p*-tolylsulfonyl-**, α-D-, 4636*d*.
—, **methyl 2,4-diacetyl-3-(1-triphenylmethyl-**, α-D-,
—, **methyl dimethyl-**, 583*f*.

——, **methyl 2,4-dimethyl-**, β-D-, 583*f*.
——, **methyl 3-methyl-**, α-D-, 4636*b*.
——, **methyl 2,3,4,6-tetramethyl-**, 5009*g*.
D-, 581*bf*.
——, **methyl 2,3,4(and 2,3,6)-trimethyl-**, 583*a*.
——, **methyl 2,3,6-trimethyl-**, D-, 585*i*.

fluocculation by $H_2SO_4$, 2070*i*.
refractive index of suspensions of, 4078*c*.
**Gambusia affinis**, insecticide testing on, 7627*e*.
**Gametes** (*malarial*). See *Plasmodium (protozoans.)*
**Gamma acid**. See *1-Naphthol-3-sulfonic acid, 7-amino-*.
**Gamma benzene hexachloride**. See *Cyclohexane, 1,2,3,4,5,6-hexachloro-*.
**Gamma-rays**. (See also *Radioactivity; X-rays.*)
absorption by phosphate glass, 5163*h*.
absorption coeffs. for, of sedimentary rocks, 7931*h*.
absorption of, 1646*i*.

from aluminum, Cu, Au, Na, Th C'' and V, 935*a*.
from annihilation of positrons from $Cu^{64}$, 4948*b*.
from anticathode of electron accelerator, neutrons from Be produced by, 7811*f*.
from antimony ($Sb^{124}$), 4121*a*.
from antimony ($Sb^{125}$), $Cr^{51}$, $I^{131}$ and $Te^{132}$, 6913*c*.
from antimony ($Sb^{128}$), $Pr^{142}$ and $Rh^{106}$, 8267*i*.
from argon by proton bombardment, 2506*e*.
from arsenic ($As^{71}$), 936*e*.
from arsenic ($As^{76}$), 6910*h*.
from astatine ($At^{210}$), 4123*i*.
from barium ($Ba^{140}$), 1261*a*.
from barium by neutron bombardment, 4120*f*.
from beryllium ($Be^{8}$), 484*d*.
beryllium bombarded by, angular distribution of neutrons from, 8855*bc*.
$Li^{8}$ and protons from, 4093*g*.
theory of, 4117*e*.
from beryllium by deuteron action, 4093*fg*, 4561*h*, 8876*ab*.
from betatrons, and their use, 8850*b*.
bombardment with, 936*f*.
of Be and D, energy of neutrons from, 6506*d*.
of Be and D, energy release in, 8864*d*.
resonance in neutron emission in, 1645*i*.
thresholds for neutron emission in, 8864*d*.
thresholds for photonuclear reactions in, 4115*c*.
yield of neutrons in, 1260*e*.
yields from, 4116*a*.
from boron by neutron bombardment, 3283*h*.
from bromine ($Br^{77}$), 485*i*.
from bromine ($Br^{80}$), 5295*g*.
from cadmium by neutron bombardment, energy of, 6910*i*.
from cadmium ($Cd^{114}$), 6911*b*.
from cadmium ($Cd^{115}$), $Hf^{181}$ and $In^{115}$, 4122*b*.
from carbon by deuteron action, 4093*h*, 5294*d*.
from carbon ($C^{10}$) and $O^{14}$, 3284*d*.
from cerium ($Ce^{141}$), 6913*i*.
from cerium ($Ce^{137}$ and $Ce^{139}$) and $La^{138}$, 486*f*.
from cerium ($Ce^{141}$), $Se^{80}$ and $Tb^{146}$, 4094*d*.
from cesium ($Cs^{129}$), 4949*g*, 8266*i*.
from cesium ($Cs^{134}$), $Au^{199}$ and $I^{124}$, 8268*d*.
from cobalt ($Co^{60}$) and $Na^{22}$, 8872*d*.
from cobalt ($Co^{60}$) and $Zn^{65}$, 8867*e*.
from cobalt ($Co^{60}$) decay to $Ni^{60}$, 2506*g*.
collision with nucleons, cross section for single production of mesotrons by, 8260*d*.
collision with nucleons, polarization of mesotrons produced by, 8260*c*.
from columbium ($Cb^{95}$), 4120*h*.
from columbium ($Cb^{96}$), 6507*h*.
from columbium ($Cb^{96}$), $Mo^{98}$, $Os^{191}$, $Os^{193}$ and $Re^{180}$, 487*c*.
Compton scattering of— *Compton effect*.
from copper, 7329*i*.
counter irradiated with, aftereffect of discharge in, 5290*d*.
counter irradiated with, discharge in, 5289*h*.
counters for—see *Counters*.
counting of collimated and uncollimated, effect of absorber position on, 3282*a*.
counting, with crystal fluorescence counter, 2861*c*.
[illegible] with scintillation counters, 7812
"cross-over transitions" in emission of, from $Cl^{38}$, $Co^{60}$, $Br^{82}$ and $Sb^{124}$, 4119*b*.
cross section for neutron emission by action of, structure of light nuclei and, 7326*d*.
cross section for, of C, 484*h*.
cross sections for, 3283*e*, 8267*a*.
in defect detection, 8215*i*.
detection of, instruments for, for health protection, 7326*e*.
detection of, with Tl-activated NaI crystals, 4111*cb*.
deuterium disintegration by, angular distribution of neutrons from, [illegible]
deuteron [illegible]ng energy from, 8862*c*.
neutron-proton scattering and, 8862*e*.
neutrons and protons from, 9284.
from $Na^{24}$, 4601*h*.
from deuteron bombardments, 4113*a*.
Doppler broadening of lines of, from deuteron bombardment of Be, 4117*b*.
effect on sulfhydryl enzymes, 6682*e*.
effect on water, 3709*c*.
from *K*-electron capture in heavy nuclei, 6911*g*.
emission of, in absorption of mesotrons, 6908*g*.
angular correlation between emission of $\alpha$-particles and, 7810*h*.
angular correlation between successive emission of $\beta$-rays and, 4093*i*
angular correlation in successive, 1642*i*.
angular correlation in successive emission of $\beta$- and $\gamma$-rays and, 933*f*.
breaking of chem. bond of atom in, by neutron action, 7332*h*.
correlation between polarization and direction of, emitted successively, 1643*a*.
during $\beta$-decay, 3280*c*, 4094*e*, 8860*h*.
following $\alpha$-rays, angular correlations in, in $B^{10}(n,\alpha)Li^{7}$ reaction, 5294*a*.
following $\beta$-decay, 3280*e*.
-emitting radioelement, integral dose received from uniformly distributed, 3282*e*.
energy of, from bombardment of $CaF_2$ by protons, 4091*a*.
from $Co^{60}$ and $Zn^{65}$, measurement with magnetic-lens spectrometer, 4119*f*.
emitted on neutron capture, 8861*a*.
emitted per $\beta$-particle by radioelements, 4091*b*.
instrument for detg., 6505*c*.
ionization chamber for measurement of, P 44*i*, 4092*f*.
measurement of, 35*a*, 5282*a*, 7329*g*.
from erbium and ytterbium by neutron action, 4948*f*.
exposure to, max. for, and protection therefrom, 4129*a*.
from fission products, bombardment of $D_2O$ and Be with, 4090*i*.
from fluorine by proton action, 36*c*, 1260*a*.
from fluorine ($F^{19}$) and $He^{4}$, 484*c*.
from gadolinium and Tb, 4949*i*.
from gallium ($Ga^{72}$), $Au^{198}$, $Rb^{86}$ and $Sc^{46}$, 1647*a*.
from germanium ($Ge^{69}$), 936*b*.
from germanium ($Ge^{77}$), 5295*e*.
from gold and Pt isotopes, 4125*b*.
from gold ($Au^{198}$), 4122*i*, 4124*g*, 4950*d*.
from gold ($Au^{199}$) and $Pt^{193}$, 37*a*.
from granite, 4128*e*.
from hafnium, 4124*ac*.
from hydrogen by neutron action, 1259*h*.
internal conversion of, 479*d*, 6075*i*.
in $Br^{80}$, efficiency of, 4563*g*.
in heavy elements, fluorescence excitation by, 3285*i*.
in $In^{111}$, 4949*d*.
magnetic, 4100*b*.
in *K*-shell, 4565*a*, 6073*e*.
in $Te^{125}$, 4123*i*.
in Th C and Ra D, *L* radiation following, 3286*b*.
internal conversion of magnetic multipole radiation, 3703*f*, 4108*e*.
internally-converted, from heavy elements, 4091*g*.
internal pair conversion coeffs. of, for Po, 487*b*.
from iodine, 8872*g*.
from iodine ($I^{131}$), 2089*f*, 3285*d*, 4948*e*, 5296*d*.
iodine liberation from org. iodides by, 8871*i*.
from ionium, 3287*g*.
ionization by, of A, 2861*d*.
ions produced in air by, after ultraviolet irradiation, 8258*h*.
from krypton ($Kr^{88}$), 8267*e*.
from lead ($Pb^{202}$) and $Hg^{203}$, 4125*e*.
from lithium from decay of $Be^{7}$, 8866*c*.
by proton action, 4093*h*.
resonance voltage for production of, by proton action, 4947*c*.
from lithium ($Li^{7}$), angular distribution of, 8869*e*.
from lutetium ($Lu^{177}$), 7330*b*.
from magnesium by $\alpha$-ray bombardment, 1646*i*.
from manganese ($Mn^{56}$) and $V^{52}$, 6507*e*.
from mercury ($Hg^{203}$), 7330*f*.
from mesotron production by bombardment of C and protons with, threshold energy for, 4561*c*.
from molybdenum, 8873*a*.
from molybdenum by proton bombardment, 1647*c*, 2089*d*.
from molybdenum, W and V, 8872*c*.
from neodymium ($Nd^{141}$), 6507*i*.
neutron detection in presence of, app. for, 4089*i*.
from nickel ($Ni^{65}$), 7812*g*, 8867*e*.
from nucleon-nucleon collisions, 6905*g*, 8853*f*.
oxidation by, of $Fe^{++}$ in aq. soln., 2508*a*.
from palladium ($Pd^{106}$), angular correlation between successive, 8867*h*.
petroleum-well-bore logging by, P 3603*h*.
from polonium, 3707*g*.
from potassium ($K^{40}$), 485*dg*.
from praseodymium ($Pr^{142}$), 4122*b*.
production of, microwave accelerator for, 4095*i*.
from proton bombardment of $Al^{27}$ and $F^{19}$, resonance voltages for, 3283*d*.
from proton bombardment of nuclei, 4115*b*, 8860*g*.
from radium (B + C), 8269*f*.
from radium C, absorption in Pb, 2505*d*.
from radium C', 4565*a*.
from radium, concrete as protective barrier for, 8871*d*.
from radium D, measurement of, 4131*c*.
from rhenium ($Re^{186}$) and $Tm^{170}$, 8269*a*.
from rubidium, 4122*f*.
from scandium ($Sc^{46}$), 3285*b*.
from scandium ($Sc^{47}$) and $V^{47}$, 6507*f*.
scattering of, by C and Cu, 8266*a*.
scattering of, recording app. for measuring, 4091*c*.
scintillating sensitivity of org. compds. to, 4111*e*.
secondary—see also "Bremsstrahlung" under *Radiation*.
from selenium by $\alpha$-ray action, 936*i*.
from selenium ($Se^{75}$), 4120*e*.
-sensitive fluorescent materials, P 500*g*.
from silver ($Ag^{110}$), 4949*f*.
from sodium ($Na^{24}$), 8853*g*.
from sodium ($Na^{24}$) and $V^{48}$, 4563*c*.
from sodium ($Na^{24}$), scattering of, 484*i*.
spectra, positron analysis of, 4091*a*.
spectrometers for—see *Spectrometers*.
spectroscopy of, 4096*g*.
from tantalum ($Ta^{182}$), 6913*i*.
from tellurium ($Te^{121}$), 3285*e*.
from thallium, 4564*e*.
from thorium C and ThC', 1648*c*.
from thorium C'', angular distribution of pairs produced by, 5297*h*.
from thorium C'' decay, 3286*e*.
from thulium isotopes, 5297*a*.
tin bombarded by, In from, 8267*h*.
from tin ($Sn^{123}$), 8869*c*.
transition effects of, and their influence on ionization current, 5282*d*.
from tungsten ($W^{187}$), 4124*e*.
uranium bombarded by, ternary fission of, 8269*d*.
from uranium ($U^{235}$), 8872*f*.
from uranium Y, 3286*i*.
from xenon ($Xe^{131}$), 5296*d*.
zinc sulfide excited by, luminescence of, 7826*d*.

**Gammarus**, compn. of, of Black Sea, 6746*b*.
*pulex*, respiratory exchange of, compared with *Niphargus virei*, 5873*b*.
**Gammexane**. See *Cyclohexane, 1,2,3,4,5,6-hexachloro-*.

from peat, 5927*a*, 8118*e*.
from petroleum by oxidative reforming, 8125*a*.
from petroleum electropyrolysis, for cutting and welding steel, 4838*f*.
phase equilibria of coal, at high pressures and low temps., 3700*a*.
phenol-splitting microörganisms from, 8432*h*.
plant operation in relation to utilization, 3171*e*.
in potato preservation, 6329*g*.
pressure and vol. control of, governors for, 8645*g*.
problems in making, 6807*e*.
producer gas, $NH_3$, cyanogen and HCN in, and their detn., 4833*d*.
producer gas, manuf. of, P 7669*h*.
metering in horizontal main, 6395*c*.
particle-size distribution of dust in, 8644*c*.
peat charcoal as fuel for making, 2407*e*.
from run-of-mine coal, 6393*e*.
as source of fuel supply, 2406*e*.
water detn. in, 3171*h*, 8119*h*.
producers for, 1168*h*, P 7669*a*.
for automotive use, 1547*fh*.
combustion in, 3592*c*.
producer (slagging) for, for melting foundry Fe, 4611*h*.
propane-air mixt., 2405*f*.
purification of—see also *Iron oxides*, 8644*i*.
purification of, 3595*hi*, P 7669*as*,
app. for, P 6997*c*.
by catalysis, 2172*ad*.

*purification of*, effect of sawdust size and moisture on flow resistant in oxide-sawdust mixts. for, 5173*e*.
with fluidized solids, 3172*d*.
hardening of oxide in, 3173*f*.
by liquids, 3172*b*, 7211*e*.
oxide manuf. for, 3596*b*.
prepn. and use of pelleted oxides for, 4832*i*, 4833*b*.
with water spray, 8119*g*.
purification of brown-coal-generator, with gas liquor, 9416*e*.
quality and output from generators, effect of moisture and fuel size on, 3590*h*.
quality control of, 7666*a*.
quality indicator for, 8120*a*.
refractories in industry of, 1543*b*, 2392*b*, 3582*f*, 3583*e*.
removal of $C_2H_6$ and S from, 4833*g*.
research on, 4909*b*, 5172*b*, 8118*gh*.
research on, in French industry, 8119*a*.
retorts, air-borne sealing of, 3594*i*.
maintenance of, 6807*f*.
output from, 1946*d*.
selection of, 8118*b*.
review on, 4788*di*.
from rubber by pyrolysis at high pressure, 5169*c*.
scrubbing or washing, economics of, 3993*b*.
with oil-water dispersion, P 1552*f*.
in plate and bell-jar washers, 1945*i*.
from sewage or sewage sludge, design and operation of plant for production of, 8586*c*.
in production of dried grass, 3131*a*.
utilization of, 6767*c*.
from shale distn., 3177*i*, 7671*g*.
from shale, O detn. in, 3744*g*.
from shales of Baltic area, 9421*g*.
from solid fuel, 4831*f*.
from solid fuels at high pressure with catalysts, P 6397*c*.
in steel industry, 4193*h*.
from strawboard-waste decompn., 848*f*.
sulfur in, 3170*g*.
sulfur org. compd. removal and detn. in, 6112*f*.
sulfur recovery from, 4833*e*.
sulfur removal from, P 3791*i*, 836*g*, P 8396*b*, 3169*i*, P 3599*b*, 5571*e*, P 8122*a*, 9414*b*.
sulfur removal from, porosity of C catalysts for, 2080*c*.
for synthesis, P 4835*h*, 4836*b*.
Bur. of Mines report on, 2397*c*.
from coking gas, 3595*b*.
compn. effect on catalysts in hydrogenation of CO, 2398*g*, 2400*eg*.
from hydrocarbon gases, P 7213*b*.
hydrocarbons in, effect on hydrogenation of CO, 2406*e*.
manuf. of, 378*e*, P 8120*h*.
from $CH_4$, P 3174*h*.
from $CH_4$ or natural gas, P 4446*h*.
from $CH_4$, thermodynamics of, 7200*a*.
from oil shale, P 1170*c*.
from O and steam gasification of powd. coal, 378*a*, 6393*d*.
by O gasification of anthracite, 378*e*.
S removal from, P 7214*c*.
tar detn. in, app. for, 5926*h*.
tar emulsions from, breaking of, P 4451*f*.
from tar oils, P 1952*a*.
tar removal from, elec. app. for, 1551*b*.
tar removal from, heating of insulators of electrostatic precipitators for, 7211*h*.
temp. of, measurement of, 6394*c*.
turbines—see *Turbines*.
by underground gasification of coal, 3169*bc*, 3993*d*, P 3994*d*, 4831*c*, 5172*a*, 7210*g*, 9414*h*.
of lignite, 7210*f*.
of peat-lignite, 3594*g*.
of solid fuels, P 1170*g*.
use of, characteristics of, 3989*f*.
in foundries, 6808*a*.
by Liverpool industry, 5924*g*.
viscosity corrections in flow formulas, 5172*c*.
viscosity detn. of, 3596*g*.
wash oils—see *Absorption oils*.
wastes (cyanide-contg.) from, treatment of, P 3126*h*.
water gas, P 3176*f*, P 4837*a*, 5571*bg*, 5924*h*, P 7212*f*.
carbureted, from hydrocarbon oil, 378*f*, 836*e*.
catalyst for making, P 3599*a*.
chemical manuf. from, 8646*f*.
clinkering in generators for, ash fusibility and, 6394*e*.
conversion at high pressure, 1944*i*, 1945*abda*.
*water gas*, cracking oil to make higher B.t.u., 5571*a*.
fluidized-solid technique in making, P 1552*c*.
generator for, P 6397*d*.
heat transfer in app. for catalytic synthesis of, 2343*a*.
II synthesis by conversion of, plant design for, 5571*a*.
manuf. in reducing Fe ores with lignite, P 5727*g*.
by $CH_4$ reaction with $CO_2$, 1944*fg*, 4445*g*.
$CH_4$ synthesis from, 2402*a*.
methanol synthesis from—see *Methanol*.
mixt. with retort gas, 2405*c*.
from powd. coal, P 5928*d*.
preventing ignition of blow gases from plant for, P 9419*g*.
SiC linings in generators for, 378*g*.
S detn. in, 1169*b*.
S removal from, 1946*b*, 2401*e*.
temps. in generators for, 1550*h*.
water-gas reaction, 1945*fg*.
water-gas reaction, mechanism of, 378*g*.
from wood, 4832*h*, 6392*e*.
from wood, methanol extn. from, 7665*h*.
yield calcn. of, 7665*f*.
**Gas, natural**, absorption of $C_2H_6$ and $C_3H_8$ from, and dehydration of, at Dubach, La., 7217*b*.
absorption of 2-methylpropane and $C_3H_8$ from, and dehydration of, 4453*a*.
absorption plant for, and compn. and recovery of, 2412*d*.
of Alberta, 3989*f*, 5924*b*, 8319*h*.
argon, He and N ratios in, 528*e*.
book: Engineering, 1170*d*.
burners for—see *Burners*.
of California (Kern Co.), 4607*e*.
carbon black from—see *Carbon*.
carbon dioxide recovery from, 1169*a*, 1882*d*, 2343*b*.
chemicals from, 3993*e*, 6336*g*, 8643*e*.
chemicals from, economics of plant location and, 5175*h*.
compressibility of, 8643*e*.
condensate reservoirs, phase behavior of fluids, cycling and estg. hydrocarbon recoveries in, and review on gas hydrates, 7672*e*.
condensate wells, corrosion control by alkalies and $Na_2CrO_4$ in, 6813*a*, 8651*d*.
corrosion control by NaOH and $Na_2CrO_4$ or $Na_2Cr_2O_7$ in (reference should be No. 5), 7216*i*.
corrosion in, $CO_2$ and pH of well waters in relation to, 3599*e*.
corrosion prevention in, 551*f*.
kinetics of corrosion in, 8250*i*.
polar constituent adsorption from liquid-hydrocarbon phase of, 1951*i*.
recovering liquefiable hydrocarbons from fluids from high-pressure, P 8662*h*.
cycling plant for, 1550*g*.
cycling plant for, and absorption of hydrocarbons from, 2412*e*.
density of, measurement of, 1946*a*.
drying and purification of, 836*f*, 5571*d*.
drying of, 836*h*, 3171*i*, 5924*i*, P 9419*h*.
effect on fruit trees, 5830*b*.
entrained-material removal from, 5571*g*.
entropy and heat content of, effect of pressure on, 5576*b*.
ethane recovery from, 7210*i*.
extn. of $CO_2$ and $H_2S$ from, 2711*g*, 5516*c*.
extn. of $H_2S$ and absorption of hydrocarbons from, 8119*b*.
firing with—see *Firing*.
flame characteristics and utilization of, 3989*f*.
flow of, in limestone oil reservoirs, 8651*h*.
of France (Pechelbronn), 8319*g*.
fuel gas as substitute for, for peak load demands, 4832*b*.
gasoline—see *Gasoline*.
in Hungary, 8073*b*.
hydrates of, humidity and, 8643*d*.
pipe-line operation and, 3172*b*.
prevention of formation in high-pressure gas lines, 4832*f*.
hydrocarbon absorption from, 7216*h*, 7220*f*.
hydrogen manuf. from steam and, 5171*a*, P 6398*a*.
hydrogen sulfide detn. in, 835*e*.
hydrogen sulfide removal from, and sepn. of gasoline and liquefied petroleum gas from, 3180*a*.
industry in 1946, 2127*e*.
leakage tracer for, $C_2H_2$ as, 7211*b*, 8646*a*.
liquefied petroleum gas as supplement for, 836*c*.
liquid fuels from, bibliography on, 9414*f*.
liquid hydrocarbon recovery from, at Silsbee, Tex., 7220*g*.
in lubricant deterioration and deposit formation in motored engines, 4454*b*.
of Manitoba (southern), 5347*c*.
in metal cutting, 7394*b*.
meters—see *Meters*.
mixing coal gas with, 4831*e*.
mixts. with black oil or well condensate, volumetric and viscosity studies of, 2760*a*.
with manufd. gases, interchangeability of, 836*i*.
with propane and air, storage and utilization of, 5926*c*.
with propane as fuel, 4831*c*.
in New York and Penna. Oriskany sandstone, 4190*h*.
nitrogen removal from, 5924*f*, 6393*f*, P 7670*b*.
odor and its removal from, 7666*b*.
oil-gas interchangeability with, 3992*h*, 4831*h*.
oil gas supplement for, 1550*e*.
origin of, cosmic or inorg., 839*f*.
in petroleum recovery from gas-injections and reservoirs, 8651*i*.
phase equil. in, at low temp., 2833*g*.
pipes for—see *Gas pipes*.
producing formations, measuring permeability and porosity of, 3599*g*.
prospecting for, in Fla., 6126*i*.
by geophys. means, P 4456*e*.
by geothermal gradient in Trans-Terek plain, 1951*e*.
by waxlike substance, P 5581*h*.
purification of, P 7669*ce*.
pyrolysis of, aromatic hydrocarbons by, P 5928*i*.
recovery (secondary) of, acidization by $NH_4NO_3$-activated HF or HCl in, P 5179*dg*.
reforming of, by O oil gas process, 8643*g*.
with steam and coke, 3594*f*.
in water-gas sets, 1947*a*, 6393*e*, 7666*c*.
reinjection into petroleum reservoirs, oil displacement by, and oil vaporization into, 8121*ghi*.
removal from coal seams, 5923*e*.
reviews on, 1952*e*, 6398*ef*.
in Sarmatian strata of Azov Sea region, genesis of, 5710*i*.
in sedimentary complex of Ufa, Tataria, 6954*e*.
storage of, as hydrate, 1946*c*.
storage of, in depleted fields, 3169*c*.
sweetening and hydrocarbon recovery from, at Slaughter plant, Texas, 8657*d*.
synthesis-gas manuf. from, 1944*i*, P 4446*h*, P 4836*e*.
synthesis-gas manuf. from, thermodynamics of, 7200*a*.
of Texas (Sheridan field), 4451*i*.
thiol detn. in, 5924*c*.
of Trinity River Tributary area in Okla. and Tex., 4607*i*.
United States reserves of, 3992*g*.
volcanic—see *Volcanoes*.
vol. correction for compressibility and temp., 8645*e*.
waters (underground) in fields of, of Saratov, U.S.S.R., 4192*b*.
wells, alk. earth salts in waters from, 6371*h*.
calcns. of operation of, 1550*i*.
corrosion inhibition by $H_2S$ in, P 3185*i*.
corrosion inhibitors for, P 5002*c*.
drilling fluids or muds for—see *Drilling fluids or muds*.
galvanic corrosion in fluids of, 2918*h*.
hydrocarbon detn. in strata of deep, app. for, P 1955*a*.
sealing porous strata in, phenol-HCHO resin dispersions for, P 2421*e*.
wells and flow lines, corrosion by $CO_2$ in, prevention with S compds., P 7221*g*.
**Gas appliances**, corrosion resistance of, measurement of, 6963*a*.
for petroleum liquefied gas, pressure regulation in, 3600*g*.
**Gas black.** See "black" under *Carbon*.
**Gas constant**, 4058*i*.
**Gases.** (See also *Fluids; Fumes; Smoke; Vapors*.)
absorbents for—see *Absorbents*.
absorption app. for—see *Absorption apparatus*.
absorption of—see *Absorption; Absorption (biological)*.

acetylene removal from—see *Acetylene*.
adiabatic exponent for, 3677*f*.
adsorbed—see *Adsorbed substances*.
adsorbents for—see *Adsorbents*.
adsorption of—see *Adsorption*.
air pollution from industrial, public health and, 7614*c*.
analysis for dust and water and test metering of, 972*b*.
analysis (magnetic) of, 4836*i*.
analysis of, 6104*i*, 8962*b*, 8970*i*.
absorption app. for, P 3249*g*.
app. for—see also *Orsat apparatus*.
app. for, P 380*i*, P 3249*g*, P 4907*d*, 5234*g*, P 6010*fg*, 8215*f*, P 8758*cd*.
app. for, in automatic control systems, 8213*c*.
app. for raising and lowering Hg in, 9111*i*.
Blacet-Leighton app. for micro, 6006*f*.
infrared app. for, 4054*g*, 5666*f*, 6869*i*, 8297*h*.
with infrared rays, 2759*e*, P 6873*d*.
in liquid food products, app. for, 4779*d*.
mass spectrometer for continuous, 7270*f*.
with mass spectrometer, glass diaphragm leaks for, 2822*d*.
Hg sealing bulb closures for app. for, 4054*h*.
from metals, 5646*e*.
micro app. for, 445*g*, 8749*g*.
Orsat app. of petroleum industry in, 7673*d*.
oxidizing bacterial cultures in, P 6114*f*.
pneumatic autodetector for infrared, 8216*g*.
semimicro app. for, 910*c*.
in $H_2SO_4$ manuf., 8621*g*.
by thermal cond., P 6543*a*.
analysis of O compd.-free, for O and water vapor, 971*i*.
atomic functions and viscosities of, 8774*f*.
banana storage in, 3535*g*.
benzene detn. in, contg. butadiene and higher olefins, 5343*d*.
blast-furnace—see *Gas, fuel (manufactured)*.
blood—see *Blood*.
blowers for—see *Blowers*.
bombardment of, with deuterons and $\alpha$-rays in cyclotron, 4090*i*.
books: Tables, 478*g*; Die Behandlung und Reindarstellung von, 2856*e*; Collisions of Electrons and Ions with Gaseous Atoms, 8283*d*; Over de physische gasanalyse volgens de warmtegeleidingsmethode, 8312*f*.
Bose-Einstein, 4913*h*.
bubbler for, 4903*a*.
bubbles—see *Bubbles*.
burets—see *Burets*.
butadiene detn. in, 7758*b*.
carbon dioxide detn. in, 6109*h*.
carbon dioxide removal from mixt. of, P 4450*d*.
carbon monoxide detn. in, with thermoelec. analyzer, P 7870*h*.
centrifuge for—see *Centrifuges*.
in chromium electroplates deposited from sulfate baths, 8901*i*.
circulators for—see *Circulators*.
coke-oven—see *Gas, fuel (manufactured)*; for gas travel in coke ovens see *Coke ovens*.
collection from anaerobic fermentation, app. for, 1077*c*.
combustibles in, detection or detn. of—see *Combustibles*.
combustion—see also *Flue gases*.
combustion, centrifuge for catalyst in, P 914*e*.
from coal beds of Mongolian S.S.R., $NH_4Cl$ sublimed crystals from, 6117*a*.
contg. S oxides, silica-smoke effect on dewpoint of, 2403*h*.
equil. compn. and thermodynamic properties of, 8119*e*.
furnace for producing high-pressure, P 4449*g*.
heat-exchange app. using, P 6874*f*.
inert, in synthetic resin and paint plants, 8177*a*.
of kerosene, enthalpies, entropies and heat capacities of, and their mixts. with air, 3671*d*.
from paraffins, 3618*e*.
removal without catalyst entrainment in hydrocarbon conversion, P 2452*b*.
thermodynamic properties of, 894*d*.
combustion of, mechanism of, 7663*d*.
combustion wave development in flowing, 4467*b*.
compn. of, app. for indicating changes in, P 3176*c*.
compressed—see also *Compressors; Cylinders*.
compressed, balloons or tires for, P 5224*c*.
compressed, theory of thermal conductance and viscosity of, 4004*g*.
compressibility of—see *Compressibility*.
compression of—see *Compression*.
compressors for—see *Compressors*.
condensed permanent, quantum theory of, 3678*e*.
contact with liquids, P 7760*d*.
contact with liquids, app. for effecting, P 1228*h*, P 2048*de*, P 5237*cf*, P 5650*a*, P 7676*h*, P 8218*e*, P 8759*b*.
contact with solids, P 387*g*, P 389*d*, P 6476*h*.
contact with solids, app. for effecting, P 6010*gh*.
containers for—see *Containers; Cylinders*.
cooling—see *Cooling*.
cooling app. for—see *Cooling apparatus*.
dehumidification of—see *Drying*.
density of—see *Density*.
desorption of—see *Desorption*.
detection in liquids, 7070*a*.
detection in pipe line, app. for, 7757*g*.
detection or detn. in air—see *Air*.
detn. of, 6943*h*.
in Al, 2120*de*.
in blood in heart disease, 9136*e*.
in steel (liquid), 4600*i*.
in steels, 8964*h*.
in water, 8961*i*.
detonation in—see *Detonation*.
dielec. properties of—see *Dielectric constants; Dielectric strength*; etc.
diffusion of—see *Diffusion*.
dispersion of—see *Dispersion*.
displacement from fibers and fabrics, measuring rate of, 854*e*.
drying—see *Drying*.
drying apparatus for—see *Drying apparatus*.
for drying citrus products, P 9295*b*.
dust removal from—see *Dust; Precipitation, electric*.
effect on activation of C from rice husks, 4834*f*.
on Sb evapn. and outgassing rates, 4066*h*.
on bronze, 532*h*.
on decompn. rate of $CaCO_3$, 2078*c*.
on Ni corrosion from steam condensate, 4996*e*.
on welds, 4996*h*.
effusion of—see *Effusion*.
elec. breakdown in, or discharge through—see *Electric discharge*.
elec. cond. of—see *Conductivity, electric*.
electrons in—see *Electrons; Electron tubes; Ions, gaseous*; etc.
energy (internal) of nonpolar, 7764*d*.
equation of state for—see *Equation of state*.
equil. with liquids under pressure, 8832*b*.
equil. with metals, 4917*d*.
equil. with metals, thermal-diffusion error in, 4932*i*.
evolution of, dismutation equil. for, 58*f*.
from powders in foam-rubber manuf., formula for, 6854*g*.
from supersatd. liquids, 6890*d*.
exhaust, from aircraft engines, water purification and recovery from, P 9310*i*.
from Diesel engine, sampling and aldehyde detn. in, 8646*c*.
effect on deposition and lubricant deterioration in motored engines, 4454*d*.
effect on lacquer and sludge deposition in engines, 5580*f*.
flame quenching in, P 1984*c*.
from internal-combustion engines, filter for HCHO removal from, 1547*i*.
expansion of—see *Expansion*.
from explosions—see *Explosions*.
explosions of—see *Explosions*.
extn. from plant sap or tissue, app. for, 8454*e*.
Faraday effect in—see "magnetic" under *Optical rotation*.
feeding apparatus for—see *Feeding apparatus*.
filters for—see *Filters*.
fire extinguishing in liquids with noncombustible, 6417*f*.
flame—see *Flames*.
flow of—see *Flow*.
flue—see *Flue gases*.
formation of, in doughs, effect of metals and salts on, 4781*e*.
endothermic reactions with, 6060*g*.
during org. reactions, app. for measurement of, 8749*h*.
in ruminal ingesta, effect of antifermentatives on, 2693*i*.
friction (internal) in, sound absorption and, 6878*f*.
in fruits, extn. and analysis of, 4350*b*.
fugacities in mixts. of, 2057*a*.
fugacity of associating, 3268*h*.
general ideal relativistic, 916*e*.
-generating substances, hydrophosphite-contg. flameless nitrate or nitro compd., P 5190*d*.
-generating substances, nondetonating compns., P 852*d*.
generators for—see *Generators*.
heat capacity of—see *Heat capacity*.
heat cond. of—see *Conductivity, thermal*.
heaters for—see *Furnaces; Heaters*.
heat exchange or transfer in—see *Heat*.
heating of—see *Heating*.
for heat-treatment of metals, manuf. of, P 6811*f*.
humidification of—see *Humidification*.
humidity of—see *Humidity*.
hydrofluoric acid removal from, agents for, P 9300*f*.
hydrogen cyanide removal from—see *Hydrocyanic acid*.
hydrogen sulfide detn. in, 7375*b*.
hydrogen sulfide removal from—see *Hydrogen sulfide*.
ignition of—see *Ignition*.
imperfect, after Fermi's model, 4530*d*.
inert—see *Helium group gases* and "protective" below.
inflammability of—see *Inflammability*.
interfaces of, reflection of shock wave at, 3677*e*.
in intestinal flatus, effect of gaseous transfer between colon and blood stream on, 298*b*.
ionization of—see *Ionization, gaseous*.
ionized—see also *Ions, gaseous*.
ions of—see *Ions, gaseous*.
kinetic theory of—see *Kinetic theory*.
law of, derivation from Boyle's and Charles' law, 6015*g*.
laws of, lab. expt. to illustrate deviation from ideal, 6021*c*.
light scattered by, depolarization of, 7281*i*.
liquefaction of—see *Liquefaction*.
liquefied, measurement of viscosity of, 6024*b*.
liquefied, transferring measured quantities of, P 1229*a*.
magna, thermodynamics of, 8224*f*.
measuring app. for—see *Meters*.
measurement in creams and pastes, 2734*i*.
in metals—see *Metals*.
metals and, review on, 1638*a*.
meters—see *Meters*.
microwave spectroscopy of, 4559*i*.
mine—see *Mines*.
mixing app. for—see *Mixing apparatus*.
mixing of, in open-hearth furnace models, 7878*g*.
mixts. of inert, sepn. by flow through capillary networks, 6488*i*.
mixts. of, interpretation of states of, by semilogarithmic entropy-vol. diagrams, 4914*b*.
mixts. of, velocity of flames in, 8248*h*.
models for instruction, 4062*i*.
mol. wts. of, detn. of, 2055*i*.
neutron diffraction by, 5285*d*.
of nonspherical mols., 2nd virial coeff. of, 3677*c*.
noxious—see *Chemical warfare agents; Noxious substances*.
occlusion of—see *Occlusion*.
oil displacement from limestone cores and porous media by, 2757*c*.
in oil tankers, removal after discharge and detn. of explosibility, 8127*e*.
oxidation-inhibiting, for treatment of milk, P 4396*h*.
oxygen detn. in, 1286*a*, 3744*f*, 8963*d*.
for, P 7760*a*.
[illegible] as absorbent in, 4599*gi*.
oxygen removal from—see *Oxygen*.
partial pressure of—see *Partial pressure*.
partition between liquid hydrocarbons and $H_2O$, 7397*f*.
permeability of various substances to—see *Permeability*

from petroleum refining—see *Petroleum refining.*
poison—see *Chemical warfare agents; Poisons.*
polymerization of—see *Polymerization.*
precipitation of particles from—see *Precipitation, electric.*
pressure—see *Pressure.*
protective or inert, for annealing, 3327*g.*
annealing in, 3757*c.*
for bright annealing, producer for, P 2153*d.*
for bright heating of metals, P 4209*h.*
for casting Pd or Pd alloys, P 8289*g.*
for cementation of Fe and steel, P 5729*c.*
in chemical, paint and varnish industries, 7607*d.*
detn. in coal gas, 8971*a.*
for elec. furnaces, 45*c.*
indicator for O in furnace, 7303*c.*
in industry, 3117*g*, 7607*cd.*
manostatic valve for, 7270*e.*
manuf. of N for use as, P 104*f.*
for metals, 9001*d.*
review on, 332*f.*
for steel heat-treatment, 4992*a.*
pumps for—see *Pumps.*
purification of—see also *Centrifuges; Dust; Precipitation, electric; Scrubbers; Washing; Washing apparatus.*
purification of, P 7669*ce.*
by activated charcoal, 2744*b.*
from As, P and S, P 2382*a.*
from $AsH_3$, $H_2S$ and $PH_3$, P 2381*i.*
with fluidized materials, P 8218*h.*
in metallurgical plants, 1293*e.*
radiation scattering by inhomogeneous regions in, 6040*e.*
Raman spectra of—see *Raman effect.*
rare—see *Helium group gases.*
reaction kinetics of—see *Reaction kinetics.*
reactions of—see *Reactions.*
reactions of, catalysts for—see *Catalysts.*
real, Nernst theorem and theory of, 8773*d.*
recovery of acidic, P 308*h.*
release from liquids by solid surfaces, 2068*h.*
removal from Al alloys, 1702*a.*
from benzene, 8978*b.*
from brasses and bronzes, 1703*g.*
from fluids, cation-exchange resins for, P 5238*f.*
from low-boiling liquids, 8622*g.*
from molten Mg, P 3340*e.*
from nonferrous metals, N in, 5715*d.*
from oils, P 3186*c.*
from petroleum tanks, 3179*i.*
from transformer oil, app. for, P 394*b.*
removal of dissolved, from soil water, and app. therefor, 3951*e.*
requirements of molds for, 4332*i.*
residual—see *Electron tubes; Getters; Lamps, electric;* etc.
respirators for—see *Respirators.*
respiratory—see also *Air.*
respiratory, analysis of, 2268*b.*
respiratory, O detn. in, with syringe Pt cathode, 8963*i.*
sampling—see *Sampling.*
sampling app. for—see *Sampling apparatus.*
scrubbers—see *Scrubbers.*
sepn. of—see *Precipitation, electric; Separation;* and "thermal" under *Diffusion.*
separators for—see *Centrifuges; Separators.*
sewage—see *Sewage.*
from silage, effect of NaCl on, 1123*c.*
in soils—see *Soils.*
solid treatment with, P 8*d.*
solns. of—see *Solutions.*
sorbents for—see *Sorbents.*
sorption of—see *Sorption.*
sound in—see *Sound.*
spectrum of—see *Spectra.*
steady motion in perfect, equations for, 2055*h.*
in steel—see *Steel.*
sulfur dioxide recovery from—see *Sulfur dioxide.*
sulfur recovery or removal from *Sulfur.*
synthesis, manuf. of, 15366.
synthesis of—see *Synthesis.*
systems with elastomers, and transport phenomena in,
systems with fluidized solids, transfer in, 8646*i.*
systems with liquids, 4681.
systems with solids, thermal condv. in, 8634*h.*
temp.—see *Temperature.*
temp. regulators for—see *Thermoregulators.*
theory of, 8772*fh.*
thermal cond. of—see *Conductivity, thermal.*
thermal diffusion of—see *Diffusion.*
thermodynamics of—see *Thermodynamics.*
thermoösmosis of, through membranes, 4002*f.*
toxic—see *Chemical warfare agents; Poisons.*
transport properties of, and their mixts., 4531*a.*
transport properties of, calcn. of, 2832*i.*
transport properties of multicomponent mixts. of, 8774*c.*
transport properties of nonpolar, 2833*a.*
traps for—see *Traps.*
valves—see *Valves.*
viscosity of—see *Viscosity.*
volcanic—see *Volcanoes.*
vol. properties of, calcn. from crit. data, 2832*d.*
war—see *Chemical warfare agents.*
washing apparatus for—see *Scrubbers; Washing apparatus.*
washing of—see *Washing.*
waste, heat recovery from—see *Heat.*
from paper-pulp digestion, purification of, 8135*i.*
use of industrial, in CO-H manuf., 1994*i.*
waves in—see *Sound; Ultrasonic waves.*
work functions of surface coated with, 4093*d.*

**Gas exchange.** See *Respiration, animal; Respiration, plant.*

**Gasification.** See *Carbon dioxide; Carbonization; Coal; Gases; Peat.*

**Gaskets,** acrylonitrile-butadiene rubber compns. for, P 7260*d.*
from chlorinated polythene, P 9534*be.*
cork, P 2039*f.*
cork substitutes for, P 6466*i.*
from dimethyl silicone gums, P 2036*g.*
from factice and polyisobutylene, P 2040*b.*
fungicides for cork, 4803*i.*
leather waste-vinyl acetate plastic for, P 4506*b.*
methyl silicone elastomers contg. vinyl groups for, P 5625*c.*
polysulfide polymers for, P 5636*h.*
polytetramethylethylene oxide materials for, P 2038*f.*
from silicon rubbers, 9516*f.*
siloxane (methyl-) elastomers for, P 2808*d.*
from vinyl chloride polymers with vinylidene chloride, P 5638*b.*

**Gas liquor.** (See also *Ammonia, manufacture of; Ammoniacal liquor.*)
disposal of, 837*h.*
effluents from, treatment of, 6344*g.*
hydrogen-ion concn. of, carbonization temp. and, 8642*c.*
utilization in brown-coal-generator-gas purification, 9416*e.*
from wood-fed generators, 5925*g.*

**Gas masks.** See *Respirators.*

**Gas oil.** See *Hydrocarbon oils* and "solar oil" under *Petroleum.*

**Gasol,** by hydrogenation of CO, 2398*cfhi*, 2399*abcde.*

**Gasoline.** (See also *Hydrocarbon oils; Kogasin; Octane number; Petroleum refining.*)
acetal as blending agent in, P 2222*b.*
in air, max. allowable concn. of, 4401*a.*
by alkylation and isomerization with halide-ether complex catalyst, P 8666*c.*
by alkylation and polymerization of olefins, economics of making, 8654*c.*
alkylation of, alkyl benzenes by, P 1175*d.*
by alkylation of 2-methylpropane with amylenes, P 9430*e.*
of 2-methylpropane with butenes, P 4004*i.*
of paraffins with olefins, P 4458*d.*
amine (aromatic) blending agents for aviation, P 1561*g.*
amines (stabilized aromatic) for use in, P 251*f.*
anabasine distribution between water and, 6789*b.*
analysis of, for Br and Cl, burner for, 6474*d.*
for hydrocarbon types, 2413*gi*, 3998*d.*
for $H_2S$ and mercaptans, 6043*i.*
for naphthenes and paraffins, nomographs for, 5931*f.*
by Raman effect, 8124*s.*
antiknock-value improvement, mid-boiling point increases and tail-end volatility of, 9423*a.*
antiknock value of, effect of $C_6H_6$, $C_6H_6$ derivs. and alcs. on, 7674*b.*
effects of hydrocarbons, $PbEt_4$ and S compds. on, 7674*a.*
improvement of, and agents therefor, 5578*h.*
increasing by alc.-water-$PbEt_4$ injections, 383*h.*
Pb compd. mixts. with bromo- or chlorohydrocarbon scavengers for improvement of, P 8667*e.*
from superfractionation of naphtha, 1555*a.*
antioxidant concn. and stability of cracked, 5579*f.*
antioxidants for, *o*-alkyl-*p*-alkoxyphenols, P 3187*e.*
*p*-aminophenols as, P 3604*f.*
2,6-di-*tert*-butylphenol as, P 3459*f.*
halogen-contg. org. P compds., P 2765*c.*
by reductive alkylation of *p*-phenylenediamine with ketones, P 4005*f.*
antioxidants for cracked, and oxidation induction period in, 2414*ce.*
aromatic-hydrocarbon detn. in aromatized shale-oil, 5931*c.*
aromatic-hydrocarbon detn. in Puertollano-shale, and its fractions, and control of its aromatization, 5577*c.*
aromatic-hydrocarbon extn. from cracked, P 8670*d*
aromatic hydrocarbon recovery from, P 4002*i.*
by aromatization of hydrocarbons with heavy metal oxide-Zn spinal catalysts, P 6818*h.*
aromatization of paraffinic, with $Cr_2O_3$-$SiO_2$ catalyst and desulfurization with Cu wire, 3997*d.*
aromatization of Puertollano-shale, 5577*g.*
aviation, compounding uniform, 3998*i.*
aviation, or cyclopentane blending agent therefor, P 6818*g.*
brown-coal, recovery from gas liquor, 9416*g.*
butane permissible vols. in, 382*h.*
catalytic treatment and reforming of, silica-gel catalysts for, P 3604*c.*
from Chile (Manantiales) oil distn., d. and yield of, 3995*h.*
from coal-distn. products, 8641*f.*
from coking petroleum heavy residuum oil and tars, 9425*i.*
by coking petroleum tarry cracking residues on coke, P 389*d.*
combustion products from cracked and mercaptan-doped, effect on deposition and lubricant deterioration in motored engines, 4454*d.*
cracked, formic acid pretreatment and 2-methylpropane alkylation with, to antiknock gasoline, P 3189*b.*
olefin and S content reduction by $SiO_2$-$Al_2O_3$ catalytic heat-treatment, aviation blending stock by, P 4003*a.*
by Thermofor process, hydrocarbons in $C_6$ fraction of, 4453*b.*
by cracking and conversion, aviation satd., P 386*i.*
by cracking, by catalytic processes, 6814*c.*
with fluid MgO-$SiO_2$ catalysts, 8656*d.*
of gas oil, highly aromatic, P 386*i.*
of gas oil, testing $H_2SO_4$-activated clay catalyst for, P 8663*b.*
by Houdriflow process, 8124*d*, 8656*g.*
of hydrocarbon oils, clay catalysts for, P 6403*g.*
of hydrocarbon oils, increasing efficiency of catalyst in, P 8665*d.*
of hydrocarbon oils with Th phosphate catalysts, P 9428*g.*
of hydrocarbons in vapor phase, P 8663*c.*
of sour gas oil in Thermofor unit, 841*a*, 3180*c.*
by Thermofor process, increasing yield of, 4839*b.*
cracking of gas oil and reforming to highly aromatic aviation, P 389*f.*
by cracking of hydrocarbon oils and olefin content reduction with solid cracking catalysts, P 4003*i.*
by cracking with fluidized catalyst and reforming to aromatic oil, P 387*e.*
cycloölefin extn. from cracked olefinic, P 4003*g.*
cycloparaffin extractive distn. from naphthenic, P 3605*g.*

detection of water, etc., in, app. for, P 8760*b*.
2,3-dimethylbutane blending stock for aviation, P 5181*a*.
diphenylamine detection in, 2760*e*.
in disinfection of skin, 3525*c*.
from distn. (high-pressure) of coal, 5570*e*.
by distn. of cracked residuum distillate, P 4003*h*.
distn. of straight-run, and maintaining yields in cracking by solar-oil addns., 3601*g*.
ethyl and Me group removal from higher-boiling aromatics of, P 5584*b*.
from ethylene and $C_2H_6$ by polymerization, isomerization and alkylation, P 2763*g*.
evapn. losses of, 5931*g*.
fire-extinguishing system for plants using, in pine-stump processing, 8681*h*.
fires on $H_2O$, extinguishing, P 3949*e*.
of Formosa (Kinsui), phys. properties of fractions and structural analysis of, 2413*g*.
fuel cells for—see also *Fuels*.
fuel gas enriched with, in coke-oven heating, P 2408*i*.
fuels contg.—see *Fuels*.
by gas oil conversion with $Al_2O_3$-$SiO_2$ catalysts, P 844*a*.
gelation of, 3991*f*.
gum and peroxide formation and improving gum stability of cracked, 8656*a*.
gum-formation inhibition in, by org. sulfides or polysulfides, P 7223*h*.
gum-formation prevention in, from shale oil, 5576*h*.
heat capacity of, and of its gels with Napalm, 8140*b*.
hydroaromatic hydrocarbons in 95–122° fraction of Mirzaan, 4838*i*.
by hydrocarbon-oil conversion in vapor phase, P 6403*i*.
by hydroforming of naphtha, 841*c*.
by hydroforming of naphthas with $MoO_3$-$Al_2O_3$ catalyst, with high $PbEt_4$ susceptibility, 2761*a*.
by hydrogenation-cracking of raw rubber, 3648*g*.
by hydrogenation of CO, 2399*g*, P 3174*g*, P 3994*bc*, P 5574*d*, 7664*c*, 7211*h*.
of coal, 1942*i*, 2754*f*, 5170*f*, 6391*c*, 8641*e*.
of coal or CO, 3591*e*.
of hydrocarbon oils with $MoO_3$.2HCl catalyst, P 9431*d*.
of Kogasin fractions, 2415*g*.
by hydrogenation of CO and hydrogenolysis, P 4834*i*.
hydrogen sulfide partition between $H_2O$ and, 7297*h*.
ignition, detonation and oxidation of vaporized Fuel S, 7674*d*.
ignition pressure and temp. relations of, 7209*h*.
isooctyl alc. manuf. from, 3180*a*.
lead mercaptide decompn. by heat in, and sweetening thereby, 4839*g*.
lead poisoning by leaded, 2416*a*.
lead pptn. in leaded aviation, inhibition by hydroquinone and phenolic gum inhibitors, P 4003*f*.
lead pptn. in leaded, inhibition by dialkyl sulfates, P 2423*d*.
lead scavenger in aviation, $C_2H_4Br_2$ as, 1173*a*.
mixing of, 1614*f*.
natural-gas, absorption and analyses of, 2412*e*.
absorption and recovery at Dubach, La., 7217*b*.
absorption plant at Newhall, Calif., 9422*h*.
absorption plant at Silsbee, Tex., 7220*f*.
absorption plants using direct-fired heaters for, 3179*i*.
cycling plant for, 1550*h*, 2412*f*.
extn. at Burrel plant, 4453*a*, 7218*d*.
extn. plant at Hastings field, Texas, for, 5931*f*.
fractionator instrumentation for control of plants for, 7673*e*.
industry in 1946, 2127*e*.
propane recovery in plants for, 7220*d*, 7673*cfg*, 8654*c*.
recovery and sweetening at Slaughter plant, Tex., 8657*e*.
recovery with $C_3H_8$ refrigeration unit, 382*f*.
U.S. reserves of, 7213*i*.
neutralizer effect on, 97*a*.
olefin detn. in cracked and reformed, 285*e*.
olefins (di-) in Puertollano-shale, identification of conjugated, 5578*c*.
oxidation (auto-) inhibition in cracked, by amine or phenolic antioxidants and metal deactivators, 5932*a*.
oxidation in, by metal catalysts, inhibition with amino aldehyde-amine condensation products, P 4460*a*.
oxidation products in oxidized, detn. of, 1952*eg*.
oxidation stability of aviation, and effect of $Et_4Pb$ and halide-contg. $Et_4Pb$ thereon, 5578*i*.
oxidation stability of cracked, purification effect on, 2414*f*.
from oxidative reforming of Tulmazin Devonian petroleum, 8124*i*.
phenol detn. in, 9422*i*.
poisoning by, 4789*e*.
polyform, 3600*i*.
by polyforming of naphtha, 384*b*.
from polyforming of refinery gases, 2759*i*.
polymer from cracked, corrosion-preventing compn. from, P 8349*d*.
polymer from re-running of sour cracked, linseed-oil extender from Edeleanu ext. and, 4025*c*.
by polymerization of butenes and $C_2H_4$ with Cu pyrophosphate catalyst, 4839*c*.
of olefins ($C_4$) and $C_2$-$C_3$-$C_4$ olefin mixts., P 1559*d*.
of olefins with imino compd. or nitrohydrocarbon catalyst, P 8666*g*.
polymerization unit making antiknock, and analyses of polymer gasoline, 383*f*.
by pyrolysis of molasses, 9422*e*.
by pyrolysis of rubber waste with petroleum heavy oil, 5984*c*.
refining 65–95° fraction of, with $H_2SO_4$, ligroin by, 4839*i*.
reformed, from Arkansas City refinery, 9423*e*.
reforming of Fischer-Tropsch, and S removal from cracked gasoline, catalysts for, P 6763*b*.
reforming of, with $Al_2O_3$-halogen-Pt catalyst, P 8664*g*.
catalyst for, P 8579*c*.
economics of, 8654*c*.
at McCarthy Chem. Co., 8124*e*.
yields *vs.* operating conditions in, 2757*h*.
removal of halogen and S from, with active C complexes, P 390*c*.
removal of $H_2S$ and phenol from cracked, treatment of spent NaOH from, 4839*c*.
-resistant nylon impregnated with polyamide interpolymer, P 3208*i*.
as rocket fuel, 9449*i*.
rocket propellant from $HNO_3$ and, 833*c*.
from rubber cracking, 5169*g*, 5984*bd*.
from rubber cracking, refining by hydrogenation and value as fuel, 5984*de*.
rubber soln. in, as hydraulic fluid, P 4791*f*.
from shale oil, control in making, 7215*c*.
from shales of Baltic area, 9421*h*.
in sludge and varnish deposition in engines, effect of additives and compn. of, 5579*h*.
solid mixt. prepn. with, 6398*h*.
stabilization of cracked, with substituted dihydroxybiphenyls, P 9428*a*.
stabilizers for, condensation products of hydroxyarylalkyl amines, P 1176*b*.
standards or specifications for, 4399*d*, 4787*b*, 4838*h*.
sulfide and thiol extn. from, regenerating NaOH solns. from, P 8664*g*.
sulfur compds. in, effects on octane no., Pb susceptibility and engine wear, 383*i*.
sulfur removal from reformed, with catalysts, 8125*d*.
synthesis of, physiochem. research on, 2412*hi*, 2413*abd*.
tanks (self-sealing) for, coatings for rubber linings of, P 6003*e*.
tar-acid detection in, 7216*f*.
from tar distillates, 7207*h*, 7664*h*.
testing corrosiveness and sludge- and varnish-forming properties of, 839*i*.
tetraethyllead detn. in, 4787*d*, 5693*e*, 6006*h*, 7216*d*, 9423*e*.
tetraethyllead mixing with, 8655*c*.
thiol detn. in, 7216*g*.
thiol extn. from acid, regenerating NaOH from, P 5182*i*.
thiol formation in cracked, 3601*c*.
thiol removal from acid, P 4844*b*.
of United States, 2412*f*, 8613*g*.
United States aviation, 1553*h*, 5578*f*.
from vegetable-waste digestion and elec. arc treatment, P 8662*h*.
viscosity of, polyesters and superpolyesters in increasing, 8699*d*.
Wyoming crude oils as source of, 839*g*.

**Gas pipes**, carbon monoxide-resistant, 3330*e*.
copper tubes as main and service, 5925*f*.
corrosion of, 1706*b*, 5724*a*, 6140*i*.
by bacteria, 8645*h*.
by $H_2S$, 1169*d*.
for natural gas, prevention of, 98*i*.
prevention by cathodic means, 1305*a*, 2150*i*, 3336*e*, 7400*h*.
deposit removal from, 3597*c*.
dust in mains, 8119*f*.
flow in long, 7272*b*.
gas hydrates in relation to operation of lines, 3172*b*.
gas-impurity detection in, app. for, 7757*g*.
leakage in, $C_2H_2$ as tracer for, 8646*b*.
leak detection in underground, 1551*a*
long-distance lines in Netherlands and Belgium, 4445*e*.
naphthalene removal from inlet piping of gasholders, 5926*d*.
transmission of $CH_4$ in lines, 4832*b*.
water mech. removal from high-pressure lines, 4832*e*.

**Gastaldi reaction**, pyrazinol derivs. by, 3006*b*.

**Gasterophilus intestinalis** and(or) **Horse botfly**, disturbances in blood-sugar regulation after, 5108*e*.
hemoglobin metabolism in, 5506*h*.
iron metabolism after, 3893*g*.
succinic acid in blood of larva of, 1872*i*
sugar metabolism after subtotal, 3514*e*
for ulcer, Fe in blood after, 748*d*.

**Gastric contents**. See *Stomach contents*.

**Gastric juice**, action on pteroylheptaglutamic acid, 3895*f*.
alk. reserve and secretion of, 1099*e*.
anesthesia and, 5871*i*.
anoxic suppression of secretion of, 4744*i* of aphid, 322*i*.
[2-(benzhydryloxy)ethyl] quaternary ammonium compds. as inhibitors of secretion of, P 3463*a*.
carbohydrate metabolism and secretion of, 9229*c*.
catalase activity of, 6257*c*.
chlorine in, in gastric diseases, 5853*i*
chloroform detn. in, 7191*g*.
curare effect on secretion of, 7143*b*.
digestive capacity of stomach and, 739*a*
effect of benzhydryloxy derivs. of heterocyclic amines on secretion of, P 2235*d*.
effect of histamine and neoantergan on secretion of, 1868*g*.
effect of quinine and atebrin on secretion of, 5491*h*.
effect of urine ext. from oophorectomized and thyroidectomized dogs on secretion of, 3502*de*.
enterogastrone effect on secretion of, 5497*d*.
folic acid effect on secretion of, 8051*i*.
histaminase inhibition of secretion of, 321*a*.
histamine-induced secretion of, effect of thephorin on, 4385*i*.
hydrogen ions in, source of, 3500*i*.
insulin effect on secretion of, 8538*h*.
mercury salts and, 4763*e*.
mucin detn. in, 2264*e*.
mucin of, 6252*h*.
nocturnal secretion of, by normal, ulcer and carcinoma patients, 303*a*.
paludrine effect on secretion of, 2704*def*
peptic synergist in, 747*g*.
pregnancy-urine effect on secretion of, 749*f*.
pressure effect on secretion of, 8506*c*.
secretion of, in ulcer patients, 6302*b*.
stimulation of secretion of, by theophylline-ethylenediamine, 7583*c*.
sulfonamide effect on secretion of, 3527*b*.
*Tanacetum vulgare* exts. and, 8537*h*.
tubercle bacillus culture from, 7546*e*.
Tween 20 stimulation of secretion of, and its inhibition by benadryl, 760*e*.
uric acid in, effect of histamine on, 5846*c*.

**Gastroenteric alliohalon**, the name, 5114*g*.

**Gastroenteritis**, hemorrhagic, in mink as nutritional deficiency, 8022*c*.

**Gastroenterology**, book: An Introduction to, 1104*c*, 3091*d*.

**Gastrointestinal tract**. See *Digestive tract; Intestines; Stomach*.

**Gastropods.** (See also *Mollusks; Snails.*)
effect of choline and acetylcholine on heart of, 3528*h*.
**Gattermann-Koch reaction,** 6182*f*.
**Gattermann synthesis,** with 2(and 4)-nitroresorcinol, 7925*b*.
**Gaultheria shallon,** Cu and Zn in twigs and wood of, in geochemistry, 3321*f*.
**Gauze.** See *Surgical dressings.*
**GBH.** See *Cyclohexane, 1,2,3,4,5,6-hexachloro-.*
**Gearksutite,** crystal structure of, 8984*c*.
**Gears,** carburization of, furnaces for gas, 7393*f*.
forgings for main reduction, standards of A.S.T.M. for, 4202*e*.
lubricants for—see *Lubricants.*
surface hardening and mech. strength of, 983*f*.
**Gee-Thaysen disease.** See *Celiac disease.*
**Gehlenite,** crystal structure of, 5253*c*.
solid solns. of melilite and, and as of glasses and crystals of gehlenite–soda-melilite systems, and soly. of $Na_2O$ in gehlenite-akermanite mix crystals, 73*c*.
**Geiger counter, Geiger-Müller counter.** See *Counters.*
**Geigy 33.** See *Ethane, 1,1,1-trichloro 2,2-bis(p-chlorophenyl)-.*
**Gelkielite,** stability of, in rocks, thermal properties and, 4187*g*.
**Gelsosepermum laeve,** curarizing substance from, 9380*h*.
**Gelatin,** betaine in, effect on photographic properties, 51*g*.
as bonding material for fiberglass fabric to phenolic resins, P 8208*i*.
cathepsin action on, 9089*c*.
coacervate with gum arabic, effect of pH and salts on diam. of drops of, 3691*a*.
coagulation by, in V detn. in steels, 4179*d*.
coating contg., for food and food packages, P 8576*c*.
coating with, on Al and Al alloys, P 5001*e*.
coating with, on stringed instruments, P 4494*f*.
collagen degradation into parent, 6888*g*.
complexes with Na alkyl sulfates, 8801*g*.
compns. with acrylic acid polymers, 8076*e*.
with aldonic acids for Zn electroplating baths, P 2102*h*.
with polyvinylurea, P 5231*h*
congealing of sols of, 6491*i*.
in copper electrodepositions, 1269*a*.
cross-linking process in gels of, 3690*i*.
decompn. by *Fusarium,* 7546*g*.
deformation of gels of, 5261*d*.
deformation of mols. of, in soln. on varying elec. charge, 7787*f*
detection of, 4324*h*.
detn. in electroplating baths, 961*h*.
detn. of Cu, Pb and Zn in, 5510*g*.
digestion by chymotrypsin and trypsin, effect of pH and buffers on vol. during, 6263*f*.
from ears, feet and lips of cattle and hogs, 5220*g*.
effect on adhesion of particles, 4503*b*.
on Al soln. in NaOH, 5264*e*.
on autodisplacement of Pb, 2846*e*.
on corrosion of wrought steel, 6141*i*.
on growth rate of electrolytic single crystal of Ag, 4584*c*.
in polarographic analysis of brass, 4181*h*.
on polarographic diffusion currents, 4930*a*, 5698*bc*.
on polarographic drop time, 1270*i*.
on polarography of metals, 5310*a*.
on polarography of methyl orange, 6043*i*.
on soly. of $Cu_2O$ in soil solns., 7542*b*.
on stability of supersatd. solns. of $KNO_3$, 8805*i*.
on Sn electrodeposition, 1269*d*.
on tryptophan transformation to niacin on low-casein diet, 3500*a*.
elec. cond. of, effect of adsorbed salts, HCOOH and temp. on, 3698*b*.
electrophoretic homogeneity and isoelec. point of, 2247*f*.
emulsions for screen printing, improving resistance to alkalies and water, 9455*a*.
films of, on water, 2487*b*, 8798*f*.
films of, solubilization of insol., 8087*e*.
films (unimol.) of, HCOOH soln., 6039*i*.
foaminess of solns. of, 3794*f*.
foaming of solns. of, agents for, P 7610*e*.
gelation and interaction with org. substances, 7787*f*.
gelation and viscosity of solns. of, effect of salts on, 4540*f*.
gelation of, effect of Na dodecylsulfonate or acacia gum on, 2488*f*.
gels of, m.ps., optical activities and rigidities of, 4066*g*.
hardeners for, dialkylaminomethylol, alkyloxazolidene and tetraalkylaminomethylenediamine as, 7246*e*.
heat of wetting of, 6042*f*, 7781*f*.
heptane emulsion in, crit. dispersity of, 7776*d*.
hydrochloric acid adsorbed by, titration of, 6883*c*.
hydrolysis at high pressures, 705*b*.
hydrolysis (enzymic) of, 3790*i*.
hydrolyzates of, glycine detection in, 4978*b*.
hydrolyzates of, optical specificity of, 6265*b*.
insecticide films on, 9330*f*
interfacial tension between $C_6H_6$ solns. of cholesterol-lecithin and aq., 8800*b*.
iron passivation with, 8246*c*.
isoelec. point of, dyes in detn. of, 6884*d*.
liesegang rings in—see *Liesegang rings.*
manuf. of, P 1592*i*.
from bones, 6854*a*.
from bones and hides, P 3224*e*.
melt with glycerol, ethylene glycol, etc., porous spongy product from, P 5618*i*.
methylation of, and its derivs. to raise isoelec. point, P 9512*d*.
molded articles from wood or cork waste and, P 4517*f*.
mol. form of, 3477*g*.
mol. wt. of, 3266*e*.
pancreatic juice action on, and products therefrom, 9089*e*.
photographic, 1667*g*, 3301*a*.
characterizing, 8923*i*.
S detn. in, 8923*i*.
photographically active ingredients in, removal of, P 958*e*.
in photographic emulsions, 6927*c*.
photographic films from—see *Photographic films.*
plastic emulsion contg., P 6000*e*.
precipitation in films of, 7296*h*.
preservation of, esters of unsatd. tricarboxylic acids for, P 7634*d*.
reaction with basic Cr salts, 1592*a*.
relaxation in gels of, 6888*f*.
rigidity of gels of, 467*e*.
silver nitrate electrolysis in presence of, 7356*gi*.
sponge, P 4434*g*.
stabilizer for icings, P 6759*b*.
standard solns. of, for tannin detn., 7732*f*.
substitutes for, in photographic emulsions, polymers of acrylates of hydroxy amides as, P 3446*i*.
as suppository bases, 3563*f*
surface-active-agent adsorption by fibers of, 1193*i*.
surface areas and heats of absorption of, 2248*b*.
swelling of, in mixts. of dioxane, EtOH and $H_2O$, 7788*b*.
system: $(NH_4)_2SO_4$–$H_2O$–, 3691*a*.
thermal analysis of, 9137*b*.
thermal cond. of gels of, 6888*i*.
thermodynamic properties of solns. of fractions of, 8837*f*.
water bound by, 4553*e*.
water (combined) detn. in, 5701*b*.
water-vapor sorption by, 7294*d*.
from whale skin (blue), prepn. and physiochem. properties of, 1206*e*.
whipping properties of, improvement with negatively charged acid-inositol condensation products, P 8186*i*.
xanthurenic and kynurenic acids in urine on diet of, 6294*a*.
**Gelatinase,** in *Clostridium histolyticum* and *perfringens,* 6260*b*.
**Gelatinous materials,** emulsions, 7775*i*.
**Gelation,** of acrylonitrile polymers with vinylidene chloride in 2-butanone, prevention of, P 7755*b*.
of alk. earth sulfonates in mineral oil solns., prevention by phthalic acid esters, P 1959*h*.
of aluminum soap-hydrocarbon systems by additives, 3638*i*.
of aluminum soaps, 3688*f*.
amine bentonites in, of paints, etc., 8704*d*.
of apple pomace, 5516*e*.
of blood serum with fibrinogen, 4780*g*.
Buna-rubber structure detn. by, 7253*g*.
of carbon black in cold rubber reënforcement, 9515*d*.
of cellulose derivs., inorg.-salt effect on, 8134*f*.
of ethylcellulose aq. solns. on heating, 3611*d*.
in ethylene glycol- and water-solubilized systems, 466*c*.
of gasoline, 3991*f*.
of gelatin, 7787*f*.
effect of acacia gum or Na dodecylsulfonate on, 2488*f*.
effect of salts on, 4540*f*.
of Igelites, 6454*h*.
light scattering during, 7785*b*.
of methyl siloxanes, improving resistance to, P 5420*f*.
of nitrocellulose, 8673*d*.
nitroglycerin combustion improvement by, 1981*c*.
of paints (zinc-white enamel), 5202*i*.
of phenolic resins, catalyst for, P 2033*b*.
of phenolic resin-tung oil varnishes, effect of time and temp. of cooking on, 7238*g*.
in polymerization of butadiene with styrene in diazo thio ether and Fe pyrophosphate recipes, prevention of, 5987*g*.
of polymers, 4927*i*, 7294*a*.
of polyvinyl alc. coatings, P 1670*e*.
of proteins, 3857*f*, 7983*c*.
of rosin and rosin-deriv. solns., 8176*i*.
of rubber by alkoxides, 429*h*.
of rubber latex by $Na_2SiF_6$, pH values in, 5983*c*.
of rubber with $(p\text{-}BrC_6H_4CO)_2O_2$, 6453*f*.
of silicate solns., 6801*c*.
of soaps, effect of bivalent-metal palmitate or stearate on, 4080*b*.
of starch, 8715*f*.
of tung oil, by anhyd. $FeCl_3$, 5605*f*.
with $H_3BO_3$-$(CO_2H)_2$ catalyst, P 9484*e*.
effect of glycerol, maleic anhydride and sardine oils on, 5204*bc*.
ultrasonic treatment during, P 1884*c*.
**G-eleven.** See *Phenol, 2,2'-methylenebis-[3,4,6-trichloro-.*
**Gelose,** extn. from Irish moss, P 3542*a*.
**Gels.** See *Colloids.*
**Gems,** book: Handbook of Fluorescent, 7876*d*.
of California (Siskiyou Co.), 2901*g*.
identification and testing of, 5703*f*.
industry in 1946, 2127*c*.
references on, 8981*c*.
of Washington, and their origin, 8981*g*.
**Genalkaloids.** See "*N*-oxides" under *Alkaloids.*

Pt coatings on app. for manuf. of, P 4440*g*.
reviews on, 2778*c*, 3201*g*.
rigid body from resinous products and, P 4824*b*.
in salt removal from petroleums, 4837*g*.
siloxanes for coating tape from, P 442*e*.
sound-insulating pad from, P 5518*i*.
spinning of, 5164*bc*.
spotting materials for textiles from, P 1935*a*.
storage-battery separator from, P 8920*i*.
swelling in water, 7690*f*.
textile from, transparent material from plastic material and, P 9534*i*.
textiles from, 6798*e*.
translucent sheet from polyvinylidene chloride and, P 908*d*.
films of cerotic acid and octadecylamine on, evapn. of, 7767*d*.
films of, electron-bombardment cond. of, 8847*h*.
films of, flow phenomena on contact of 2 glasses, 4531*h*.
films on, from receding meniscus, thickness of, 2059*c*.
filters—see *Filters*.
fining of, melted in shaft furnaces, P 6386*d*.
flasks—see *Flasks*.
flint, electron diffraction by film of, 2837*b*.
flow of, 8625*e*.
fluorite in manuf. of, 1540*c*.
flux from Ag and, P 3587*b*.
food heating rates in, 1491*i*.
on Fourcault machines, increasing rate of pick-up of, 9401*e*.
Fourcault sheet, contg. $Al_2O_3$ and MgO, 9401*h*.
fracture (delayed) of, 4048*i*.
fracture of, 3578*e*.
friction between glass and, effect of org. substances on, 2060*b*.
friction (internal) of, 5252*a*.
furnaces or tanks for, P 4439*i*.
$Al_2O_3$ brick for regenerators of, 5915*c*.
basic regenerator materials for, 5161*i*.
charging app. for, P 6386*d*.
convection in, 3577*e*.
cooling and heating of Dinas in, 9399*f*.
cooling of, by air, 9399*c*.
corundum refractories for, 9405*h*.
detn. of size of cooling section of, 1161*f*.
effect of $H_2O$ in wood on performance of, 6778*i*.
elec., P 3587*e*, P 4824*b*, P 6386*c*, P 7357*f*, P 8632*hi*.
elec., with submerged C elements, P 8633*a*.
electrode system for elec., P 6380*c*.
feeding app. for, P 9407*e*.
fuel consumption in, 6379*d*.
gas-fired, 7653*d*.
heat utilization in, 9399*d*.
with high output, 5913*g*.
increasing output by thermal insulation, 6381*f*.
medium-temp. repair of, 9399*a*.
multigrog bricks for, 1163*e*, 8113*e*.
O-enriched blast in, 4436*f*, 8998*d*.
refractories for, 5562*b*, 9406*b*.
refractory soln. in, 8625*i*.
regenerative, P 3587*a*.
of SKP type, 1539*g*, 6379*cd*.
steel-furnace trials and, 2747*h*.
thin-layer feeding of charge into, 1539*i*.
furnaces or tanks for plate, 8109*i*.
gas release from liquids by, 2068*c*.
in gehlenite–soda–melilite systems, *ns* of, 73*d*.
grease sliding along surface of, 7779*b*.
grid gas in Czechoslovakian industry of, 9397*i*.
ground, effect on linseed-oil absorption by pigments, 3630*h*, 6837*a*.
ground surface of, detn. of microgeometry of, 3578*g*.
gutta-percha adhesion to, 2842*d*.
heat-flow in industry of, 828*e*, 2476*a*.
heating (elec.) in manuf. of sheet, 7653*h*.
heating (elec.) of, in Fourcault channel, 1540*f*, 7653*d*.
heat transfer by radiation in, 4939*c*, 8626*e*.
history of, 4435*e*.
for hydrogen-ion-concn. measurement, 4083*ef*.
hygroscopicity of, effect of heavy-metal ions on, 2069*f*.
hygroscopicity of, for containers, 4435*i*.
for illumination, 1541*h*.
industry of, in Soviet Zone of Germany, 9397*h*.
industry of, reviews on, 1539*c*, 8109*i*.
infrared-transmitting, P 5917*i*, P 6802*fg*.
infrared transmission by binary, 1541*g*, 2747*f*.
insulators—see *Insulators, electric*.

manuf. of, 1539*c*, 8111*e*, P 8633*d*.
plastic deformation of, 5558*d*.
ultrasonic wave absorption and velocity in, 458*e*.
oxygen-atom recombination on, 1635*c*
paint test panel of, prepn. of, 2443*h*
peat briquets for, 9400*g*.
perforated or reticulated articles of, 5565*c*.
permeability to He, cations and, 9401*c*
phosphate, 2747*a*, 5163*h*, 6381*a*
photosensitive, 4905*g*.
pigments (blue) for, P 7712*i*.
Poisson series in industry of, 6797*d*
polarizing, P 4824*d*.
polish cleaners for, 425*h*.
polishes for, 8180*d*.
polishing of, sticking of baize in, 1162*g*
polyvinyl lacquer removal from, compn for, P 6340*i*.
powd., ceramic bodies from corundum or mullite and, P 9408*c*
concrete manuf. from, P 6801*i*
effect on oxidation of hydrocarbon oils, 3602*d*.
gas nucleation by, 3682*g*
for pressed goods, 6361*h*.
prism, spectrophotometer employing Perv 5310*e*.
prisms, protection against alkali spotting, 1162*f*.
properties and structure of, 9398*i*
properties (chem.) of, 2745*h*, 5913*d*
properties (phys.) of, review on, 9397*h*
protection against alkali, P 374*a*
protection of surfaces of stacked, P 7657*b*.
purity and rate of production of, relation to method of feeding furnace, 6377*i*
Pyrex, effect on at. H reaction with $O_2$, 2080*b*.
Pyrex, sp. heat of, below 20° K., 6018.
quality control and viscosity, 2383*g*
quality of, control by refractive index, 8625*f*.
quartz—see "fused" under *Silica*.
quartz transformation into cristobalite in, 371*g*.
rapid-fusion, P 5564*i*.
rare earth, 3577*g*.
raw materials for, use of carnallite and pyrolusite in, P 9407*d*.
reactions in melts of, 3578*b*
reaction with alk. solns., 5914*g*.
with fluobromite, 3739*f*.
with fluoride, 3579*e*.
with ions, 2066*e*, 8233*g*.
with NaF solns., 6363*c*.
reflection by, films for modifying, P 4900*f*.
films for reducing, P 1164*i*, P 2394*a*, P 6803*a*.
increasing by metal oxide films, 3161*g*.
reduction of, P 0802*i*.
reflectors—see *Reflectors*.
reflector stability and, 1161*i*.
refractories from fused cast $Al_2O_3$ in industry of, 5563*e*.
resistance of window, to temp. variations, 2748*a*.
reviews on, 4525*i*, 4788*e*, 4789*a*.
rings of, for Fenske column, 2822*e*.
sand—see *Sand*.
scratching of, by metals, 3682*e*.
for sealing ceramic insulators of spark plugs to metal shell, P 5166*h*.
sealing elec. vacuum app. parts of, P 4590*d*.
sealing electrode in capillary tubing of, 3665*g*.
sealing or uniting of, to metals, P 1935*c*, 4823*c*, P 5918*b*, P 6386*g*.
to metals, alloy for, P 6145*h*.
to metals, A.S.T.M. standards for, 4203*e*.
to metals, conductors for, P 1274*f*.
to wire, wire coating for, P 8918*f*.
for sealing to metals, P 1934*i*.
seals with metals, flaw detection in, 5359*e*.
selenium ruby, 6380*f*.
shock-resistant, P 3164*e*.
silica—see "fused" under *Silica*.
silver atoms in, fluorescence of, 3294*h*.
silvering—see *Silvering*.
sodium carbonate in manuf. of, 1539*c*.
sodium penetration into, 2747*f*.
sodium sulfate for, from astrakhanite, 1920*e*.
sodium sulfate reduction in manuf. of, 7203*d*
soft, and its elec. use, 3161*i*.
soft, for elec. app., 3985*g*.
spectral transmission of, cerium oxide effect of, 827*h*
spheres of, flow of fluidized, 6474*h*.
stone in, cristobalite inversion in, 2390*e*.
stones in, identification of, 2387*e*.
stopcocks—see *Stopcocks*.
strains in sheet, control of, 1540*g*.
strength of, review on, 3578*d*.
structure and, 5163*e*.
theory of, 3162*h*, 9398*i*.
structure changes in, d. and, 5163*i*.
structure of, 2383*i*, 2837*e*.
structure of mixed alkali-silicate, 5555*h*
from sulfate charge, 3577*d*, 5913*h*.
sulfate charges for, combination reducing mixts. for, 9400*e*.
as supercooled liquid, 2063*a*.
surface-active substance spread on, rate of, 1625*f*.
surface properties of, effect of heavy-metal ions on, 2386*e*.
surface tension of, 2800*g*, 3255*i*.
surface tension of, furnace atm. and, 6379*a*
technology of, physics in, 4823*a*.
technology of, review on, 6377*h*.
testing (nondestructive) of, 4540*h*
test tubes—see *Test tubes*.
theories of, 5163*a*.
thermal after effects in, mechanism of reversible, 4823*b*
thermal cond. of, 3579*a*, 4070*g*, 8786*i*.
transformation range in, 2383*h*
tubes of, bending app. for, P 5565*b*.
tubes of, marking of, 3665*f*.
uranium, depolarization during extinction of fluorescence of, 7824*f*.
fluorescence spectra and U content of, 2119*f*.
luminescence of, 197*d*, 5671*d*.
vapor adsorption by, 7288*d*.
varnish adhesion to, 8702*i*.
viscosity of, 4435*f*, 7654*b*.
at annealing temps., 1161*e*.
at annealing temp., app. for measurement of, 7654*c*.
at annealing temps., effect of oxides on, 7654*e*
calcn. of, 3578*c*, 4435*f*.
temp. and, 7299*f*
voids (structural) in, filling of, 6380*e*.
volcanic, basaltic hornblende overgrown with weathered, in bentonite of Poland, 6954*f*
-ware industry of Germany, 2383*e*.
waterproofing of, compn. for, P 1505*b*.
waterproofing of, halosilanes for, P 8744*a*.
water vapor adsorption by, 1623*d*.
windows—see *Windows*.
xenoliths in pillow basalt of British Columbia, 2903*i*.
x-ray absorbing and -transmitting, 2091*d*.

**Glass silk**. See *Glass wool*; and "fibers" under *Glass*.

**Glass substitutes**. (See also *Plexiglas; Transparent materials, Vitreous materials*.)
coating with, P 5952*a*
from trichloroethyl methacrylate polymers, P 4898*g*.

**Glass wool**. (See also *Mineral wool*; and "fibers" under *Glass*.)
adhesive emulsion for spinning of, 4435*h*.
storage battery separators from, P 2882*e*.

**Glauber salt**. See *Mirabilite; Sodium sulfates*.

**Glaucium**. See *Horn poppy*

**Glaucoma** (*the disease*), calcium and K in blood in, effect of irritants on, 6310*i*.
diisopropyl fluophosphate in treatment of, 3974*e*.
ocular tension in, and effect of substances thereon, 753*e*.
pilocarpine effect on eye in, effect of pH on, 7646.

**Glaucoma piriformis**. See *Tetrahymena geleii*.

**Glauconite**, as cementing substance for sands, 6550*e*.
in sands, 7331*h*.
of U.S.S.R. (eastern Ural sediments), 3322*g*.

**Glaucophane**, of Giant Mts., 8987*d*.

**Glaucorigenin**, and derivs., 4679*i*.

**Glazes**. (See also *Enamels*.)
ammonium chloride effect on, 3986*i*.
books: Chinese Ceramic, 8632*g*; Ceramic, 8632*h*.
for brickwork in boiler plants, 5564*f*.
cerium oxide in opaque, P 1166*d*.
chrome-Sn reds and pinks in, 8632*f*.
colored, 9403*f*.
defect in, detection with dichroic film, 3579*e*.
lead soly. from, detection of, 1543*e*.
lithium minerals and, 3320*a*.
microscopy of, 2392*e*.
nonfritted, for faience, 3585*d*.
prevention of hairlining or tearing of, P 5168*a*.
for refractory materials, 6385*i*.
terra sigillata, 2392*c*.
viscosity of, measurement of, 3585*e*.
zirconia opacifiers in monoclinic form, P 1580*b*.
zirconium compds. in, P 1166*d*.
for zircon porcelains, 9406*e*.

**Glazing**, electrostatic, 7205*d*.
kiln, firing for, P 7657*c*.
kilns for, stoker for, 2391*f*.

**Glechoma hederacea**. See *Nepeta glechoma*.

**Gliadin**. (See also *Gluten; Prolamins*.)
in doughs, effect of yeast on metabolism of, 4392*d*.
manuf. of, P 6466*f*.
monolayers of, mol. structure and viscosity of, 3689*h*.

**Glide bands**, in silver chloride sheets, plastic deformation and, 7772*f*.

**Gliocladium fimbriatum**, control of, P 1526*a*, P 3968*h*, P 4419*g*.

**Gliotoxin**, identity of antibiotic from *Aspergillus fumigatus* with, 7076*g*.
sulfur-contgn. degradation product of, synthesis of, 6204*i*.

**Gliricidia**, decompn. of, effect of tannin on, 9325*c*.

**Globar**, light (infrared) emission by, 944*d*.

**Globefish**, food poisoning from raw or cooked, 327*g*.

**Globins**. (See also *Hemoglobin; Myoglobin*.)
modified, for human injection, P 2739*d*.
origin of, 8497*h*.

**Globucid**. See *Sulfanilamide, N¹-(5-ethyl-1,3,4-thiadiazol-2-yl)-*.

**Globularia alypum**, blackening of leaves of, 6704*c*.

**Globularoside**, the name, 6704*c*.

**Globulinemia**, in pregnancy, 2687*f*.

**Globulins**. (See also *Arachin; Cryoglobulins; Edestin; Euglobulin; Myosin; Pseudoglobulins; Thyroglobulin*.)
Ac-, in blood-clotting mechanism, 3867*e*.
Ac-, in blood plasma, effect of aminophylline on, 5117*g*.
of blood serum, stability of, 1815*e*.
effect of dicumarol on, 2321*i*.
species differences in, 746*a*.
stability in stored blood plasma, 706*f*.
-albumin equilibrium in schizophrenia, 2305*e*.
-albumin ratio of blood in anaphylatic shock, 3510*h*.
in blood serum, detn. of, 264*c*.
of blood serum, effect of delipidation on, 8420*d*.
in blood serum in protein deficiency, 3076*i*.
of potato protein, 5429*g*.
α- and β-, in blood serum, reaction with thymol, 9093*c*.
α- and β-, in lymphoid tissue and calf thymus gland, 3049*a*.
α-, β- and γ-, in synovial fluid, 9202*c*.
α-, β- and γ-, precipitation from blood serum, 4316*f*.
α, in blood after parathyroidectomy, 295*c*.
α-, in blood plasma, albumin content and, 6726*h*.
α-2-, —see *Hypertensinogen*.
β- and γ-, sepn. from blood serum, 3486*c*.
$\beta_1$-, radioactive ferric, transcapillary exchange of Fe from, 298*d*.
binding of org. ions by plasma, 7062*c*.
blood coagulation and, 5811*i*.
in blood in hemolytic disease, effect of cold on, 2697*d*.
of normal and diseased patients and their detn., 1453*i*.
in pregnancy, 8480*i*.
in Recklinghausen disease, 8523*g*.
in tuberculosis of children, 2813*b*.
in blood plasma and serum, equil. of bound albumin and globulin with free, 1813*f*.

in blood plasma and serum of sheep, 9204*i*.
blood-plasma, blood-clotting accelerator from, P 5909*a*.
after castration and testosterone-propionate treatment, 23036.
effect of adrenal cortex hormones on, 3909*h*.
hypotensive and smooth-muscle stimulating factor release from, by snake venom and trypsin, 5814*b*.
in multiple lymphoma, 5109*h*.
in pneumococcic infections, 2305*h*.
pptn. by $Na_2SO_3$ and their detn., 4745*d*.
in various diseases, 5857*a*.
blood-serum, Ca-formol gel reaction and, 4321*a*.
Cu bound by, in biuret reaction, 4305*i*.
detn. of, 4719*f*.
effect of gum on d. of boric acid ppts. of, 3874*a*.
effect of nonelectrolytes on isoionic point of, 6888*e*.
effect on van den Bergh reaction, 6684*d*.
globin formation from, 8497*i*.
in hepatitis, 2308*h*, 2696*g*.
humoral immune functions and, 1101*b*, 2305*f*.
immunity and, 6722*h*.
in insanity, 9232*h*.
of normal, tumor-bearing and immunized chickens, 1477*e*.
origin of, 8523*b*.
pneumococcus agglutinin in, 8049*g*.
pptn. by boric acid, 6692*g*.
reaction with bilirubin, 5433*h*.
in rheumatoid arthritis, 5487*i*.
in senility, 8513*h*.
serological test for, 6269*c*.
in typhoid, antiendotoxin action of, 1100*i*.
after vaccination against hoof-and-mouth disease, 3513*a*.
in bone marrow in various conditions, 4359*i*.
in cerebrospinal fluid, 2311*e*.
in cryptogenic epilepsy, 2667*b*.
in inflammatory diseases of nervous system, 9235*b*.
ultraviolet absorption and, 5468*b*.
in colostrum of cow, effect of prepartal rations on, 740*i*.
of Cucurbitaceae seeds, 5450*i*.
detn. in blood, 265*f*, 2666*c*.
in blood plasma, 4314*g*.
in cerebrospinal fluid, 6696*h*.
digestion by trypsin, products of, 1816*b*.
effect on biochem. decompn. of cellulose, 3609*d*.
fibers from, 3201*g*.
formation in hepatectomized animals, 2252*b*.

7506*c*.

—, 2,3,4,6-tetramethyl-, D-, dimethyl ester, reaction with Na, 8357f.
—, 2,3,4-trimethyl-, δ-methyl ester lactone, 583a.
Glucosamine (*chitosamine*), in blood-group substances, 8479g.
chromatography on starch columns, 5818f.
D-, detn. and reducing power of, 7861c.
hydrochloride, phthalocyanine dye from, P 8168d.
oxidation of, 578d.
reaction (color) with orcinol and $H_2SO_4$, 3795d.
structure of, 5747i.
N-thiazolyl derivs., 7931e.
—, acetyl-, from mucoss-mucoid of bull stomach, 3480d.
—, N-methyl-*, hydrochloride, 1328g.
L-, from pentaacetyldihydrostreptobiosamine, 1330a.
—, octaacetylmannosido - N-methyl-*, L-, 3367f.
—, N-phenylacetyl-*, 2271b.
Glucosaminide, N-acetyl-3,4,6-trimethyl-α-methyl-*, D-, 586b.
—, dimethylmethyl-*, D-, 585i.
Glucosan. (See also *Levoglucosan*.)
α-, 9060h.
in wood, 5587b.
—, dimethyl-, 5926c.
—, trimethyl-, 5926b.
Glucosan<1,5>α<1,4>, 3,6-anhydro-*, D-, 1726e.
—, 3,6-anhydromethyl-*, 1726g.
β-Glucosan<1,5>β<1,6>. See *Levoglucosan*.
Glucosanilide, D-, prepn. of, 7906c.
Glucosazone. See "phenylosazone" under D-*Glucose*.
Glucose (*the sirup and its dried products*). (See also *Starch*.)
as corrosion inhibitor for light metals, 4622d.
decolorization of, with synthetic resins, 5980d, P 9506b.
decompn. of, by $SO_2$, 4461c.
in glucose detn. in, 1290f.
manuf. of, 1589c, P 2006g, P 2456d.
Cu corrosion in, 8896.
ion-exchange system in, 4882c.
plant for, 8716d.
from potato, tapioca, wheat and waxy cereal starches, 888i.
from sorghum grains, 7243i.
purification of, ion exchange in, 6441g.
specific rotations of, 4602b.
α-Glucose (*dextrose*). (See also *Glucose (the sirup); Glycolysis; Saccharification; Sugars*.)
absorption of, in alloxan diabetes, effect of insulin on, 317d.
from blood by mammary glands, 8040b.
from intestines, effect of $CaCl_2$ on, 5466i.
from intestines, effect of thiamine on, 5838e.
in stomach after extirpation of vegetative nervous-system section, 295i.
in traumatic shock, 1100g.
adsorption by plants, plant respiration and, 1084c.
α-, pentaacetate, 1326g.
in ammonium chloride acidosis therapy, 1869i.
analysis for—see *Sugars, analysis*.
as antioxidant in alkyl benzenesulfonates, P 6840b.
in aqueous humor, 5485f.
assimilation of, during anesthesia and surgery, 5850c.
by chick embryo, 5465d.
in diabetic sheep, 753c.
by diaphragm with and without insulin, effect of adrenal cortical ext., adrenocorticotropic hormone and hypophysectomy on, 9255g.
by *Drosophila*, 3228.
effect of adrenaline on, 7980b.
by erythrocytes, 8509f.
by heart, 9210h.
by *Tenebrio molitor*, 4387i.
by *Trypanosoma hippicum*, effect of Zn insulin on, 2276b.
by yeasts, 275c.
in *Azotobacter* nutrition, 5821c.
in bean rust, 1463f.
β-, pentaacetate, Grignard reaction with, 1326d.
β-, pentaacetate, reaction with phenols in presence of $BF_3$, 7922i.
biochem. and hemodynamic changes after subcutaneous injection of, 7110b.
in birch sap, 2678e.
in blood—see *Blood sugar; Glycemia; Hypoglycemia*.
boric acid complexes, amine salts derived from, P 1800f.
in brain, blood gases and, 5848g.
in cacao-bean covering, 8010i.
caramelization products of, bactericidal substance from, 3147d.
as carbon source for *Bacillus subtilis* and its action in amylase formation, 2278f.
carotene mixt. with, 3971i.
casein nutritive value after heating with, 8478a.
in cerebrospinal fluid, blood content and, 7102d.
in chloroform and uranyl nitrate intoxications, 2699c.
in citric acid production by submerged fermentation, 813i.
in colostrum and milk, 1496a.
compds. with NaCl and NaI, compression of single crystals of, 2063c.
compd. with acetone, 7409a.
condensation products (hydrogenated) with aminoöleanilide or aminostearanilide, surface-active, P 4409d.
condensation with hydrazides of coconut-oil fatty acids, wetting agents by, P 4499e.
crystn. of anhyd., 8716g, 9499i.
cyclization of, 4229c.
in cystine oxidation by $HNO_2$, 4224f.
decolorization with synthetic resins in manuf. of, 5980e.
degranulation of beta cells of pancreas by, correlated with alterations in glucose tolerance, 4760d
dehydration of, 9060h.
dehydrogenase—see *Glucose dehydrogenase*.
derivs., 1726g.
with benzenearsonous acid derivs., 599a.
galactose transformation to, 6680f.
microorganism attack on, 7692g.
x-ray diffraction data for, 3795b.
diabetes from administration of, 7569d.
diet contg., caries producing capacity of, 8474h.
diethyl mercaptal and dimethyl acetal, oxidation by *Acetobacter suboxydans*, 1828e.
diffusion of, 21h.
diffusion (thermal) in aq. solns. of, 2481a, 2491a.
diffusion (tubular) of, 9226f.
di-2-thenyl mercaptal, 6986b.
effect on Addison's disease, 1480b.
on alanine in blood, 1846c.
on Arakawa reaction and lactation after injection into mammary gland, 9215b.
on autodisplacement of Pb, 8811g.
on blood flow, glucose retention and O utilization by tissue, compared with adrenaline, 7145d.
on blood sugar, and effect of nicotinamide thereon, 7366, 1472b.
on blood sugar arteriovenous differences, and effect of insulin thereon, 9204e.
on blood sugar obtained from scarification of skin, 9201b.
on Ca and K in glaucoma, 6310i.
on cholinesterase in blood serum, blood sugar in relation to, 2311c.
on color of strawberry anthocyanin, 5087e.
on DDT-paralyzed blowfly larvae, 4416f.
on deamination of casein hydrolyzates by *Bacterium fluorescens liquefaciens* and *Proteus vulgaris*, 5448e.
on drying rate and water content of leather, 427h.
on erythrocytes of turtle, 3939c.
on exchangeable Mn in soils, 3129e.
on food intake, 2298g, 5465f.
on formation of $H_2S$, 1672h.
on gastric acid secretion and emptying time, 9229d.
on growth of plant tissue, 4349a.
on hypoglycemic shock from synthalin, 8527g.
on lactic and pyruvic acids in blood, 5111b, 5832h.
on methemoglobin reduction in erythrocytes, 3048g.
on oxidation of vitamin C, 1016i.
on O uptake by larva cells of *Gastrophilus intestinalis*, 1872c.
on pancreatic secretion, pharmacology of, 9209c.
on paradiabetes, 1856b.
*effect* on periodic paralysis, effect of previous diet on, 3919g.
on phosphatase activity of blood serum and liver, 9098a.
on phosphatase activity of kidneys, 9245g.
on phosphates in blood, 1849h.
on phosphorylated lactoflavin in urine, 6707h.
on phys. properties of leather, 1206d.
on procaine action, 758e.
on prothrombin formation by liver, 5463i.
on reagents for detn. of vitamin C, 5879b.
on skin and stomach lining, 3106c.
on soly. of $Cu(OH)_2$ in $NH_4OH$, 2489e.
on soly. of $CuO$ in soil solns., 7542b.
on sporulation of *Bacillus cereus*, 7082h.
on stability of supersatd. solns. of $KNO_3$, 8805i.
on survival time of eviscerated rats, 2306a.
on Takata-Ara reaction, 3480g.
on tubular function of kidney, 9218f.
on work performance after adrenalectomy, 8024i.
in egg-jelly coat of various sea urchin species, 4389f.
esters, 3368a.
esters (penta-) with 3-carboxy-1-methylpyridinium bromide and with nicotinic acid, 2623a.
esters with nicotinic acid, 1469i.
fermentation of, by *Aerobacter aerogenes*, 2,3-butanediol formation in, 1320h.
contg. $C^{14}$, 3969e.
by *Escherichia coli*, 5080i.
in soil, 7172d.
by yeast enzymes, trehalose from, 7544d.
in foaming control in lubricating oils, 6815c.
formation of, from enzymic hydrolysis o glucofructosans, 5828e.
from protein in phlorhizin diabetes during vitamin deficiencies, 5484b.
by thermophilic cellulose fermenting bacteria, 720d, 721d.
freezing-point depressions by, 5903c.
in gas liquor from wood-fed generator, 5925i.
gastric passage and intestinal absorption of, effect of anesthetics and barbiturates on, 4767g.
glycemia from, effect of Zn on, 2327i.
glycogen synthesis from, in liver, effect of morphine, phenobarbital and urethan on, 7134b.
glycolysis of, in tumor homogenates, 7576b.
in grape juice, fructose and, 8070h.
as growth factor for *Bacteroides*, 9154i.
in guava during growth, and its utilization in synthesis of ascorbic acid, 3889c.
*Hemophilus parainfluenzae* requirements for, 9156b.
hexokinase affinity for, 8484b.
hydrogenation of, P 5794h.
hydroxyalkyl ether esters, P 886e.
hypertonic soln. of, cardiac effects of, 1490e.
inositol formation from, in tea leaves, 3070e.
isotonic, diuretic action of, 4373g.
isotonic, effect on acetylcholine and K sensitivity of muscles, 1853b.
labeled, with $C^{14}$ in aldehyde group, 3795c.
*Lactobacillus bulgaricus* adaptation to, 2669i.
lipogenesis from, normally and after hepatectomy, 8509g.
loading in diabetic and normal boys, urinary flow, excretion of solutes and osmosis during diuresis of, 1858h.
manuf. of, P 427d, 1589d.
from cellulose, P 6825gh.
from corn, plant for, 8716d.
from cornstarch, 8716d.
from cotton husks, 7225d.
by saccharification, P 406a.
melanoids from amino acids and, colloidal properties of, 5255e.
mercaptals, preservation of butadiene polymers with, P 5625b.
metabolism of, in diaphragm, 8029e.
in diaphragm, effect of adrenal cortical compds. and insulin on, 6714e.
effect of vagus on, 2693a.
Lundsgaard effect and, 3056g.
by malaria-infected red blood cells, 5107b.

*metabolism of*, in *Plasmodium gallinaceum*, and effect of antimalarial agents thereon, 3099*a*.
in *Trypanosoma evansi*, and action of trypanocides thereon, 3099*d*.
in yeast, effect of U on, and relation of cell surface thereto, 5434*f*.
methionine destruction by autoclaving with, amino N change, browning and fluorescence in relation to, 9276*i*.
methylated derivs. of, detection of, 66*g*.
2,2′-methylenebis(4-chlorophenol) fungicidal action and, 1515*f*.
mixts. with alcs., osmosis of, 7300*g*.
with amino acids, HCl or $H_2SO_4$, dialysis of, 2486*h*.
with aminobutyric acid, maple-sirup substitute from, 5880*b*.
with citrate, erythrocytes of blood preserved in, 6690*ade*.
with citrate for blood preservation, 6690*i*.
with glycine, fluorescent development in, 7154*f*.
α-monohydrate, 5748*f*.
nitrogen metabolism by diphtheria bacteria in presence of, 8000*a*.
nutritive value of, 1847*a*.
optical crystallographic data for, 6105*e*.
oxidase—see *Glucose oxidase*.
oxidation of, 1729*i*, P 7506*c*.
by alloxan-diabetic and normal rats, 2310*a*.
in brain, diethylstilbestrol and steroids effect on, 7579*e*.
by Br, kinetics of, 6895*i*.
electrolytic, to Ca gluconate, 8904*e*.
by kidney homogenates, effect of fluoroacetic and fluorobutyric acids on, 4709*f*.
and its metabolites in cell suspensions, effect of snake venoms on, 2260*a*.
with $HNO_3$, 4644*b*.
with $HIO_4$, detn. of acids from, 2006*e*
by Na periodate, 8820*f*.
by yeast, 1460*c*.
oxidation of, by HgO, and prepn. of Ca gluconate, 3147*f*.
in oxidation-reduction activation of polymerization of butadiene with styrene in systems with cumene and Fe salts hydroperoxide, 8723*f*.
oxime, Cu complex, rotproofing value in duck, 5958*b*.
in peach-X-disease control, 9347*g*.
in penicillin production, 3060*d*.
pentaacetate, *Aspergillus oryzae* action on, 8007*e*.
in perspiration, 8481*h*.
phenylosazone and phenylosotriazole, anthrone reaction with, 66*g*.
phenylosazone, homogeneity of, prepd. from D-fructose, 580*g*.
phosphates—see *Glucose phosphates*.
phosphorylation (enzymic) of, 152*f*.
in pigment production by *Pseudomonas aeruginosa*, 1827*f*.
in *Pinus sylvestris* root nutrition, 3494*c*.
in plants, effect of growth substances on transport of, 804*h*.
plasmaphoresis with, restoration of blood protein and colloid-osmotic pressure after, 4310*f*.
polymerization in yeast, phosphate uptake and polymerization in relation to, 9145*e*.
prepn. from cellulose hydrolysis, yield of, 8678*a*.
from coniferous fiber hydrolysis, chromatography of, 9433*g*.
from pear cellulose, 7679*h*.
protective action against bacteriophage x-ray inactivation, 2275*g*.
protein deposition in liver following injection of amino acid mixt. and, 766*g*.
purification of solns. of, with ion-exchange resins, P 9506*a*.
radioactive, with $C^{14}$ from liver glycogen after feeding radioactive Na bicarbonate, 3476*g*.
radioactive, with $C^{14}$ in position 1, 9040*i*.
in rayon waste liquor, 395*i*.
reaction (color) of, with orcinol and $H_2SO_4$, 3795*i*.
reaction products with mercaptoacetic acid and stearamide, surface-active, P 7242*e*.
reaction with amino acids, effect on growth of lactic acid bacteria, 8445*e*.
with hydrazides of coconut fatty acids, stearic acid or *p*-stearylaminobenzoic acid, textile assistant by, P 9497*h*.
*reaction* with 2-naphthalenesulfonic acid and PhHgOAc, P 690*e*.
with $K_2S_2O_8$, kinetics of, 471*g*.
with 2,5,6 - triamino - 4 - pyrimidol, 7028*h*, 7489*a*.
in red clover and timothy at various stages of growth, 727*h*.
as reducing agent in GR-S rubber polymerization in cumene hydroperoxide systems with org. compds. forming complexes with Fe, 8727*f*.
as reducing agent in polymerization of unsatd. compds., 2811*a*.
reducing power of, 7861*c*.
reduction (electrolytic) of, P 2104*d*.
renal tubular transport of, effect of mercurial diuretics and xanthine on, 6734*a*.
rotation of, detn. in sirup, 4502*b*.
sodium bisulfite addn. compd., reaction product with *p*-phenylenediamine, P 7958*b*.
soly. in aq. alc., effect of $C_6H_6$ or $CHCl_3$ on, 6889*h*.
specific dynamic action of, 5836*i*.
sterilization of solns. of, 2367*b*.
*p*-sulfamylphenylosazone†, 601*c*.
sulfanilamide deriv., P 4817*c*.
surface-active agent from *p*-stearoylaminobenzoic acid hydrazide and, P 3039*a*.
systems: acetamide–$H_2O$–, and urea–$H_2O$–, 2854*c*.
in tobacco leaf, effect of position on plant on, 819*b*.
tolerance to, in anoxia, 2302*i*.
blood serum and citric acid after test for, 9226*e*.
effect of alloxan on, 8544*c*.
effect of emotions on, 5846*e*.
effect of hormones of posterior pituitary on, 7116*d*.
in endocrine disorders, diagnostic value of, 8424*g*.
after evisceration, effect of adrenaline on, 6319*e*.
after evisceration, effect of isuprel on, 7583*d*.
after evisceration, effect of work on, 2691*h*.
at high altitudes, 3504*a*.
after nephrectomy in eviscerated rat, 297*a*.
in senility, 8558*f*.
tests for, 4320*d*.
in urine—see also *Glycosuria*.
in urine, in diabetes, effect of adrenocorticotropic hormones and pituitary growth on, 2691*i*.
diet in relation to adrenocorticotropic hormone effect on, 7098*f*.
of hypophysectomized diabetic rats, effect of adrenocorticotropic hormones and pituitary growth on, 2692*b*.
of partially depancreatized rats, effect of 11-desoxycorticosterone acetate on, 1474*g*.
xylose detn. in mixt. with, 1976*a*

**D-Glucose, acetoamino-***, β-, 7430*f*.

, **o-hydroxyphenyl**, β-D-, tetraacetate, 7923*c*.
, **[β - (p - hydroxyphenyl) - $\Delta^{\alpha,\beta}$-butenolide]**, and tetraacetate, 4654*i*.
—, **3 - hydroxy - 5 - styrylcyclohexadienyl**, β-, 5017*g*.
—, **3-hydroxy-5-styrylphenyl**, β-, and 2,3,4,6-tetraacetate benzoate, 5017*f*
, **isoborneol-***, tetraacetate, P 5428*b*.
, **isopropyl**, α-, tetraacetate, 3795*e*.
, **o-methoxyphenyl**, β-D-, tetraacetate, 7923*b*.
, **[p-(p-methoxyphenylazo)phenyl]**, β D , tetraacetate, spectrum of, 6919*f*.
, **3-methoxy-5-styrylphenyl**, β , and tetraacetate, 5017*e*.
, **4-methoxy - 2',3,4',6' - tetrahydroxychalcone-***, adrenaline potentiation by, 5117*a*.
, **methyl**, α-D- and β-D-, affinities of, for cuprammonium, 3368*e*.
α , fermentation by *Escherichia* and *Aerobacter* species, 5082*f*.
α , tetraacetate, 3795*e*.
α inhibition by *Drosophila*, 322*h*.
β , 3,1-diacetate 2,6-di-*p*-toluenesulfonate, 1726*i*.
β D , 2,3 dicarbanilate, 3368*h*.
β D , esters, 3368*b*.
β D , tetraacetate, 7430*h*.
, **methyl 4,6-benzylidene-**, α-D- and β-D , affinities of, for cuprammonium, 3368*e*.
, **methyl 3,4 - diacetyl - 2 - tosyl-6-iodo-***, β-D , 3368*c*.
, **methyl 4,6-dimethyl-**, β-D , and 2,3-dicarbanilate, 3368*h*.
, **methyl 2,4-ditosyl-3,6-anhydro-***, β , 1727*a*.
, **methyl tetraallyl-**, α-, copolymer with bt acrylate, 5989*a*.
, **methyl 2-tosyl-3,6-anhydro-***, β , 1726*i*.
, **morphine-3-decaacetyl-6-β-cellobiosido-***, β-D , 3004*i*.
, **1-naphthyl**, β-D-, tetraacetate, 7923*c*.
, **o**-and **p**-**nitrophenyl**, tetraacetate, 5007*h*.
, **[p-(m-nitrophenylazo)phenyl]**, β D , tetraacetate, spectrum of, 6919*g*
, **phenyl**, α-D- and β D-, affinities of, for cuprammonium, 3368*e*.
β D , tetraacetate, 7923*a*.
β , tetraacetate, nitration of, 5007*h*.
β D , tetraacetate, 7430*f*.
, **(p-phenylazophenyl)**, β-D-, spectra of, and tetraacetate and tetrapropionate, 6919*e*.
, **o-phenylene di-**, β-D-, octaacetate, 7923*c*.
, **phenyl tetraacetylthio-**, β-D , cleavage of, with Br, 1326*g*.
, **procaine-N-***, hydrochloride hydrate, 758*e*
, **5-styryl-m-phenylene di-**, and octaacetate, 5017*e*.
, **testosterone-***, β-D-, tetraacetate, P 5428*b*.
, **thymyl**, β-D-, tetraacetate, 7923*b*.
**Glucoside<1,5>, 3(β)-cholestanyl***, β D-, reaction with chromic acid, 243*e*.
, **17-keto-3(β)-androstanyl***, D-, 243*e*.
**Glucosides**. See *Glycosides*.
**3 - [b - Glucosido - L - rhamnosido]strophanthidin***, 818*d*.
**Glucosone**, D-, structure of, 5007*i*.
**Glucosonic acid**. See *Gluconic acid, 2-keto-*.
**Glucosucrase**. See *Invertase*.
**Glucosuria**. See *Glycosuria*.
**Glucosyl bromide**, α-D-, esters, 3368*b*.
tetraacetate, reaction with phenolphthalein, P 689*i*.
**Glucuronamide**, α-D-, 4642*d*.
——, **1-amino-***, D-, 4642*d*.
**Glucuronanilide, 2,3,4-trimethyl-**, 1324*b*.
**Glucuronic acid**, ammonium salt, *p*-toluidine complex, 6314*h*.
benzoic acid detoxification by, in normal conditions and in liver disease, 6300*g*.
compd. with cinchonidine, 5008*hi*.
conjugation of morphine, effect of methylbis(β-chloroethyl)amine on, 7139*c*.
conjugation with estrogen in liver, 5479*h*.
detn. in glycoproteins, 5071*c*.
detoxication by, produced in liver, effect of vitamin $B_1$ on, 4372*h*.
D-, from almond tree gum, 1323*i*.
esters with hexesterol and stilbestrol, detn. in urine, 2662*i*.
ester with pyrocatechol, 2325*b*.
excretion of, after ingestion of benzoic or cinnamic acids, liver function and, 2322*h*.
fermentation by *Escherichia coli*, fermentation of galacturonic acid and pentoses in relation to, 4333*i*.
poly, in wood, 5587*b*.
reaction with naphthoresorcinol, 141*f*.
urinary excretion of, after benzene and phenol administration, 6312*h*.
from viscotoxin, 2943*c*, 7940*g*.
**Glucuronic acid, formyl-***, compd. with cinchonidine, 5008*i*.
——, **2,3,4-trimethyl-**, 1324*b*.
**Glucuronidase**, β-, extrinsic agent effect on, sex and organ specificity in response to, 704*f*.
β-, in genital cancer, 8048*i*.
as growth index in uterus and other organisms, 9207*c*.
inhibition by saccharic acid and role in glucuronide synthesis, 9106*c*
in spleen, and assay of prepn. of, 2255*h*.
in tissues in cancer, menopause, etc., 303*e*
inhibition by vitamin C and heparin, 7529*a*
**Glucuronide**, *p*-**acetamidophenyl-***, benzylamine salt, 6314*g*.
**Glucuronides**. (See also *Glucuronic acid*.)
in estrogen excretion, 8506*a*.
of products of conjugation and deamination of *p*-hydroxybenzylamine, etc., 2702*d*.
synthesis by tissue prepns., measurement of, 9103*h*.
synthesis of, β-glucuronidase in, 9106*c*
**Glucuronoside, methyl 2,3,4-trimethyl-***, derivs., 583*ag*.
**Glue**. (See also *Adhesives*.)

of castor oil and diglycolic acid, P 843*d*.
of cinnamic acid-dehydrated castor oil-styrene polymer, P 5972*c*.
of fatty acids, drying oil by, 6432*b*, 6830*h*.
of fatty acids, fluoride catalysis of, 4030*g*.
of linseed oil, 3213*a*.
of maleic anhydride polymers with Me methacrylate, 8202*c*.
of rosin-coumarone condensate, P 9486*h*.
of rosin-unsatd. cyclic hydrocarbon condensates, P 9486*c*.
of tall oil and varnishes from esters, 3212*h*.
ester (mono-) with coconut oil and $H_2SO_4$ and Na salt, P 9495*e*.
esters—see also *Ester gums; Glycerides*.
esters (mixed) of, P 4290*e*.
as coating compns. and drying oils, P 877*a*.
as plasticizers, P 4895*c*.
with 1,2-propanediol and tall-oil fatty acids, for cutting-oil base, P 4845*g*.
esters (mixed) of, from 2-furanacrylic acid and linseed oil for use as drying oil, and polymer with Me methacrylate, P 1995*f*.
esters of, P 5036*d*.
detection in alkyd resins, 6459*c*.
with diene monocarboxylic acids, for drying to hard films, P 3634*b*.

*esters of*, with linseed-oil fatty acids, drying oil by heating with monoallyl maleate, P 4029*e*.
from maleic acid and rosin, P 6464*d*.
as ointment-base constituent, hydrophilic properties of, 8610*a*.
from *l*-pimaric acid-maleic anhydride adduct, polymerization of, P 2469*f*.
as softeners in artificial leather manuf., 6451*f*.
esters (tri-) with λ-hydroxyoleic and λ-hydroxystearic acid carbamates, P 5968*d*.
ethers of, manuf. of, P 5794*f*.
ethers of, naturally-occurring, 1997*a*.
ethers (α-substituted), chemical structure and central depressant action of, 311*g*.
explosives from $H_3O_3$ and, P 1190*f*.
fermentation by acetone-EtOH bacteria, 8446*h*.
fermentation stillage contg., plastic substances from dicarboxylic acids or anhydrides and, P 5229*e*.
in foaming control in lubricating oils, 6815*d*.
formation of, from hydrogenation of diethyl mesoxalate, 573*e*.
in interesterification of peanut oil with EtOH, effect of concn. of alc., NaOH catalysts and time on, 3635*g*.
by thermophilic cellulose-fermenting bacteria, 720*d*.
heat of wetting of activated charcoal by, 8835*f*.
hertzian-wave absorption and dispersion in, 3717*b*.
hydrogen peroxide soln. in, bacteriotoxic effect in, 5533*i*.
hydroxyalkyl ether esters, P 886*e*.
lubricating greases from, P 5183*i*.
magnesium corrosion by, inhibitors for, 4622*e*.
manuf. of, 128*e*, P 673*e*, 1584*i*, P 3026*e*, P 3562*a*, P 4290*f*, P 5612*g*, P 6437*b*, 9488*g*.
from petroleum, 2758*e*.
from sugar, P 1148*b*.
from vegetable wastes, P 3561*e*.
manuf. of, by splitting of coconut oil and tallow, and glycerol in unsplit fats, 9487*e*.
melt with gelatin, porous spongy product from, P 5618*s*.
metabolism of, continuous enteral diffusion in studies on, 4359*f*.
metal films on, 2481*g*.
mixts. of, with Aerosol OT, or Aerosol OT and triethanolamine oleate, effects on foaming vol. of oils, 6814*h*.
with alc., distn. by heating liquid-vapor interface, 7297*i*.
with borax, soly. of resins in aq. solns. of, 1584*c*.
with coconut oil, polyester with mercaptosuccinic acid, and coatings therefrom, P 3633*d*.
dielec. relaxation of, 6020*b*.
with other humectants, hygroscopicity of, 3542*e*.
naphthoquinoneimide dye from, P 8167*b*.
nicotinates—see *Nicotinin*.
nitric and sulfuric acid esters of, and their salts, 5368*b*.
9,11-octadecadienoate, esterification with phthalic anhydride and heating with abietic acid, drying oil by, P 4873*b*.
ointment base (oil-in-water) contg., 5534*i*.
oxidation of, by *Acetobacter suboxydans*, 1828*e*.
oxidation of, with dichromate and light, kinetics of, 3695*g*.
for paper and pulp manuf., 5948*h*.
in paper manuf., 3615*d*.
phthalate, as insectifuge, P 8605*a*.
pigment-caking inhibition in nitrocellulose by, 7719*b*.
poly-, ester, antidimming material from, P 1884*a*.
from glycerol pitch, P 4033*b*.
unsatd. ethers of, P 903*i*.
prepn. of, 128*f*.
prepn. of, and related compds., 5367*c*.
purifying alc. solns. of, contg. esters and soaps, P 3636*e*.
as quenching liquid, 5355*b*.
rancidity of, detn. of, 1147*g*.
reaction products (resinous) with sulfates, for textile softening, etc., P 4870*b*.
reaction product with oil and rosin, thermoplastic wax from candelilla wax and, P 5232*g*.
reaction with aliphatic or aromatic amido acids or haloalkyl acid, surface-active agents by, P 8712*d*.
with esters from oxidation of kerosene, coatings from rosin esters and products from, 3182*h*.
with linseed oil, dielec. properties and functionality during, 9481*b*.
with $Ti(OH)_4$, P 6223*c*.
recovery, from aq. solns. and phases therein, P 9081*d*.
from fermentation concentrates, 8608*f*.
from ink-roll paste, P 4498*e*.
reducing-sugar removal from, P 4037*b*.
in rubber industry, 9512*h*.
sepn. from mixts. of polyhydric alcs., P 3839*g*.
solid, phys. properties in softening interval, 6029*c*.
solubilities of $H_3BO_3$ and succinic acid in, 1241*h*.
in soly. expts. with esters, 137*d*.
specifications for, 9492*d*.
substitute for, P 5416*a*.
adulterated butylene glycol as, 5540*f*.
glycols as, in enemas, 3147*h*.
1,2-propanediol as, in ointments, 5534*h*.
toxicity of, 818*d*.
suppositories contg., 1528*h*, 8093*i*.
in suppositories contg. Postonal, 8093*i*.
as suppository bases, 3563*f*.
system: AcOH–$C_6H_6$–, 8833*b*.
system: EtOH–$H_2O$–, foaminess and foam stability of, 7775*h*.
system: Na palmitate–x-ray diffraction by, 2793*b*.
thermal cond. of aq., 6499*f*.
thermal diffusion in aq., 2481*a*, 2491*a*.
toxicity of, 1867*f*.
trinitrate—see *Nitroglycerin*.
utilization by *Drosophila*, 322*h*.
utilization by plant tissues, 2281*b*.
vacuum pump using, 911*g*.
viscosity of, 2044*f*, 4915*g*.
viscosity of aq., 2058*i*.
viscosity of, pressure and, 5249*a*.
vitreous, transformation range of, 2383*h*.
in wine, 6779*h*, 6780*a*.
wood plasticization with, 5920*i*.

on malignancy, 2307*d*.
on N balance during casein diet, 4739*a*.
on phosphatase activity of sheep milk, 9279*i*.
on thrombin action on blood coagulation, 8538*a*.
on urea formation by liver, 6257*a*.
*Escherichia coli* variant induced by growth in, 4337*a*.
ethyl ester, and -HCl, 7425*h*.
ethyl ester, effect on glycolysis in brain, 7520*f*.
ethyl ester-HCl, formation of, from 1-(*m*-hydroxyphenyl) - 2,5 - piperazinedione, 2973*i*.
in fibrosarcoma and its normal homologous tissue, 5856*f*.
folic acid prepn. contg., 355*i*.
formation from serine, threonine and other hydroxyamino acids in tissue, 7986*f*.
hemoglobin synthesis from, labeled with radioactive C, 2243*f*.
in hemolymph of dragon-fly nymph, 3114*d*.
hydrazide, and ionization const., 5741*b*.
hydrogen-ion-concn. reduction in synthetic-elastomer latex by, P 2463*d*.
identification of, 2651*b*.
incorporation of labeled, into protein and lipide fractions of homogenates, 7538*c*.
labeled with $C^{13}$, and Et ester, 211*g*.
in lactogenic hormone of pituitary, 5474*e*.
liberation from raw and heated casein after acid and enzyme hydrolysis, 1819*f*.
in liver, diet and, 7562*g*.
in liver exts., 710*f*.
in lupine and soybean seeds and sprouts, 1080*e*.
from lycomarasmine hydrolysis, 4643*b*.
metabolism of, 6712*f*.
effect of pteroylglutamic acid on, 5835*c*.
isotopes in study of, 5482*c*.
methylene C atom of, incorporation into bone-marrow fats, 5054*b*.
mixts. with glucose, fluorescent development in, 7154*f*.
in myoglobin of whale, 7537*b*.
1,8-naphthalimidedisulfonic acid dye from, P 7710*g*.
nitrogen-labeled, as indicator in N turnover in purines from polynucleotides, 8030*b*.
as nitrogen source for *Polytoma*, 1835*e*.
for streptomycin production by *Streptomyces griseus*, 272*c*.
for *Ulva lactuca*, 6289*f*.
for yeast, 8447*b*.
in nutrition, of *Aedes aegypti* larva, 3940*i*.
of tissue cells, 9190*i*.
of yeasts, 1826*a*.
in organs of swine, 7061*h*.
oxalic acid formation from, in animal organism, 9198*i*.
oxidation of, 6570*b*.
by lipoxidase system, 6263*h*.
by plant tissues, 2283*f*.
oxidation (secondary) by catechol oxidase of belladonna, 3863*f*.
peptides from, absorption of water vapor by, 467*c*.
from pigments of yeast, 2258*d*.
in pollen collected by bees, 732*e*.
poly-, Curtius reaction in prepn. of, 5743*c*.
polymerization of, 3787*c*.
poly-, structure of, 6486*e*.
in porphyrin synthesis, 4718*d*.
poult requirements for, 1088*f*.
prepn. of, 6695*e*.
prepn. of carboxyl-labeled, and glutathione synthesis in liver, 8503*c*.
prepn. of, from $ClCH_2COOH$, kinetics of, 5656*e*.
in procollagen of ox, 8411*d*.
in protein (basic) from sperm nuclei of different invertebrates, 4388*b*.
in *Proteus vulgaris* flagella, 3061*f*.
reaction with $CO_2$ in the presence of $Ca(OH)_2$, P 5415*d*.
with $CS_2$, 1398*e*, 2247*g*.
with mixed anhydrides of benzoic and phosphoric acids, 2188*f*.
with $PhBzPO_4H$, 6996*f*.
with resorcinol, 2973*g*.
with sugars, 4501*h*.
in royal jelly, 7149*f*.
salicylate—see *Salicyluric acid*.
sepn. from hydrolyzed egg albumin, 8807*c*.
serine and glycogen formation from formate and, 3859*f*.
serine formation from, in animal organism, 4747*i*.
serine formation from, in liver, 9124*f*.
silk synthesis by silk worm from $C^{14}$-labeled, 7149*b*.
and sodium salt, spectra of, 4574*b*.
soly. in liquid $NH_3$ and in water, 4081*i*.
specific dynamic action of, and effect of vitamins and hormones thereon, 4353*e*.
specific dynamic action of, compared with yeast, 8471*h*.
in stabilization of solns. of polythionates and polythionic acids, P 7651*h*.
in thyroglobulin, 9121*i*.
in tissue after administration, 9120*g*.
in tissue and its detn., 8427*e*.
in tobacco-mosaic virus, 7092*b*.
trimethyl betaine—see *Betaine*.
uptake of carboxyl-labeled, into protein of *Torula utilis*, 8439*a*.
uptake of radioactive, by amphibian embryo, 4389*c*.
uric acid synthesis from, 3501*g*.
utilization of, by *Chlorella vulgaris*, 3494*a*.
by *Drosophila*, 322*i*.
in hemoglobin synthesis, 8480*d*.
for pyrrole synthesis for protoporphyrin, 4356*a*.
-vitamin C-Ca in treatment of hemorrhage, 3933*f*.
water-vapor adsorption by, 2066*h*.

in *Pseudomonas*, *ovalis*, and its properties, 2275*h*.
**Glycocyamine** (*guanidoacetic acid*), in blood plasma and urine, effect of testosterone and methyltestosterone on, 2301*f*.
creatine synthesis from, in animal tissue, methionine and choline as Me donors in, 6681*de*.
creatinuria from, and its relation to site of action of methyltestosterone, 7117*e*.
degradation by *Pseudomonas ovalis*, 3061*g*.
detn. in urine, 1451*g*.
effect on glycine concn. by diaphragm, 9120*d*.
methylation of, to creatine in cryst. lens, 7059*e*.
reabsorption by renal tubules, 7115*g*.
transmethylation of, in liver autolyzates, 8481*a*.
in urine of nephrotic and normal children, 8501*de*.
**Glycogen**. (See also *Metabolism, animal*.)
in adipose tissue, deposition of, insulin and, 8036*f*.
in adipose tissue, synthesis of, 2690*e*.
α-amylase (malt) adsorption by, 9504*h*.
in blood corpuscles and hemopoietic tissue, 2683*g*.
in blood in scarlet fever, 2697*g*.
in brain, blood gases and, 5848*g*.
breakdown or hydrolysis of—see *Glycogenolysis*.
in cartilage in rickets, and its relation to healing, 8038*a*.
complex with myosin, spectrum of, 8885*h*.
constitution of, 5431*b*.
consumption by cornea, effect of mustard gas on, 769*h*.
of corn, 6849*b*.
deposits in alloxan diabetes, effect of thiouracil on, 2304*f*.
detection and detn. in tissue, 4355*a*.
detection of, 5704*a*.
detection of, in tissue, 1823*c*, 2657*h*.
deuterium incorporation into, in animal, thyroid effect on, 8030*f*.
in diaphragm, formation of, effect of insulin on, 8029*f*.
formation of, opposing action of insulin and adrenaline or adrenochrome on, 5470*b*.
formation of, with and without insulin, effect of hypophysectomy, adrenocorticotropic hormone and adrenal cortical ext. on, 9255*g*.
effect on histoplasmin formation, 719*h*.
equil. state of mols. of, 8815*a*.
fibrinolysin release in blood serum by, 7125*h*.
formation of, 6251*h*.
after adrenal enucleation, 8031*f*.
effect of bacterial endotoxins on, 269*h*, 7542*h*.
from formate and glycine, 3859*f*.
after thymectomy, 2690*i*.
in hair and skin, 6710*f*.
in hair of rabbit, 7105*f*.
in heart, effect of adrenaline on, and effect of adrenal cortical hormone thereon, 1851*g*.
in heart, liver and muscles, effect of alloxan on, 8537*f*.
hydrolyzability of, by enzymes, 2252*b*.
in kidneys, formation of, effect of blood-sugar levels and insulin lack on, 6305*b*.
in kidneys in diabetes, 8518*d*.
in liver and muscles, after death, 9219*e*.
formation of, after adrenalectomy, effect of desoxycorticosterone, 17-hydroxy - 11 - dehydrocorticosterone and adrenal cortex ext. on, 9202*a*.
in hereditary osteopetrosis, 1482*h*.
oxidation of, with $HIO_4$, 1330*g*.
after thymectomy and thymus implantation, 2307*i*.
in liver, blood sugar regulation and, 3085*b*.
deposition of, effect of high-protein and high-carbohydrate diets on, 1847*b*.
in diabetes, 751*h*.
after dimethylaminoazobenzene poisoning, 6316*d*.
distribution of, 3910*d*.
distribution of fixed radioactive C in glucose from, 3476*g*.
effect of body substances of typhoid bacilli on, 5851*e*.
effect of folliculin on, 3937*a*.
effect of vitamin C on, 1113*g*.
of embryo, effect of decapitation on, 7104*d*.
formation and storage of, 1850*g*.
formation of, 7995*g*.
formation of, and effect of desoxycorticosterone acetate thereon, 3519*i*.
formation of, as indicator of intermediary metabolism, 5482*g*.
formation of, effect of adrenal cortical steroids and amino acids on, 9212*e*.
formation of, effect of digitoxin on, 2321*h*.
formation of, from glucose, effect of morphine, phenobarbital and urethan on, 7134*b*.
formation of, from pyruvic acid, 3073*i*.
after hypophysectomy, daily rhythm in, 6302*g*.

*in liver*, incorporation of acetate and butyrate C into, 5099*h*.
incorporation of isotopic $CO_2$ in, 3905*h*.
in infectious hepatitis, 3922*f*.
phosphorolysis of, in traumatic shock, 1100*h*.
during pregnancy, 6717*d*.
during protein depletion, 8478*c*.
storage of, 6727*b*.
storage of, amino acids in relation to, as influenced by adrenalectomy and adrenal replacement, 8544*b*.
in thyroxine intoxication, effect of pancreatic exts. on, 9200*a*.
loss during pregnancy, 8495*h*.
metabolism of, during work in diaphragms of normal and adrenalectomized rats, effect of desoxycorticosterone on, 3904*h*.
metabolism of, in psychotic states, 5486*h*.
methyl deriv., mol. wt. of, 3687*i*.
mol. assocn. in, 2584*a*.
in mucus glands of *Anodonta cygnea*, 3529*e*.
in muscles, black quarter development and, 3072*e*.
of cockroach in relation to O consumption, 2333*b*.
deposition of, effect of hypophysectomy on, 3506*a*.
effect of training on, 5480*b*.
formation and storage of, after castration, 2693*a*.
formation of, effect of insulin on, 9202*d*.
lactic acid formation from, 6255*e*.
natural, 3052*f*.
in nerve tissue of *Anodonta cygnea*, 3529*f*.
in organs, effect of vitamin C and glucomc acid on, 9182*h*.
phosphorylase action on, 7068*h*.
phosphorylation by muscle and liver of adrenalectomized cats and rats, 1098*f*.
in placenta, during O starvation, 4359*c*.
of rodents, 5466*h*.
of shrews, 7057*f*.
reaction with I, 9109*b*.
terminal groups in, detn. of, 2006*e*.
in tissue, deposition of, effect of α-hydroxybenzylphosphinic acid and its Na salt on, 1486*h*.
in tissue, diastase content and, 3505*c*.
triacetate, concn. and viscosity of, 6885*f*.
tricarbanilate from, 154*b*.
in tubercle bacilli, 9104*e*.
in tumors, 1857*b*.
in uterus and vagina, effect of progesterone, stilbestrol and testosterone on, 3503*i*.
in uterus, effect of corticosuprarenal hormone on, 7113*a*.
utilization by *Drosophila*, 322*h*.
utilization by *Tenebrio molitor*, 4387*i*.

**Glycogenase**, in intestines of *Oedemagena tarandi*, 1116*d*.
in liver, effect of folliculin on, 3937*b*.

**Glycogen disease**. See *Gierke's disease*.

**Glycogenolysis**, cyanide effect on, by phosphorolysis and by hydrolysis with amylase, 5804*i*
2,4-dinitrophenol effect on, 9268*e*.
enzymic, 4307*e*.
factor from insulin and gastric mucosa, purification of, 9212*g*.
by hydrochloric acid, 4307*c*.
in liver, effect of adrenaline and glycogenotropic hormone on, 8063*a*.
pancreatic factor for, origin and distribution of, 744*e*.
vitamin C effect on, 3501*i*.
by vitamin K, 8479*f*.

**Glycogenosis**. See *Gierke's disease*.

**Glycogenotropic hormones**. See "hormones of anterior lobe of" under *Pituitary gland*.

from cycloalkenes, 2173*b*.
dehydration of, P 3834*c*.
and derivs. as solvents, 3118*f*.
detection of, and laws regulating their use, 8188.
dialkylcyclohexyl derivs., P 1058.
dielec. properties of γ-, and their derivs, 11*c*.
dimethacrylates, casting compns. from Me methacrylate and, P 6467*b*.
disinfection of air with vapors of, 9387*b*
ester ammonolysis in, 6495*c*.
esters—see also *Esters*.
esters, 5399*e*, P 7503*g*.
with *p*,*p*′-alkylenedioxy derivs of benzoic acid, P 4897*h*
with fatty acids, granular polymers from vinyl halides and, P 6002.
with fatty acids, phys. properties and solubilities of, 2002*g*.
polymeric, P 1608*gh*, P 1609*d*, 5380*i*
with polymeric fat acids, prepn. of hydrogenated rubberlike, 8699*i*
polymeric, with dicarboxylic acids, $Fe_2O_3$ - reinforced peroxide - cured rubbers from, P 432*d*.
polymeric, with maleic acid, surface active bisulfited, P 1588*b*.
esters (mixed) of, P 7504*a*.
and their ethers and ether esters in azeotropic sepn. of xylene isomer 1007*c*
ethers of, esters of, P 3030*f*.
pigment powder wetting by 8698*a*.
of polyoxypropylene, P 391*a*.
reaction with halonitrophenols, P 1062*d*.
ethers or ether esters of, as azeotropic agents in styrene recovery from hydrocarbon oils, P 5582*h*.
ethylene γ-, 6162*i*.
hydrogen (active) detn. in, 3316*f*
identification of solid derivs. of, 6105*g*.
lubricants from reaction products with ales, unsatd acids, maleic acid or anhydride, and aliphatic amines, P 7679*a*.
lubricating greases stabilized by, P 5185*d*, P 5186*e*.
magnetic susceptibilities of γ-, and halogen derivs., 4911*d*.
manuf. of, P 673*c*, P 2223*h*, P 6652*a*, P 9080*f*.
from methylcyclopentenes, 2172*d*.
oxidation of, 7418*h*.
oxidation of α-, with ammoniacal Ag soln. and detection, 2548*c*.
pectates, 141*c*.
poisoning by glysantin, 1863*h*.
polyalkylene, esters with fatty acids, P 5792*f*.
lubricating greases from, 8660*b*.
mixts. of mixed, P 4289*e*.
polymeric allyl carbonates, for molding dentures, P 9538*g*.
sorbitan derivs.—see *Sorbitan, Tweens*.
surface-active esters with fatty acid polymers, P 6440*a*.
poly-, esters with fatty acids, emulsions from, P 4878*i*.
in heat-stabilization of vinylidene chloride polymers, P 3233*f*.
lubricating greases from, service life of, 5936*d*.
mono (alkylaryl) ethers, as lubricant additives, P 1177*f*.

polyethylene, absorption and penetration of therapeutic agents from vehicle of, 8609*f*.
acrylates and methacrylates of, purification of, P 7503*a*.
alkyl ethers of, P 3839*d*.
alkyl monoethers, hydrogen sulfates and sulfo carboxylic acid esters, for improvement in electroreduction of metals, P 4152*ce*.
as base for ointment contg. hexadecyltrimethylammonium bromide, 8609*e*.
cleaning compns. from, 883*e*.
crystallinity of, effect of surface-active agents on, 8609*e*.
derivs. of, 3784*b*.
detn. of detergent, 8710*e*.
dimethacrylates, emulsions of, P 9533*h*.
effect on antiseptic ointments, 3562*i*.
esters, P 7726*i*.
esters with tall oil, P 1557*c*.
esters with tall oil or rosin acids, as detergents, P 6438*f*.
fluorescent and penetration studies on carcinogens dissolved in, 8525*e*.
hygroscopicity of mixts. with other humectants, 3542*e*.
maleate, cellular polymers with styrene, P 3656*a*.
monoethers, for addn. to gelatin dynamite, P 3620*a*.
oil-in-water ointment base contg., 5534*g*.
in pharmacy, 4812*i*.
as pill base, 6365*g*.
reaction with octadecyl stearate, P 9080*e*.
stearate, as ointment levigating agent, 5534*g*.
stearate, effect on crumb softness of bread, 3113*g*.
stearic acid esters, P 6652*f*.
as suppository base, 8093*i*.
suppository bases contg., 9365*h*.
toxicity to tomato cuttings, 3072*a*.
tumor production with, as carriers for carcinogenic hydrocarbons, 5108*g*.
vulcanized esters of, plasticizers from, P 3242*g*.
polyethylene and polypropylene, Verdet const. of, 8240*b*.
polymers of, hydraulic fluids from, P 6341*a*.
polypropylene, Bu ethers, as fly repellents, 8603*i*.
polypropylene, esters of monoalkyl ethers of, as lubricants, P 1562*e*.
polythio, aldehyde condensation products of, P 6001*e*.
in polyvinyl alc., 8240*g*.
properties, toxicities and uses of, 1320*g*
solutizers of amino glycols and, for thiol extn. from hydrocarbon oils, P 4844*c*.
as solvents for extn. of aromatic hydrocarbons, P 8670*c*.
steroidal, 16,17-, 3434*e*.
stimulation by, and their polymers on tarsal receptors of blowflies, 2358*e*.
terephthalic esters, degradation of, P 4519*a*.
for melt-spinning, P 4052*f*.
polymers of, P 4896*g*.
recovery of terephthalic acid from, P 4052*c*.
sizing yarns of, with hydrolyzed polyvinyl acetate and $H_3BO_4$, P 3628*a*.
stabilization of, P 4052*d*.
tetrahydro-2-furanol synthesis through intermediate, 4253*i*.
thermal cond. of, 6499*f*.
thio-, esters of, P 3662*b*.
vaporizers for, with app. for control of concn. in air, P 6370*g*.
vinylacetylene, dehydration and isomerization of, 2162*g*.
**Glycoluric acid.** See *Hydantoic acid.*
**Glycoluril** (*tetrahydroimidaz[4,5-d]imidazole-2,5-(1H,3H)-dione*),

**3a,6a-dimethyl-**, toxicity to rats, 348*h*.
**3a,6a-diphenyl-**, toxicity to rats, 348*g*.
——, **1,3,4,6-tetrakis(hydroxymethyl)-**, 5996*b*.
**Glycolysis** or **Glucolysis.** (See also *Fermentation; D-Glucose.*)
of blood in cancer, P release during, 2310*c*.
of brain, effect of antipyrine on, 7147*b*.
effect of Mg on, 7588*d*.
in epilepsy, 9230*h*.
of febrile and normal rabbits, 7146*i*.
protection by amides and esters of amino acids, 7520*d*.
of brain prepns., 8484*b*.
cold effect on, 5052*i*.
by cornea, 769*g*.
dissociation of synthesis from, in yeast in presence of Na azide, 1826*c*.
enzymes of, in fractions of tissue homogenates, 2652*b*.
by *Escherichia coli*, effect of fatty acids on, 717*i*.
glyceraldehyde effect on, 9119*h*.
inhibition by NaF, ketolysis after, 1863*g*.
inhibitors of, in cancer treatment, 5856*g*.
keto acids and, 6680*i*.
in liver, 4358*c*.
in liver homogenates, 8508*b*.
malignant tissue formation and, 303*g*.
in muscle, effect of adrenaline on, 7986*c*.
in muscle, effect of isopropyl fluophosphate on, 5478*b*.
in muscle exts., effect of amidines and related compds. on, 7581*e*.
in muscle exts., effect of naphthoquinones on, 7581*c*.
oxalacetate metabolism in tumor homogenates during, 4369*h*.
in parasitic nematodes, 9270*d*.
permeability of erythrocytes in relation to, 4764*a*.
in *Plasmodium gallinaceum*, 5445*g*.
respiration ratio to, in bone marrow or lymphosarcoma, effect of pH on, 4752*c*.
of retina after section of optic nerve, 7105*e*.
in retina during dark adaptation, 3503*g*.
review on, 9122*h*.
in skin, effect of mustard gas on, and its relation to cancer growth, 8548*g*.
in skin prepared for Shwartzman phenomenon, 5858*h*.
in tissue, effect of $CS_2$ on, 7577*d*.
in tissue homogenates, adenosinetriphosphatase and, 9090*d*.
tumor, enzymic system in, 7575*h*.
in tumor homogenates, 2697*e*.
by tumor, phosphorylated intermediates in, 1857*b*.
**Glycoproteins.** (See also *Mucins; Mucoids; Proteins.*)
acetyl attached to hexosamine in, form of, 3480*e*.
in blood, sugar components of, 6259*b*.
glucuronic acid detn. in, 5071*c*.
proteins which make up natural, 7062*g*.
**Glycosidase**, in *Drosophila*, 322*i*.
**Glycosides** or **Glucosides.** (See also *Aglucons; Glucides; Saponins;* and specific glycosides, such as *Convallatoxin*) 243*d*, 1429*i*, 1790*h*, 1791*c*, 2583*b*, 7034*b*, 9380*e*.
acid-sensitive, review on, 8616*a*.
from *Adonis amurensis*, 2371*b*.
aglucons and, 714*i*.
alkaloidal, from wild-tomato leaves, 5551*a*.
anthraquinone, 2984*g*.
anthraquinone, effect on intestines, 6308*h*.
of apigeninidin chloride, 7935*h*.
in *Apium dissectum*, 2280*a*.
carboxyl group in compds. of the type of, 4641*g*.
cardiac, P 823*d*, P 2739*e*, 4679*e*.
assay of, 4810*i*.
carriers for, P 2375*c*.
compds. related to, 4654*i*, 4655*a*.
detn. of, 2735*b*.
effect of atropine and papaverine on intestinal contractions from, 5872*f*.
effect on cholinesterases of myocardium, erythrocytes and brain, 4380*f*.
effect on electrocardiogram and myocardium, 4380*h*.
effect on respiration of cardiac muscle, 1110*g*.
effect on smooth muscles, 1485*h*.
evaluation of, 3106*a*.
isolation from digitalis leaves, P 5909*e*.
prepn. from squill, 3977*d*.
*cardiac*, from *Urginea*, 3150*a*.
cardioactive, from *Euonymus europaeus* seeds, 2371*h*.
cardioactive, in medicine, 7193*g*.
in *Cestrum hediondinum*, 2279*i*.
of *Citrus trifoliata*, 4669*h*, 6582*g*.
from *Convallaria majalis*, 3976*f*.
coumarin, as growth substances, 5893*b*.
cuprammonium complexes, 3368*d*.
of cyclopenta[*a*]phenanthrene derivs., P 2376*h*.
detection in squill, 2372*e*.
detn. of, 8004*g*.
detn. of cardiotonic, 1152*a*.
digitalis—see *Digitalis;* and the specific digitalis glycosides, as *Digitoxin.*
of digotoxin group formed from purpurea glycoside A in digitalis prepns., 7644*b*.
of dihydroxyanthraquinone, 5019*gi*.
drugs contg., stabilization against fermentation, 5902*h*.
enzymic synthesis of, 4710*e*.
flavanone, 7935*e*.
of hibiscetin, 1408*a*.
manuf. of, P 2243*c*, P 5428*a*.
methoxy detn. in, 8975*i*.
nitrates of, 5007*f*.
*N*-, of aminobenzoic acids, and derivs., 3805*h*.
of *Oleander*, 5548*b*.
of phenolphthalein, P 689*i*.
of phenols, 7922*i*.
*p*-phenylazophenyl, spectra of, 6919*e*.
of polyhydrocyclopentaphenanthrene dihydroxy derivs., P 1532*i*.
in *Potentilla anserina*, muscle-relaxant effects of, 9383*g*.
prepn. of, 1770*d*, 3393*g*, 7430*g*.
of 1,2-propanediol derivs., 312*c*.
of purine and pyrimidine derivs., 144*f*, 1406*bh*, 1726*c*.
purine, synthesis of, 2649*i*.
from rice bran, 1117*g*.
of *Salix purpurea*, 7924*b*.
from *Senna* leaves and pods, P 2376*a*.
solvent for flavone, P 2789*e*.
steroid, P 5811*c*.
strophanthus, assay of, 4811*a*.
of 5-styrylresorcinol and its mono-Me ether, 5017*e*.
sulfur-contg., in seeds of crucifers, 3888*b*.
tetraacetyl-β-D-, cleavage of, with Br, 1326*g*.
toxic, removal from rapeseed press cake, 6757*b*.
from *Urginea maritima* seeds, 5550*g*, 7195*e*.
**Glycostatic factor.** See "anterior lobe of" under *Pituitary gland.*
**Glycosuria** or **Glucosuria**, in Addison's disease, 1480*b*.
adrenochrome effect on, 3517*i*.
from aminobenzoic acid and its derivs., 9245*g*.
mechanism of, 2308*f*.
after pancreatectomy, effect of high-protein and high-carbohydrate diets on, 3498*h*.
in pregnancy, 4753*c*.
in pregnancy, incidence and causation of, 745*e*.
review on, 6300*a*.
**Glycosylation**, of hydrocarbons, P 7507*cd*.
**Glycosyl halide**, acetyl derivs., mol. structure of, 2964*h*.
**Glycotropic hormones.** See *Pituitary extracts;* and "hormones of anterior lobe of" under *Pituitary gland.*
**Glycuronic acid.** See *Glucuronic acid.*
*N*-**Glycylglycine dipeptidase**, cobalt in hydrolysis by, 2250*b*.
peptide splitting by, 1448*e*.
*N*-**Glycylleucine dipeptidase**, of animal tissues, 2249*i*.
peptide hydrolysis by, 1448*d*.
sarcosyl-L-leucine hydrolysis by, 2250*b*.
**Glycyrrhiza**, oils of—see *Oils.*
**Glyketal***, pharmacology of, 7582*a*.
**Glykresin.** See *1,2-Propanediol, 3-o-toloxy-.*
**Glyoxal** (*biformyl, diformyl, oxalaldehyde*), aldehydic function and, 6159*g*.
bis(dibutyl acetal), toxicity of, 4401*g*.
bis(2,4-dinitrophenylhydrazone), 2575*f*, 6980*f*.
in corrosion prevention by acid cleaning compns., P 6439*a*.
dioxime—see *Glyoxime.*
disemicarbazone and polymer, 123*f*.
in Doebner reaction with $2\text{-}C_{10}H_7NH_2$, 5025*g*.
effect on stiffness, stress-strain properties and wrinkle resistance of rayon and wool fabrics, 5193*a*.

formation of, in oxidation of $C_4$ hydrocarbons, 1309c.
manuf. of, and purification of its polymers, P 4688i.
sulfate, as catalyst in partial hydration of myrcene, P 6219g.

compression of, 4917a.
corrosion resistance of, in red fumi $HNO_3$ and in mixed acid, 986g.
cosmic-ray showers in, 5285a.
deuteron bombardment of, angular di tribution of neutrons from, 8866d
distribution in animal body in relation t arthritis, 763d.
effect on liver function, 5118a.
on *Mycobacterium smegmatis*, 5444c.
on oxidation of Ni, 4619f
on polarographic drop time, 1270h.
on *Proteus vulgaris* and *P. X19*, 1455f
elastic and structural properties of, 9001g
elec. resistance and heat of soln. in Ag 3683g.
elec. resistance of, at low temps., 8784a
electrodeposition of, polarography and 3297e.
electrodes of, in potentiometric titration of thiosulfate, 6934e.
electron scattering by, 8269h.
electroplating with, 6924g.
on bearings, P 7896a.
on Be-Cu alloy, 3727h.
in combination with Cr, 1268g.
detn. of Au in cyanide baths for 8904d.
on fabrics, P 6529a.
with reversing current, P 956e.
energy loss by deuterons and protons in 4123f.
energy loss by $H^1$, $H^2$, $He^4$ and $Li^6$ nuclei in, 1646c.
erosion (bridge) of contacts of, 1235c.
exchange between $AuCl_3$ and, 6890h
films of, crystal structure of, 4071c.
effect of heat on structure of, 4923b.
elec. resistance and optical properties of, 2836c.
spreading of oils over, 8799a.
on ZnS, crystal growth in, 7286a.
fineness of, calcn. from sp. gr. measurements, 6112b.
gamma-ray bombardment of, threshold for neutron emission in, 8864d.
glass coloration with, 8111f.
heat transfer by radiation to surface of, 4939b.
hydrogen overvoltage on, in MeOH solns., 4585c.
industry in 1946, 2127c.
isotope of mass 198, autoradiography of, 1258e.

*isotope of mass 198*, β-rays from, 8879*h*.
coincidence expts. on, 4094*d*.
decay by *K*-capture, 4564*bc*.
γ-rays from, 9355, 4122*i*, 4124*g*, 6075*i*.
and γ-rays from, 1647*a*, 4950*c*.
half-life of state following β-decay of, measurement of, 6914*e*.
sepn. from stable isotope, 5297*f*.
in therapeutics, 3524*c*.
isotope of mass 199, β- and γ-rays from,
isotope of mass 199, radiations from, 36*i*.
isotopes (radioactive) of, 4124*i*.
isotopes (radioactive) of, decay of, 6911*h*.
light absorption by, 4957*f*.
magnetic susceptibility of, in borax glass, 2053*b*.
melting point of, 5274*c*.
metabolism inhibition by, mechanism of, 8003*g*.
metal-ion adsorption by, 5254*g*.
minerals, of Kern Co., Calif., 4607*e*.
in Precambrian rocks of Midlothian Twp., Ontario, 8315*a*.
of Siskiyou Co., Calif., 2901*f*.
in mineral springs at Beppu, Japan, 5703*h*.
native—see *Gold ores*.
neutron binding energy of, and energy of γ-rays emitted on neutron-capture by, 8861*d*.
neutron cross sections of, 6506*b*, 6909*d*.
neutron fission cross section for, 4127*d*.
oxidation (anodic) of, in alkali, 4583*i*.
oxide film on anode of, 47*d*.
particle size measurement by x-ray scattering, 2863*d*.
-peptone-agar complex, P 8619*i*.
in photographic development, 51*d*.
photographic images of, in glass, 4965*g*.
poisoning by, BAL in treatment of, 3523*h*, 6739*f*.
potentials in solns. of foreign ions, 2875*b*.
powder metallurgy of, P 7403*a*.
powder metallurgy with powders of other metals, 7879*a*.
proton-stopping power of, 8868*b*
in pyrite, quartz and rock in Paleozoic of Belgium, 7382*f*.
radioactive, from gold mechanically bound to radioelements, P 3296*g*.
reaction with $H_2SeO_4$, 6931*b*.
recovery from sea water, P 5238*e*.
scattering of electrons and positrons in, 6911*i*.
solid solns. with Cu-AuCu, order-disorder in, 3260*e*.
with Cu, neutron studies of order-disorder in, 4130*i*.
with elements, lattice spacings of, 3684*h*.
soln. in aqua regia, active centers and, 6028*c*.
spectrum (x-ray) of, 6079*f*.
surface energy and tension of, 5653*a*.
surface tension of, 8255*e*.
system: Cu–, 7771*a*.
internal friction in, 3258*f*.
transitions in, 8254*e*.
system: Cu–Ag–, 2562*c*, 9014*a*.
system: Pb–Zn–, 6067*a*.
system: Pt–, 2853*f*.
system: Ag–, 4074*c*.
in tissue after $AuCl_3$ administration, 2698*i*.
toxicity and excretion of, effect of 2,3-dimercapto-1-propanol on, 4765*c*.
toxicity to mycomycetes, 8448*f*.
uses of, in industry, 532*i*.
wettability of, effect of gases on, 2485*i*.
x-ray excitation of, 4131*g*.
x-rays from, 1262*c*.

**Gold, analysis, assaying,** use of slag from, 7390*c*.
chromatographic, 4595*g*.
chromatographic sepn. from other noble metals and detection, 3743*d*.
detection, 963*d*, 4599*d*, 8299*h*, 8300*g*, P 8080*g*.
detn., 2542*e*, 3743*i*, 4597*i*, 6106*f*, 8303*e*.
detn. in cyanide baths, 8904*d*.
in electroplating baths, 961*h*.
in ores, 4602*b*.
in precious alloys, 5334*b*.
in tissues, 711*a*.
sepn. from metals with colored ions and detn., 1283*b*.

**Gold, metallurgy of.** (See also *Cyanide process.*)
amalgamation, elec. app. for, P 9021*h*.
by ammine formation and sorption, P 8344*e*.
from antimony ores and slags, 78*h*.
from arsenic ores, 1695*g*.
book: Refining, 2566*c*.
cyanide-process, adsorption by activated C in, P 6562*c*.
adsorption by charcoal in, P 5357*b*.
for arsenical ores, P 7891*b*.
Ca detn. and control in thickened feed pulp in, 3311*a*.
countercurrent decantation in, 6133*a*.
pH control in, 78*c*.
ion-exchange resins in, 3753*d*.
in treatment of sulfide ore of Southern Rhodesia, 7875*h*.
for U ores of Katanga, 1292*b*.
Zn dust for, P 7891*d*.
history of, 2477*e*.
in Minas Gerais, 2905*i*.
refining, 5711*i*.
review on, 77*c*.
roasting arsenical ores, 6131*i*.
roasting arsenopyrite concentrates, 6132*h*.
from sand, P 7891*c*.
from sea water, ion-exchanging resin for, P 2344*j*.
from seleniferous ores, P 4998*f*.
sintering pyritic ores, $SO_2$ recovery in, 3753*h*.

**Gold alloys.** (See also *Electrum; Gold compounds;* and "system" under *Gold.*)
aluminum-Cu-Pd-, P 8349*a*.
amalgams, in dentistry, 9014*b*.
annealing of, in protective gas, 3757*d*.
bismuth-, and Tl-, eutectics in, 4935*f*.
bismuth-, elec. supercond. of, 4532*h*.
cobalt-Ru-, for elec. contacts, P 5357*e*.
copper-, and Cu-Ag-, order in, lattice parameter and, 4205*d*.
copper-, and Ag-, crack formation in stress corrosion of, 7879*e*.
copper-, and Ag-, elec. resistance of, 3684*a*.
copper-, effect of neutron bombardment on order in, 6915*a*.
elasticity of, temp. and, 5715*d*.
expansion by heat, 542*i*.
order of, 7770*i*.
superlattices of, 542*f*, 8788*a*.
superstructure formation in, 9001*i*.
copper-Mn-Ni-Zn-, for dental use, P 6563*h*.
copper-Ni-Pd-Pt-Ag-Zn-, for dental work, P 2922*d*.
copper-Pd-Pt-Ag-, chromatography of, 3745*c*.
copper-Ag-, structure of, 2562*c*.
copper-Ag-Sn-, P 4626*d*.
copper-Ag-, transformations in, 4618*d*.
elec. resistance of, effect of pressure and temp. on, 5679*d*.
fineness or Au content detn. by sp. gr. method, 6112*c*.
for jewelry, 9014*b*.
platinum-, Ag-, and Pt-Ag-, electrodeposition of, 2097*i*, 2098*c*.
silver-, and Pt-Ag-, electrodeposition of, 4148*c*.
silver-, diffusion in, 1622*f*.
silver-, potential of, in fused glass, 6092*a*.
solid solns. in, lattice spacings of, 8782*a*.

**Gold bronze.** See *Bronzing.*

**Gold chlorides,** stability in soln., 6494*i*.

**$AuCl_3$,** effect on O consumption of tissues, effect of thiol compds. on, 2328*g*.
exchange between Au and, 6890*h*.
gold in tissue after administration of, 2698*i*.
reaction with org. sulfides, 1313*c*.
reaction with org. sulfides and formation of compds. $R_2S.AuCl_3$, 5323*b*.

**Gold-Chrome,** elec. resistance of, effect of pressure and temp. on, 5679*d*.

**Gold compounds.** (See also *Chloroaursc acid.*)
ammines, P 3158*a*.
ammines, in Au recovery, P 8344*f*.
in arthritis treatment, metabolism, toxicity and manner of action of, 2328*f*.
with copper and Zn, compressions of, 4917*a*.
with copper, effect of neutron bombardment on order in $CuAu$, 6915*a*.
with copper AuCu, solid solns. with Cu and Au, order-disorder in, 3260*e*.
cyanide, complexes, polarography of, 3297*e*.
diethyl— derivs., 7421*e*.
diethyl— thiocyanate and related compds., 9034*i*.
effect on sensitivity of photographic emulsions, 5682*i*, 7842*e*.
org., 7421*e*.
with parafuchsin, 7856*a*.
photographic emulsion contg., P 4592*e*.
with sulfanilamide and derivs., 1347*g*.
with thioglucose, effect on liver function, 5118*a*.
with thioglucose, obesity from, 5117*f*.

**Goldenrod,** copper, Fe and Mn in, and its rubber, 2799*e*.
cultivation, fertilization, compn., etc., of, 2372*a*.
oils of—see *Oils.*
rayless—see *Rayless goldenrod.*
rubber production from leaves of, P 1211*e*.
as rutin source, 8102*a*.

**Golden seal.** See *Hydrastis.*

**Golden Yellow.** See *Dyes.*

**Goldfish,** benzene-deriv. toxicity to, inhibition of autoxidative reactions and, 9271*a*.
chloride balance of, physiol. adjustments in, 1116*f*.
insecticide toxicity to, 9345*f*.

**Gold hydroxides,** polarography of, 3297*e*.

**$Au(OH)_3$,** Au passivity and soly. of, 4584*b*.

**Gold ores,** of Alaska, as basis of industry, 2130*e*.
antimony-, of Blue Spec Mine, W. Australia, 6122*i*.
arsenic-, of eastern Alps, 8314*i*.
of Australia, 525*a*, 4980*h*, 6122*h*.
of Belgian Congo, 2135*d*, 2136*a*.
of British Columbia (Stanley area), 4607*i*.
of California, 3750*b*, 5707*de*.
concn. of, 77*h*, 6955*a*.
concn. of, by calcining and cyanide treatment, P 2151*i*.
copper-Fe-Ag-, of Mt. Andrew, Alaska, 7384*e*.
copper-Pb-Ag-Zn-, from Cascade Co., Mont., 5711*f*.
copper-, of Natagaima, Colombia, 525*h*.
of Prince of Wales Is., Alaska, 2131*b*.
of Virgilina Copper dist., Va. and N. Car., 2131*e*.
copper-Pt-Ag-, of Salt Chuck Mine, Alaska, 74*c*.
copper-Ag-Zn-, of Sherritt Gordon Mines, Manitoba, 4188*a*.
copper-Zn-, of Blue Ledge Mine, Calif., 7382*h*.
crystals from southern Appalachians, 8982*c*.
deformation of vein quartz of native Au and sulfide, of Beresov, 2900*a*.
of Egypt (Barramiya Mining Dist.), 1692*d*.
flotation of Co-Cu-Ag-S-, 1693*d*.
flotation of, effect of O absorption and oxide films on Au in, 7875*f*.
fossil placer, under basalt of Kivu, Belgian Congo, 1291*h*.
of Idaho, 4980*i*, 6954*b*.
of India (Mysore), 2130*f*.
of Itay (Ticino River sands), 2130*f*.
lead-Ag-, near Velhartic, Bohemia, 4187*i*.
lead-Ag-Zn-, of Akoz Mine, Calif., 7383*d*.
mercury in sulfide, of northern Sweden, 6544*i*.
mercury-Ag-Sn-, placer, near Guadalcazar, Mex., 4983*b*.
of Montana, 2900*d*, 8315*d*.
native and sulfide, of Colombia, 525*e*.
native, from Belgian Congo, 523*bc*.
native, in W deposits at Hyder, Alaska, 2131*h*.
of New Mexico, 1692*a*, 4607*f*.
of Newfoundland (Southern White Bay), 1692*b*.
of New Zealand (Reefton), and relation of lode to synclines and anticlines and history of mining, 6544*h*.

**Gramine** (*donaxine*). For derivs. see under *Indole, 3 (dimethylaminomethyl)-.*
labeled with $C^{14}$, 8379i
reaction with triethyl methanetricarboxylate, 3405g.
**Gramineae.** See *Grasses.*
**Graminic acid.** See "hydrochloride" under *Tyrocidine.*
**Graminin,** in *Apera spicaventi* stems, 8011f
**Granadilla.** See *Passion vine.*
**Granary weevil.** See *Sitophilus granarius*
**Granite.** (See also *Alaskite; Gneisses; Pegmatites; Rapakivi.*)
alkali, of Kola Peninsula, 3749e.
amphibole- and biotite-high, in Geremeas territory, Sardinia, 978c.
of Annam, 2135c.
of Belgian Congo (Kibara Mts.), 2135c
biotite, spheroidal weathering of, 6550a
or California, 2901i, 2904h.
of Colombia (Anserma), 526a
diorite altered by intrusive, of Rastenberg, Austria, 8320c.
drusy, of Drăganului Valley, Rumania, 5709a.
of Egypt, 1692d, 6548e.
formation of, 8253e.
thermodynamic stability of minerals and, 6548h.
in Västervik quartzite, 7386e.
of France (Margeride and Mt. Lozère), 8320b.
gallium and Ga/Al ratio in, 2906e.
gamma-rays from, 4128e.
gneissose, formation in Nanga Parbat massif, India, 4985c.
of Italy, 5708fi.
of Japan (Gosaisho-Takanuki dist.), 6127i.
magmatic and metasomatic processes in, 7874d.
melting of, magma rise and isostasy from, 6127a.

microflora of, 9160*e*.
of Minnesota (Duluth area), 6548*e*.
of New Hampshire (White Mt. series), 6129*b*.
of New Jersey (Highlands cryst. belt), 74*g*.
norms of average analyses of, 2552*a*.
of Poland (Volhynia), 1293*b*, 3752*a*.
porphyriticbiotite, of Terska-Alatau Ridge of Tyan-Shan, 7386*a*.
radioactive Th and U in, from Brittany, 6127*c*.
radioactivity of, photographic study of, 4128*e*.
radioactivity of Vosges, 37*d*.
radioelements in, detn. by photographic method, 4565*g*.
radium in, of Egypt, 7874*a*.
relations among diorites, schists and, in western Odenwald, 8320*b*.
review on, 978*d*.
rubidium, $Rb^{87}$, Sr and radiogenic Sr in, from Finland, 6132*d*.
of the Sahara, 6127*c*.
schistose terrane intrusion by, in Minn., 6129*a*.
sillimanite, of Co fahlband mineralization of Modum dist., Norway, 8316*f*.
of Spain (Tarragona), 6548g.
of Sweden, 373*g*, 7382*f*.
of Tanganyika Territory, 75*i*.
thorite in Brittany, 8996*c*.
thorium- and U-bearing, in Hungary, 8996*b*.
with tin mineralization in China, 1291*f*.
xenoliths in pillow basalt of British Columbia, 2903*i*.
**Granitites**, from Italy, 4980*c*.
of Sardinia, 978*c*.
**Granitization**, of gneisses and volcanic rocks in Black Forest, 7871*c*
of infra- and supercrustal rocks of Finland, 3323*g*.
metasomatic, of batholithic dimensions, 4985*a*, 6548*i*.
in New Zealand, 8314*d*.
progressive, effect on age detns. of quartz and pegmatites, 8231*d*.
**Granitoids**, potassium metasomatism in formation of Caledonian, of Terska Alatau Ridge, 7385*i*.
**Granodiorites**, of Balkans between Botevgrad and Zlatitza Passes, 4191*b*
batholith intrusions of Caucasus, effect of microclinization on, 8993*b*
batholiths of Arequipa quadrangle, Peru, 73*i*.
of California, 2904*h*.
in chromite veins in Itaú, Brazil, 2132*h*.
norms of average analyses of, 2552*a*.
of Oregon (Kerby Quadrangle), 4984*h*.
origin and transformations of, in Terska-Alatau Ridge of Tyan Shan, 7386*b*.
of Poland (Volhynia), 1293*b*.
porphyrites in red beds of Sheku area, China, metasomatic origin of, 6548*i*.
in serpentinite at Harper's, N. Z., 4610*d*.
of Sweden (Ingelsby), 7382*f*.

**Grapefruit**. (See also *Citrus*.)
carotene and vitamin C in, 3536*a*.
compn. and growth in Southern France, 8157*e*.
drop of, sprays reducing, 1518*b*.
melanose control on, 3553*g*.
peel (dried) of, as feed for dairy cows, 785*i*.
peel of, pectin manuf from, 3668*d*.
size of, increase by 2,4-D, 8597*i*.
vitamin C in, 5511*b*.
**Grapefruit juice**, fertilizer effect on compn. of, 2726*a*.
frozen concd., sirups in prepn. of, 8571*h*.
vitamin C in, and effect of storage thereon, 3944*h*.
**Grapefruit oil**. See *Oils*.
**Grape juice**. (See also *Musts*.)
DDT residues in, 6328*h*.
fermentation of, alc. losses during, 8090*h*.
fermentation of, pH and, 8606*e*.
Fiehe reaction in relation to, 785*e*.
glucose ratio to fructose in, 8070*h*.
glycerol formation from, by yeasts, 6780*a*.
iron detn. in, 3560*b*.
manuf. of, in U. S., 8069*d*.
odors of, organoleptic properties and, 784*c*.
from scarlet grapes, 6328*g*.
stabilization with $SO_2$ and $H_2SO_3$, P 4397*d*.
sulfur dioxide removal from, 6329*c*.
**Grapes**, amylase and invertase action in, coördination of, 8453*h*
anticryptogram for, Cu-$NH_4$ salt complex, P 5152*d*.
argol crystn. in products from, prevention of, P 9294*i*.
arsenic poisoning in raising, 8533*i*.
arsenite-spray injury to leaves, 3135*a*.
bleeding of vines of, 3889*e*.
bromine and Cl in, 3537*g*, 8572*d*.
carbohydrate metabolism in vines of, 3069*a*.
carotene and vitamin C in, 3536*a*.
carotenoids and vitamin A in, 5830*i*
cellulose from vine branches, P 8680*f*.
chlorosis of, Mg and, 9329*h*.
chlorosis prevention in muscadine, magnesium injection for, 5091*e*.
court-noué of, 803*b*.
DDT residues in, 6328*h*.
disease control on, with Dithane, 3133*i*.
exts. from vines of wild, detergent from $Na_2CO_3.2NaHCO_3$ and, P 6844*i*.
fertilizer expts. with, 9329*cf*.
fumigant sorption by sultana, 3962*h*.
fungicide for, cuprioxychloride as, P 9355*f*.
fungicides for, Al compds. as, 8596*h*.
fungus control on, 7177*g*.
hybrid, for juice and jellies, 6328g.
insect control on, 9329*a*.
marc, tartaric acid and its salts from, P 2226*e*.
melanin-forming oxidases in, 277*i*.
mildew—see also *Uncinula necator*.
mildew control on, 3959*e*, P 4807*a*, 8596*hi*.
muscatel, cultivation, wines, etc., of, 8605*h*.
nutrient deficiency symptoms of muscadine, 9173*h*.
nutrition with N and P, effect of climate and soil on, 6349*ef*.
pekmez prepn. from, 784*c*.
pest control on, compn. for, P 5528*f*.
pigments of, spectra of, 7093*i*.
plastids of, cytochrome oxidase in, 8454*c*.
pomace, alc. detn. in, 5531*c*.
potassium supply of, effect of climate and soil on, 7174*d*.
ripening of, 728*c*.
root-rot of, control in soln. culture, 9351*a*.
rubidium in, and in wine therefrom, 9350*e*.
ruby cabernet and emerald riesling, 3560*f*.
seedless, early maturing, 6328*f*.
seeds, activated C from, 9295*i*.
soils, assimilable and presumably assimilable $H_3PO_4$ in, 5141*i*.
stakes for, keeping qualities of, 6351*i*.
starch synthesis and hydrolysis in, 5091*h*.
sucrose in, 280*e*.
tartaric acid recovery from wastes of, 3969*i*.
vine shoots, utilization of, 6360*i*.
vitamin $B_1$ in, 6753*i*.
vitamin C in, 5511*b*, 7603*f*.
weed-control-agent effect on, 9351*g*.
**Grape-seed oil**. See *Oils*.
**Grape sugar**. See *D-Glucose*.
**Graphite**. (See also *Carbon; Graphitisation*.)
adhesion of particles of, effect of gelatin, molasses, starch and sucrose on, 4503*b*.
adsorption (multimol.) by, 7289*a*.
adsorption of $NH_3$, EtCl and $H_2O$ by, 1638*h*.
adsorption of $NO_2$ $N_2O_4$ by, 6035*b*.
of Alabama, and its beneficiation, 1694*f*.
of Alaska (northwestern), 8314*i*.
anodes in electrolytic prepn. of F, 2871*h*.
Australian industry of, 6546*f*.
bearing compn. from, P 3233*i*.
bearings of, for mech stirrers, 2821*b*.
bromine sorption by, 6038*e*.
brushes of, P 4403*c*.
as building material for industry and labs., 2041*c*.
of California (Skiskiyou Co.), 2901*f*.
capillarity and surface area of, 6036*g*.
in carbazole manuf. from o-$PhC_6H_4NH_2$, P 9086*a*.
in cementation and hardening of Fe and steel parts, P 9019*h*.
in chem engineering, 8745*b*.
chlorination of, 5572*d*.
coatings for containers for bituminous substances from, P 907*g*.
coating with, on nonconductors for electroplating, 8286*b*.
colloidal, detn. of, 5159*e*.
light polarization by, in rotating magnetic field, 7291*d*.
in $H_2O$, 5159*d*.
compds. with HF, 2534*a*.
crucibles, borax substitute for, P 6803*f*.
crucibles, repair of, P 6804*a*.
crystals and crystallites of, binding energies in, 2484*bd*.
detn. in malleable cast Fe, 970*b*.
effect on fireclay, 8112*a*.
of Egypt (Barramiya Mining Dist.), 1692*e*.
electrodes, analysis of purified, 5337*b*.
electrodes for electron tubes from, P 1274*e*.
electron secondary emission of, 4101*g*.
expansion by heat, 8253*h*.
flotation of, 2379*a*, 6373*e*, P 7204*b*.
formation from petroleum coke, rate of, 1230*f*.
formation of, 4545*i*.
formation of spherulitic, in cast Fe, 2558*i*.
friction material from, P 5519*a*.
heat capacity of, 1638*b*.
heat of sublimation and vapor pressure of, 457*c*.
heat of sublimation, melting point and vapor pressure of, 1638*e*.
heat of sublimation of, 8254*g*, 8754*e*.
heat transfer by radiation to surface of, 4939*b*.
heptane films on, heat of transition of, 6034*b*.
identification of types of, 4180*f*.
of India (Pachipenta Zamindari), 5709*d*.
in iron (cast), conversion of eutectic, into flake, 7395*c*.
in iron (cast), effect of elements on form of, 7395*a*.
lubricants contg.—see *Lubricants*.
in metal finishing, 3336*c*.

microcryst., in asphaltenes, 1954*c*.
mining and dressing of, in South Bohemia, 1924*d*.
molds of, for plates of $B_4C$, P 7658*d*.
of Montana, 4984*d*, 8318*h*.
neutron cross section of, 4558*h*.
neutron-filter power of, 6077*f*.
of New York (Rockland Co.), 4609*a*.
from nitrocellulose irradiated with electrons, 7324*b*.
nodular, formation in cast Fe, 535*e*.
nodular, in cast Fe, production with Mg, 9005*c*.
overvoltage (anodic) on, in molten mixts. of cryolite and $Al_2O_3$, 6519*e*.
oxidation of, 5007*c*.
oxidation of, kinetics of, 7798*c*.
petrographic and x-ray study of, 7661*fi*, 7662*d*.
polishing of, effect on hardness and surface structure, 4071*i*.
in powder metallurgy, 80*c*, 7879*c*.
prospecting for, near Mavinahalli, Mysore, India, 2134*b*.
of Quebec, 525*d*.
reaction with F and use of anodes of, in electrolysis of KF-HF melts, 2107*de*.
with F mixts. with HF, 2107*f*.
with O and steam, 2076*g*.
with S, 8838*b*.
sealing compn. from chlorinated biphenyl and, P 5520*a*.
somatoidal, in gray-Fe casting, 9004*h*.
for spectrographic electrodes, 8276*b*.
spectrum (x-ray) of, 4131*f*.
in stove polishes, 3632*c*.
system: Fe–, 6068*a*.
thermocouple from W and, 6474*a*.
on tungsten carbide surface, 6483*d*.
of Washington, 6547*d*.
water evapn. in tubes of, heat transfer in, 448*i*.
of Western Australia (Donnelly River and Munglinup) and their grinding and flotation, 6125*gh*.

**Graphite compounds**, review on, 2105*h*.

crystal structure of, 1949*h*.
formation and viscosity of, and prepn. and peptization of its salts, 4539*f*.
formation by O adsorption by graphites, 5572*h*.
formula of, 5007*c*.
gels (anisotropic) of, 922*e*.
ionotropy of, 4539*e*.

**Graphitization**, of carbon, structure and, 4072*e*.
of iron (cast), 7877*h*, 8907*g*.
of iron (white), 6134*f*.
in malleable-Fe process, 6554*e*.
nodular, alloy for forming, 8336*c*.
of steel, aging, flaking and temper brittleness in relation to, 2911*d*.
contg. Mo, 3759*i*.
near welded joints, 6556*b*.
of steel piping, effect of addns. on, 534*fg*.
of steel steam pipes, 2144*d*.

**Graphium ulmi**. See *Ceratostomella ulmi*.

**Grapholitha molesta** and(or) **Oriental fruit moth**, control of, 5527*e*, 7630*h*, 9328*g*.
control of, on apples, 804*c*.
control of, on peaches, 4417*b*, 7630*g*, 9328*i*.
parasitization of, effect of insecticides for plum curculio in, 1144*a*.

**Grapholitha pomonella**. See *Codling moth*.

**Graphs**. See *Curves*.

**Grasses**. (See also *Bamboo; Cereals; Millet; Pasture; Sorghum; Timothy; Turf*.)
arctic and reed, feeding stuffs for cattle from, 7604*f*.
arrow, lung injury of cattle or sheep from, 9278*e*, 9313*e*.
ashes in, 4347*i*.
beach and dune, for erosion control, fertilizers for *Ammophila arenaria*, 1135*e*.
bent and Kentucky blue, effect of soil acidity and P on mixed, 1130*e*.
bent, pH and P of soils under, 339*h*.
Bermuda, 3552*d*.
Bermuda and Johnson, control of, 6352*g*, 9330*c*.
Bermuda and Johnson, control of *Cynodon dactylon* and *Sorghum halepense*, 9338*g*.
Bermuda and *Koeleria phleoides*, 2-methyl-4-chlorophenoxyacetic acid effect on, 1137*e*.
Bermuda, control of, 3967*c*, 5145*a*.
bleaching of, P 3219*d*.
blue, effect on N and org. matter in soils, 9319*e*.
blue, perennial rye and ensiled, as poultry feed, 3946*a*.
brome and Sudan, silage from, 3539*a*.
brome, fertilizer expts. with, 9313*a*.
N and mineral content of, effect of K on, 7087*i*.
sugar detn. in, 6752*i*.
broom and reed, polyhydric alcs. in cellulose prepn. from, 7227*a*.
buffalo, herbicides in production of seed of, 5525*c*.
canary, effect of Cu, phosphate and Zn on *Phalaris tuberosa*, 8591*a*.
canary, P metabolism and P and N uptake by *Phalaris tuberosa*, effect of P supply on, 5090*e*.
chinch-bug control in lawns, 5896*i*.
citronella and lemon, effect of harvesting at different heights on yield and oil content, 8448*i*.
Colonial bent, redtop and silky bent, glucides in *Agrostis tenuis*, *A. alba* and *Apera spica-venti*, 8014*e*.
control of, 9351*e*.
in barley and oats, 6775*i*.
with isopropyl carbanilate, 3961*b*.
control of *Agrostis*, *Avena bulbosa* and couch, in grain, 9351*f*.
control of arrow, Bermuda and coarse, in sugar cane, 805*f*.
control of crab and other, in gladiolus, 5145*f*.
control of fall armyworm and green June beetle in lawns, 1899*a*.
cord, ergot parasite of pharmacology of, 3933*d*.
couch and Kentucky blue, control in greenhouses, 4413*f*.
couch, control of, 1893*ab*, 5145*h*, 9354*d*.
crab and foxtail, control in vegetables, 2359*b*.
crab and perennial rye, effect of 2,4-D on, 8085*i*.
crab, control of *Digitaria*, 5145*i*, 9337*h*.
Dallis, proteins in *Paspalum dilatatum*, 9329*g*.
2,4-D effect on Gramineae, 8598*a*.
dollar-spot control in golf greens, 6775*f*.
effect on K in soil, 1131*i*.
elephant, as soiling crop for milking cows, 9314*a*.
ergot control and production on, 3959*f*.
ergothioneine in *Agropyron*, brome, *Calamagrostis* and *Elymus*, 9379*b*.
esparto, beating of paper pulp from, 6410*e*.
paper-pulp manuf. from, 1183*c*.
reductic acid from hydrolyzates of, 6823*a*.
falsebrome (Japanese) and tall oat, soil under *Brachpodium pinnatum* and *Arrhenatherum elatius*, 9320*d*.
fertilizer expts. with N on *Cynodon dactylon*, *Paspalum dilatatum* and Rhodes, 340*i*.
fertilizer expts. with, on peat soils, 7621*f*.
fertilizer expts. with, with digested sewage sludge, 3131*a*.
fescue, compn. of *Festuca kingii*, 9273*e*.
fluorine in contaminated, 5884*e*.
foxtail and witch, control in vegetables, 1893*g*.
foxtail, symbiotic bacteria on *Alopecurus pratensis*, 6701*a*.
fungus control on, 7178*d*.
glaga or kans, pulp and paper manuf. from *Saccharum spontaneum*, 2768*i*.
globulins of seeds of, 8456*d*.
goose, clarification of protein-contg. solns. by juices of, 6749*a*.
hay from—see *Hay*.
irrigation effect on compn. of *Holcus lanatus*, *Lolium multiflorum* and *Poa annua*, 4408*g*.
Johnson, control of, 343*c*, 9351*d*.
Kentucky blue, effect of photoperiodism and temp. on growth and flowering of, 2287*h*.
fertilizer expts. with, 1516*a*.
stimulation of *Poa pratensis*, 9313*i*.
knot—see *Polygonum*.
Korean lawn and Manila, germination of *Zoysia japonica* and *Z. matrella*, effect of strain differences, seed treatment and plating depth on, 1079*d*.
kudzu grown with Guinea, Pará and Napier-millet hybrid, 3553*a*.
lignin in, structure detn. by hydrogenation, 2427*hi*, 2428*c*.
lignins of, methoxy group in, 2285*a*.
maleic hydrazide Cu or Zn deriv. effect on bent, blue or crab, 6776*b*.
manienie—see "Bermuda" above.
Methoxone effect on, 806*b*.
mixts. with alfalfa, effect of clipping on, 1515*c*.
Napier—see "elephant" above.
nitric acid pulping of, nitrophenols from lignin in, 1974*c*.
oat, sapogenin from *Arrhenatherum bulbosum*, 4729*d*.
oils from—see *Oils*.
palm, fodder value of *Setaria palmifolia*, 7159*b*.
perennial, in increasing productivity of subtropical soils, 8082*c*.
phosphorus (org.) in, 1510*d*.
protein concentrates from, P 3947*a*.
quack—see "couch" above.
range-forage, of Southern Great Plains area, 1501*d*.
reed, paper from *Phragmites communis trinuis*, 398*h*.
paper-pulp manuf. from, in sugar factories, 6409*d*.
rayon manuf. from, 2768*g*.
use of *Phragmites communis*, 9501*h*.
respiration of endosperms of, 1834*i*.
respiratory systems in, 728*g*.
rye, carbohydrates in *Lolium perenne*, 4347*g*, 6284*h*.
compn. and yield of, clipped at grazing heights, 9291*f*.
feed value for cattle of annual, 6331*e*.
fertilizer expts. with, 9321*a*.
germination and seed development of, effect of 2,4-D on, 1517*g*.
N distribution in *Lolium perenne*, 1835*h*.
N fractions in annual, 7595*e*.
phosphate fertilizer utilization by, 1135*a*.
phosphate migration and, 2723*g*.
vitamins in annual, 8574*c*.
selenium in *Agropyron*, rice and *Sitanion hystrix*, 3890*f*.
shave—see *Equisetum*.
soil losses under, 6772*a*.
soil microflora and, 6350*d*.
sour, control of *Trichachne insularis*, in sugar cane, 805*f*.

Sudan, As toxicity to, 6350*e*.
decompn. in soils, 1891*f*.
effect of K silicate, etc., on, 2722*b*
fertilizer expts. with org. phosphates, etc., 3131*d*.
green manure as P source for, 6774*d*
taste of water-sol constituents of, improvement of, P 6334*g*.
teosinte, tillering in chaleo, control by auxin, 7555*f*.
weed control in lawns and effect of 2,4-D on germination of seed of, 2727*g*.

**Grasshoppers**, control of, 3135*h*, 6353*e*, 7185*dfh*.
control of, in alfalfa, 1521*e*.
control of, in citrus groves, 3136*a*.
control of *Melanoplus occidentalis* and *dentalis*, 3136*b*.
control of *Nomadacris septemfasciata* by aircraft, 3557*d*.
control of *Schistocerca cancellata*, 4805*i*, 4806*e*.
control of *Schistocerca gregaria*, 3558*a*.
copper in eggs and embryos during development of, 3531*c*.
copper in embryos of *Melanoplus differentialis*, complex formation with Na diethyldithiocarbamate, 8562*a*.
eggs of *Melanoplus differentialis*, development of resistance to toxic substances, 8087*d*.
esterases and lipases of, 6677*c*.
lipolytic enzyme systems of, effect of Na taurocholate on, 6676*i*.
respiration by embryonic cells of, effect of diethyldithiocarbamate on, 2331*f*.
respiration by embryonic cells of, effect of urethan on, 774*f*.
toxicity to *Locusta migratoria* of S compds., 4415*a*.
toxicity to red-legged, of Cevadine and veratridine, 2363*c*.
waxlike material isolation from eggs of, 6323*c*.
waxy-covering development on eggs of, 5124*e*.

**Grassland**. See *Hay; Pasture*.

**Grass pea**. See *Lathyrus sativus*.

**Gratonite**, hatchite identity with, 2128*f*.

**Gravel**. (See also *Calculi*.)
of Alaska, 2130*e*.
from emulsion breaking, regeneration of, P 7676*g*.
industry in 1946, 2127*f*.

of Newfoundland (Southern White Bay), 1692c.
in sediments of Black Sea, 5709i.
standards for, 4398f.
of Trinity River Tributary area in Okla. and Tex., 4607i.
of Washington, 6547d.
**Graves' disease.** See "exophthalmic" under *Goiter.*
**Gravitation,** book: and At. Bomb, 947g.
effect on radial diffusion, 74i.
**Gravitole** (*2-(2-allyl-6-methoxyphenoxy)triethylamine*), effect on muscle contraction, 8543d.
**Gravity meters,** in iron-ore prospecting, 8990h.
in ore-deposit tracing, 8989c.
**Graywacke,** of Spain (Tarragona), 6548g.
**Grease.** (See also *Fats; Lubricants.*)
adsorbent for, P 9298h.
analysis of, 4399c, 6842b.
antioxidants for, P 4008c.
antioxidants for, *p*-phenylenediamine alkylated derivs., P 4005f.
detn. in sewage sludge, 7169b.
effect on penetration of leather by water and water vapor, 3639i.
effect on surface area of Ag, 6893i.
electron microscopy of, 32d.
from fermentation, P 4810c.
flow of, 5259e.
on glace kid, effect of curing methods on extractable, 7736f.
of hides and skins, and its removal from pelts and leather, 1203fg.
mech. properties of synthetic, at low temps., 842e.
methylpentadiene-aralkenyl copolymers, P 6458e.
paint resistance to, testing, 4480f.
-proof adhesive, P 3240b.
-proof coatings for foods, etc., P 8576d.
-proofing cardboard, glass, paper, textiles, wood, etc., P 6004a.
recovery of, in sewage, Cl in, 2718e.
removal of—see also *Cleaning compositions; Fats; Soap, Solvents.*
removal of, from Al, 8325g.
from Al, spontaneous decompn. of $C_2HCl_3$ in, 6515f.
from furs, 6424a.
from hides, 7736i.
from hides, effect of electrolytes on naphthenic emulsions for, 6447i.
insecticidal compns. for, P 1146c.
from leather, mildew control by, 7733i.
from metals, 2143c, 7399f.
from metals, app. for, 1304f, 6961i, P 6966i.
from sheepskins, 4042b, 7233c.
ventilation of plants for, 7220c.
silicone, for cooking utensils, 3544e.
structure-mech. properties and thixotropy of, 7779c.
viscosity of, measurement of, P 2766i.
**Greenfish,** food poisoning from raw or cooked, 327g.
**Green gram.** See "mung" under *Beans.*
**Greenhead fly,** control of, DDT in, 9344e.
**Greenhouse leaf tier.** See *Phylctaenia rubigalis.*
**Greenhouse thrips.** See *Heliothrips haemorrhoidalis.*
**Green June beetle.** See *Cotinis nitida.*
**Greenockite,** alpha-conduction pulses in, 8263h.
of Pennines, England, 4188d.
**Green oil,** 1-methylnaphthalene recovery from, P 6404d.
**Green peach aphid.** See *Myzus persicae.*
**Greenstone,** of Alaska (Mt. Andrew), 7384d.
of Ontario (Algoma dist.), 8315h.
of Oregon (Grant Co.), 524h.
**Grewia,** oils of—see *Oils.*
**GR-I.** See *Butyl rubber.*
**Grids.** See *Electrodes.*
**Griffithsia setacea,** sodium mannoglycerate in, 8014g.
**Grignard reaction,** 5004f.
in acyclic hydrocarbon synthesis, 5003c.
with aldehydes and dialkylaminoalkyl halides, P 5043b.
with allylic esters, 1851d, 9051d.
with amino ketones, P 5417d.
app. for, 1226f, P 4287a.

**Group-specific substances.** See *Blood;* etc.
**Group theory,** and its application to vibrational problems in theoretical chemistry, 3672e.
**Groutite,** crystal structure of, 6484b.
**Growth.** (See also *Body weight; Cancer; Carcinoma; Development; Differentiation; Dwarfism; Neoplasms; Nutrition, animal; Nutrition, plant.*)
adrenaline effect on, of mammals, 8467f.
adrenal size and, 9182g.
amino acid content of diet and, 8143e.
amino acid effect on, 7558f.
amino acid effect on, during low-casein diet, 3075d.
amino acid efficiency in, with or without casein, 1468f.
amino acids essential for, effect on body wt., 6295i.
amino acids in skin during, 3514e.
ammonium N utilization during, 6712i.
antipernicious anemia prepns. and, 3895i.
of bacteria—see *Bacteria.*
of beef cattle, 4353b.
book: Chemistry and Physiology of, 3867i.
butter effect on, 8474b.
calcium and vegetable proteins in, 7556d.
caloric intake during, of rat, 1467f.
caloric restriction and protein metabolism in, 1468i.
carotenoid pigments and, in chicks, 4353g.
of cells—see *Cells, animal; Cells, plant.*
choline and glycine betaine in, 1470b.
choline requirements for, effect of vitamin $B_{12}$ on, 6708i.
citrate and lactate in bones during, 5841a.
colchicine effect on, 296f.
corn effect on, in nicotinic acid-low rations and effect of tryptophan thereon, 2680c.
corn steep-liquor effect on, of rats, 1091d.
crystal—see *Crystals.*
deuterium oxide effect on, 3481b.
diet and, 3078b.
dietary K and Mg in relation to, 294b.
on diet contg. heated proteins, 5458g.
differential, 4710g.
diketopiperazines of cystathionine, homolanthionine and methionine in relation to, 8477f.
distillery feedstuffs and, of chickens, 285g.
effect of butter and soybean oils on, of dairy calves, 8473c.
effect of colchicine alone or with hormones on, of tadpoles, 5112e.
effect of diethylcholine and ethionine on rat, 1470g.
effect of protein concentrates and vitamin A on, of lambs, 291b.
effect of sulfonamides and thiouracil on, 5870c.
environment effect on, in chickens, 5459d.
from estradiol and prolactin, nucleic acids and phosphatases in tissue during, 2686a.
ethionine effect on, and its alleviation by

S-contg. amino acids and choline, 8477*d*.
fat content of diet and, 7559*i*.
fat effect on, Ca and P metabolism during, 7558*c*.
feeding expts. on, of pigs, 9193*a*.
folic acid effect on, during balanced or protein-poor rations, 4352*d*.
food supplements and, 5096*i*.
β-glucuronidase as index of, in uterus and other organs, 9207*c*.
goitrogenic drugs and, in newborn, 8051*c*.
hexahomoserine effect on, of swine, 2293*f*.
hormones—see *Growth substances; Hormones; Pituitary extracts;* "hormones of anterior lobe of" under *Pituitary gland;* and "hormones of" under *Thymus gland*.)
3-indoleacetic acid effect on rat, 7556*g*.
-inhibiting substances—see *Growth substances*.
inhibition of, S metabolism and, after 1,2,5,6 - dibenzanthracene treatment of rats, 320*d*.
inhibition of, toxicity and protein metabolism in rats treated with 1,2,5,6-dibenzanthracene in relation to, 306*b*.
lanthionine availability for, of rats, 2295*c*.
lipotropism and, 2681*g*.
liver action on, in hyperthyroidism, 4308*i*.
methyltestosterone effect on, of chickens, 1097*e*.
methylthiouracil effect on, 8531*i*.
of microbiganisms—see *Microörganisms*.
milk-diet effect on, of rabbit, 1090*f*.
mol. morphology and, 4710*f*.
in morphine poisoning, 5867*e*.
nicotinamide effect on, effect of methionine on, 6296*e*.
nutritional requirements for adult, 7562*e*.
$\Delta^{13}$-octadecenoic acid effect on, 8023*h*.
phosphorus content of blood and, in range beef cattle, 6711*e*.
plant—see *Plants*.
-promoting substances—see *Growth substances*.
protein requirement for, 8024*d*.
sex-hormone effect on, 3507*h*.
sodium chloride-deprivation effect on, 4355*g*.
sodium chloride effect on, in chicks, 286*e*.
soybean meal (untoasted) effect on, of chicks, 287*c*.
stages of, and their physiology, 6704*g*.
sulfaquinoxaline effect on, of chicks, 287*c*.
of *Tetrahymena gelrii*, 7593*d*.
thiouracil effect on, of pigs, 8466*h*.
thiouracil effect on, of turkeys, 8466*b*.
thyroprotein effect on, of chickens, 285*i*, 287*a*.
tissue—see *Tissue, animal; Tissue, plant*.
tri- and tetrazolium salts as reduction indicators in, of marine animals, 7593*b*.
trypsin-inhibitor effect on, 288*g*, 2680*i*.
tryptophan availability for, of chicks, 2292*i*.
vitamin A effect on, of heifers, 2293*h*.
vitamin B complex in, 1468*e*.
in vitamin $B_1$ deficiency, effect of exercise and fat content of diet on, 9184*a*.
vitamin $B_2$ in, 1096*e*.
vitamin $B_{12}$ compared with antianemia liver ext. in, 6291*f*.
vitamin $B_{12}$ effect on, of chick, 3074*h*.
during corn-soybean diets, 8027*d*.
of rats receiving thyroid, 4739*c*.
vitamin D requirements for, of ducks, 285*e*.
vitamin E-deficiency in, of cattle, 8472*d*.
vitamins and, 8028*b*.
vitamin T complex in treating disturbances of, 8025*i*.
wood-sugar molasses effect on, of chickens, 320*e*.
xanthopterin effect on, 1470*h*.
of yeast—see *Yeasts*.
yeast as protein source for, 3897*c*.

**Growth substances.** (See also *Auxins; Bios; Biotin; Carcinogenic substances; Estrogenic hormones; Flavins; Flowers; Hormones; 3-Indoleacetic acid; 3-Indolebutyric acid; Inositol; Metabolism, animal; Metabolism, plant; Naphthaleneacetamide; Naphthaleneacetic acid; Pituitary extracts; Plants; Rhizocalin; Roots; Vitamins;* "hormones of anterior lobe of" under *Pituitary gland;* etc.) P 3152*g*.

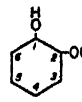
on plants grown for production of alc., 1839*d*.
on rabbit on milk diet, 1000*g*.
on size of grapefruit and oranges, 8597*i*.
on snap-bean yield, 5144*h*.
on tomatoes 1518*a*, 2725*i*, 9337*f*.
on transplanted plants, 804*i*.
in emulsifiable oils, P 2733*b*.
evaluation of plant, 1833*i*.
extn. from plant tissue, 3491*e*.
factor II, for *Tetrahymena*, 9156*e*.
in fig maturation, 2726*f*.
fig parthenocarpy from, 2287*i*.
in fish products, 5462*a*.
floor litter as source of, for chicken, 285*d*.
folic acid as, for bacteria, 8441*d*.
in *Fraxinus* buds, inhibitory, 8460*b*.
in fruit setting, 1139*c*.
gall formation in sugar cane in response to, 7090*h*.
hematins as, 5444*d*.
heterotropic-alga requirements for, 1835*c*.
hexachlorocyclohexane as, for *Lupinus albus*, 7626*b*.
hexaethyl tetraphosphate as, on roses, 1523*g*.
histamine and other imidazole compds. as, for bacteria, 8436*g*.
homopantothenic acids and related compds. as, 4226*g*.
in humus for germination of spores of *Tilletia tritici*, 8085*c*.
indoleacetic acid and 1-naphthaleneacetamide as, synergists for, P 5151*e*.
indolebutyric acid as, for carnation cuttings, 9338*e*.
inhibiting, 2679*b*.
*meso*-inositol as, for *Neurospora crassa*, 1457*h*.
for *Lactobacillus bulgaricus* and *L. helveticus*, 4334*b*.
for *Lactobacillus casei*—see *Lactobacillus casei*.
for *Lactobacillus leichmannii* and *Leuconostoc citrovorum*, sepn. by electrolysis, 5084*f*.
in *Laminaria agardhii*, 9167*a*.
in leaf saps, inhibitory, 8459*d*.
lemon preservation by, 1516*h*.
in lettuce bolting and seed production, 1893*d*.
for *Leuconostoc citrovorum*, 1828*i*, 9148*h*.
in Lima beans, inhibitory, 8477*h*, 9195*e*.
in liver exts., assay of, 3499*e*.
in liver exts., for bacteria, 5082*g*.
maleic hydrazide Cu or Zn deriv. as, for plants, 6776*a*.
in manure (cow), vitamin $B_{12}$ in relation to, 2298*b*.
manure (liquid) and urine as, 3131*i*.
manures as, 3131*f*.
methionine derivs. and homologs as inhibiting, 3499*h*.
2 - methyl - 4 - amino - 5 - aminomethyl pyrimidine as, for *Mycobacterium*, 269*c*, 716*a*, 4331*e*.
7 - methylbenz[*a*]anthracene derivs. as inhibiting, for tumors, 621*f*.
microörganism requirements for, detn. of, 4329*d*.
for microörganisms, 1460*i*, 9157*c*.
in milk, for hamsters, 3901*e*.
in milk from animals fed silage and non silage rations, 3893*h*.
mixts. with fungicides and insecticides, effect on tomatoes, 9337*e*.
monoarylhydroxyacetic compds. as, for plants, P 3967*i*.
for *Mycobacterium paratuberculosis*, 1457*a*.
1 - naphthaleneacetic acid as, in rasp berry-rest prolongation, 9351*c*.
nicotinic acid as, for orchid embryo, 6285*d*.
nicotinium compds as, 9123*d*.
nucleosides as, for bacteria, 716*f*.
oat-coleoptile sensitivity to, hereditary variations in, 3493*h*.
orange small size and, 1135*e*.
in *Orobanche aegyptiaca* control, 3134*h*.
in pancreas, for *Trichomonas vaginalis*, 9158*a*.
pantothenic acid analogs as inhibiting, 2680*i*.
pantothenic acids as, 4223*i*.
pantothenol as, 3071*f*.
in peach-cutting treatment and peach thinning, 9330*a*.
penicillin (destroyed com.) as, for *Staphylococcus aureus*, 9161*h*.
phosphorus as, for animals, humans and plants, 9273*f*.
physiol. activity and structure of, 6707*h*.
plant, 1083*g*, 2286*d*, 3493*h*, 3554*f*, 4710*h*, 5144*g*, 8451*h*, 9178*c*.
activated C in contratoxification of, 2355*h*.
effect on soil microörganisms, 1514*c*.
properties of, 8452*d*.
in plants (host) for germination of *Striga hermonthica*, 6285*e*.
in pollen, 7553*d*.
in *Polygonum*, for yeast, 7085*b*.
in potatoes, 3493*e*.
for potato-germination speeding, P 3491.
potato rest-period in relation to inhibitory, 8460*a*.
in potato-sprouting control, 1499*i*, 1500*a*, 7181*e*, 8597*d*.
for poults, 1088*e*.
production by Jerusalem artichokes, tryptophan and, 7094*b*.
pteridine derivs. as, P 7518*f*.
putrescine as, for *Hemophilus parainfluenzae*, 4332*a*.
pyridoxine derivs. as, P 725*d*, P 7648*e*.
pyridoxylamino acid and related substances as, 723*a*.
reviews on, 5452*c*, 6704*d*, 8460*a*.
from *Rhisopus nigricans*, P 8448*f*.
in root elongation in germinating barley, 8015*f*.
in scald reduction on fruits, P 330*h*.

seed hormonization by, properties of water and, 1837*b*.
in seeds, inhibitory, 3492*i*.
in seeds, in relation to endosperm development and fruit drop in apples, 1081*b*.
from sheep cardiac muscles inhibitory, 1849*d*.
from staphylococcus inducing satellitism in corynebacterium, 6278*i*.
sulfonic acid analogs of oxybiotin and homooxybiotin as, 5023*d*.
for *Tetrahymena geleii*, 6274*e*.
3-thienylalanine inhibiting effect on, 6613*h*.
thymidine as, for lactic acid bacteria, 4334*d*.
thymidine as vitamin $B_{12}$ substitute for, for *Lactobacillus*, 270*c*.
thymine desoxyribose as, for lactic acid bacteria, 270*b*.
in tobacco-suckering elimination, 5145*c*, 9329*h*.
tomato treatment with, 9329*b*.
unidentified, 4710*f*.
vaccenic acid as, 1468*h*.
vitamins as, for lactobacilli and their interrelationships, 7542*e*.
in weed control, 8598*a*, 9313*f*, 9351*h*, 9354*c*.
wheat-middling inhibitory, 3479*d*.

**GR-P**. See *Thiokol*.



**GR-S rubber** (*Buna S*). (See also *Rubber, substitute and synthetic*.)
adhesion to brass, 5985*e*.
in adhesive-plaster compns., 6369*e*.
adhesives for, from Neoprene-AC and phenolic resins, 7743*i*.
adhesives from, P 3229*c*, P 3240*f*.
aging, compdg., mech. properties and swelling of, 2802*b*.
aging of, creep and stress relaxation and relation to cross linking and oxidation in, 2013*e*.
aging of, in air, effect of temp. on, 9517*i*.
aging or oxidative degeneration of solns. of, 5620*i*.
allyl esters in improving millability and plasticity of, P 9519*g*.
analyzer for butadiene recycle impurity in manuf. of, 1616*c*.
branching degree, size and shape of mols. of $S_1$ and $S_2$, 7253*g*.
carbon black-contg. latex manuf., P 8732*a*
carbon black pH and structure in compounding, 802*e*.
carbon black mixing with latex, 894*d*.
carbon black reinforcement and swelling of, 2014*a*.
carbon black reinforcing properties in, 8723*a*.
chlorination of, P 6457*h*
coagulation of latex and manuf. of dry films of, 891*f*.
coagulation of ZnO-loaded latexes with $MgSO_4$, P 7744*h*.
concn. of latex of Type III, with NaCl, 2007*i*.
continuous polymerization in making, 1209*f*, 5986*h*.
control of mol. wt., polymer-chain proportions and viscosity of, 8729*a*.
copper, Fe and Mn in, 2709*d*.
creep, recovery and permanent set of, 8724*c*.
cross-linking of, 5227*cd*.
decompn. by heat, and products therefrom, 2015*a*.
deterioration prevention or retardation in, by trialkylphenols and tin salts, P 8195*b*.
deterioration prevention or retardation in, with triphenyl arsenite, P 4891*c*.
*o,o'* - dibenzamidodiphenyl disulfide in improving processing qualities of, 7252*f*.
dielec. study of, and relations among heat resistance, mol. structure, mech. properties and oil resistance, 5221*h*.
drying of, porous-sheet process of, 2801*i*.
effect on crystn. of rubber at low temps., 6853*g*.
effect on Zn reaction with $CuCl_2$ in nonaq. solvents, 6886*b*.
elasticity of S and $S_8$, fillers and, 4045*c*.
elastic properties and force of retraction of disazodicarboxylate-vulcanized, and their measurement and relation to degree of cross-linking, and detn. of swelling ratios, 8731*d*.
elastic S-3, 7253*e*.
elec. charges produced during mastication on roll mill, 7255*g*.
elec. insulators from, on cables, attack by soil microorganisms, 9517*f*.
electrophoretic mobility of rosin soap-stabilized latex of Type III, 2013*g*.
expanded, elec. and mech. properties of, 429*d*.
friction coeffs. on ice of, and its blends with Neoprene GN or rubber, 2012*f*.
Gough-Joule coeffs. at const. stress and strain and modulus of, 6858*e*.
hard (*ebonite*), 1,3-bis(biphenylyl)triazene-blown gas-expanded sponge and stiff board, P 897*f*.
elec. properties of, 5986*c*.
reclaimed rubber-contg. elec., 7256*g*.
heat capacity and thermal cond. of lattices of, 3644*h*.
heat deterioration of, effect of chemicals on, 8188*f*.
heat embrittlement of, measurement of, and effect of aging and overcure on, 3647*b*.
improving abrasion resistance and tensile strength of, without reinforcing C black, P 3228*i*.
improving processing and stress-strain properties of, 3644*e*.
iodine no. of, and its detn., 5985*h*.
in leather (black sole) substitute manuf., reducing amt. of, 6853*e*.
lignin in stabilization of, 3644*a*.
lignin (oxidized alkali) as reinforcing agent in, 1599*b*.
low-temp. polymerization in making, 1210*d*, 8724*h*.
with anti-freeze agents, 8728*c*.
at Baton Rouge plant, 9515*a*.
in continuous unit with reduction-oxidation systems, 8723*e*.
history and reduction-oxidation formulas for, 9515*b*.
with Fe pyrophosphate activators, alkyl aromatic sulfonates as emulsifiers in, 8725*c*.
with Fe pyrophosphate-alternative activators, 8727*e*.
with $FeSO_4$ as polymerization activator and dodecyl mercaptan as modifier, P 6458*a*.
refrigeration requirements in, 9515*c*.
from low-temp. polymerizations, 2460*c*.
improving scorching and processing characteristics by furnace blacks, 3644*c*.
peptization and mastication of, 8723*i*
phys. and processing characteristics of C black-reinforced, 2461*a*, 8724*c*.
manuf. in Canada, 1207*c*.
manuf. in jacketed steel tubular reactor, P 4507*b*.
microgel in, and its relation to sol and gel structures in, 4506*d*.
milling or working agents for, by butadiene-styrene copolymer heating with *p*-nitrosodimethylaniline, P 4046*c*.
mixing or compounding of standard and X-435, power consumption in, 5984*h*.
mixing or compounding with PbO accelerator and softening agents for transparent vulcanizates, 5985*c*.
mixts. with phenolic resins, resinography of, 6459*h*.
mol. wt.-viscosity relations for, 3646*g*.
monomer recovery in manuf. of, and definition of GR-S latex, 5986*h*.
oil resistance and polarity of, 1594*e*.
oxygen absorption by, effect of antioxidants and of coagulants on rate of, 2460*c*.
peat as filler in, and ammoniated peat in sponge rubber prepn., 2801*f*.
Philprene A, prepd. at 41°F., 1209*b*.
phys. properties of fractions of, and their vulcanizates, 8724*b*.
pigment (reinforcing) behavior in, 1593*e*.
pigments in, adsorption and reinforcing action of, 8188*h*.
plasticity and softness of, effects of plasticizers on, 2010*i*.
plasticity and soly. of, effect of oxidation on, and resinification in sunlight, 2801*i*.
plasticization of, 9513*b*.
plasticizers or softeners for, Cl unsatd. compds., P 8732*f*.
diagrams showing performance of, 3648*e*.
furfural phenylhydrazones as, 2014*f*.
sulfurized tall oil or rosin-drying fatty acid mixts., P 8732*h*.
by polymerization at 50° with salts of esters of *l*-pimaric acid-maleic anhydride addn. product as emulsifying agents, P 4504*b*, 7252*h*.
by polymerization in S-3 system with diisopropylxanthogen disulfide modifier, 8189*a*.
polymerization modifier effects on manuf. and properties of S, $S_1$, $S_2$ and $S_8$, 7253*d*.
polymerization modifiers in making, 2-thiazolethiol derivs. as, 633*f*.
polymerization promoter in making, ethylene glycol monophenyl ether as, P 6457*h*.
polymerization temp. effects on, in tire-tread recipes, 8726*a*.
by polymerization with emulsifying soap in presence of salts of *l*-pimaric acid-maleic anhydride addn. products, P 4508*d*.
prepn. of S-3, with diisopropylxanthic disulfide and thiol regulators in lab. and pilot plant, 6454*i*, 6455*c*.
processing and tire-service characteristics of low-temp. and standard, 8726*dg*.
processing behavior of, immiscible polymeric plasticizers in improving, 8190*h*.
processing shrinkage and scorching of, effects of reinforcing furnace blacks on, 4887*a*.
pyrolysis of, and mass spectrometry and mol. wt. detn. of fractions, 7742*e*.
pyrolysis to butadiene, 2010*b*.
rayon cord treatment with, effect on cord-rubber adhesion and flex life of tires, 2012*g*.
reclaimed, effect on accelerated aging of rubber and GR-S, 3647*f*.
reclaiming, P 8734*b*.
reclaiming, in Banbury mixer with N compds. and cationic surface-active agents, P 8196*g*.
reclaiming mixts. of rubber and, with resin oil-abietic acid mixts., P 6458*g*.
relaxation and stress-strain curve of, 2459*f*.
resin acid soaps as emulsifying agents in prepg., 8724*h*.
review on, 7252*f*.
rubber *vs.*, 3646*h*.
sound velocity and attenuation in, and dynamic viscoelastic consts. of, 6855*h*.
stopping agents in prepn. of, 8727*i*.
tackifiers for, 2808*i*, P 3229*d*, P 8194*h*, P 8195*g*.
tackiness of, improvement of, P 3229*f*.
tear initiation, propagation and testing in, 7256*d*.
tensile properties of, from −20 to 120°, 9513*g*.
tensile strengths of films of Type III, 2009*b*.
tensile strength of, measurement of, 2011*i*.
testing and controlling uniformity of, 429*e*.
testing discoloring, pigmenting and staining properties of, 1209*h*.
thickening latexes of, cellulose derivs. and other polymers in, 6411*b*.
tire tread from, compounding with fine furnace black and processing of, 5984*e*.
trichlorothiolacetates as polymerization modifiers and vulcanization accelerators in, P 4046*c*.
Ultipara, tensile properties from −20 to 120°, 9513*g*.
ultrasonic-wave propagation velocity and attenuation and elastic consts. of, 6856*c*.
uniting, to isobutene rubbers, tie-gum compns. for, P 5224*a*.
viscosity of concd. solns. in $C_6H_6$ and energy of activation of flow of, 1210*a*.
vulcanization accelerators for, alkyl derivs. of tetraalkylthiuram sulfides and salts of dialkyldithiocarbamates as ultra-, 5987*a*.
vulcanization activators for stearic acid-contg., dodecylamine as, P 8194*f*.
vulcanization of, adiabatic reaction kinetics of, 8731*h*.
effect of water on rate of, 2014*d*.
variation of modulus of two-dimensional extension from, 8192*h*.
vulcanizing cylinders of, at high pressures, 4888*f*.
water (low-)-absorption nonstaining X-392 and X-393, 2017*b*.
zinc oxide (active) effects in, and Zn salts as vulcanization activators, 2462*b*.
zinc salt of aromatic mercaptans in improving milling and processing characteristics of, P 5224*b*.

**cyano-** (*dicyanodiamide*), acetate,

Cu deriv. of acetate and condensation product with HCHO and Cr acetate, as dye-fixing agents, 3620*g*.
acyl derivs., P 1057*d*, P 4292*d*.
adhesive from starch, plasticizer and, P 3223*a*.
aldehyde condensation products, stable sirups from, P 9534*i*.
alkyl (halophenyl) derivs., P 6658*e*.
anion-exchange resin from acrylonitrile, polyamine and, P 7162*h*.
aryl-2-alkyl derivs., reaction with mono- or dialkylamines, 2948*a*.
aryl derivs., 169*e*, 2179*d*.
biguanides from, for textile printing, P 7713*a*.
as catalyst in reaction of hydroxy compds. with $H_2NSO_3H$, P 3024*h*.
condensation products of, with cetyl chloromethyl ether for softening and waterproofing textiles, P 6440*d*.
with dicyanodiamide and HCHO for dyeing aftertreatment, P 2786*h*.
with HCHO and $NH_3$, amines or urea for aftertreatment of dyed textiles, P 2786*h*.
with HCHO and melamine, paper laminate from, 433*g*.
with HCHO, condensation with $NH_4Cl$ and HCHO, P 4880*c*.
with HCHO, emulsions from, P 6000*e*.
with HCHO, for improving dye affinity and wet fastness of dyes on cellulose, P 7238*a*.
with HCHO, for improving dye affinity of nylon, P 2442*i*.
with HCHO, for pretreatment of artificial fibers for dyeing, P 4440*h*.
with phenols, P 2469*g*.
condensation with acetamide, textile assistant by, P 1991*a*.
with dichlorodimethyl ether-rosin reaction product, textile slipproofing agent by, P 2796*b*.
with HCHO, phenol and HCl, textile assistant by, P 9497*g*.
derivs., P 1799*c*, P 2635*i*, P 3843*c*.
derivs., reaction with amines, P 2229*g*.
dialkyl derivs., reaction with *p*-$ClC_6H_4NH_2$, 2949*d*.
formation in soil from $CaCN_2$, 797*f*.
hydrochlorides, P 9082*b*.
infrared Christiansen filter effect in, 1657*f*.
labeled with $C^{14}$, 5007*b*.
lacquer from phenol-ethylene oxide condensation products and, P 2448*d*.
melamine from, P 699*ae*
nitrate, in flameless, gas-producing charges, P 5190*d*.
reaction product with $NH_4NO_3$, condensation with *N* - (hydroxymethyl)-oleamide or -stearamide, P 5978*f*.
with coconut oil acid, ethanolamine, and glycidol or ethylene-oxide, sulfuric acid esters, as textile aids, P 7727*ce*.
with ketones, P 1069*a*.
with semicarbazide, condensation product with HCHO, P 9526*b*.
reaction product with benzidine and its subsequent reaction product with 1-chloro-2,4-dinitrobenzene, P 3968*e*.
reaction with $NH_4$ sulfonates, P 4292*g*.
vanadium complex, 8959*a*.
——, **1-cyano-3-(*p*-cyanophenyl)-**, 169*f*.
——, **1-cyano-3-cyclohexyl-**, P 2636*a*, 2947*c*.

as corrosion inhibitor for light metals, 4622*d*.
detection of, 5704*b*.
effect of Senegal, on optical d. of ppts., 3873*i*.
effect of Senegal, on optical d. of serum globulin ppts. from boric acid, 3874*a*.
effect on flow birefringence of gelatin during gelation, 2488*g*.
on soln. rate of NaCl monocrystals, 6054*g*.
on stability of supersatd. solns. of $KNO_3$, 8805*i*.
-gold-peptone complex, P 8104*h*.
guinea-pig growth and, 6293*i*.
heat effect on, 6849*a*.
ionization of, mol. structure and, 2073*b*.
plasmaphoresis with, restoration of blood protein and colloid-osmotic pressure after, 4310*f*.
reductic acid in hydrolyzates of, 6823*b*.
Soviet, 5541*h*.
**Gumbrin**, activation with $H_2SO_4$ and petroleum decolorization with activated, 3996*i*.
as catalyst in dehydration and isomerization, 6153*a*.
as catalyst in dehydration of cyclohexanol, 5010*e*.
coating of, with sesquioxides, 7620*h*.
in oil filtration, effect on deparaffination of residue oil and on oil evapn. and I no. of distillate, 4001*b*.
**Gum ghatti**, effect on diffusion current of Cu and Pb in polarography, 5698*b*.
**Gum guaiac**. See *Guaiacum*.
**Gum levan**. See *Levans*.
**Gummosis**, brown-rot—see *Phytophthora citrophthora*.
**Gums**. (See also *Chewing gum; Cholla gum; Gingiva*.)
almond and cherry, chromatography of sugars in hydrolyzates of, 1290*c*.
of almond tree, structure of, 1323*h*.
binding material from, P 9538*d*.
bleaching, P 1580*e*.
carboxyethyl and cyanoethyl ethers of galactomannan and glucomannan, P 4504*d*.
carob-bean, 581*ac*, 8717*a*.
in *Cestrum hediondinum*, 2279*i*.
coating with, on soap particles to reduce dusting and lumping, P 1587*a*.
from desert plants, 6337*g*.
detection in mayonnaise and French dressing, 9290*d*.
as detergent protective colloids of soil carriers, 6436*d*.
diabetic sirups contg., 3144*i*.
flavoring of, 8573*g*.
formation in aviation gasoline, effects of $Et_4Pb$ on, 5579*a*.
in cracked gasolines and hydrocarbons, 8656*a*.
in fuel gas, 5925*a*.
formation in tar distillates, 7664*g*
-forming properties of gasolines of U.S., 6813*i*.
from hydrocarbon-oil vapor cracking on coke in steam, P 8129*g*.
identification of polysaccharide, 3639*d*
inhibition or prevention of formation in, or removal from, gas, gasoline, hydrocarbon oils, etc., alkyl monoamines and fatty acid amides for, P 3193*e*.
by dialkyl selenides or tellurides, P 6820*e*.
with hydroxybenzoic acids, esters or salts, P 8667*d*.
with org. sulfides or polysulfides, P 7223*g*.
with phenols, P 4003*f*.
by salicylic acid, its esters and salts, P 4457*h*.
by $H_2SO_4$ treatment and distn., 5576*h*.
jeol, 1589*d*, 8717*e*.
jeol, electrochem. and viscous properties of, 2797*ef*.
karaya—see *Karaya gum*.
from lubricant refinement with $H_2SO_4$, 2417*e*.
melting point and *n* at m.p. of pharmaceutical, 9363*g*.
mesquite, constitution of, 582*g*.
from oil refinement, electronic drying of, P 6438*b*.
oxidation of, prevention of, P 5990*h*.
from oxidized transformer oil and white mineral oil, 4841*i*.
polysaccharide, reviews on, 2005*gh*.
quince, effect on soil aggregation, 2349*b*.
removal from hemp bast fibers, effect on degradation of cellulose, 4858*f*.

removal from hydrogenated soybean oil, effect on flavor reversion, 7723b.
from plant fibers, P 4868h.
from vegetable oils with halogenated acids to render nonbreak, P 885a.
seeds contg., prepn. for dehusking, P 8717h.
sterculia—see *Karaya gum*.
turpentine—see *Turpentine*.
water absorption by jaggery and, 2454b.
wood—see *Xylan*.
from yeasts, prepn. of, and their Cu compds., 5509e.
**Gum Senegal**. See *Gum arabic*.
**Gum tragacanth**, in carrier for medicinal substances, P 2375d.
detection of, 5704b.
diabetic sirups contg., 3145a.
evaluation by viscosity, 5218d.
evaluation of flake, 4881d.
incompatibility with Bi subnitrate, 355d.
**Gum tragacanth substitutes**, silica gel as, in alkaloid detns., 6364b.
**Gum verek**. See *Gum arabic*.
**Guncotton**. See *Explosives; Nitrocellulose; Pyroxylin*.
**Gunite**. See *Concrete*.
**Gunpowder**. See *Explosives*.
**Gur**. See *Jaggery*.
**Gurvich rays**. See *Milogenetic radiation*.
**Gustavson's hydrocarbon**, structure of, 991d.
**Gut**. No entries this year. See *Intestines*.
**Gutierresia**, selenium in, 3890f.
**Gutta-percha**, adhesives from, bond strength of rubber united to leather and textiles by, 6854f.
cyclized rubber, oxidized AcOH rubber and rubber-HCl prepn. from, and use in varnish, 3224h.
distn. of, and cracking of distillate gases, isoprene by, P 1211g.
elec. insulators from, on cables, attack by soil microorganisms, 9517g.
from *Euonymus* spp. in Spain, 4886h.
extn. of, P 6456f.
film of, adhesion to solids, 2842d.
lyogels of, 4510e.
mech. properties and swelling in hexane and ketones and cryst. nature of gutta-percha-HCl and -HBr, 7739b, 8728h.
pyrolysis of, to isoprene, 2010b.
thermal stability of, rosin and milkweed, saghyz and Soviprene rubbers in improving, 6855d.
water-vapor permeability of, 8738d.
**Gutta-percha substitutes**, from polyvinyl acetate, P 4895d.
**Guvacine** (*1,2,5,6 - tetrahydronicotinic acid*). (For derivatives see under *Nicotinic acid*.)
ethyl ester, reduction of, 2582b.
**Gymnite**. See *Deweylite*.
**Gynecology**, book: Essentials of Gynecologic Endocrinology, 3915b.
**Gynecomastia**, from benzedrine, 5501g.
**Gynergen** (*ergotamine tartrate*), effect on intracranial circulation in chronic headache, 9232g.
effect on pulmonary circulation, 9248b.
effect on vasoconstriction from O lack, 1110a.
**Gynocardic acid**, sulfanilamide derivs., therapeutic activity of, 3097e.
**Gypsum** (*gypsite*). (See also *Calcium sulfate; Plaster of Paris*.)
of Alaska, 2130e.
alum mixt. with calcined, P 9410h.
ammonium sulfate manuf. from, P 2380i.
in antimony deposits of Soyatal, Mex., 4982g.
application with Se compds. in pest control, 1141e.
in barley and lettuce growth stimulation, 7622h.
binding properties of, effect of TETs cement on, 9409d.
bioradiation by, 9093e.
building plates from filings and, P 6390c.
calcination of, catalytic effect through gas phases in, 8621i.
calcination of, shaft furnace for, P 3592a.
of California (Kern Co.), 4607e.
catalyst of $Fe_2O_3$ and, in disproportionation of carene, 5012g.
cement—see *Cement, hydraulic or structural*.
cement defects from, 373e.
in cement expansion reduction, 5566i.
cements (slag) contg., 2394h.
clay, waterproofing materials from, 7205g.
dehydration of, P 3166i.
detn. in amorphous substances, 5252b.
elec. cond. of split face of, 6026c.
electrokinetic potential of, 4924e.
fabric of parallel-fibrous, 4980a.
and its formation, 76h.
formation during deterioration of stones, 4727b.
industry in 1946, 2127c.
iron sulfide detn. in, 6937d.
of Italy (Tuscany), 2128b.
journal: Zement-Kalk-Gips, 3989d.
manuf. of high-strength, app. for, P 3591a, P 6389d.
in mercury ores of Huahuaxtla dist., Mex., 4981h.
in mineral springs at Beppu, Japan, 5703h.
peanut-soil treatment with, 1514a, 9322f.
phosphate fixation in sugar-cane soils limed with, 8591i.
as pigment extender, 8704a.
plaster from—see *Plaster*.
of Poland (Nowy Ladek), 5348e.
polishing of, effect on hardness and surface structure, 4071i.
in porcelain-mix stabilization, 3582a.
reaction with $NH_4NO_3$, P 3575e.
removal from glass vessels, 6876c.
in sherry production, 1904i.
soils, 3127d.
below solonchak soil of Georgian S.S R., 7386f.
sulfur dioxide manuf. from, 2377i.
sulfuric acid manuf. from, 2377d, 7650g, 8905f.
sulfur isotopes in, 6508d.
sulfur trioxide detn. in, 58d.
systems: liparite–, and limestone–liparite–, 1920i, 1921b.
terms relating to, 4785e.
of Trinity River Tributary area in Okla. and Tex., 4607i.
in Union of South Africa, 8115g.
in volcanic deposits at Nyamuragira and Tshambene, Belgian Congo, 5349a, 8902e.
water infiltration into soils treated with, 794a.
water of hydration of, Raman effect in study of, 2513f.
waterproofing of, P 6389d.
**Gypsy moth**. See *Porthetria dispar*.
**Gyromagnetic ratio**, 5303c.
of beryllium, Cs and Rb, 4137a.
detn. of, 8262e.
electronic, in $CuSO_4.5H_2O$ single crystals, 5244c.
of electron orbital momentum, 2856i.
*g*, values and, 5303c.
nuclear, 8865a.
**Gyttja**. See *Muds*.

*h*, 4948c.
**de Haas-van Alphen effect**. See *Magnetic susceptibility*.
**Habinol**, as wood preservative, 9339e.
**Habituation**, to morphine—see *Morphine*
**H acid**. See *1-Naphthol-3,6-disulfonic acid, 8-amino-*.
**Hackberry**, oils of—see *Oils*.
**Haddock**, vitamins $B_1$ and $B_2$ in, effect of radar energy on, 1493a.
**Haemagglutination, Haematin, etc**. See *Hemagglutination; Hematins*.
**Haematobia irritans**. See *Siphona irritans*.
**Haematopinus suis**, control of, chlorinated hydrocarbons in, 9332c.
**Haematopinus tuberculatus**, control of, 8598i.
**Haemobartonella muris**, infection with, cellular reactions in, during anemia produced by anti-blood immune serum, 9221h.
**Haemonchus contortus**, respiratory metabolism of, 5874e.
**Haemophilus**. See *Hemophilus*.
**Haffkinine**. See *Quinacrine*.
**Hafnium**, electrodes from, for high-pressure-discharge app., P 7840e.
heat capacity of, 3671d.
isotope of mass 175, from Lu bombarded by deuterons and protons, 4124a.
isotope of mass 181, $\beta$- and $\gamma$-rays from, 4121i, 4124b.
energy of $\gamma$-rays of, 6075i.
radioactivity of, 487a.
from lutecium, 7330c.
nuclear isomerism of, 3280b.
partition between $HClO_4$ and theonyltrifluoroacetone, 8959d.
sepn. from Zr by distribution, 2883c.
sepn. from Zr, ion exchange in, 4169b.
system: C–, 2914a, 6958b.
**Hafnium, analysis**, sepn. from Zr, 8959d.
**Hafnium borohydride***, $Hf(BH_4)_4$, 8937g.
**Hafnium chloride**, $HfCl_4$, heat of formation of, 2828b.
**Hafnium compounds**, purification by distribution, 2883d.
**Hafnium oxide** ($HfO_2$), catalyst of $SiO_2$ and, for acylation of thiophene, P 2643g.
detn. in mixt. with $ZrO_2$, 5693e.
purification of, 2883e.
**Hafnium silicates**, as catalyst in decompn. (mol.) of diaryl paraffins, P 2228f.
**Hafnium sulfates**, sepn. from Zr sulfates, 2883c.
**Hagemannite**, as geothite-ralstonite-thomsenolite mixt., 8984c.
**Hagemann's ester**. See "ethyl ester" under *2-Cyclohexene-1-carboxylic acid, 2-methyl-4-oxo-*.
**Hahn, Otto**, biography, 4907h.
**Hair**. (See also *Alpaca*.)
adsorption and swelling isotherms of, in water vapor, 4305d.
alginates in prepns. for, 1905i.
amino acid content of hog, 4708h.
camel—see *Camel hair*.
cleanser, P 5554c.
color, biotin effect on, 6292f.
color of rat, hormone factor A and, 3074e.
copper in colored and white, 3084c.
cycles of, effect of removing endocrine glands on, 8036c.
damage by acids, alkalies and heat, detection of, 414d.
dead space and shrinkage control in human, 9457c.
dyeing of, 2737g, 4423h.
dyes for, 9386h.
dyes for, and dangers of these dyes, 2373h.
dyes for, pyrogallol detn. in, 9368d.
felt—see *Felt*.
glycogen in, 6719f.
gray—see *Achromotrichia*.
green-colored human and animal, 6255h.
horse—see *Horsehair*.
inflammations of hair bulb, drug for use against, P 1532c.
keratin compn of, 2089g.
keratin orientation and hardening in follicle of, 7113d.
improvement with resorcinol-HCHO resins, P 5200a.
mech. properties of, structure and, 2810c.
melanin detn. in, of guinea-pig genotypes, 6721i.
pantothenic acid deriv. prepns. for, P 4434f, P 6793b, P 8108c.
pentoses in, 7106g.
pest control in, P 4422e.
plastic from, P 8744d.
prepn. for, contg. *p*-hydroxybenzoic acid esters, butyramide deriv., etc., P 7646a.
rabbit—see *Rabbit hair*.
recovery of, by peptic digestion of hides, P 8722d.
recrystn. of relaxed, 8416g.
removal from ears, feet and lips of cattle and hogs, 5220f.
removal of—see also *Depilatories; Hides*.
-rubber upholstery pads, P 8176c.
shampoos for—see *Shampoos*.
soly. of human, in alkali, detn. of, 5192h.
sulfur distribution and analysis of cattle, 7736i.
water detn. in, 1824c.
waving of, 8103c.
compns. for, P 3574e, P 5554b, 8093g, P 8621e.
mercapto acids in solns. for cold, 3144h.
thioglycolates in cold, 2374c.
**Hairy root**. See *Agrobacterium tumefaciens;* and "crown" under *Galls*.
**Hairy spider beetle**. See *Ptinus villiger*.
**Hake-liver oil**. See *Oils*.
**Haleite**. See *Ethylenediamine, N,N'-dinitro-*.
**Halibut**, oil from—see *Oils*.
**Halicystis ovalis**, tertiary membranes of cell wall of, 5092h.
**Halides**. (See also *Alkali metal halides; Alkaline earth halides; Alkyl halides; Aryl halides; Bromides; Chlorides; Fluorides; Halogen compounds; Iodides; Sulfonyl halides;* and "halogenated," etc., under *Hydrocarbons*.)
acetylenic, condensation with $\alpha,\beta$-unsatd. ketones, P 5798b.
acid, condensation of aromatic, with fatty

acid halid[e] pour depressors for lubricants by, P 5586*b*.
condensation with tertiary amines, mechanism of, 4240*h*.
of β-halo acids, P 3444*e*.
manuf. of, P 7954*b*.
polyhalo straight-chain, P 1434*c*.
reaction with aromatic arsines in the presence of $AlCl_3$, 6178*a*.
reaction with $BrCH_2CO_2Et$ and Mg, 2973*e*.
reaction with β-lactones, P 1056*h*.
resinous products from castor oil, olefinic α,β-dicarboxylic acids, vinyl compds. and, P 3656*d*.
catalyst complexes of ethers and metallic, in alkylation and isomerization of hydrocarbons, P 8666*c*.
catalysts for Friedel-Crafts reaction from, P 3161*b*.
as catalysts in condensation of $C_2H_2$ with $NH_3$, 3778*f*.
in polymerization of olefins, P 3188*b*.
in polymerization of unsatd. hydrocarbons, 7313*a*.
in soln. of Cu, 6496*f*.
catalysts of $AlBr_3$ or $AlCl_3$ and molten metallic, in conversion of hydrocarbons, P 4843*c*.
catalysts of, in alkylation of aromatic hydrocarbons, P 4005*b*.
in hydrocarbon conversion, removal from products, P 7222*h*.
in isomerization of $C_6$–$C_8$ paraffins, P 3190*d*.
in polymerization of drying oils, P 9484*a*.
chromatographic sepn. of, 6883*b*.
condensation of satd., with unsatd. compds., 3371*h*, 3372*df*.
detn. of, 8972*d*.
detn. of, series titration with Ag ion in, 6942*a*.
elec. cond. in different solvents, 7301*f*.
fluorescence of, quenching of, 7829*c*.
of Group IV elements, force field of, 2051*h*.
heats of dissocn. of org., 6479*d*.
heats of formation of, thermochem. logarithmicity and, 2827*f*.
isomorphism of org., 5754*e*.
mercury equil. with ions of, 4545*g*, 7857*a*.
metal extractive distn. with, P 5728*e*.
microwave absorption by org., 4912*ace*.
organo metal, in silvering org. surfaces, P 4520*e*.
poly-, calcn. of formulas of, 3306*f*.
polymethylene di-, use in synthesis, 3792*d*.
reaction of acyl, with phosphorus thio esters, 560*g*.
reaction of metal, with org. Al compds., P 7935*d*.
reaction of org., with Bu di, 2188*g*.
reaction products of org. di-, with metal polysulfides, P 6457*c*.
reactions of $Mg_2Pb$ and $Mg_2Sn$, 7364*a*.
reactions of org., with Na vapor, 3694*a*.
reactions with at. Na, 3694*c*.
reaction with $BrF_3$, 3739*e*.
reducibilities of metallurgical, 4931*c*.
reduction of org., with $LiAlH_4$, 1312*c*.
refractive indexes of crystals of, 3259*h*.
reviews on, 3739*g*, 3780*d*.
selenium contg., P 5162*h*.
solid solns. with Ag halides, 8789*b*.
soly. in water, heteroatom polarizability and, 3671*i*.
substitution by OH ions in basic salts and OH ions substitution by halide ions, 5266*d*.
systems (binary) of, 2107*b*.
thermodynamic properties and ultrasonic velocity in inorg., 6024*h*.
thermodynamics of bivalent, in aq. soln., 22*c*.
titration of, glass sensitive to Ag ion for, 4961*b*.
ultrasonic velocity in org., 1232 .

**Halite.** See *Sodium chloride* (esp. "rock salt").

**Hall effect,** of bismuth-Te alloys, 7763*e*.
corrosion measurement by, 8340*c*.
equation for, 8221*g*.
of galena, photoelec. effect, thermal e.m.f. and, 4101*i*.

in quinoline compds., 6113*b*.
detn. of two, 7866*a*, 8306*g*.
disintegration of, products of, 2861*d*.
effect on acetate rayon, 2777*f*.
effect on fungistatic activity of $C_5H_5$ derivs., 4803*h*.
electrodeposition from $Ac_2O$ solns., 2876*h*.
exchange of, in benzoic acid derivs., 187*g*.
in inorg. compds., 2495*h*.
with Li in iodothiophenes, 1393*f*.
nucleophilic substitution and, 6876*e*
in ring closure of diazotized *o*-amino α-haloacetophenones, 652*g*.
heats of hydration of ions of, 7318*b*.
methyl halide reactions with ions of, effect of solvents on, 5270*a*.
photoreactions sensitized by, 3725*c*.
radioactive, in exchange reactions, 7809*g*
reactions in aq. solns., 6496*g*, 7799*e*
reaction with H, kinetics of, 5266*e*
with metals at high temps., 90*i*
with 1-(2-nitrovinyl)piperidine, 1004*c*
removal of, from coumarone-indene polymers, P 904*g*.
from 2-[(2-dimethylaminoethyl)(5-halo-2-thenyl)amino]pyridines 5781*i*.
from gasoline, etc., P 390*c*.
from halogenated benzenes by electrolysis, 8908*f*.
from halogenated hydrocarbon-aromatic compd. condensation products, P 2124*b*.
from hydrocarbons, P 4006*c*.
with Raney Ni, 646*c*.
sulfur (insol.) stabilization with, P 3160*i*
in sulfur viscosity reduction, 8839*d*.

**Halohydrins,** reaction kinetics with hydroxyl ion, 2848*e*.
reaction with alkyl vinyl ethers, 6150*b*.
reaction with vinyl esters, P 6649*i*.
sulfolene, P 3851*e*.

**Halomethylation,** of 1,8-naphthosultone, 203*d*.

**Haloprenes.** See "halo derivs." under *1,3-Butadiene*.

**Halothenes.** See "halo derivs., polymers" under *Ethylene*.

**Halotrichite,** in mineral springs at Beppu, Japan, 5703*h*.

**Halovis,** metabolism and, 3912*h*.

**Haltica.** See *Altica*.

**Halva,** compn. and nutritive value of, 782*c*.

**Hamamelis,** identification of fluidexts of, 1908*c*.

**Hammond's Weed Killer,** effect on action of 2,4-D, 805*h*.

**Hamsters,** oxygen consumption and temp. regulation in, during hibernation, 8563*a*.

**Handkerchiefs,** in transfer of respiratory infections, 6278*f*.

**Handling of materials.** (*For handling of specific materials see headings for those materials.*) 1227*i*, 9297*d*.
book: Khranenie i perevozka zhidkikh kislot i shchelochei, 2744*h*.
conveyors for—see *Conveyors*.

**Hanger's test.** See *Flocculation reactions*

**Hanksite,** compression of, 4917*b*.

**Hansa Dyes.** See *Dyes*.

**Hansenula anomala,** metabolism of, 7550*a*.

**Haplopappus.** See *Aplopappus*.

**Haptens.** (See also *Antigens.*)
interaction with antibodies 3925*e*.
Rh, 753*h*.

**Hardboard.** See *Building materials*.

**Hardening.** (For hardening of specific materials see such headings as *Alloys; Cement, hydraulic or structural; Glass; Metals.*)
of oils—see *Hydrogenation*.
by plastic deformation, 8787*d*.

**Hard materials.** No entries this year. See *Carbides;* and "hard" under *Alloys*.

**Hardness,** crystal structure and, of psilomelane and pyrolusite, 1663*i*.

of crystal surfaces, effect of working on, 4071*i*.
expression of, of rubber, 2462*d*.
indentation, of rubber and synthetic materials, 7742*c*.
of interstitial phases, 918*d*.
measurement and theory of, 5351*h*.
measurement of, of alloys, app. for, 6136*e*.
app. for, 2559*g*.
of cosmetic products, 2369*c*.
of elec. insulators and plastics, 4400*c*, 4787*i*.
of glass, plastic deformation in, 5558*d*.
of org. coatings, 2788*d*, 3632*b*, 7239*c*.
of paints, app. for, 3211*b*.
of polymers, 8202*g*.
of quartz crystals, 976*f*.
of rubber, 429*b*, 1210*i*, 2462*ef*, 3643*g*.
of rubbers, and calibration of testers therefor, 1207*e*.
by scratch resistance, 4056*a*.
of viscoplastic bodies, 4928*i*.
of metals—see *Metals;* and the specific metals.
of minerals—see *Minerals;* and the specific minerals.
rebound, of rubber, 7741*a*.
of steel—see *Steel*.
of water—see *Water, potable and industrial*.
of water, measurement of—see *Water, analysis*.
**Harkins, Wm. Draper**, biography, 4057*f*.
**Harlequin bug**. See *Murgantia histrionica*.
**Harmine** (*7-methoxy-1-methyl-9 H-pyrid-[3,4-b]indole*), effect on growth of wheat seedlings, 4350*h*.
synergism with antihistamines on intestines, 3102*d*.
**Harmony**, 7781*d*.
**Harmotome**, compn. and origin of, 1291*e*.
**Harpodon nehereus**, compn. and nutritive value of, 782*c*.
**Harzburgite**, norms of average analyses of, 2552*b*.
in serpentinite of Wairere, N. Z., 1692*h*.
**Hasethrol**. See "tetranitrate" under *Pentaerythritol*.
**Hashish**. No entries this year. See *Hemp*.
**Hastelloy**, B, ceramic coatings on, 541*e*.
B, minor phases in, 540*i*.
C, corrosion resistance of, in paper-pulp manuf., 4010*i*.
C, corrosion resistance to $NaClO_2$ and NaOCl bleaching solns, 855*a*.
corrosion of, by sulfates, 1706*f*.
oxide coatings on A, B, C and D, 1299*e*.
as sulfation and sulfonation app. alloy, 97*e*.
**Hatchettolite**, neptunium and Pu in, 1649*a*.
**Hatchite**, identity with gratonite, 2128*f*.
**Hats**, from braids of cellulose derivs. plasticized with bis(methoxyethyl) phthalate, etc., 2785*h*.
from felts from nonfelting fibers and resin fibers, P 3208*f*.
hyperthyroidism and Hg poisoning in factories for making felt, 8689*a*.
mercury exposure in making fur-felt, 8688*g*.
mercury poisoning and urinary excretion of Hg by workers on felt, 4019*a*.
mercury poisoning in manuf. of felt, 333*a*, 8688*i*.
**Haworthia coarctata**, carotenoids in leaves of, 1836*i*.
**Hawthorn**, bud exts., stabilization by $HPO_3$ of vitamin C in, 8475*e*.
cardioactive substance of, 5906*f*.
control of *Crataegus*, 4414*a*.
identification of fluidexts. of, 3145*h*.
pharmacology of, 8558*c*.
vitamin C-contg. prepns. from, 8070*a*.
**Hay**, alfalfa—see *Alfalfa*.
from Bermuda grass, 3552*d*.
carbohydrates in, 6755*g*.
carotene detn. in, 2895*e*, 9276*d*.
cereal, carotene losses on curing and storing, 4783*i*.
compn. and digestible energy of, 6755*e*.
curing, in arid and forest-meadow zones, 329*f*.
fertilizer expts. with, 1129*f*, 9329*i*.
fertilizer expts. with, with P, 1892*c*.
legume, soil and, 2723*b*.
from *Lespedeza sericea*, as mulch, 3129*i*.
milk production and, 3041*d*.
nutritive value of, 329*e*, 1091*e*.
nutritive value of timothy and clover, 7604*c*.
nutritive value of wild meadow, effect of time of cutting on, 3946*c*.
peanut, effect of Cu residue of, on livestock, 9329*g*.
sewage-digester gas in making, 3131*a*.
soybean, in correction of K deficiency of peaches, 9319*a*.
**Haydite**, manuf. of, 5560*a*.
**Hay fever**. (See also *Allergy*.)
antihistamines in treatment of, 3938*f*.
aspasan in prophylaxis of, 4426*e*.
blood in, during acute shock, 7125*f*.
**Hazel**, control of brush in forests, 3134*i*.
control of *Corylus cornuta*, 4414*a*.
nuts, vitamin $B_1$ in, 6753*i*.
nuts, weevil control on, 6777*d*.
**HCC**. See *Cyclohexane 1,2,3,4,5,6-hexachloro-*.
**HCH**. See *Cyclohexane, 1,2,3,4,5,6-hexachloro-*.
**Ho 176**. See *Carbamic acid, ethylenebis[dithio-*.
**Ho 178E**. See "zinc salt" under *Carbamic acid, ethylenebis[dithio-*.
**Healing**. See *Wounds*.
**Health**. (See also *Diseases; Hygiene; Poisoning; Public health*.)
agricultural chemicals and, 5142*a*.
book: Avoidance of Toxic Hazards in Some German Chem. Factories, 3948*g*.
in brickworks, 3581*c*.
hazards, in asbestos-cement industry, 4826*h*.
of Be, 8577*de*.
of Be, control in industry, 5883*f*.
of Co and dust in cemented-W carbide industry, 4614*d*.
of cyclotron workers, 6505*b*.
in electroplating, 2099*b*.
of F contamination in Fort William area, 5883*g*.
industrial, 3947*i*.
of insecticides and rodenticides, 0352*i*.
in Fe and metal-pickling industries, 7888*f*.
from Pb arsenate in apple orchards, 8086*b*.
in Pb bronze pouring and smelting, 6559*b*.
of metal-cleaning compds, 787*e*
of MeBr, 2341*f*.
of MeOH vapors from duplicating machines, 7159*i*.
of neutrons, 4562*a*.
of neutrons and x-rays, 4128*i*.
of pest-control agents, 8600*e*.
from radiations from at.-bomb explosion, 6505*a*.
of radiations in industry, 5885*d*.
of U compds., 8270*b*.
from $U^{235}$ fission products, 4951*d*.
of welding with Mn electrodes, 6561*e*
journals. Revista de sanidad de aeronáutica, 2262*a*; Industrial, Review, 6761*k*.
Organization of League of Nations, 3561*f*.
protection of, from radiation exposure, 4129*a*.
protection of, radiation-detection instruments for, 7326*e*.
soil nutrients and animal, 7171*c*.
and working conditions of operators with radioactive materials, 8876*e*.
**Hearing**, vitamin $B_1$ intake and, 5096*g*.
**Heart**. (See also *Circulation; Endocarditis; Tachycardia*.)
acetate and pyruvate utilization by, in diabetes, 8513*d*.
acetylcholine and cholinesterase in, 2686*i*.
acetylcholine effect on, in relation to its synthesis, 4383*b*.
acetylcholine effect on, thiaminase action on, 4767*h*.
acetylcholine in, of *Helix pomatia*, effect of physostigmine and prostigmine on, 3530*d*.
acetylcholine sensitivity of, effect of NU 683 on, 7134*f*.
acetylcholine sensitization by morphine and its derivs., 3102*c*.
acetylcholine sensitization of ventricle of *Helix pomatia* by local anesthetics, 1107*e*.
acetylcholine-vitamin $B_1$ antagonism in, 1093*i*.
action current of, effect of Ca on, 6742*e*.
action current of, effect of K ions on, 6742*f*.
actomyosin and myosin in, 7109*e*.
adenosinetriphosphatase in, effect of various substances on, 8058*a*.
adenosinetriphosphate effect on, 2693*e*, 8527*i*.
adrenaline action on, effect of veratramine on, 5866*h*.
adrenaline effect on, of cold-blooded animals, 6744*h*.
adrenaline effect on rhythm of, in dogs anesthetized with cyclopropane, 760*d*.
adrenochrome effect on, 5864*e*.
aglucons of glycosides acting on—see *Aglucons*.
amino acids in, 3534*f*, 7061*dh*.
6-amino-2-methyl-2-heptanol effect on, 6732*i*.
*Ammi visnaga* action on, 5542*i*.
antifibrillatory action of dilator drugs, 758*h*.
antifibrillatory action of thiamine triphosphate, 1880*g*.
antifibrillatory and coronary dilator action of diethylaminoethoxy-2-diphenyl hydrochloride on, 3109*a*.
antimony compd. effect on, 2316*g*.
antisclerotic prepn. contg. vitamin $B_1$ and $MgSO_4$ or NaI, 1157*b*.
antithyrotoxic factor in, 3912*i*.
arrhythmia of, effect of dibenamine on cyclopropane - adrenaline - induced, 2700*d*.
effect of diethylaminoethanol on, 2700*e*.
quinidine gluconate in treatment of, 9356*b*.
tetraethylammonium chloride effect on adrenaline-induced, 321*i*.
in arsenic poisoning (chronic), 8533*i*.
autolysis of, effect of acetylcholine on, 1074*g*.
automaticity of, effect of cyclic and noncyclic hydrocarbons on, 1111*d*.
autonomic innervation of, in blood sugar regulation, 9199*g*.
barium chloride effect on, 758*f*.
beat vol. of, measurement of, 8421*e*.
beef, in diet, effect on hemoglobin and plasma-protein production, 3500*e*.
benzene poisoning effect on, 3947*h*.
bis(2-chloroethyl)sulfide effect on, 5493*i*.
blood flow in, effect of acetylcholine, adrenaline and noradrenaline on, 8539*a*.
blood flow in, effect of pituitary exts. on, in relation to action of nicotine and to smoking, 4385*a*.
-blood vessel reflexes, tetraethylammonium as aid in study of, 6744*e*.
book: Coronary Disease, 1859*g*.
caffeine-digitalis antagonism in, 8051*g*.
calcium effect on, 297*c*.
calcium ethyl sulfate effect on, 4426*h*.
calcium-K ion antagonism on, 6742*g*.
carbon disulfide effect on, 7577*g*.
cholinesterases in, effect of cardiotonic glycosides on, 4380*f*.
cold effect on, 4754*f*, 5053*b*.
conduction and elec. systole of, effect of quinidine and strophanthidin on, 314*i*.
congenital disease of, 7571*h*.
congestive failure of, biologic decay periods of Na in, 3476*i*.
effect of sulfanilamide on salt and water excretion in, 3526*c*.
effect of tetraethylammonium chloride on venous and arterial pressure in, 3103*h*.
renal excretion of $Na^{24}$ in, 4744*c*.
Na elimination in, 5491*b*.
contractures of, from K and $CaCl_2$ and their mixts., 5867*i*.
contractures of, from salts, 5867*g*.
convallotoxin effect on, 5116*e*.
coronary arteriosclerosis, cholesterol in, 749*h*.
coronary infarct, effect of theophylline on, 819*a*.
*Crataegus* ext. active on, 5906*f*.
cysteine action on, 9252*b*.
cytochrome oxidase activity of prepn. of, 9104*b*.
decompensation, electrolytes of urine in, 4758*c*.
deficiency, O deficiency in blood in, 3093*e*.
digitalis effect on papillary muscles of, 2318*g*.
digitalis-glycoside retention by, 1106*h*, 5493*c*.
dihydroergocornine effect on, 7583*f*.
disease of blood vessels and, vitamin E in treatment of, 6296*d*.
diseases of, gas analysis of blood from heart and arteries in, 9136*e*.
kidney tubular function and, 9218*e*.
polypeptides in blood in, 8049*b*.
porphyrin in, 7570*g*.
tocopherol and blood plasma in, 7122*a*.
vitamin $B_2$ effect on O debt in, 4738*c*.
water balance in, 3095*e*.

dysfunction of, *Adonis vernalis* in treatment of, 5861*d*.
effect of acetylcholine and adrenaline on, 1489*c*.
effect of acetylcholine and choline on, of cephalopods, gastropods and molluscs, 3528*h*.
effect of acetylcholine and intermediate products of carbohydrate metabolism on, 5865*c*.
effect of 3-acetylpyridine and nicotinamide on, 2681*b*.
effect of adrenaline and noradrenaline on, 3525*e*.
effect of antibiotic lactones and analogs on, 1116*c*, 7138*g*.
effect of aranthol, ephedrine and octin on, 8546*c*.
effect of arsenic compds. and narcotics on, protective role of methemoglobin in, 316*h*.
effect of cardiac drugs on tissue explanted from, 4372*g*.
effect of chloro derivs. of diethanolamine and triethanolamine on, 2700*b*.
effect of choline and related compds. on, of *Venus mercenaria*, 8058*g*.
effect of citral and β-ionone on, 1488*g*.
effect of *Clostridium oedematiens* toxins on, effect of antitoxin on, 6740*f*.
effect of drugs on, in hypotension, 7147*i*.
effect of α-fagarine related compds. on, 2320*d*.
effect of gluconic acid and vitamin C on, 9182*i*.
effect of glycosides on electrocardiogram and myocardium, 4380*h*.
effect of β-halogenated ethylamine derivs. on, 7131*f*.
effect of heptanols and chloroheptanes on, 9248*e*.
effect of isomeric heptylamines on, 1110*b*.
effect of khellinin and visammin on, 7584*b*.
effect of mercurial diuretics on, effect of ascorbic acid on, 4373*c*.
effect of 2-methyl-1,4-naphthoquinone, 2-methyl-1,4-naphthohydroquinone and its esters on, 9246*g*.
effect of optical isomers of quinacrine, org. acids and alkaloids on, in molluscs with shells with left- and right-handed spirals, 3932*e*.
effect of ouabain and strophanthidin-3-acetate on, 313*e*.
effect of phenobarbital and sulfathiazole on, 7134*f*.
effect of strophanthin and vitamin D on, 8536*h*.
effect of substances which interrupt glucose metabolism of, 8550*b*.
effect of synthetic compds. with vitamin K activity on, 8059*g*.
effect of tetramethyl and tetraethyl ammonium hydroxide on, 6731*c*.
electrical stimulation of, liberation of active substance during, 7118*d*.
electrode jelly for electrocardiogram, 356*d*.
emetine in, 1862*e*.
ergot alkaloids and, 7128*a*.
evolution in vertebrates, 8509*d*.
failure of, from central nervous system depressants and local anesthetics, 1862*ef*.
failure of, salt and water retention in, 4366*d*.
fatigability and metabolism of, effect of adrenal cortical hormone on, 1851*f*.
fibrillation from adrenaline and chloroform, protective action of various agents against, 4768*c*.
fibrillation of, effect of adenosinetriphosphoric acid on electrically induced, 2319*b*.
fibrillation (ventricular) of, hydrocarbon-adrenaline induced, 313*a*.
flavoprotein and cytochrome complex from, as glucose dehydrogenase carrier systems, 4712*g*.
folic acid in normal and diseased, 7568*h*.
function of, oxyhemoglobin reduction in diagnosis of, 3093*f*.
glutamic acid and glutamine in, 6719*d*.
glycogen of, 3052*g*.
glycogen of, effect of alloxan on, 8537*f*.
glycosides acting on—see *Glycosides*.
growth-inhibitory fraction from sheep, 1849*d*.
growth of embryonic, effect of hormones on, 1099*f*.
growth of tissue culture of, effect of glutathione on, 296*i*.
hyaluronic acid in, effect of nervous excitation on, 741*f*.
hydrastinine effect on, 3102*f*.
hypertonic soln. effect on, 1490*de*.
idioventricular rhythms of, under cyclopropane anesthesia, arterial pressure and, 1111*e*.
infarction of myocardium, fibrinogen in blood in, 4772*g*.
inotropism in, 315*c*.
iron in, 9133*h*.
irregularities during cyclopropane anesthesia, dihydroergotamine and dihydroergocornine in prevention of, 4381*h*, 4763*g*.
ischemia, nucleotides in, 4756*g*.
isopropyladrenaline effect on rhythmic action of, 5866*i*.
in lead poisoning, 9297*f*
lesions of, effect of salicylates and benadryl on anaphylactic hypersensitive, 3523*b*.
from endocrine kidney, effect of diet on, 8043*d*.
from γ-globulins of blood serum, 5859*c*.
liver and, 7118*e*.
lyxoflavine isolation from, 7532*h*.
meperidine effect on, 8552*h*.
metabolism by, 8513*a*.
in avitaminosis, 292*i*.
drug action and, 9267*i*.
and effect of metabolic inhibitors thereon, 9210*fgh*.
of triacetic acid and its Et ester and lactone, 2261*c*.
minute vol. of, effect of quinine and quinidine on, and effect of Ca thereon, 3108*b*.
myoglobin in, 6301*c*.
nicotine effect on, 757*d*.
nicotine effect on, and its reproduction by other autonomic drugs, 4385*c*.
nicotinic acid effect on, 3076*c*, 3519*e*.
nicotinic acid in, during corn diet, and effect of tryptophan and $N^1$ methylnicotinamide thereon, 3075*g*.
nicotinic esters and, 6317*a*.
ouabain effect on papillary muscle of fetal, 2318*h*.
output, effect of dibenamine on, 6309*g*.
output, effect of Na thiocyanate on, 4374*f*.
in oxygen breathing, and effect of vagus thereon, 9200*i*.
paludrine effect on, effect of choline derivs. on, 2704*b*.
penicillin effect on, 9245*d*
phenobarbital effect on, 7133*g*.
phosphate synthesis by, at low O tension, effect of succinic acid on, 756*e*
phosphatides of, 3483*f*.
poisons—see *Poisons*.
potassium effect on, 6742*c*.
potassium inhibition of, effect of methylxanthines on, 1108*d*.
pressor-depressor antagonism in, 8056*e*.
protein fractions of normal and hyper trophied, 9199*f*.
pyrophosphate decompn. by, 8484*e*.
quinine dihydrochloride effect on, in malaria infection, 9256*e*.
rate of, effect of chloro- and bromothyronine derivs. on, 1109*d*.
rate of, in hyperthyroidism from thyroprotein, effect of energy intakes on, 293*h*.
refractory period and elec. excitability of ventricle of turtle and frog, effect of acetylcholine on, 1117*b*.
respiration of, effect of cardiac glycosides on, 1110*g*.
review on, 5838*h*.
rhythm (bigeminal) of, digitalis and, 5121*c*.
rhythm of, in digitoxin therapy, 1112*a*.
stimulation of, adrenotropic receptors and, 298*g*.
substances acting on, 5862*i*.
effect on phosphorylated intermediates of rat, 2321*g*.
standardization of, 1907*i*.
sulfathiazole effect on, 7133*e*.
sulfonamide effect on, 4371*h*.
sulfonamide toxicity for toad, 6307*d*.
sympathomimetic amines and, 9250*d*.
tetraethylammonium compd. effect on, 9266*b*.
thiamine triphosphoric acid effect on, 8557*g*.
thiamine triphosphoric ester effect on, 1860*f*.
thiobarbiturate toxicity to, 4768*f*.
toad venoms effective toward, constitution of, 2626*i*.
tobacco smoking and, 6738*d*.
uranin effect on, 309*g*.
urethan effect on, 5493*e*.
vagal stimulation of, adrenergic mechanism of, 8511*g*.
water (extracellular) of, in hemorrhagic shock, 7125*d*.

of cond. electrons in $Mg_2Sn$, 4533g.
of copolymerization, 8203c.
of copper oxidation, 2851c.
of copper phthalocyanine, 3731i.
of cracking on $Al_2O_3$ catalysts, 1250i.
of cyclohexene oxidation, 8825d.
of cyclopentene decompn. by heat, 3271f.
of decahydronaphthalene oxidation, 5389c.
of decarboxylation of isoquinaldinic, picolinic and quinaldinic acids, 7310d.
of decompn. of microcosmic salt and Na and K phosphates, 6535a.
of dehydration and dehydrogenation of EtOH and HCOOH vapors on catalysts, 6497h.
of dehydrogenation of cyclohexane and decahydronaphthalene on metal and oxide catalysts, 4551e.
dendrite growth and, 6027c.
of desorption, 4921h.
of deuterium exchange, isomerization and hydrogenation of butenes, 24g.
of diffusion of C and N in Fe and of strain aging of Fe, 7881d.
of θ,ι-dihydroxystearic acid polyesterification, 2941d.
of diketohexanoic acid-hydrolyzing enzyme, 6267a.
of disilane decompn., 2078f.
of dissocn. of $NH_4$ phosphates and $H_4P_2O_7$, 7307i.
of $N_2H_4$ and $PhCH_2NH_2$, 7708a
of pentaphenylethane type of hydrocarbons, 5387e.
distribution function of, in activated adsorption, 3264a.
in elimination reactions of alkyl halides and sulfonium compds., 3346i, 3347c.
of ester hydrolysis, 6064i.
ester relaxation in polyisobutene or polythene and, 6020a.
of ethane oxidation, 474b.
of ethyl acetate hydrolysis, 8827e.
of ethylbenzene pyrolysis, 8250f.
of ethylene chloride decompn. by heat, 7307d.
of ethylene halohydrins with hydroxyl ion, 2848f.
of ethylene oxide hydration, 4549b.
of ethyl nitrate decompn., 6901i.
of exchange between two oxidation states of Ce in $HNO_3$, 6532h.
in fluorescence development in egg powder and glucose-glycine mixts., 7154f.
of formaldehyde condensation with PhOH, 8737b.
of formaldehyde oxidation, 4085e.
free energy of surface formation and viscosity of liquids in relation to, 8778g.
of free-radical reactions in gas phase, 5270e.
of free-radical reaction with double bonds, 5733b.
frequency exponents in chem. kinetics and, 5266h.
of fuel mixts., internal-combustion-engine knock and, 1167d.
of 2-furaldehyde reaction with phenol, 5226e.
of germanium rod, 8289e.
of GR-S rubber flow, 1210c.
of GR-S rubber polymerization with resin acid soap emulsifiers, 8725b.
of GR-S rubber reaction with $K_2S_2O_8$, 5227e,
of gum formation in cracked gasoline,
of halides (org.), 4912c.
of halogen-ion reaction with Me halides, effect of solvents on, 5270b.
of hexachlorocyclohexane-isomer dehydrochlorination, 7311d.
of hexamethylenediamine reaction with sebacic acid, 4547g.
of hexane decompn. by heat, 6056b.
of hydroaromatic compd. dehydrogenation, 1732b.
of hydrocarbon oxidation on catalysts, 927f.
of hydrogenation of $C_6H_6$ derivs. and furan and its derivs. on Pt, 5657e.
of hydrogen bromide oxidation, 1634g, 7800d.
of hydrogen combustion with O, 1246f.
of hydrogen-ion discharge on electrode, 954a.
of hydrogen (para-) conversion by metal catalysts, 26i.
of hydrogen peroxide decompn. by heat, 7305i.
of hydrogen transfer in styrene polymerization in hydrocarbons, 5731i.
of hydroxyl (free radical) reaction with $C_2H_4$, $C_2H_4$ and $C_2H_2$, 8820h.
of γ-hydroxystearic acid lactonization in monolayers, 6883h.
of λ-hydroxystearic acid polyesterification, 2166c.
of hypophosphorous acid reaction with iodate ion, 5268a.
of iodide reaction with persulfate, 8236f.
of ion (foreign) motion in NaCl crystals, 5245c.
of ions in $TiO_2$ systems with oxides, 5561c.
of ion sorption by glass and metals, 8233i.
of iron bipyridyl-complex formation, 3695g.
of iron-α,α′-bipyridyl decompn., 6056d.
of iron corrosion, 7401d.
of iron(III) oxide modifications, 8933i.
of iron-Si alloys, 4994i.
of iron sulfate oxidation in soln. by O, 1632g.
of isopropyl alc. dehydration and dehydrogenation over $Cr_2O_3$, 4087f.
of isopropyl chlorocarbonate decompn. by heat, 6057b.
of isopropyl ether oxidation, 4085c.
of lactic acid oxidation by enzymes from plants, 6267b.
of laminated-plastic creep, 7259i.
of lead oxalate decompn. by heat, 2837i.
of low-frequency dispersion in ionic crystals, 7769b.
of lubricant thickening by Ca soaps, 1556b.
of lubricating-oil oxidation, 5932i.
of magnesium hydroxide decompn. by heat, 8816c.
of malonic acid decompn., 7797g.
of metal exchange with its cations, 6891b.
of metal intercryst. slip, 3329c.
of methane-$d_4$ reaction on Ni catalyst, 7802g.
of methyl methacrylate polymerization, 3231c, 4934g.
of 2-methylpropene decompn. by heat, 5270i.
of mol. decompn. by heat, 3697d.
of monolayer evapn. from glass, 7767f.
of naphthalene bromination, 2851h.
of nitrogen dioxide reaction with $O_3$, 7308h.
of nitrogen evolution from ε-Fe nitride, 4933e.
of nitrosoguanidine decompn., 5746a.
of novolac-resin flow, 6861a.
of oxidation of $C_2H_4$ and HCHO, 6567e.
of oxidation of $Mg_2Pb$ and $Mg_2Sn$, 7363i.
of oxygen absorption by Ag catalyst and of iso-PrOH oxidation, 5272g.
of paraffin reactions with H and $CH_3$, 5270f.
of paraldehyde depolymerization in gas phase, 7801g.
of peptidases from tumor and normal tissue, 5105f.
of phenol alkylation with *tert*-alkyl halides, 2850f.
of phenyl isocyanate reaction with alcs., 7441h, 7442d.
of phosphine adsorption and oxidation, 6898a.
of polyisobutylene flow, 7295e.
of polymer degradation by heat, 8206d.
of polymerization, 2497d.
of polymerization of Me methacrylate, styrene and vinyl acetate, 6460g.
of polystyrene depolymerization, 8204g.
of polyvinyl-alc. addn. reactions, 8241c.
of potassium chloride diffusion through $Cu_2Fe(CN)_6$, 5257a.
of propene decompn. by heat, 5270g.
of propylene oxide addn. to $NH_3$ and amines, 926d.
in protein monolayers of elementary functional groups, 3690a.
of pyrite decompn., 3696c.
of radical-dissocn. reaction of hydrocarbons in o-dichlorobenzene, 6496c.
reaction const. for heterogeneous reactions and, 2850i.
of recombination of H and O atoms on solids, 1635h.
of re-orientation in $D_2O$ and $H_2O$, 3676d.
of respiratory enzymes in stenothermophilic bacteria, 2671f.
of rubber flow, 1207h, 2010g, 8721f.
of self-diffusion in metals, 4917c.
of semicarbazone formation with acetophenone and p-derivs., 2850d.
of silver oxalate decompn. by heat, 26b.
of silver oxide dissocn. and reduction, 4086b.
of sodium-butadiene polymer oxidation, 925d.
of sodium sulfite autoxidation, 8824a.
of soln. of Cu and Ag in solns. of $(NH_4)_2S_2O_8$, 1245d.
spectra and, 6894i.
of stibosobenzene disproportionation, 3696f.
of styrene polymerization, 1634d, 3273a, 7312g.
of sulfochloride-group hydrolysis in aromatic compds., 926i.
of tendon-collagen shrinkage in water, 7247e.
of thallium(I) in exchange with Tl(III), 8817h.
of thiosulfate-ion reaction with EtBr, iso-PrBr and PrBr, 1632i.
of tin (supercooled) nucleation with water drops, 2061d.
of titanium oxidation, 9007a.
of tobacco mosaic virus, 1461g.
of θ,ι,λ-trihydroxystearic acid polyesterification, 2941e.
of trinitrotoluene decompn. by heat, 7687a.
of uranium(V) disproportionation, 5269b.
of urease action on urea, and effect of sulfite thereon, 7066h.
of vinyl-radical reaction with H, 3694d.
of viscosity in system: $CdCl_2$-$CdBr_2$, 4036g.
of water-gas reaction, catalyst effect on, 1945f.
of wool dyeing, 7687i.
of zinc carbonate decompn. by heat, 7306g.
of zirconium reaction with O, 8817c.

**Heat of adhesion**, adsorbed-film effect on solid-liquid, 8234e.

**Heat of adsorption**, 1638h.
of acetylene and $H_2S$ by active C, 7317c.
of adsorption complexes in heterogeneous catalysis, 1635a.
of ammonia and $C_2H_4$ by active charcoal, 4939d.
by bauxite contg. Fe, 6497e.
calcn. of, 1237e, 8791e.
of carbon dioxide by Mn oxides, 1623i.
of carbon monoxide and O by films of Cu and Cu oxide, 6532f.
of gaseous hydrocarbons by C black and $SiO_2$ gel, 8254h.
of gases and liquids, calorimeter for, 6871d.
of gases and vapors by active C, 6903g.
of helium by C black, 6037b.
of hydrogen and fragments of $CH_4$ and $CD_4$ on Ni catalyst, 7802g.
by membranes, 2069g.
of methane by Fischer Ni catalyst, 6064c.
of methanol by $BaSO_4$, 461h.
of methyl ether by activated charcoal, 8835e.
of mixts. by catalyst, 2498e.
monolayer vol. and, 4075f.
of nitrogen dioxide-$N_2O_4$ mixt., 6035a.
of oxygen by Mn oxides, 1624b.
theory of, 3263f.
of tritolyl phosphate by calcite, Cu and quartz, 8234f.
of water vapor by casein, 7787c.
of water vapor by langbeinite, 8836e.

of magnesia by ferrosilicon, 4932*e*.
of silica with C and Si, 4582*h*.
of silicon monoxide with C, CO and SiC, 7794*g*.
**Heat of solution**, of acetone in nitrocellulose, 4928*g*.
of alumina in NaOH, 2077*d*.
of aluminum bromide in $CHBr_3$, 1,2-dibromoethane, MeI, EtBr and EtI, 2851*f*.
of ammonia (liquid) and $Mg_3N_2$ in HCl, 8836*i*.
of cadmium ferricyanide, 3277*b*.
of cadmium nitrate and $Cd(CNS)_2$, 2830*b*.
of cobalt complexes, 2855*c*, 7805*i*, 7806*g*.
of fayalite, forsterite, geikielite and ilmenite in HCl-HF mixt., 4187*h*.
of gelatin fractions, 8837*i*.
of glycine, leucine and tyrosine in water, 4082*a*.
of gold in Ag, 3683*g*.
of hydrogen in liquid Fe and Fe alloys with Cb, Ti and Ta, 2490*c*.
of hydrogen in Ti, 7770*i*.
limits of, 6047*g*.
of macromol. compds., 5262*f*.
of magnesium carbides in HCl contg. NaCl, 1671*a*.
of magnesium iron silicates in HF, 3700*i*.
of 1-naphthalenesulfonic acid, 1368*f*.
of perlite and its dehydration products, 1294*a*.
of potassium acid fluoride and KF, 8763*f*.
of potassium chloride in KI solns., 7795*i*.
of silver in Au, 6092*b*.
of sodium oxides, 2082*h*, 3276*e*.
of sulfur trioxide in $HNO_3$ and $H_2SO_4$ and of $HNO_3$ in $H_2SO_4$, 931*d*.
**Heat of solvation**, in elimination reactions of alkyl halides and sulfonium compds., 3346*i*, 3347*d*.
of oxygen, OH, $O_2H$ and $O_3^-$, 5651*d*.
**Heat of sorption**, of argon, Hg and N by chabazite, 7288*h*.
of methanol by coal, 8835*i*.
of water by cellulose and viscose, 9433*i*.
**Heat of sublimation**, of carbon, 452*gi*.
of graphite, 157*c*, 1638*e*, 8254*g*.
measurement of, of slightly volatile substances, 8754*c*.
of quinuclidine, 3422*d*.
of silicon monoxide, 11*i*, 7794*a*.
of tantalum(V) bromide, 8225*a*.
of uranium hexafluoride, 4530*f*.
**Heat of sulfonation**, of naphthalene, 1368*f*.
**Heat of swelling**, of charcoal by MeOH, 6882*a*.
theory of, 4553*d*.
**Heat of tautomerization**. See *Heat of isomerization*.
**Heat of transfer**, in thermoösmosis, 3265*h*.
**Heat of transformation**. See *Heat of transition*.
**Heat of transition**, 4058*i*.
calcn. from differential heating curves, 6903*c*
of carbon tetrachloride, MeOH and MeOD, 5276*b*.
of cyclohexene and cyclopentene, 1254*c*.
of ethylcyclohexane and dimethylcyclohexane isomers, 5276*a*.
of iron and Fe alloys, 1636*d*.
of phases of ethyl palmitate, α-monopalmitin and pentadecylic acid films on liquids, and of heptane on graphite, 6034*b*.
of potassium acid fluoride, 8763*f*.
of thiophene, 6069*h*.
of tin (white to gray), 6500*d*.
**Heat of transport**, in condensed phases, 8835*c*.
of surface and volume in thermodynamics, 7317*h*.
**Heat of vaporization**. (See also *Clapeyron equation; Heat of desorption; Trouton's constant*.)
of acetaldehyde, 7804*i*.
of benzene and cyclooctatetraene, 2479*f*.
of benzotrifluoride, 1620*c*.
of beryllium, 2061*g*.
of binary mixts., 476*h*, 1253*i*.
boiling point and parachor in relation to, 3276*b*.
calcn. of, 8775*i*.
from equation of state, 3700*h*.
of hydrocarbons, 2758*g*.
of carbonyl cyanide, 3682*i*.
of cationic soaps, 7293*i*.
compn. and structure in relation to, 2833*h*.
of cyclooctatetraene, 6500*b*.
drying and, 8753*c*.
of ethyl acetoacetate, in detn. of keto enol ratio of its vapor, 139*h*.
of ethyl chloro- and fluorothiophosphates, 1313*i*.
of ethylene oxide, 8837*b*.
of ethylene, O and propene, 8254*b*.
of halo methanes, 3775*a*.
of halomethylsilanes, 5739*c*.
of helium (He)$^3$, 4915*c*.
of 1,3,5-hexatriene, 558*a*.
inner, relation to surface energy, assocn. of liquids and, 3255*d*.
of lewisite isomers, 917*a*.
liquid and vapor compn. in rectifying columns with different molal, of individual components, 8839*f*.
of metals, surface energy and, 5653*a*.
of methanol and MeOD, 5276*b*.
of nickel carbonyl, 2057*e*.
of perfluorocyclopentane, 8814*f*
recovery of, concentrator and distn. app. for, P 8218*d*.
of selenium carbonyl, 1673*d*.
structure of liquids and, 5248*c*.
of tantalum(V) bromide, 8224*i*.
of thiophene, 6069*h*.
of thorium from $ThO_2$-W cathode, 7323*g*.
of titanium, 6070*b*.
of trichlorobenzene isomers, 8225*c*.
of trifluoromethyl hypofluorite, 2833*d*.
of trinitrotoluene, 7687*b*.
of triphenyl compds. of group V*B* elements, 8786*f*.
Trouton's const. and, 3255*c*.
viscosity and, 5266*g*.
**Heat of vulcanization**, of hard rubbers, 2011*adfh*, 7250*i*.
**Heat of wetting**, of activated charcoal, 8835*c*.
of agar, gelatin, $SiO_2$ and starch with alc. and $H_2O$, 7781*f*.
of casein by HCl and NaOH, effect of HCHO on, 7787*c*.
of cellulose, 1180*h*.
of cellulose by org. liquids and water, 1638*f*
of coal by MeOH, 8835*i*.
of coal, coal quality and, 3593*b*.
of coke, structure and, 4834*e*.
of disperse systems, 6042*h*.
measurement of, of gases and liquids, colorimeter for, 6871*e*.
of soils, 7619*c*.
of soils, work of wetting in relation to, 7619*e*.
specific surface measurement of carbonaceous powder by, 7208*hi*.
theory of, 4553*d*.
**Heat pumps**, in paper manuf., 4465*f*.
review on, 3248*c*.

**Heptane**, adsorption by $SiO_2$ gel, 462*f*.
alkylation (destructive) of, 1713*a*.
antimony(III) fluoride soly. in, 6890*b*.
aromatization of methylcyclopentane and, P 3453*h*.
aromatization of, on Cr catalysts, 6062*e*.
$MoO_3$-$ZnAl_2O_4$ catalyst in, P 6818*i*.
to toluene with $Cr_2O_3$- or $MoO_3$ $ZnAl_2O_4$ catalyst, P 3605*e*.
aromatization products of, spectra of, 3715*e*.
chain-transfer coeffs. for styrene in, 5731*h*.
chlorination (photochem.) of, P 6644*h*.
compds. with desoxycholic acid, 3429*d*.
compression and freezing under pressure, 4067*e*.
cracking of, 1250*h*.
detn. in hydrocarbon cuts and infrared spectra of, 2759*c*.
dielec. const. and loss of, 8770*a*.
dotriacontane soly. in, 6890*c*.
effect of, on cryoscopic behavior of 1,1-dimethylcyclohexane, 2964*f*.
emulsions in $NH_4$ caseinate and gelatin, crit. dispersity of, 7770*d*.
entropy and heat content of, effect of pressure on, 5576*b*.
equil. with $PhNH_2$, $H_2O$, perfluorokerosene, white P, Ga and Hg, 7285*d*.
films on graphite, heat of transition of, 6034*b*.
flame propagation limits for, 3618*e*.
flames of, velocity of, 8248*i*
formation of, in isomerization of $C_8H_{12}$, P 3833*d*.
formation of, in reaction of $AlCl_3$ with iso-AmOH, 164*e*.
as fuel (reference) for motors in knock testing, 383*f*.
heat capacity of, reduced pressure and temp. in relation to, 2758*g*.
heat of wetting of activated charcoal by, 8835*f*.
ignition pressure and temp. relations of, 7209*f*.
isomers, control of distn. from naphtha, P 3191*f*.
free energy of formation and knock resistance of, 3600*h*.
isomerization with HCl-promoted $Al_2Cl_6$-paraffin complex catalysts with cracking inhibited by $C_4H_{10}$, P 1560*h*.
knocking tendencies and crit. compression ratios of, contg. $Et_2Hg$, $Fe(CO)_5$ and $Et_4Pb$, 5576*g*.
lyoparachor of, 2834*a*.
magnetic susceptibility of, 8767*g*.
mass spectrum of, 3288*g*.
mixt. with $C_6H_6$ and cyclohexane, alkylated benzenes and pure cyclohexane by isomerization and alkylation of, P 1958*e*.
with $C_6H_6$ and 2,4-dimethylpentane, viscosities of, 8777*h*.
with caproic and caprylic acids, interfacial tension between $H_2O$ and, 8250*h*.
with cetane, activity coeffs., vapor pressures and statistical thermodynamics of, 5247*a*.
with cyclohexane, dehydrogenation of, 2499*b*.
with hendecane, distn. and heat-content curves of, 3255*g*.
with isoöctane and 2,2,4-trimethylpentane, isoöctane sepn. from, P 2216*c*.
with MeOH, column capacity for, 3*b*.
with N and O, explosion of, study with orthicon spectrograph, 5313*a*.
with org. vapors, adsorption by active carbons, 16*g*.
mobility of ions of, 4559*a*.
in naphtha of shale oil, 4453*f*.
oxidation of, 2402*h*.
on catalysts, kinetics of, 927*g*.
by $CH_4$-oxidizing microbacteria, 9160*d*.
by *Pseudomonas aeruginosa*, 4327*c*.
in paraffin cracking distillate, 8124*h*.
phenol adsorption by $SiO_2$ gel from, 4536*e*.
phosphorus soly. in, 2073*g*.

prepn. by polymerization of $C_3H_8$ with 2-methylpropene, 8657*c*.
prepn. from AmMeCHBr, 1312*b*.
Raman spectrum and rotational isomerism of, 2866*i*.
reaction of, under hydrogenating conditions over Fischer-Tropsch Co catalyst, 7664*a*.
reaction with $NH_3$, P 3439*d*.
removal from Skellysolve C distn. bottoms, 3603*d*.
sepn. from methylcyclohexane, with activated C, P 9431*f*.
by adsorption, P 6011*g*.
with liquid $NH_3$ solns., P 3192*d*.
soly. in aq. long-chain electrolytes, 6041*c*.
soly. in Na xylenesulfonate solns., 1242*e*.
as solvent in cottonseed-oil extn., 423*h*.
sound velocity in, and isomers, 3256*d*.
styrene transfer consts. in, 5271*b*.
system: hexadecane–, entropy, free energy and heat of mixing in, 6070*e*.
system: methylcyclohexane–, 2474*b*.
systems: EtOH–, and MeOH–, 6023*a*.
ultrasonic velocity in, 1232*f*, 1620*e*, 8239*e*.
ultraviolet transmission by, 1653*h*.
viscosity of, 8839*e*.

*d*- and *dl*-, and *l*-, hydrochlorides and their acetates (esters), 3390*g*.
——, **7-dimethylamino-4,4-diphenyl-**, derivs., 3391*d*.
——, **2,6-dimethyl-2,6-dinitro-**, P 7952*i*.
——, **2-methyl-**, and carbanilate, 3776*d*.
——, **2-methylamino-**, 131*g*.
——, **3-methyl-6-methylamino-**, hydrochloride, cardiac action of, 9248*e*.
——, **2-nitro-**, 131*g*.
——, **2,4,6(and 2,5,6)-trimethyl-2,6-dinitro-**, P 7952*i*.
**4-Heptanol**, formation from decompn. of PrCHO, 1715*d*.
——, **2-amino-**, 131*g*.
——, **2,6-dimethyl-**, toxicology of, 4401*g*, 7140*c*.
——, **4-isobutyl-2,6-dimethyl-**, 6967*g*.
——, **4-isopropyl-2,6-dimethyl-**, 6967*g*.
——, **2-methyl-**, 1718*g*.
——, **2-methylamino-**, 131*g*.
——, **3-nitro-**, P 3438*i*.
——, **2,2,4,6-tetramethyl-**, 4213*a*.
——, **2,2,4-trimethyl-**, 4212*i*.
——, **2,4,5-trimethyl-**, 6967*f*.
**1-Heptanone, 1-cyclohexyl-**, 4637*d*.
——, **1-(2-thienyl)-**, reaction with methylisatin, 228*a*.
**2-Heptanone**, as azeotrope former in concd. of aq. solns. of HCHO, P 2221*d*
formation of, from $CrO_3$ oxidation of AmMeCHOH, 2926*a*.
Grignard reaction with, 5004*f*.
lyoparachor of, 2834*b*.
oxime, rearrangement of, 5740*e*.
phys. consts. of, 2589*h*
spectrum of, 1656*c*, 3715*g*.
trimer, manuf. of and plasticization of rubbers and polymers with, P 4507*f*
**2-Heptanone, 1-amino-**, hydrochloride, 635*a*.
——, **3-*sec*-butyl-**, and semicarbazone 1317*c*.
——, **1-chloro-**, 633*g*.
——, **3,4-dihydroxy-3-methyl-** 132*b*
——, **3,3-dimethyl-**, and semicarbazone 2162*h*.
——, **4-ethyl-**, and oxime, 131*h*
——, **3-ethyl-4-hydroxy-**, and oxime 131*i*.
——, **3-hydroxy-**, and dimer, 3791*b*.
——, **4-hydroxy-**, and oxime, 131*g*
——, **7-hydroxy-**, and derivs., 6190*f*
——, **4-hydroxy-3-methyl-**, 131*i*.
——, **3-isobutyl-**, and semicarbazone 1317*b*.
——, **6-methyl-**, formation from tetrahydrochlorophorin, 5388*c*.
——, **3-methylene-**, P 6458*c*.
——, **4,4,5,5-tetramethyl-**, and oxime 131*h*.
**3-Heptanone**, phys. consts. of, 2589*h*
prepn. of, 565*e*.
reaction with $HCO_2Et$, 643*g*.
toxicity of, 4401*g*.
——, **7-diethylamino-4,4-diphenyl-**, 9053*h*.
——, **1-(3,4-dimethoxyphenyl)-6-methyl-**, and *p*-nitrophenylhydrazone, 2185*g*.
——, **2-(3,5-dimethoxyphenyl)-5-methyl-**, 8384*d*.
——, **6-dimethylamino-4,4-diphenyl-**, addiction of monkeys to, 2321*f*.
as analgesic, 9250*h*.
analgesic effect of, compared with morphine, 5863*c*.
analgiphoric group in, 9268*b*.
cholinesterase inhibition in brain by, 1108*e*.
compds. related to, 611*d*.
*d*- and *l*-, and related compds., 7466*a*
*d*-, *dl*- and *l*-, and related compds., 3390*a*.
*d*-, *dl*- and *l*-, and salts and related compds., 2193*e*.

distribution in animal organism as detd. by $C^{14}$ labeling, 5865*i*.
effect on pyruvate and succinate oxidation by brain and effect of yeast ext. thereon, 8053*f*.
on succinic oxidase system, 3521*c*.
on uterus, 8551*g*.
fluorene analog of, 5770*b*.
hydrochloride, 8614*f*.
identification of, 4424*h*, 9366*b*.
isomers, pharmacology of, 1487*c*, 7591*a*.
ketimines related to, 3391*f*.
labeled with $C^{14}$, 9031*f*.
*l*- and *dl*-, effect on ganglionic transmission compared with morphine, 6311*b*.
*l*-, tolerance to, 6733*f*.
pharmacol. action and toxicity of, 7131*e*.
pharmacol. action of, 8537*h*.
pharmacol. action of, compared with demerol, 3519*f*.
pharmacology of, and related compds., 1869*d*, 8099*d*.
reactions of, 191*h*.
reduction of, and related compds., 3391*b*.
and related compds., 9053*i*.
review on, 1909*f*.
stereoisomers, and salts, 4244*c*.
tetrahydrofurans related to, 2201*i*.
thiobarbiturate anesthesia and, 1483*d*.
——, **6-dimethylamino-2-methyl-4,4-diphenyl-**, and nitrate, 7466*f*
——, **4,4-diphenyl-6-(1-piperidyl)-**, hydrochloride, 4244*d*.
——, **4,4-diphenyl-6-(1-pyrrolidyl)-**, hydrochloride, 4244*d*.
——, **5-ethoxy-5-methyl-**, 2576*c*.
——, **1-(4-hydroxy-3-methoxyphenyl)-6-methyl-**, 2185*g*.
——, **5-hydroxy-5-methyl-**, acetate, 2576*b*.
——, **1-(*p*-hydroxyphenyl)-6-methyl-**, and *p*-nitrophenylhydrazone, 7001*h*.
——, **5-mercapto-1-methoxy-5-methyl-**, 2163*f*.
——, **5-methyl-**, and semicarbazone, 2161*b*.
——, **6-methyl-1-methylmercapto-6-nitro-**, and 4-phenylsemicarbazone, 7433*h*.
——, **6-(4-morpholinyl)-4,4-diphenyl-**, analgesic action of, 9250*h*.
hydrochloride, 4244*d*.
salts, 3390*i*.
and salts, 9054*e*.
——, **7-(4-morpholinyl)-4,4-diphenyl-**, and hydrochloride, 9053*h*.
**Heptanone**. See *Butyrone*.
——, **3-chloro-**, 2936*g*.
——, **2,5-dimethyl-**, and semicarbazone, 1333*a*.
——, **2,6-dimethyl-**. See *Isovalerone*.
——, **1-dimethylamino-3,3-diphenyl-**, 4244*e*, 9053*f*.
hydriodide, 7467*d*.
——, **1-dimethylamino-2-methyl-3,3-diphenyl-**, and hydrochloride, 7467*b*.
——, **3,3-diphenyl-1-(1-piperidyl)-**, salts, 7467*d*.
——, **3-ethyl-4-methoxy-**, and semicarbazone, 6974*h*.
——, **3-hydroxy-3-methyl-**, and semicarbazone, 2944*f*.
——, **3-methoxy-**, and semicarbazone, 6974*g*.
——, **6-methoxy-2,2-dimethyl-3-methylene-**, 118*a*.
——, **3-methoxy-5-methyl-**, and semicarbazone, 6974*h*.
——, **5-methoxy-2-methyl-**, and semicarbazone, 6974*h*.
——, **3-methyl-**, and semicarbazone, 2161*c*.
——, **1-(4-morpholinyl)-3,3-diphenyl-**, hydrochloride, 9053*h*.
——, **3-phenyl-**, and semicarbazone, 119*d*.
——, **1,1,1-trichloro-2-hydroxy-**, 3785*c*.
——, **1,1,1-trichloro-2-hydroxy-6-methyl-**, 3785*c*.
——, **2,2,3-trimethyl-**, 1185.
**Heptasiloxane, 1,13-diethoxy-1,1,3,3,5,5,7,7,9,9,11,11,13,13-tetradecamethyl-**, P 6221*c*.
——, **hexadecamethyl-**, P 4402*f*.
compression of, 4067*f*.
**3,33-Heptatriacontadien-19-one**, reaction products with P acids, P 4877*h*.
**1,4,6-Heptatriene, 5-methyl-**, 1018*b*.
**1,4,6-Heptatrienoic acid, 5-methyl-7-(2,6,6-trimethyl-2-cyclohexen-1-yl)-**, 6989*f*.
and isomer, 2687*i*.
**1,4,6-Heptatrienyl** (*free radical*), 5732*f*, *g*.
**1,3,5-Heptatrienylamine, *N*-phenyl-7-phenylimino-**, hydrobromide, prepn. and reaction with 3-ethyl-2-methylbenzothiazolium iodide, 2617*a*.
**Heptene**, isomers, 6151*h*.
isomers, in shale-oil naphtha, 4453*h*.
isomers, polymerization with butadienes and acrylonitriles or styrenes, P 2806*e*.
from olefin polymerization, P 5640*h*.
——, **methyl-**, 1311*d*.
——, **2-methyl-**, formation in hydrogenation of isopropylcyclopentane, 5010*c*.
——, **2(3 and 4)-methyl-**, 6152*c*.
**1-Heptene**, freezing point, purification, and purity of, 2924*g*.
in paraffin cracking distillate, 8124*i*.
——, **1-chloro-**, 9024*h*.
——, **5,6-epoxy-2-ethyl-6-methyl-(?)**, 4629*a*.
——, **2,4,4,6,6-pentamethyl-**, depolymerization of, 6151*b*.
**2-Heptene, 3,5-bis(*p*-methoxyphenyl)-**, P 4700*a*.
——, **6-chloro-2,6-dimethyl-**, 5736*f*.
——, **5-chloro-5,6,6-trimethyl-**, 5736*f*.
——, **1,2-dibromo-**, 6572*b*
——, **2-(3,5-dimethoxyphenyl)-3,5-dimethyl-†**, 8384*e*.
——, **2-(3,5-dimethoxyphenyl)-3-methyl-†**, 8384*f*.
——, **2,6-dimethyl-**, elec. moment of, 4061*g*.
——, **4-ethyl-3,5-bis(*p*-methoxyphenyl)-**, P 4700*a*.
——, **3-methyl-**, elec. moment of, 4061*g*.
——, **2,4,4,6,6-pentamethyl-**, depolymerization of, 6151*c*.
——, **1,2,3-tribromo-**, 6572*e*.
**3-Heptene, 3,6-dimethyl-**, elec. moment of, 4061*g*
——, **4-ethyl-**, elec. moment of, 4061*g*.
——, **2,2,4,6,6-pentamethyl-**, 5176*f*.
depolymerization of, 6151*b*.
——, **4-phenyl-**, reaction with S, 5392*g*.
——, **2,4,6,6-tetramethyl-**, mixt. with 2-isobutyl-4,4-dimethyl-1-pentene, 4213*b*.
——, **2,4,6-trimethyl-**, 9023*g*.
elec. moment of, 4061*g*.
**5-Heptenenitrile, 2-hydroxy-2,6-dimethyl-**, 5736*c*.
——, **6-methyl-4-oxo-**, and semicarbazone, 6625*b*.
**5-Heptene-2-thiol, 2,6-dimethyl-**, 1001*a*.
**6-Heptene-2-thiol, 2,6-dimethyl-**, 1001*a*.
**2-Heptenoic acid, 2,4-dihydroxy-**, γ-lactone, and esters, 4221*h*.
——, **4-hydroxy-**, lactone, effect on microorganism growth, 7542*c*.
——, **6-methyl-4-oxo-**, 3785*d*.
——, **4-oxo-**, 3785*d*.
**5-Heptenoic acid, 2-acetamido-2-cyano-**, ethyl ester, 574*f*.
——, **2-amino-**, 574*e*.
——, **2-benzamido-**, 574*g*.
——, **2-hydroxy-2,6-dimethyl-**, and butyl ester, 5736*c*.
——, **3-(hydroxymethyl)-6-methyl-2,4-dioxo-**, γ-lactone, effect on heart, 7138*g*.
——, **6-methyl-4-oxo-**, and semicarbazone, 6625*c*.
**1-Hepten-3-ol, 1-phenyl-**, 1718*h*.
**2-Hepten-1-ol, 2,3-dibromo-**, and 3,5-dinitrobenzoate, 6572*d*.
**3-Hepten-4-ol, 2,6-dimethyl-**, acetate, P 3838*i*.
**5-Hepten-2-ol, 2,6-dimethyl-**, 5735*d*.
**6-Hepten-3-ol, 2,2-dimethyl-**, compd. with $H_3PO_4$, 5735*d*.
and esters, 5735*c*.
——, **2,2,3-trimethyl-**, and allophanate, 5735*d*.
compd. with $H_3PO_4$, 5735*d*.
**Heptenone, methyl-**, P 2222*h*, P 2632*d*.
**1-Hepten-3-one**, polymers with 2-vinylpyridine, P 5231*b*.
——, **5-chloro-5-methyl-**, 2576*a*.
——, **1-(4-hydroxy-3-methoxyphenyl)-6-methyl-**, 2185*g*.
——, **1-hydroxy-2-methyl-**, sodium deriv., 643*g*.
——, **5-hydroxy-5-methyl-**, acetate, 2576*b*.
——, **1-(*p*-hydroxyphenyl)-6-methyl-**, 7001*h*.
**1-Hepten-4-one, 6,6-dimethyl-5-methylene-**, 1185.
——, **5,5-dimethyl-7-(1-piperidyl)-**, hydrochloride, 4244*f*.

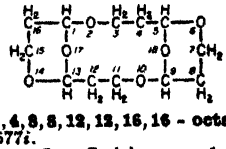
on permeability of hematoencephalic barrier to sulfonamides, 2328*c*.
folic acid prepn. contg., 355*h*.
hydrochloride, prepn. contg. vitamin B and, P 5157*b*.
infrared Christiansen filter effect in, 1657*f*.
manuf. of, P 2223*i*, 2435*h*.
nitration of, 4633*b*, P 9079*h*.
nitrolysis of, 8137*d*.
nitrolysis of, and related compds., 9072*h*, 9073*eh*, 9074*d*, 9075*a*.
phenolic resins hardened rapidly by, P 8207*i*.
prepn. of, intermediates in, 1316*e*.
reaction products with anacardic condensation products, P 904*f*.
reaction products with phenols, 5993*g*, 5994*i*.
reaction with methylenediphenols, P 4698*g*.
reaction with sulfathiazole, P 6234*c*, P 8401*a*.
silicomolybdate, decompn. of, 6893*e*.
in tobacco-black-root-rot control, 3133*d*.
as vulcanization accelerator, 8729*g*.
**Hexamethylenimine** (*hexahydroazepine*),



3400*c*.
manuf. of, P 1793*h*.
——, **1-(*p*-chlorophenethyl)-**, picrate, P 3455*g*.
salts, 3379*a*.
——, **1-ethyl-**, penicillin salt with, P 3982*b*.
——, **1-(hydroxymethyl)-2-oxo-**, polymerization of, 2176*d*.
——, **2-imino-**, and salts, 2594*d*.
——, **2-isopropyl-5-methyl-7-oxo-**, 4232*f*.
——, **1-(*p*-methoxyphenethyl)-**, and derivs., 3378*h*.
salts, P 3455*f*.
——, **1-methyl-2-oxo-**, polymerization of, 2176*d*.
——, **2-methyl-7-oxo-**, polymerization of, 2176*d*.
——, **5-methyl-2-oxo-**, 2593*i*.
——, **1-methyl-2-thioxo-**, 8735*i*.
——, **2-oxo-**, 4232*g*.
and derivs., polymerization of, 2176*c*.
hydrolysis of, P 2225*b*.
identification of, and reaction products with aryl isocyanates, 8365*g*.
optical crystallographic data for, 6105*f*.
polymerization and polycondensation of, 8736*a*.
polymers with polyamides, P 7263*i*.
regeneration from polyamide waste in textile manuf., 1571*a*.
spectrum of, 8274*g*.
textile printing with dye pastes contg. thiourea and, P 5199*f*.
——, **2-phenylimino-**, and salts, 2594*d*, 2595*f*.
——, **2-thioxo-**, 8735*i*.
polymerization of, 2176*d*.
——, **4,4,6(and 4,6,6)-trimethyl-2-oxo-**, P 3450*i*.
**Hexamethylenimine-*N*-*d*, 2-oxo-**, spectrum of, 8274*g*.
**Hexamidine**. See *Bensamidine, p,p'-(hexamethylendioxy)di-*.
**Hexamine**. See *Diphenylamine, 2,2',4,4',6,6'-hexanitro-; Hexamethylenetetramine*.
**Hexanal**. See *Caproaldehyde*.
**Hexane**, absorption by carbonaceous solids, 5653*f*.
adsorption by macromols. in binary solvent mixts., 2066*h*.
aromatization of, in azeotropic mixt. with $C_6H_6$, P 7034*h*.
azeotrope with $MeNO_2$, P 5791*a*.
benzene manuf from, 8661*d*.
as bitumen flocculant, 6817*c*.
camphor optical activity in, 8813*c*.
compds. with desoxycholic acid, 3429*d*.
crit. consts. of, 3254*h*.
decompn. by heat, rate of, 5269*d*, 6056*a*.
in density detn. of carbonized coal, 9412*e*.
dimethyl acetylenedicarboxylate addn. to HBr in, 8824*g*.
equil. with isomers, 5656*f*.
fires in, extinguishing of, 6417*g*.
flame-propagation limits for, 3618*e*.
in gasoline (Thermofor cracked), 4453*c*.
gutta-percha swelling and rubber soln. in, 8728*h*.
heat capacity of, reduced pressure and temp. in relation to, 2758*g*.
hexene-isomer extn. from, with liquid $NH_3$ solns., P 3192*c*.
inflammability limits for mixts. of $CF_3Cl_3$ or MeBr and, 3619*b*.
inflammability limits of, effect of $COCl_2$ on, 8248*i*.
inflammability of mixt. of difluorodichloromethane and, 6395*g*.
interfacial tension between $H_2O$ and solns. of lauric, palmitic and stearic acids in, 8819*f*.
ionization of, by electron impact, 6503*c*.
isomerization of, P 3833*bd*, P 4006*i*.
and its isomers, P 5182*f*.
Raman effect and, 2078*b*.
isomers, control of distn. from naphtha, P 3191*f*.
effect on isomerization of pentane, P 1560*h*, 1712*e*.
manuf. from naphtha and other hydrocarbons, P 1958*i*.
manuf. of, P 2628*h*.
mixts. with $C_6H_6$ and methylcyclopentane, alkylated benzenes and cyclohexane by isomerization and alkylation of, P 1958*d*.
lyoparachor of, 2834*a*.
magnetic susceptibility of, 2479*g*, 8767*g*.
mixts. with cetane or dodecane, activity coeffs., vapor pressures and statistical thermodynamics of, 5247*a*.
mixts. with org. vapors, adsorption by active carbons, 16*g*.
mobility of ions of, 4559*a*.
in naphtha of shale oil, 4453*f*.
nitrogen soly. in, 8803*h*.
octane value of, double-bond positions and sensitivity to $PbEt_4$ in relation to, 3997*i*.
oxidation of, 7897*b*.
oxidation of, rate of, 5269*f*.
parachor and mesochor of, 2923*f*.
in paraffin cracking distillate, 8124*h*.
purification of, for spectroscopic use, 7817*g*.
Raman spectrum and rotational isomerism of, 2866*i*.
reaction of, under hydrogenating conditions over Fischer-Tropsch Co catalyst, 7664*a*.
reaction with S to form $H_2S$, 2847*b*.
removal from cyclohexane-contg. petroleum fraction, P 5938*g*.
resonance energies of, 10*e*.
in sepn. of MeCN from $CCl_3CN$ by azeotropic distn., P 4285*e*.
soly. in Na xylenesulfonate solns., 1242*e*.
soln. or swelling in, of gutta-percha, rubber and rubber-HCl, 7730*c*.
as solvent in cottonseed oil extn., 123*h*.
sorption by activated charcoal, measurement of, 4536*d*.
sorption by porous substances, 1240*e*.
system: $AlBr_3$-$HBr$-, 1253*f*.
system: MeOH-, 6023*a*.
systems: oleic acid–palmitic acid, and predicting degree of sepn., 6839*b*
ultrasonic velocity in, 1620*e*.
vapor pressure of, temp. and, 8775*a*
viscosity of, 8839*k*.
**Hexane, 1,6-bis(4-bromo-o-toloxy)-**, 9048*i*.
——, **1,6-bis(2-chloroethoxy)-**, in pest control, P 9358*c*.

——, **2-phenyl-**, and polymer, 118*d*.
**3 - Hexen - 5 - yn - 2 - one, 6 - (1 - cyclohexen-1-yl)-**, and semicarbazone, 8361*b*.
**Hexestrol**. See *Phenol, p,p′-(1,2-diethylethylene)di-*, for dimethyl ether, see *Bibenzyl, α,α′-diethyl-4,4′-dimethoxy-*.
**Hexitol, bis(methanesulfonyl)dianhydro-***, 2940*b*.
——, **chlorobenzylideneanhydro-***, 2940*c*.
——, **dianhydro-***, 2940*b*.
——, **dichloroanhydro-***, 2940*c*.
**Hexitols**, anhydrides, partial esters of, and of their polyoxyalkylene derivs., lubricants contg., P 5938*e*.
ester ethers, for conditioning cellulose ester filaments, P 3207*e*.
photographic antistatic subbing compn. contg., P 3739*c*.
**Hexobarbital**. See *Evipal*.
**Hexobarbitone**. See *Evipal*.
**Hexogen** (*hexahydro-1,3,5-trinitro-s-triazine*), 9072*i*.
cobalt, Pb and Mn derivs., as driers, 4024*f*, 5969*i*.
decompn. by heat in dicyclohexylphthalate and TNT solns., 5187*g*.
detonating fuse coated with, P 2438*d*.
detonation of, fugacity and thermodynamic equil. consts. for products from, 407*f*.
homolog of, 9073*i*, P 9079*h*.
manuf. of, 2435*h*.
nitro N detn. in, 1568*g*.
plastic explosive from, P 7688*d*.
poisoning by, 8682*c*, 9449*d*.
prepn. and purification of, 9073*e*.
prepn of, 4633*b*, 8137*d*, 8354*c*.
sensitiveness to explosion by impact and crit. hot spot temps. of, 4856*ab*.
toxicity of, 4467*f*.
waste acid from making, AcOH recovery from, P 8682*i*.
***n*-Hexoic acid**. See *Caproic acid*.
**Hexokinase**, affinity for glucose and fructose, 8484*b*.
differentiation from galactokinase, 6283*e*.
2,4-dinitrophenol effect on, 9268*c*.
effect of alloxan and ninhydrin on, 9124*d*.
insulin effect on, 8555*d*.
phosphorylation of hexoses by brain, 7980*g*.
in sarcoma glycolysis, 7575*i*.
in tissue from diabetic and normal rats, 4369*i*.
**Hexolysis**. See *Glycolysis*.
**Hexone bases**, in glycoproteins, 7062*g*.
**Hexonic acids**, 2- and 5-keto-, detection and detn. of, and their salts and esters and unsatd. derivs., 1689*g*.
**Hexosamines**, in blood-group substances, 3479*f*.
detn. of, 6269*g*.
in sea-urchin egg jelly coat, 9271*h*.
**Hexosans**. (See also *Galactan; Mannans*.)
from lignocellulose by high-pressure hydrolysis, P 5593*a*.
in vegetable foods and their alteration during digestion, 6753*c*.
**Hexose isomerase**, in rat tissue, 6265*d*.
**Hexose phosphates** or **Hexosephosphoric acids**. (See also *Fructose phosphates; Galactose phosphates; Glucose phosphates*.)
effect on heart, 5865*d*.
effect on yeast inhibition by U, 2257*a*.
in glycolysis by neoplasms, 1857*e*.
insulin effect on action of, 6742*b*.
in metabolism of 4-dimethylaminoazobenzene by liver homogenates, 2306*g*.
in plants, effect of fertilizer on, 7622*d*.
respiration of *Escherichia coli* in presence of, permeability in, 8002*h*.
ribose conversion to, by enzyme from liver, 9123*f*.
as sucrose intermediates in photosynthesis, 6287*g*.
**Hexoses**, analysis for—see *Sugars, analysis*.
3,6-anhydro-, 7431*f*.
color reactions of, 9139*c*.
D-*xylo*-2-desoxy-, derivs., 4635*h*.
fermentation of—see *Fermentation*.
manuf. from cellulose, P 6825*h*.
mol. structure of, 2964*h*.
mucic and saccharic acids from aldo-, 6982*h*.
phosphorylation by brain hexokinase, 7980*g*.
photographic antistatic subbing compn. contg., P 3739*c*.
reaction with anthrone, 66*h*.
relation to pentoses, 5828*c*.
utilization by *Oöspora lactis*, 7541*h*.
**Hexoside, methyl 6-methyl-***, DL-, 5370*f*.
——, **methyl tetramethyl-***, DL-, 5370*f*.
**2,6,10,14,17,18 - Hexoxatricyclo[11.3.-1.1$^{5,9}$]octadecane**,

——, **4,4,8,8,12,12,16,16 - octamethyl-**, 6577*i*.
**Hexyclan**. See *Cyclohexane, 1,2,3,4,5,6-hexachloro-*.
**Hexyl alcohol**. (For derivs. see under *1-Hexanol*.)
effect on bubble rise in $H_2O$, 4082*c*.
effect on work of cutting annealed Al in paraffin oil, 2001*i*.

electrodeposition in presence of, elec. oscillations from, 2874g.
esters, surface tension of, 8779g.
flow birefringence and relaxation time of, 7284h.
mercury-electrode polarization capacity in, 6522i.
monoester of maleic acid, polyvinyl chloride compns. contg., P 2038a.
in peppermint oil, 4427g.
phys. constants of, 2956b.
Raman effect and H bond formation in, 7345g.
rare earth nitrate partition between $H_2O$ and, 8807h.
**Hexylamine**, hydrochloride, elec. conductivity in presence of dodecylammonium chloride, 1243h.
pharmacology of, 1110a.
——, **1-amyl-**, hydrochloride, (incorrectly given in abstr. as (iso-Am)$_2$NMe.HCl), 2166i.
——, *N*-[**2-(2-biphenylyloxy)ethyl**]-*N*-(**2-chloroethyl**)-, hydrochloride, antagonism of adrenaline and histamine with, 6309b.
——, **5-bromo-***N*-**isopropyl-**, hydrobromide, P 4684d.
——, **5-chloro-1,5-dimethyl-**, cardiac action of, 9248e.
——, **5-chloro-***N*,**1,5-trimethyl-**, cardiac action of, 9248e.
——, **4-chloro-***N*, *N*,**1-trimethyl-3,3-diphenyl-**, and derivs., 192b.
——, *N*, *N*-**dimethyl-**, hydrochloride, effect on nerve centers, 9260g.
——, *N*,**1-dimethyl-**, effect on heart, 7148a, 9250f.
——, **2-ethyl-**, toxicity of, 4401g.
——, **2**(and **3**)-**ethyl-***N*,**1-dimethyl-**, and hydrochlorides, 131h.
——, **2**(and **3**)-**ethyl-1-methyl-**, and hydrochlorides, 131h.
——, *N*,**1,3,3,4,4-hexamethyl-**, and hydrochloride, 131h.
——, **4-imino-***N*, *N*,**1-trimethyl-3,3-diphenyl-**, 3391h.
——, **4-imino-***N*, *N*,**2-trimethyl-3,3-diphenyl-**, 4244b, 7467a.
hydrochlorides, 3391g.
——, **1-methyl-**, effect on heart, 9250g.
identification of, 3504a.
sulfate, crystallography of, 8611f.
vasoconstrictor prepn. contg. salts of, P 4429d.
——, **1**(and **3**)-**methyl-**, pharmacology of, 1110a.
——, **1,3,3,4,4-pentamethyl-**, and hydrochloride, 131h.
——, *N*,**1,2-trimethyl-**, and hydrochloride, 131i.
***iso*-Hexylamine**. See *Isohexylamine*.
**Hexyl bromide**. See *Hexane, 1-bromo-*.
**Hexyl chloride**. See *Hexane, 1-chloro-*.
**Hexylene**. See *Hexene*.
**Hexyl ether**, phys. consts. of, 2590a.
**Hexyl fluoride**. See *Hexane, 1-fluoro-*.
***n*-Hexylic acid**. See *Caproic acid*.
**Hexyl iodide**. See *Hexane, 1-iodo-*.
**Hexyl mercaptan**. See *1-Hexanethiol*.
***tert*-Hexyl mercaptan**, for corrosion inhibition, P 7221h.
**Hexyl phosphate** ($(C_6H_{13})_3PO_4$), in mercerizing solns., P 9478b.
viscosity of, 4915g.
**Hexyl pyrophosphate**, $(C_6H_{13})_4P_2O_7$, P 9357a.
**Hexylresorcinol**. See *Resorcinol, hexyl-*.
**Hexyl selenide**, as lubricant additive, P 6820g.
**Hexyl silicate**, $(C_6H_{13})_4SiO_4$, 9028c.
**Hexyl sulfide**, phys. constants of, 2956e.
**Hexyl thiophosphate**, $(C_6H_{13}O)_3PS_2H$, in Mo detection, 7859b.
**1-Hexyne**, formation from cyclohexene, 8255b.
isomerization of, 6153h.
manuf. of, P 5788g.
reaction with HF, P 6645d.
reaction with AcSH, 7417e.
**3-chloro-**, 6968d.
**5-chloro-**, 6571g.
**6-iodo-**, 6572e.
**2-Hexyne**, mixt. with 3-hexyne, 6153i.
——, **1-bromo-**, 6572b.
**4-chloro-4-methyl-**, reaction with AgOAc, 6153c.
**3-[illegible]ne**, mixt. with 2-hexyne, 6153i.
**2,5-dibutoxy-2,5-dimethyl-**, and [illegible]ion of, 3782e.
**2,5-dimethoxy-2,5-dimethyl-**, and hydrogenation of, 3782a.
**3-Hexyne-2,5-diol**, 2161g.
——, **2,5-dimethyl-**, 1292e.
reaction with $HgCl_2$, 7413b.
**1-Hexyn-3-ol**, 6967i.
——, **1-(1-cyclohexen-1-yl)-3-methyl-**, 1337b.
——, **6-ethoxy-3-methyl-**, 1338d.
——, **3-methyl-**, 1333d.
**2-Hexyn-1-ol**, and 3,5-dinitrobenzoate, 6571f.
**3-Hexyn-1-ol**, and 3,5-dinitrobenzoate, 6571f.
**3-Hexyn-2-ol**, **5-butoxy-2,5-dimethyl-**, 3782h.
**4-Hexyn-3-ol**, **3-methyl-**, and acetate, 6153f.
**5-Hexyn-3-ol**, **6-(1-cyclohexen-1-yl)-4-methyl-**, and 1-naphthalenecarbamate, 1337b.
**Hibernation**, oxygen consumption and temp. regulation of hamsters during, 8563a.
**Hibiscetin**, 638c.
3-monoglucoside, hibiscitrin and, 1408a.
——, **hexamethyl-***, 1408b.
**Hibiscic acid**, 764Ac.
**Hibiscitrin**, constitution of, 1408a.
——, **hexamethyl-***, 1408a.
**Hibiscus**, mannihot, root ext. of, in paper manuf., 1974h, 1975ac.
oils of—see *Oils*.
**Hibiscus acid** See *Hibiscic acid*.
**Hibiscus cannabinus, Ambary** and(or) **Kenaf**, cellulose detn. in, 6411i.
pectin in rind of, 6287d.
retting of, 1570e.
**Hibiscus esculentus**. See *Okra*.
**Hibiscus rosa-sinensis**, catalase activity of petals and leaves of, 9174i.
**Hibiscus sabdariffa**. See *Roselle*.
**Hide beetle**. See *Dermestes maculatus*
**Hide powder**. (See also *Tanning materials, analysis; Tannins, analysis*.)
combination with cyclohexanesulfonyl chloride, 4039g.
drying wattle-tanned, effect on reaction with chromic salts and acids, 7731f.
prechromed readily wetted, 7731i.
valonia sorption by, 9505i.
**Hides**. (See also *Furs; Skin*.)
amino acids (basic and dicarboxylic) in, and their detn. and effect of depilation on acids, 7734d.
amino acids in goat, kangaroo, rabbit and steer, layerwise basic and dicarboxylic, 7734h.
bacteria (proteolytic) in, during leather manuf., 5617a.
bacteriology in treatment of, 7731c, 8181g.
bating agents for, from pyloric ceca of fish, 1815g.
bating of, and proteinase action on collagen in detg. bate strength, 7735g.
bating of, measuring permanence of deformation, smoothness of grain and elasticity and porosity to det. effectiveness of, 7735e.
chromium compd. bonds with albumin in, effect on final vegetable tanning, 6450f.
collagen of—see *Collagen*.
collagen quality in wet-salted normal and putrid, 6447g.
compn. and quality of, 5617c.
compns. and shrinkage temps. of, during tanning, 4040a.
curing and soaking, 1203f.
curing of, with alk. salts contg. $Na_2CO_3$, mechanism of hard, 8184g.
deamination of, effect on leather resistance to trypsin, 8183g.
defatting of, effect of electrolytes on naphthenic emulsions for, 6447i.
degreasing of, in drums for light leathers, 7736i.
degreasing pickled sheepskins, 4042b.
deliming and bating, 1203g.
effect of brines and smoking on color of stamps applied to, 8068i.
epidermis sepn. from fresh, analysis and S distribution of epidermis and unhairing of hides, 7737a.
fiber recovery from, by peptic enzymes, P 8722c.
gelatin from—see *Gelatin*.
glue from—see *Glue*.
grease and its removal from, 1203fg.
hide-beetle control on goat, 2725h.
histology of, 1203e.
leather from—see *Leather*.
liming and unhairing of, 6488h.
liming of, 1203g.
liming of, with Ca(OH)$_2$-$Na_2S$ soln. for Russian leather prepn., 6448g.
linear changes of fibers of, during tanning, 6450g.
maceration of, enzymic product from fish entrails for, P 4881i.
mildew control on, salts of halogenated-polyphenol sulfides for, P 6857d.
mold control on, nicotinium-salt compns for, P 5152c.
pickling and neutralizing, 6851c.
pickling of, with fatty acids from paraffin oxidation, 6852e.
liquors for, corrosion resistance of Inconel, Monel, Ni and stainless steels to, 9506g.
with metaphosphate, 6449b.
in phthalic anhydride, effect of pH on, 4042a.
water content reduction for chamoising by, 1592d.
preservation of, by halogenated fatty acids or their salts, P 1592g.
protein chemistry of, 1203f.
protein (globular) extn. rate and structural differences of steer, 7735c.
protein (globular) removal from steer, by NaCl solns., 4038i.
proteins of, effects of glycoldialdehydes on, 7736a.
rubber impregnation of, to prevent shedding of hairs or peeling of scales, P 6452a.
shrinkage temp. of, app. for measurement of, 9505f.
shrinkage temp. of sheep, 8720c.
shrinkage temps. of deaminated, fixed HCHO and, 4040h.
soaking of, detn. of activity of wetting agents for, 9505f.
soaking of dry-salted goat, effect of curing methods on, 7736f.
soaking of, sulfonated PhOH-HCHO condensates and inorg. polymeric acids for, P 6451i.
tanning of—see *Tanning*.
tanning pretreatment for, protein chemistry of, 6828e.
treatment of, 7733g.
treatment or processing of woolled sheep skins, 1204g, 7233c, 7692a.
unhairing, Ca(HS)$_2$, Ca thioglycolate, NaCN, NaHS and $Na_2S$ in, 6449f.
(mercaptoethyl) biguanides for, P 1799b.
urea in, 6447h.
washing and pickling, in tanning drum, 6450f.
waste, purification and bleaching of, and gelatin manuf. from, P 1593a.
water consumption in industry of, 6447h.
**Hide substance**, leather quality and, 2456h.
**Hiduminium RR59**, heating effect on hardness and structure of, 5352a.
**Hildebrand, Joel Henry**, biography, 4525f.
**Hill, Henry Barker**, biography, 915e
**Hillebrand, W. F.**, biography, 6014f.
**Hillebrand Prize**, to Smith, Edgar Reynolds, 2825g.
**Hing**. See *Asafetida*.
**Hinokitiol**, bactericidal and bacteriostatic action of, 5906b.
**Hipberries**, marmalade from *Hippophae rhamnoides* and, vitamin C in, 5510e.
vitamin C in, 3536f.
**Hippophae rhamnoides**, berries, prepn. of Fe malate from, 3143g.
vitamin C in, 5510d.
vitamin C in fruit of, factors protecting, 3887h.
vitamin C in mixts. of hipberries and, 5510e.
**Hippuramidine†**, hydrochloride, P 672i.
**Hippuric acid** (*N-benzoylglycine*), α-amino-*p*-toluenesulfonamide salt, P 686c.
-benzoic acid system, phase diagram of, 1148g.
α-carboxyphenethyl ester, activity of carboxypeptidase toward, 4712b.
detn. in urine in Quick's test, 7993d.
effect on biochem. decompn. of cellulose, 3609d.
ethyl ester, hydrogenation of, 573a.
formation from benzoic acid in liver damage, 3093a.
from glycine and $PhBz_2PO_4H$, 6996f.
by liver, effect of serine or threonine on, 7986h.
in liver, precursors in, 2188c.
from polyglycine, 8743d.
formation *in vivo*, effect of *p*-aminobenzoic acid on, 2329e.
liver-function test using—see *Liver*.
methyl ester, 1323g.
nitrogen fixation by *Azotobacter* in presence of, [illegible]

reaction with ketones, 7427*b*.
salt with piperazine, 235*e*.
urinary excretion of, in lipophile dystrophy, 3055*d*.
urinary excretion of, in schizophrenia, 2698*g*.
in urine, penicillin excretion and, 9244*e*.
**Hippuric acid, amino-**, sodium salt, loading in normal and diabetic boys, urinary flow, excretion of solutes and osmosis during diuresis of, 1858*i*.
——, ***p*-amino-**, in blood serum, effect on inulin clearance, 3090*h*.
detn. in blood and urine and clearance, 6271*i*.
effect on phosphatase activity of kidneys, 9245*g*.
effect on reabsorption and excretory maxima in renal tubules, 7102*c*.
renal tubular secretion of, effect of salyrgan on and effect of 2,3-dimercapto-1-propanol thereon, 1870*f*.
renal tubular transport of, effect of xanthine and mercurial diuretics on, 6734*a*.
renin action on clearance of, 321*c*.
sodium salt, effect on phosphate excretion in urine, 6734*i*.
——, ***α*-benzylidene-**. See *Cinnamic acid, α-benzamido-*.
——, ***N*-(carbamylmethyl)-**, 3782*a*.
——, ***α*-cyclohexyl-**, 7427*b*.
——, ***α*-cyclohexylidene-**, 7427*b*.
——, ***p*-(2,3-dihydroxyallylidene-amino)-**, and ethyl ester, P 6236*a*.
——, ***p*-hydroxy-**, formation from *p*-hydroxybenzoic acid in rabbit, 2702*e*.
**Hippurimidic acid**, ethyl ester, HCl, P 672*h*.
**Hippuronitrile**, 1403*h*.
——, ***N*-ethyl-α-phenyl-†**, 6176*d*.
——, ***N*-methyl-α-phenyl-†**, 6176*d*.
——, **α-phenyl-†**, 6176*d*.
**Histadyl**. See *Pyridine, 2-[(2 dimethylaminoethyl)-2-thenylamino]-*.
**Histaminase**. (See also *Diamine oxidase; Torantil*.) 6258*d*.
action on gastric secretion, 321*a*.
action on pulmonary edema from phosgene, 2700*a*.
in blood in anaphylactic shock, 1100*e*
in blood in pregnancy, source of, 2688*f*.
in blood plasma in pregnancy, 7109*b*.
detn. in blood plasma in pregnancy, 6689*e*.
heparin effect on, 5863*c*.
thermostability and ultrafilterability of, 5811*f*.
**Histamine** (*4(or 5)-imidazoleëthylamine*) (For derivs. see also under *Imidazole*.)
acetylhistamine formation from, 8413*b*.
-adrenaline counter-regulation, 758*h*.
adsorption of granular material by vascular epithelium and, 5854*b*.
aerosol contg. vitamin K and, lesions from, 9181*h*.
aerosols, guinea-pig resistance to, 1108*d*.
allergy and, 4756*c*.
antigen contg., synthesis, properties and effect of, 9254*e*.
in antihistamine action of blood serum, 5495*a*.
antihistamine effect, 3102*e*, 3931*i*, 5500*f*, 7131*i*.
of amino ethers, 4265*h*.
of anthisan and phenergan, 7580*e*.
of 2-(2-biphenylyloxy)-2′-chlorodiethylamine derivs., 6309*a*.
chem. constitution and, 604*i*.
of citral and *β*-ionone, 1488*g*.
of 2-[(2-dialkylaminoethyl)(2,2-dibutylhexyl)amino]pyridines, 4265*h*.
of *N*,*N*-dimethyl-*N*′-2-thiazolyl-*N*′-*p*-methoxybenzylethylenediamine hydrochloride, 8557*a*.
of diphenylmethane derivs., 7134*h*.
of *N*-(2-haloalkyl)-1-naphthylmethylamine derivs., 2319*f*.
of *N*-methyl-*N*′-(4-chlorobenzhydryl)piperazine dihydrochloride, 9252*i*.
of nicotinamide, 1863*i*.
of *N*-(α-pyridyl)-*N*-(α-thenyl)-*N*¹,*N*¹-dimethylethylenediamine hydrochloride, 2324*d*.
of quaternary derivs. of tertiary amines, 7921*d*.
of RP 3277, 3525*a*.
of sympathin, 3510*b*.
of sympathin E, 3519*c*.
time factor in quant. comparison of, 2323*h*.
of various substances on intestine, 3934*d*.
*antihistamine effect* of vitamin $B_1$, 4352*g*.
of vitamin $B_6$ on intestine, 4351*e*.
antihistamine substances—see also *Ethylamine, 2-(benzhydryloxy)-N,N-dimethyl-; Ethylenediamine, N-benzyl-N′,N′-dimethyl-N-phenyl-; Pyridine, 2-[benzyl(2-dimethylaminoethyl)amino]-*.

*N*,*N*-dimethyl-3-cyclopentylidene-3-phenylpropylamine, 8359*f*.
of α-fagarine related compds., 2320*e*.
eczema and, 5500*e*.
effect on adrenaline liberation from adrenals, 6738*g*.
effect on capillary bed, 4381*i*.
effect on chemosis of rabbit eye from mustard oil, 2315*d*
effect on hyaluronidase, 4383*c*.
effect on imbibition of striated muscle, 6318*f*.
effect on loss of adhesiveness of corneal epithelium after injection of histamine, 2700*g*.
effect on permeability of capillaries of hematoocular barrier, 1107*i*.
elimination through kidneys, 4771*f*.
ethers of amino alcs., 630*h*.
ethylenediamine derivs., 6587*a*.
evaluation of, 8424*d*.
in founders treatment, 1104*h*.
identification and differentiation of, 9366*cd*.
imidazoline and pyrimidine derivs., 7023*b*.
2-imidazoline derivs., 6619*h*, 6620*a*.
2-lepidyl substituted diamines, 8389*e*.
muscle inhibition by, 311*c*.
pharmacology of, 8558*a*.
phenothiazine derivs., 7938*f*.
piperazine derivs., 1484*g*.
potentiation of sedative action of barbiturates by, 312*i*.
pruritis and, 1486*a*.
2-pyridinemethanol ethers, 2204*d*.
10-[2-(1-pyrrolidine)ethyl]phenothiazine monohydrochloride, 759*e*.
10-[(1-pyrrolidyl)alkyl]phenothiazines, 631*d*.
respiration and, 9258*b*.
response of sensitized tracheal chains to, 1862*b*.
reviews on, 3934*c*, 7144*c*.
RP3277 effect on edema of lungs, 320*b*.
synergism with harmine on intestine, 3102*d*.
of thenyl series, 2986*h*, 8611*g*.
*antihistamine substances*, traumatic shock and, 9219*g*.
*s*-triazine derivs., 4269*g*.
and antihistamine substances, effect on chronaxia and anaphylactic shock, 7130*a*.
and antihistamine substances in allergy, 7585*g*.
antihistamine therapy, 3099*a*.
in aqueous humor during injection o histamine, 1473*f*.
as bacterial-growth stimulator, 8436*g*.
biol. action of digitoxin and, 313*i*.
in blood and tissue, 4759*d*.
in blood, asthma and, 5869*g*.
effect of atropine on, 9248*f*.
effect of local freezing on, 8484*i*.
effect of synephrine and adrenaline on, 8545*a*.
in erythremia and leukemia, 6725*b*.
in hemorrhage, 3510*a*.
in pulmonary emphysema of horses, 748*i*.
in blood plasma and lymph and its relation to histaminolytic activity of lymph, 7108*h*.
in blood plasma, correlation with blood pressure after x ray irradiation, 4308*h*.
bronchiole response to, in lung distention, 759*c*.
in celomic fluid of *Ascaris suum*, 2319*a*.
in cerebrospinal fluid, 4359*g*.
in cerebrospinal fluid of normal and mentally deranged patients, 2308*b*.
chromatography of, deposition and concn. in paper, 4183*a*.
chromatography on starch columns, 5818*f*.
combination with proteins of blood plasma, 7521*b*.
conjugated, formed in organism after his tamine ingestion, nature and origin of, 3478*d*.
cornea tolerance to, 3110*g*.
in *Cucumis melo* and tomato juice, 328*a*.
deamination by legumes, 6706*d*.
derivs., 8381*f*.
detn. in blood and tissue, 2658*b*.
detn. in presence of antihistamines, 1911*f*.
effect of, and antihistamines on permeability of capillaries of the hematoocular barrier, 3526*a*.
effect of, and related substances on cohesion of corneal epithelium, 769*b*.
effect on action potential of inferior right cardiac nerve, 4763*c*.
on adenosinetriphosphatase, 2250*e*.
on aortic pressure, 4776*a*.
on blood coagulation and its relation to stomach function, 3106*i*.
on blood in hemophilia, 5869*a*.
on blood pressure, before and after pretreatment with histamine, 9243*e*.
on blood sugar of sensitized and normal mice, 8518*g*.
on bone calcification in ducks, folliculin action and, 5471*a*.
on cholinesterase in blood serum in labor and child bed, 9201*e*.
on circulation, 4386*b*.
on collagen swelling, 4373*g*.
on collateral respiration, 1483*g*.
on conjunctiva, 756*c*.
on denervated and normal uterus, 8064*b*.
on epithelium and endothelium, 3108*e*.
on exchange between blood and aqueous humor, 1113*i*.
on gastric-mucin secretion, 8512*e*.
on heart, 1489*e*.
on hyaluronidase activity, 5119*c*.
on ileum in relation to survival time, 761*i*.
on intestines, 7128*i*, 7565*a*.
on intestines, effect of tetraethylammonium ion on, 1110*g*.
on intracranial circulation in chronic headache, 9232*g*.
on Fe in blood, 6730*g*.
on nerves and anaphylactic shock, vitamins antagonizing, 3901*b*.
on osmotic resistance of blood cells, 5121*e*.
on pulmonary circulation, 5105*a*, 9248*b*.
on stomach lining and skin, 3106*b*.
on stomach muscle, 4771*b*.
on uric acid in gastric juice, 5846*c*.
ergot alkaloids and, 3928*i*.
fixation by tissues of guinea pig and its liberation by diamine, 1108*a*.
formation in the body, histidine decarboxylase inhibition and, 8464*b*.

in gastric juice and gastric mucus of normal and ulcer subjects, 4385*e*.
gastric lesions from, effect of tagathen on, 6309*h*.
gastric secretion induced by, effect of neoantergan on, 1868*g*.
gastric secretion induced by, effect of thephorin on, 4385*i*, 4766*e*.
granulopexy of endothelium and, 3916*g*.
-heparin-thrombin chain mechanism, 296*g*.
identification of, 5904*g*.
identification of, in blood, 264*b*.
intracranial hypertension from, 765*e*.
liberation of, immunological significance of, 1482*b*.
by intestine during anaphylactic reaction, effect of antistine on, 3512*e*.
from liver of sensitized dog, 7574*h*.
from muscle by $NH_3$, 8495*f*.
by splenic nerves after stimulation, 2688*h*.
from tissue during shock from transfusion of incompatible blood, 3510*e*.
by tubocurarine and synthetic curariform drugs, 8558*i*.
linoleic acid effect on action of, 2327*h*.
in liver exts. and its effect on blood pressure, 5537*b*.
as nerve active factor, 7140*g*.
in nervous system (central) exts., 6713*g*.
in nettle plants, 8455*a*.
oxygen deficiency and, 4756*c*.
in pain production in skin, 3111*f*.
penicillin toxic action and, 4375*h*.
in placental metabolism, 8509*b*.
in plants, 3070*a*.
poisoning by, activity of antihistamine substances against, 3937*h*.
poisoning by, and ulcers from, thyroid activity in relation to, 7145*f*.
in pregnancy, 7109*b*.
pulmonary edema and, 2699*i*, 4380*e*, 7582*i*.
quaternary ions from, effect on nerves, 8502*h*.
reactions to, effect of sulfurated mineral waters on, 6731*h*.
resistance to, after pretreatment, mechanism of, 9243*h*.
reticulo-endothelial system and, 4356*i*.
review on, 2616*h*.
secretory response to, in subjects with normal and abnormal gastric mucosa, 6302*e*.
sensitivity of smooth muscles to, in pregnancy, 8504*b*.
sensitivity to, in normal and histamine-pretreated animals, 9243*f*.
shock from, antihistamines in protection against, 6722*c*.
effect of methylthiouracil on, before and after thyroidectomy, 4376*g*.
effect of vitamin C on, 2305*c*.
rutin in, 315*b*.
yohimbine and, 1107*i*.
shock development and, 9243*c*.
skin reaction to vitamin K and, 9181*f*.
-sympathin balance, 9221*d*.
thephorin effect on action of, 4764*a*.
toxic action of, effect of vitamin B complex on, 8058*h*.
toxicity for guinea pig, 4374*a*.
toxicity for rabbits, 1105*h*.
triazole analogs of, 6620*d*.
ulcer and gastric-perforation production with, 4761*a*.
uropepsin output in cats treated with, 297*g*.
uterus sensitivity to, effect of estradiol and progesterone on, 1848*f*.
vitamin $B_1$ effect on, 2290*g*.

**Histamine**, *N*-**acetyl-**†, biol. formation of, 3478*d*.
in urine, 8413*b*.

for melting-point tubes, 6470*c*.
for test tubes, etc., for weighing, 3665*e*.
**Hollanders**. See *Paper pulp*.
**Hollow articles**. (See also *Molded products*.)
of glass—see *Glass*.
lining for—see *Lining(s)*.
manuf. of cast, P 4624*e*.
molding of—see *Molding*.
molds for—see *Molds (I)*.
refinishing of, 5675*i*.
**Holmium**. (See also *Rare earth metals*.)
alpha-ray-bombarded, Tm isotopes from, 5297*b*.
isotope of mass 166, 6911*e*.
isotope of mass 166, β-decay of, 5297*c*.
radioactive isotopes of, 1647*f*.
spectrum of, persistent lines in, 5337*g*.
**Holmium, analysis**, detn., 6917*i*.
**Holmium ethyl sulfate**, spectrum of, 6917*h*.
**Holmium salts**, spectra of, 6917*h*.
**Holmium sulfate**, spectrum of, 6917*h*.
**Holocaine**. See *Phenacaine*.
**Holocellulose**, aspen, paper pulp from, 399*i*.
from beechwood, Cl effect on yield of, 6407*a*.
from *Betula papyrifera*, isolation and fractionation of, 3609*g*.
from cereal straw, 7226*h*.
color of pulp from, and bleaching thereof, 1185*a*.
from corncobs, 4009*g*.
pulp from, beating of, 8676*h*.
swelling of, lignin effect on, 6407*f*.
from wood chips or sawdust, P 9446*i*.
**Holosides**. See *Disaccharides; Glucides; Glycosides; Polysaccharides; Sugars*; etc.
**Holothuria**, carotenoid content of, 2334*a*.
**Homarine**, in liver of poison mussels, 3053*d*.
**Homarus**. See *Lobsters*.
**Homatropine**, dielec. potential and surface tension of, at different H-ion concns., 7196*bg*.
effect on adrenaline action, 4770*i*.
effect on osmotic pressure of aq. humor, 4775*a*
therapeutic action of, in ointment, soln. or emulsion, 8093*e*.
**Homeopathic preparations**. See *Pharmaceuticals*.
***D*-Homoandrostane, 3,17a-diketo-***, P 7055*c*.
———, **17a-hydroxy-3-keto-***, and 17-benzoate, P 7055*c*.

——, 1-acetyl-2-[α-(1-benzyl-3-phenyl-2 - aziridyl)benzylidene] - 1-phenyl-†, 3389*f*.
——, 1-acetyl-2-[α-(1-benzyl-3-phenyl-2 - aziridyl)benzylidene] - 1-phenyl-†, 3389*f*.
——, 1 - acetyl - 2 - α - carboxyacetonylidene - 1 - (*p* - nitrophenyl)-†, ethyl ester, 4248*a*.
——, 1 - acetyl - 2 - (o - carboxybenzylidene)-1-(*p*-[illegible]phenyl)-†, [illegible]nyl ester, 4248*a*.
——, 1-acetyl-2-cyclohexylcarbonyl-(?), 4233*b*.
——, 1-acetyl-2-(dibenzoylmethylene)-1-(*p*-nitrophenyl)-†, 4248*d*.
——, 2 - acetyl - 1 - (1 - naphthyl) - 1 - *p*-nitrobenzoyl-, 1246*d*.
——, 1 - acetyl - 2 - (5 - nitrofurfuryl-idene)-†, in dental caries inhibition, 6735*g*.
——, acridyl-. See *Acridine, hydrazino-*.
——, 1-(α-aminobenzylidene)-2-(*p*-nitrophenyl)-†, as indicator, 3747*d*.
——, 1-(γ-amino-γ-carboxybutyryl)-2-benzylidene-†, prepn. and antibacterial action of, 2674*h*.
——, 1-(γ-amino-γ-carboxybutyryl)-2-isopropylidene-†, prepn. and antibacterial action of, 2674*h*.
——, 1 - (α - amino - o - methylbenzylidene) - 2 - (*p* - nitrophenyl)-†, as indicator, 3747*d*.
——, 1-amylidene-2-(anilinoöxyamyl)-†, 6972*b*.
——, 1-amylidene-2-(3,5-dinitro-*p*-toluyl)-†, 6972*e*.
——, 1 - (anilinoöxamyl) - 2 - benzylidene-†, 6972*b*.
——, 1 - (anilinoöxamyl) - 2 - butylidene-†, 6972*b*.
——, 1-(anilinoöxamyl)-2-*sec*-butylidene-†, 6972*c*.
——, 1-(anilinoöxamyl)-2-(2-carboxyisopropylidene)-†, ethyl ester, 6972*c*.
——, 1-(anilinoöxamyl)-2-(3-carboxy-1-methylpropylidene)-†, esters, 6972*c*.
——, 1-(anilinoöxamyl)-2-cyclopentylidene-†, 6972*c*.
——, 1-(anilinoöxamyl)-2-ethylidene-†, 6972*b*.
——, 1 - (anilinoöxamyl) - 2 - furfurylidene-†, 6972*b*.
——, 1 - (anilinoöxamyl) - 2 - heptylidene-†, 6972*b*.
——, 1-(anilinoöxamyl)-2-hexylidene-†, 6972*b*.
——, 1-(anilinoöxamyl)-2-*o*(and *p*)-hydroxybenzylidene-†, 6972*b*.
——, 1 - (anilinoöxamyl) - 2 - isobutylidene-†, 6972*b*.
——, 1-(anilinoöxamyl)-2-isopropylidene-†, 6972*c*.
——, 1-(anilinoöxamyl)-2-α-methylbenzylidene-†, 6972*c*.
——, 1-(anilinoöxamyl)-2-α-methylcinnamylidene-†, 6972*c*.
——, 1-(anilinoöxamyl)-2-(1-methylheptylidene)-†, 6972*c*.
——, 1-(anilinoöxamyl)-2-octylidene-†, 6972*b*.
——, 1 - (anilinoöxamyl) - 2 - propylidene-†, 6972*b*.
——, 1-anisylidene-2-cyclohexylcarbonyl-†, 4233*c*.
——, 1-(α-benzamido-β-isopropylidenehydrazinohydrocinnamoyl) - 2-isopropylidene-†, 4669*d*.
——, 1-benzhydrylidene-2-(3,5-dinitro-*p*-toluyl)-†, 6972*f*.
——, 1-benzhydrylidene-2-(4-nitromesitylenoyl)-†, 6972*i*.
——, 1 - benzhydrylidene - 2 - (3 - nitro-*p*-toluyl)-†, 6973*c*.
——, benzothiazolyl-. See *Benzothiazole, hydrazino-*.
——, benzoyl-. See "hydrazide" under *Benzoic acid*.
——, 1-benzoyl-2-cyclohexylcarbonyl-(?), 4233*b*.
——, 1 - benzoyl - 2 - ethylidene - 1 - *p*-tolyl-†, 1344*a*.
——, 1-benzylidene-2-(δ-bromo-α-cyanovaleryl)-†, 4223*a*.
——, 1-benzylidene-2-[*N*-caproyl-β,β-bis(ethylmercapto)alanyl]-†, 2990*d*.
——, 1-benzylidene-2-(*N*-caproyl-β,β-diethoxyalanyl)-†, 2990*b*.
——, 1-benzylidene-2-(γ-carboxy-γ-carboxyaminobutyryl)-†, *N*-benzyl ester, 6978*i*.
——, 1-benzylidene-2-(1-carboxyisopropyl)-†, reaction with NaOH, 1027*a*.
——, 1 - benzylidene - 2 - (α - cyanobutyryl)-†, 4223*a*.
——, 1 - benzylidene - 2 - (α - cyanoenanthyl)-†, 4223*a*.
——, 1 - benzylidene - 2 - (2 - cyano - 2-indanylcarbonyl)-†, 4223*a*.
——, 1-benzylidene-2-(α-cyano-γ-phenoxybutyryl)-†, 4223*a*.
——, 1-benzylidene-2-(cyanophenylacetyl)-†, 4223*a*.
——, 1 - benzylidene - 2 - (α - cyanopropionyl)-†, 4223*a*.
——, 1 - benzylidene - 2 - cyclohexylcarbonyl-†, 4233*b*.
——, 1 - benzylidene - 2 - (3,5 - dinitro-*p*-toluyl)-†, 6972*e*.
——, 1 - benzylidene - 2 - *m* - iodobenzoyl-†, 6973*f*.
——, 1-benzylidene-2-[1(and 2)-naphthyloxamyl]-†, 6973*h*.
——, 2-benzylidene-1-*m*(*o* and *p*)-nitrobenzoyl-1-phenyl-†, 1345*c*.
——, 1-benzylidene-2-(4-nitromesitylenoyl)-†, 6972*i*.
——, 1 - benzylidene - 2 - (3 - nitro - *p*-toluyl)-†, 6973*b*.
——, 1,2 - bis(2 - anthraquinonylcarbonyl)-, amino and nitro derivs., ring closure of, P 4484*a*.
——, 1,2-bis(5-chloro-*o*-phenetyl)-, 4150*g*.
——, 1,2-bis(cyclohexylcarbonyl)-(?), 4233*a*.
——, 1,2-bis(2-hydroxyethyl)-†, reaction with glycidol or stearic acid, textile assistants by, P 2796*c*.
——, 1,2-bis(1-nitro-2-anthraquinonylcarbonyl)-, (omitted from abstr.), P 4484*a*
——, 1,2-bis(4,4',5,6-tetramethoxy-2-biphenylylcarbonyl)-, 190*e*.
——, 1 - (*p* - bromo - α - methylbenzylidene) - 2 - (3,5 - dinitro - *p*-toluyl)-†, 6972*e*.
——, 1 - (*p* - bromo - α - methylbenzylidene) - 2 - *m* - iodobenzoyl-†, 6973*f*.
——, 1 - (*p* - bromo - α - methylbenzylidene) - 2 - (4 - nitromesitylenoyl)-†, 6972*i*.
——, 1 - (*p* - bromo - α - methylbenzylidene) - 2 - (3 - nitro - *p* - toluyl)-†, 6973*c*.
——, 1 - (*p* - bromophenyl) - 2 - (1-nitropropylidene)-, 4646*i*.
——, 1-(2-butenylidene)-2-cyclohexylcarbonyl-†, 4233*b*.
——, 1-butylidene-2-(3,5-dinitro-*p*-toluyl)-†, 6972*e*.
——, 1-*sec*-butylidene-2-(3,5-dinitro-*p*-toluyl)-†, 6972*e*.
——, 1-butylidene-2-*m*-iodobenzoyl-†, 6973*e*.
——, 1 - *sec* - butylidene - 2 - *m* - iodobenzoyl-†, 6973*f*.
——, 1-butylidene-2-[1(and 2)-naphthyloxamyl]-†, 6973*i*.
——, 1-*sec*-butylidene-2-[1(and 2)-naphthyloxamyl]-†, 6973*i*.
——, 1-butylidene-2-(4-nitromesitylenoyl)-†, 6972*h*.
——, 1 - *sec* - butylidene - 2 - (4 - nitromesitylenoyl)-†, 6972*h*.

reaction of, fatty acids and $H_2SO_5$, 9027bg.

reaction with naphthyl and phenanthryl ketones, 4663*h*.
**Hydrazomethane.** See *Hydrazine, 1,2-dimethyl-*.
**Hydrazones.** (*Individual hydrazones are indexed in lightface type under the names of the corresponding aldehydes and ketones.*)
*N*-alkyl- and *N*,*N*-dialkyl-, 6592*f*.
*p*-carboxyphenyl-, of hydroxy aldehydes and ketones, 5764*e*.
as catalysts in polymerization of olefins, P 8666*h*.
as catalysts in reaction of $C_2H_4$ with carboxylic acids, P 670*f*.
decompn. of, 122*e*.
(dichlorophenyl)-, dichloroindole derivs. from, 622*b*.
2,4 - dinitrophenyl-, chromatographic sepn. of, 1289*i*.
phenyl-, cleavage by Br, mechanism of, 4247*h*.
decompn. of, 1026*h*.
deformation of electronic orbits of N in, 7340*g*.
as softeners for Buna S, 2014*g*.
rearrangement of, 5769*e*.
**Hydrazonium(I),** the term, 8927*i*.
**Hydrazonium(II),** the term, 8927*i*.
**Hydrides.** (See also *Alkali metal hydrides; Alkaline earth hydrides.*)
formation of, thermodynamics of, 1638*b*.
manuf. of, 2342*f*.
reviews on, 959*b*, 3780*c*.
in titanium-halide purification, P 3158*c*.
**Hydrindan.** See *Indan, hexahydro-*.
**Hydrindanol.** See *Indanol, hexahydro-*.
**1-Hydrindanone.** See *1-Indanone, hexahydro-*.
**Hydrindantin*,** 7012*e*.
**Hydrindene.** See *Indan*.
***a*-Hydrindone.** See *1-Indanone*.
**Hydriodic acid.** (See also *Hydrogen halides.*)
in alkylnaphthalene synthesis, 2606*e*.
bond moment of, 5240*i*.
compression of single crystals of, 2063*c*.
detn. in I-iodide solns., 6112*a*.
iodopyrrole reduction with, rates of, 2850*a*.
phase transitions in, 4136*i*.
reaction with fulminic acid, 6983*c*.
reciprocal action of $HIO_3$ and, 8095*i*.
**Hydrion.** See *Hydrogen ion*.
**Hydroabietyl alcohol*,** acrylate, P 7754*i*.
**Hydroanisoin.** See *Hydrobenzoin, 4,4'-dimethoxy-*.
**Hydroaromatic compounds.** (See also *Cycloalkanes.*)
dehydrogenation of, kinetics of, 1731*e*, 1732*a*.
prepn. of, 6202*a*.
**Hydrobenzoin** (*1,2 - diphenyl - 1,2 - ethanediol*), acetyl peroxide decompn. in, 3776*b*.
dibenzoate, 612*i*.
isomers, 2570*f*.
*meso*-, reduction of, to bibenzyl, 191*f*.
prepn. of, 2570*f*.
——, **5,5'-dibromo-2,2'-dihydroxy-,** *dl*- and *meso*-, 4246*e*.
——, **α,α'-diethyl-4,4'-dihydroxy-,** P 7510*e*.
4,4'-diacetate, isomers, P 5804*h*, P 7968*i*, P 6237*e*.
——, **α,α'-diethyl-4,4'-dihydroxy-2,2'-diisopropyl - 5,5' - dimethyl-,** 4,4'-diacetate, 614*a*.
——, **α,α'-diethyl-4,4'-dihydroxy-5,5'-diisopropyl - 2,2' - dimethyl-,** 4,4'-diacetate, 613*i*.
——, **α,α'-diethyl-4,4'-dihydroxy-2,2',-5,5' - tetramethyl-,** 4,4' - diacetate, 613*i*.
**2,2' - dihydroxy - α,α',4,4' - tetramethyl-, α-** and **β-,** 8370*g*.
—, **4,4'-dimethoxy-,** 7927*g*.
—, **4,4' - dimethoxy - α,α',2,2'**(and **α,α',3,3')-tetramethyl-,** 8370*i*.
—, **α,α'-diphenyl-.** See *Benzopinacol*.
—, **α-ethynyl-,** 1754*c*.
**,α',2,2' - tetraethyl - 3,3' - dimethoxy-,** 197*f*.
**Hydroboranes.** See *Boron hydrides*.
**Hydrobromic acid.** (See also *Hydrogen halides.*)
bond moment of, 5240*i*.
as catalyst in isomerization of olefins, P 3604*i*.
in oxidation of alicyclic hydrocarbons, P 5423*b*.
in oxidation of aromatic hydrocarbons, P 5422*a*.
*as catalyst* in oxidation of hydrocarbons, P 669*a*, P 2219*c*.
in oxidation of olefins, P 5409*h*.
catalyst with $AlBr_3$, kinetics of polymerization of propene on, 2496*h*.
complex with $NiBr_2$ and $Bu_3P$, as catalyst for trimerization of $C_2H_2$ and its derivs., 6202*f*.
exchange with Br, effect of neutron capture on, 2078*a*.
hydration of, activity and, 7302*b*.
oxidation by chromic acid in presence of $MnSO_4$, kinetics of, 1634*e*.
oxidation of, kinetics of, 7800*d*.
paraldehyde depolymerization in, 7801*f*.
phase transitions in, 4136*i*.
polarization of iridized and platinized Pt in, 2522*a*.
as promoter for $CoBr_2$ or $CoCl_2$ catalyst in polymerization of rosin, P 1996*g*.
reaction (addn.) with $MeO_2CC{:}CCO_2Me$, spatial orientation and, 8824*f*.
reaction (addn.) with fluoro olefins, 7407*b*.
reaction products with high-mol. polyunsatd compds., P 2804*d*.
reaction with *tert* butyl peroxide, 3345*e*.
with cyclopropyl mesityl ketone, 3390*b*.
with 1,2(1,3 and 1,6)-dibromonaphthalene in presence of $FeCl_3$, 2852*a*.
with fulminic acid, 6983*c*.
with mannitol and sorbitol hexaacetates, 7425*a*.
with unsatd. compds. in $SO_2$, P 3024*a*.
removal from Br derivs. of *dl*- and *meso*-4,4' - (1,2 - diethylethylene)dicyclohexanone, 6187*d*.
from Br derivs. of 3-keto steroids, 4282*c*.
from 7-bromo steroid esters derived from cholesterol esters, P 5428*d*.
from bromo terpenes, 6600*i*.
from 2,6-dibromocyclohexanone with $C_5H_5N$, 7912*c*.
from halogenated hydrocarbon solvents, P 5940*h*.
from 1,2,4,5-tetrabromo-5-methyl-3-hexanone, 2164*a*.
system: $AlBr_3$-paraffins-, 1253*e*.
system: $B_2H_6$-, 5247*b*.
**Hydrocaffeic acid, α-amino-** See *Alanine, β-(3,4-dihydroxyphenyl)-*.
**Hydrocarbon oils.** (See also *Absorption oils; Fuels; Gasoline; Kogasin; Lubricants; Olefins; Paraffin oils; Paraffins; Petroleum; Petroleum refining; Quenching oils; Solvents; Tar oils; Transformer oils;* and "oils" under *Insulators, electric.*)
as activator for coal, P 8651*a*.
adsorption and bleaching properties of montmorillonite clays on, 977*c*.
aerosols of, 7290*a*.
analysis of, for double bonds, OH groups and branchings in C chains, 1173*f*.
for groups, double-bond position and substituents, 6398*i*.
Raman effect in, 4456*b*.
thermal diffusion in, 8123*c*.
aniline point of, detn. of—see *Aniline point*.
antioxidants for, from bacterial action, P 3193*d*.
antioxidants for, polyalkylbenzyl phenols, P 4457*f*.
aromatization of, aluminosilicate catalysts in, 3998*g*.
aromatization of Fischer-Tropsch, with hydrogenation-dehydrogenation catalysts, P 1955*f*.
from benzaldehyde reaction with metals, 4238*i*.
catalytic treatment and gasification of, by $H_3PO_4$-kieselguhr catalyst, P 3605*a*.
from Chile (Mantantiales) oil distn., d. and yield of, 3995*h*.
from coal, 2307*c*.
coating glass fibers with, P 3987*c*.
coking of, P 1052*b*.
colors and purity of, 6935*a*.
combustion (partial) of, in peak-load gas manuf., 3171*f*.
conversion of, $NH_4$ ion-activated Mg silicate catalyst for, P 7224*e*.
with catalysts evolving const. amt. of heat during continuous regeneration, P 8664*b*.
with fluidized catalysts, P 387*e*, P 9429*d*.
heating vapors with heat carriers in, P 8665*a*.
*conversion of,* heat transfer by granular solids coated with fuels in, P 388*h*.
and pelleted $Al_2O_3$-$SiO_2$ catalysts therefor, P 843*i*.
in presence of fluidized coke, and temp. maintenance by burning coke in reactor, P 8663*h*.
$SiO_2$-gel beads for, P 4004*c*.
in vapor phase, measuring rate of flow of powd. catalyst in, P 9429*a*.
in vapor phase with regeneration of powd. catalysts, 844*b*, P 6403*i*.
conversion or distn. of, with heat-carrying gas and powd. catalyst in zones of different ds., P 9420*f*.
conversion or refining of, $Al_2O_3$-$SiO_2$ catalysts for, P 8664*h*.
copper corrosion by S in, prevention by *tert*-butyl hydroperoxide, P 5582*f*.
corrosion and discoloration prevention in pipe lines by sodamide inhibitor and $Na_2SO_3$, P 6402*i*.
corrosion-inhibiting action of polar-type agents in, 1954*b*.
corrosion-preventing and foam-reducing compds. for, P 665*g*.
corrosion-preventing compds. for, P 666*e*.
cracking and reforming of, P 843*e*.
cracking and reforming of, app. for, P 9428*b*.
cracking of, P 5938*h*.
$Al_2O_3$-$SiO_2$ catalyst for, P 5181*a*, P 5583*b*.
as atomized emulsions, P 3187*h*.
clay catalysts activated by mineral acids for, P 4004*f*, P 6403*g*, P 8662*i*.
compression of powd. catalysts in, app. for, P 6403*f*.
cyclic process for, P 386*f*.
drying hydrogel catalysts for, P 1558*f*.
to high- and low-olefin gasolines, P 4003*i*.
increasing gasoline-producing efficiency of catalysts in, P 8665*d*.
kiln for regenerating granular catalysts from, P 8129*i*.
mercaptan removal from vapors from, P 1174*e*.
metal sulfide catalysts for, P 844*e*.
preventing loss of fluidized catalyst in exit gases, and preventing bumping and afterburning in regenerating catalysts in, P 8665*g*.
$SiO_2$-$Al_2O_3$-$SiO_2$-MgO mixed catalyst for, P 3188*h*.
silica-oxide gel catalysts for, P 3604*c*, P 7162*e*.
in 2-stage process to satd. aviation gasoline, P 386*i*.
in vapor phase on coke in steam, olefins by, P 8129*f*.
in vapor phase to gasoline with Th phosphate catalyst, P 9428*g*.
in vapor phase with fluidized catalysts, P 1956*a*.
from cracking of distn. oil from rubber, 5619*i*.
cracking of, regenerating catalyst and refining lower-boiling fuel with regenerated catalyst, P 9429*a*.
decolorization of, regeneration of Mg silicate adsorbents from, P 5134*h*.
dehydrogenation of, in vapor phase with mixed oxide catalysts in 100-octane-fuel manuf., P 5181*b*.
density and viscosity of, 8700*i*.
deterioration and oxidation inhibitors for, P- or S-contg. compds. and esters of wax - substituted hydroxyaromatic compds., P 1561*i*.
detn. in fatty oils, 9489*c*, 5974*a*.
in paraffin waxes, 1954*b*, 4399*c*.
in waxy oils, 4032*c*.
distn. app. for, feeding app. for, P 6403*d*.
distn. from $C_4H_{10}$, P 2423*b*.
for drilling fluids, P 8128*i*.
drops on asbestos, contact angles of vacuum, 17*g*.
duplex films of, rate of evapn. of water through, 6884*f*.
effect on plasticity of stored rubber, 7737*i*.
effect on tumor formation of alimentary tract after feeding carcinogenic hydrocarbons, 8046*d*.
emulsification of, sulfonic acids for, P 3966*b*.
emulsification of, with peat alk. ext., cleaning compn. by, P 3220*h*.
emulsions of, 2072*b*.

from ethyl alc., colorless satd., P 1955*e*.
extn. with furfural, 3602*h*.
fat acids in manuf. of, P 4835*a*.
fire fighting in, 6417*e*.
foaming tendency of, polymers of chlorofluorinated org. compds. for reducing, P 846*c*.
fog of, app. for manuf. of, P 450*g*.
galvanophoresis with, P 4963*f*.
for gas enrichment or thermal cracking, 8657*a*.
gas oil, chlorination, in synthesis of lubricants, 1952*i*.
by coking petroleum heavy residuum oils and tars, 9425*i*.
cracking in fluidized-bed pilot unit, statistics in, 8217*a*.
cracking in gas phase and distn., textile industry chemicals by, 1172*h*.
cracking of fluid-catalytic cycle, 7218*e*.
cracking to $C_2H_4$, P 8663*d*.
cracking with $Al_2O_3$-$SiO_2$ gel catalyst, P 389*g*.
by distn. of cracked residuum distillate, P 4003*h*.
heat of cracking and regeneration in catalytic cracking of, 3180*d*.
reforming of, 6393*e*.
resinous products from, P 4008*h*.
from wool-grease distn., 2449*d*.
gelled by soaps, fats in preventing oil sepn. in solidified, P 1960*f*.
halogenated foots, reaction with sulfides or $S_2Cl_2$, antioxidants and corrosion inhibitors for lubricants by, P 5184*i*.
in hydrofluoric acid storage, P 6373*i*.
hydroforming of, $Al_2O_3$-$MoO_3$ catalysts for, P 4004*g*, P 8579*f*.
catalyst reactivation in, P 9397*a*.
to naphthalenes, P 7676*f*.
hydrogenation (destructive) of, with $MoO_2.2HCl$, P 9431*a*.
by hydrogenation of CO, P 4835*g*.
by hydrogenation of CO, pressure effect on yield of, 2399*a*.
interface with water, adsorption at, 921*d*.
from laundry waste liquids by distn., 2420*e*.
in *Lecanium* control on blueberries, 1524*h*.
lubricant (aviation) manuf. from low-grade, 5580*i*.
1-methylnaphthalene recovery from green, P 6404*d*.
mixts. with coumarone or coumarone-indene resins in reclaiming rubbers, P 5626*i*.
mixts. with creosote, detn. of sludging properties of, 2731*e*.
nitrobenzene detn. in, 4837*i*.
nitrogen (basic) detn. in, 2891*b*.
oiliness of, effect of additives on, 1555*d*.
oxidation of heavy alkylate, with per compds., P 5584*c*.
for paving or roads, asphalt detn. in, 7207*b*, 7659*h*.
from peat, thermal cond. of, 8653*g*.
in pest control, 8597*b*.
petroleumlike, in Tkvibulsk coal deposits, 8122*g*.
plasticizers and tackifiers for elastomers from coumarone-indene resin and aromatic, P 896*g*.
as plasticizers (covulcanizable) in rubber, 1208*f*, 6455*i*.
plasticizers from biphenyl bibenzyl compd.-contg. aromatic, for rubbers, P 896*e*.
polishing compns. from ratfish-liver oil and, P 8714*c*.
by polymerization of olefin gases with $H_3PO_4$-diatomite-$H_3BO_3$ catalysts, P 3190*f*.
by polymerization of olefins and condensation of olefin polymers with aromatic hydrocarbons, P 3190*f*.
by polymerization of olefins with vinyl aromatic compds., P 8130*d*.
pour-point depressants for, $C_2H_5$-phenol condensation products, P 6821*d*.
prepn. of, 2418*i*.
by pyrolysis of bituminous limestones, S- and thiophene-rich, 4841*g*, 8126*f*, 8127*b*.
reaction with Cl and $SO_2$, app. for effecting, P 3726*e*.
recovery from waste liquor from soda washing of petroleum, P 5938*hi*.
refining, with $C_4H_6SO_2$ mixts., chlorex- mixts. and liquid $SO_2$,
formation of $H_2S$, S and thiols during, 8938*a*.
refining, regenerating active earths from, P 4844*d*.
regenerating bauxite from, P 5180*i*.
with $H_2SO_4$, P 4842*i*.
with $SO_2$, 7220*d*, 7674*g*.
removal from worsted piecegoods, 7692*d*.
removal of halogen and S from, in vapor phase with active C complexes, P 390*c*.
review on, 4788*e*, 4789*a*.
rubber (ebonite) proofing against swelling in, 431*g*, 8729*h*.
from rubber pyrolysis, 5169*c*, 5619*h*.
in *Sclerotinia laxa* control on apricots, 7179*g*.
sepn. of constituents of, with $NH_3$-contg. solvents, P 3191*i*, P 3192*bcde*.
sepn. of naphthenic and paraffinic hydrocarbons of, P 7678*a*.
skin cleaners and protective creams for workmen exposed to, 3543*d*.
sludge inhibitors for, ethers of hydrogenated cardanol as, 8129*d*.
soap (Ca) dispersion in, flow properties of, 8710*c*.
solubilities of, and wax removal from, 8126*c*.
sprays contg.—see *Sprays*.
stripping of, in hydrogenation of coal, 5171*f*.
styrene-polymer plastic compn. with viscous ext. of, P 2467*b*.
styrene recovery from, or concn. in, by azeotropic distn. with glycol ethers or ether esters, P 5582*g*.
sulfonate (alk. earth petroleum) solns. in, gelling prevention in, P 1959*h*.
sulfuration of, with aniline-deriv. catalysts, P 1178*b*.
sulfur dioxide removal from $H_2SO_4$-treated aromatic, P 8668*a*.
sulfuric acid treatment of, sulfonic acid extn. from sludge from, P 9434*b*.
sulfur removal from, 7220*h*.
sweetening, diglycolic acid esters for break induction in, P 843*d*.
systems: metallic soaps–, 9424*g*.
for textile treatment, org. polyphosphate-contg., P 4845*a*.
thiol extn. from, P 2423*e*, P 4844*a*.
oxidation of thiols and sulfides to disulfides and S in regenerating alkali solns. used in, P 7223*gh*, P 8604*d*.
regenerating alkali from, P 5182*h*.
thiol recovery from alk. solns. from, P 1557*h*.
with two caustic solns. and regeneration of alkalies, P 8667*g*.
in tomato-disease control, 9339*a*.
vapor-liquid equil. consts. for, 8658*a*.
vapor pressure of, temp. and, 3179*e*.
as vinyl chloride polymer filler and plasticizer, P 2817*i*.
as vinyl compd. plasticizer extender, P 1218*a*.
vinyl halide polymer plasticizers and fillers of air-blown exts. of, P 4895*a*, P 5998*e*.
vinyl halide polymers plasticized with S-treated ext. of fractions of, P 5998*h*.
viscosity of, and of polyisobutylene solns. in, 6891*f*, 8241*d*.
viscosity-temp. characteristics of homologous series of, 3601*h*.
wax sepn. from, by liquid-liquid countercurrent extn., and deoiling of wax, 4840*i*.
in weed control in carrots and related crops, 1895*e*, 9352*a*.
white, sepn. and detn. in petroleum, 4044*h*.
wood preservatives contg., sludge control in, 2731*h*.
as wood preservatives, properties and, 2731*c*.

**Hydrocarbon residues.** See *Radicals*.

**Hydrocarbons.** (See also *Fuels; Kogasin; Olefins; Paraffins; Petroleum; Petroleum refining; Solvents;* etc.)
absorption and fractionation of, 385*d*, 4001*i*.
absorption from natural gas, 7220*f*.
acetone detn. in, 4183*h*.
acetone recovery from, P 3023*a*.
in acetonitrile azeotropic distn. from $CCl_3CN$, P 4285*e*.
from acetylene, 5376*abc*, P 7959*f*.
acetylene manuf. from, P 5174*i*, P 7670*h*.
acetylenic—see also *Acetylene compounds;* and "derivs." under *Acetylene*.
acetylenic, condensation with alkyl phenols for pour-point depressants, P 6821*e*.

analysis of petroleum, mass spectrometer in, 7673*a*.
analysis (structural) of petroleum, 8653*i*.
aniline point and miscibility with furfural of $C_{12}$ aromatic, 3602*g*.
antiknock characteristics of, and their relations to mol. structure, $PbEt_4$ susceptibility, etc., 1554*h*.
antiknock characteristics of gaseous, 382*i*.
antiknock tendency and fragmentation by electrons, 6503*d*.
antioxidants for, metal salts as promoters for, P 386*e*.
aromatic, 5389*i*.
by dehydrogenation of gasoline hydrocarbons, P 5039*h*.
effect of substituents and hetero atoms on chem. properties of, 5019*f*.
by electrolysis of salt of aromatic carboxylic acid, P 6926*h*.
manuf. of mixts. of, P 5708*h*.
nonbenzenoid, 3796*c*.
by oxidation of $CH_4$, P 7959*g*.
prepn. of, 6185*d*.
prepn. of $C_{10}$ monocyclic, 7438*g*.
production at Volta Redonda, 6582*g*.
aromatic and unsatd., by dehydrogenation of hydrocarbon oils and hydrogenation of unsaturates in 100-octane fuel manuf., P 5181*c*.
aromatization of—see *Aromatisation; Ring closure*.
aryl aliphatic, and halogenated derivs., as insecticides, P 5529*d*.
as azeotrope formers in concn. of aq. solns. of HCHO, P 2221*d*.
azeotropes of, and halogenated derivs., 2835*a*, 5247*c*.
azeotropes of, with ethers, 2835*c*.
homofunctional, 4063*d*.
with toluene, 7916*d*.
azeotropic distn. of, P 7*e*, P 3435*e*, P 7274*h*.
azeotropic distn. of pure, from naphtha, P 1958*ac*.
bacteria oxidizing, in lakes, 8437*b*.
benzene removal from, P 3844*g*.
bond energies of, 452*f*, 2052*g*, 6016*b*.
bond orders in unsatd., 6512*c*.
books: Encyclopedia of, Compds. Vol. VI. $C_nH_{2n}$, 1432*a*; Khimiia nefti, 3185*b*.
brominated, P 6644*h*.
brominated or chlorinated $C_2$-$C_8$, antiknock mixts. with Pb compds. for addn. to gasoline, P 8667*f*.
brominated, reaction with NaI, rate of, 4628*e*.
butadiene detn. in isobutene-contg. gaseous, 6399*c*.
butadiene extn. from other $C_4$, P 1793*b*, P 3023*e*.
butadiene recovery from mixts. of, P 2217*d*.
from butane effluent, dehydration of HCl-contg., P 4007*f*.
calcn. of aromatic, in petroleum fractions, 8653*f*.
calcn. of free energy and heat of formation of, 5658*d*.
carbon-black manuf. from gaseous, P 5574*f*, P 5930*a*.
carbon disulfide recovery from, P 6797*b*, P 7041*d*.
carcinogenic—see *Carcinogenic substances*.
catalyst centrifugation from, P 914*e*.
catalysts for treatment of, P 4004*f*.
catalytic treatment of, app. for stripping contaminated catalysts in, P 388*i*, P 2764*c*.
with arylsulfonic acid-As catalyst soln., P 2636*e*.
HF and HF-$BF_3$ mixed catalysts for, P 844*c*.
in vapor phase, app. for, P 7676*h*.
chlorinated—see also *Alkyl chlorides; Carbon chlorides*.
chlorinated, chlorinolysis and pyrolysis of unsatd., 4231*h*.
condensation products with anacardic material, P 904*d*.
as cumulative poisons, 8087*c*.
dehydrochlorination of, P 3023*b*, 7407*ch*, 7408*c*.
detection and detn. in air and organs, 973*i*.
effect on urease, 5060*h*.
in grasshopper control, 6353*e*.
in horn-fly control, 3135*g*, 5805*g*.
in milk from cattle sprayed for horn flies, 6355*f*.
mixts. with resins, explosive thickening by, P 2437*d*.
neutralization of decompn. products of, P 2714*h*.
residual toxicity of insecticidal, 5146*h*, 6354*g*.
in sheep-tick control, 8598*i*.
soil toxicity from, 9328*h*.
toxicity to thrips on cotton, 1143*e*.
chlorinated, dehydrochlorination of, and distn. of resulting compds., P 7759*h*.
chlorination of, P 1437*b*, 5361*b*, P 7950*h*.
chlorination (photochem.) of, P 6641*e*, P 7497*a*
chlorination (photochem.) of, app. for, P 2518*b*.
chlorine reaction with primary, secondary and tertiary H atoms in, rates of, 5270*c*.
chlorofluoro derivs., P 2217*i*, P 4284*g*
catalysts for treatment with HF, P 9300*f*.
polymers of, as foam depressants, P 846*c*.
chromatography of, transport factors and developer in elution methods of adsorptive percolation in, 7868*d*.
cineole azeotropic distn. from, with phenols, P 2476*g*.
from coal carbonization, P 9421*a*.
color and chem. constitution of, 942*c*.
color and electronic structure of conjugated, contg. a triple bond, 4569*i*.
combustion of, 3724*e*.
effect of light on, 7825*e*.
formation and decompn. of $H_2O_2$ in slow, 3696*h*.
knocking characteristics and, 5576*e*.
complexes with halloysite and montmorillonite, 463*e*
complex with Al halides, Al halide recovery from, P 4005*f*.
compds. of asym. aromatic, with polynitro diphenic acids, 1388*h*.
compression and freezing under pressure, 4067*g*.
condensation of acyclic unsatd., with rosin with $BF_3$ catalyst and esterification of condensate, P 9486*a*.
condensation of aralkyl, with ketones, P 2036*h*.
condensation of aromatic, or their amino of hydroxy derivs., with nitriles, lubricant antioxidants and pour-point depressants by, P 2424*b*.
condensation of polynuclear, with olefin polymers with $AlCl_3$ catalysts to oils, P 3190*g*.
condensation of vapors of, to furnish heat for polymerization of olefins, P 8666*d*.
conversion and refining of, regeneration of adsorbents from, P 2422*be*.
conversion of acidic or phenolic components in gaseous, to ketones and hydrocarbons, P 5573*g*.
conversion of, app. for, P 2422*ab*, P 2763*i*.
app. for effecting contact of catalysts in cyclic, P 843*h*.
app. with stationary catalyst bed for heat exchange in, P 7760*h*, P 8130*a*.
catalysts for, from activated $Al_2O_3$ impregnated with metal compds., P 5181*c*.
in closed cycle with powd. catalysts, app. for, P 388*e*, P 1174*f*.
elevator for catalyst in, P 9429*c*.
in fluid state with particle-form and normal-sized sepd. catalysts, P 387*i*.
with F-contg. catalysts, prevention of siliceous deposits in, P 1558*h*.
with fused $Al_2O_3$ pellets, P 387*g*.
halide-catalyst removal from effluent in, P 7222*h*.
*conversion of*, heat-treatment of catalysts for, P 7608*i*.
Fe removal from clay catalysts for, P 4843*b*.
with molten metallic halides contg. $AlBr_3$ or $AlCl_3$ catalysts, P 4843*c*.
porous-glass catalysts for, P 7162*b*.
regeneration of fluid catalysts in, prevention of after-burning in, P 1956*cd*.
$SiO_2$-gel catalysts for, P 3604*a*.
stripping carbonaceous matter and recovering hydrocarbons from used fluid catalysts in, P 388*c*.
stripping gases or vapors from fluidized catalysts in, app. for, P 7677*d*.
with sublimed $AlCl_3$ catalysts, P 1174*e*.
temp. control in, P 6819*c*.
vaporization in recovering products from continuous, P 3604*d*.
in vapor phase and regeneration of catalysts, P 4457*i*, P 4843*e*.
in vapor phase with fluidized catalysts, P 389*d*, P 1956*a*.
in vapor phase with regeneration of catalyst, app. for, P 4457*i*, P 7222*e*.
in vapor phase, $ZnAl_2O_4$ catalyst for, P 7222*g*.
conversion or cracking of hydrocarbon gases at high temps. with refractory powders to unsatd., P 8603*e*.
corrosion of Airal Mg 104, Al, Cu, Pb and Zn by, and effect of water thereon, 8128*d*.
cracking of, P 1049*g*.
on $Al_2O_3$ catalysts, 1250*d*.
C black manuf. by, 2407*c*.
catalyst chambers for, P 843*g*.
catalyst regenerator for, P 3604*d*.
with hertzian waves, P 2518*b*.
for peak-load gas-generating application, 6814*b*.
regeneration of catalysts from, P 2764*c*, P 6012*a*.
Na amt., detn. and effect on $Al_2O_3$-$SiO_2$ catalysts in, 2414*h*.
in vapor phase, app. for catalytic, P 3187*i*, P 3188*a*.
in vapor phase, app. for stripping fluid catalyst in, P 6403*h*.
in vapor phase passed alternately through heating and free zones at controlled velocities, P 9427*f*.
in vapor phase to aviation gasoline and $C_4$ fractions, P 8663*c*.
$ZrO_2$-gel catalyst for, P 5134*a*.
cracking or dehydrogenation of, app. for catalytic, P 6873*g*.
cyclic—see also *Cycloalkanes; Cycloölefins; Hydroaromatic compounds; Naphthenes*.
cyclization of—see *Aromatisation; Ring closure*.
cyclohexane distn from, P 4460*h*.
decompn. by heat of mixts. of heavy and $C_3$-$C_4$, in vapor phase with active clay to antiknock oils, P 3605*e*.
decompn. (catalytic and pyrolytic) of, 7759*c*.
decompn. of gaseous, by heating by adiabatic compression, 6022*f*.
decompn. products of, blocking of platinized C catalysts by, 7802*a*.
dehydrogenation and disproportionation on activated C, 5656*h*.
dehydrogenation, hydrogenation and reforming of, $Al_2O_3$-$MoO_3$-$TiO_2$ catalysts for, P 1561*d*.
dehydrogenation (intermol.) of alkyl derivs. of aromatic, P 1440*b*.
dehydrogenation of, P 5039*g*.
with $Al_2O_3$-BeO, P 6404*c*.
catalysts for, P 1538*h*, P 3162*a*, P 4791*g*, P 6763*b*, 9290*f*.
in gas phase, prevention of secondary reactions in, P 3191*d*.
in presence of gaseous diluent, P 4682*e*.
regenerating S-contg. oxide catalysts from, P 3188*i*.
by selective oxidation, 7898*a*.
stripping catalyst used in, with $CO_2$, P 9078*e*.
dehydrogenation of alkaryl or alkyl, P 5788*e*.
dehydrogenation of $C_3$-$C_8$, P 5080*e*.
density, refraction and structure of homologous, 6028*e*.
density of, relation to viscosity, 8775*i*.
destruction of chlorinated and low-boiling, on clothing, leather, etc., P 4022*h*.

detn. and effect of aromatic, on viscosity index of lubricating oils, 2419*ce*.
detn. in air, 4972*d*.
in cadavers, 3316*e*.
in deep-well strata, app. for, P 1954*i*.
in gas mixts., 5930*g*.
in $C_3H_8$ and $C_4H_{10}$, 6813*f*.
in subterranean air, etc., app. for, P 8759*a*.
detn. in coal gas and detn. of C density of unsatd., 8971*a*.
detn. of acetylenic, alkyl acetylenic and $CH_4$, in gases of petroleum industry, 8962*c*.
detn. of aliphatic and cyclic, in lubricating oils, 2417*e*.
detn. of aliphatic, in solvent naphtha, 4489*h*.
detn. of aromatic, in aromatized shale-oil gasoline, 5931*c*.
in petroleum products, 3179*d*.
in Puertollano-shale gasoline, 5577*c*.
detn. of $C_4$, $C_5$ and higher, in recycle styrene, 7216*e*.
detn. of classes of, in benzine, 2415*b*.
detn. of cyclic, in liquid $SO_2$ ext. of Baicoi lubricants, 8659*d*.
detn. of types of, in gasoline, 2413*gi*, 3998*d*.
deuteriated, mass spectroscopy of, 4096*c*.
1-diazo derivs. of higher, in Arndt-Eistert synthesis, 4652*g*.
dielec. loss in, 6018*i*.
in Diesel-fuels, increasing inflammability by removal of aromatic, 5569*d*.
dissocn. of gaseous, by elec. glow discharge, P 3994*e*.
dissocn. reactions of, in *o*-dichlorobenzene, 5387*f*, 6496*c*.
distn. (azeotropic and extractive) of, from petroleum fractions, tar, etc., P 3187*a*.
distn. (azeotropic, extractive and fractional) in sepn. of $C_5$, P 2824*a*.
distn., deoxygenation and conversion of, from hydrogenation of CO to anti-knock fuels, P 2421*g*.
distn., extn. and azeotropic and extractive distn. in sepn. of, 7758*h*.
distn., extn. and sepn. of unsatd., inhibiting corrosiveness and polymerization of 2-furaldehyde in, P 9430*i*.
distn. for analysis and purification, 3178*h*.
distn. of alkylated aromatic, contg. neutral org. sulfates in presence of anhyd. solid basic compd., P 3187*d*.
distn. of aromatic, from petroleum hydrocarbons and of butadiene from cracked hydrocarbons, P 4524*i*.
distn. of light, to precise fractions, 2414*a*.
in Douglas-fir-lignin-residue ext., 1182*f*.
effect of aromatic, on furnace black-reinforced rubbers, 1208*d*.
effect of aromatic, on urease, 4310*h*.
effect on acetate rayon, 2777*f*.
effect on knocking characteristics of gasolines, 7674*a*.
as elec.-condenser stabilizers, 7837*f*.
elec. moments of unsatd., 7279*f*.
electron-cloud distribution and reactivity of, 6905*h*.
electronic structure of conjugated, and their hetero derivs., 5302*i*.
electronic structure of derivs. of aromatic, 7809*f*.
electron residual affinity of conjugated and resonating, 6512*b*.
emulsification app. for, P 3588*c*.
entropy and heat of formation of vapor of, 6069*b*.
ethylene recovery from gaseous, P 6403*b*.
evapn. losses from petroleum, calcn. of, 2759*i*.
explosive vapor mixt. formation and equation for flash points of mixts. of, 5187*f*.
extn. of aromatic, from hydrocarbon mixts., P 3844*i*, P 8669*e*, P 8670*b*.
from more satd. hydrocarbons with liquid-$NH_3$ solns., P 3192*e*.
from petroleum distillates, light stabilizers by, P 398*i*.
with $SO_2$, 2761*c*, 7674*h*.
extn. of phenolic and S impurities from, P 7949*g*.
extn. (selective) of, P 5409*g*, 7758*i*.
extractive distn. with furfural, foam prevention in, P 914*b*.
flames (cool) of, periodic reactions in, [illegible].
flames (flat) of gaseous, 8645*i*.
flames of, thermodynamics of, 1231*g*.
flash points of mixts. of chlorinated and petroleum, 7160*g*.
fluorescence of aromatic, with condensed rings, 7829*a*.
fluoride recovery from, P 1159*g*.
fluorinated—see also *Fluorocarbons*.
fluorinated, P 3834*e*, P 6645*d*, P 7035*e*.
as dispersing agents in polymerization of isobutene and its mixts. with diolefins, 2019*f*.
in lubricants, P 5183*h*.
removal of F impurities from, P 6218*d*.
spectra of, 1656*g*.
unsatd., P 2218*e*.
fluorination of, 2157*a*.
fluorine compd. and HF removal from, P 661*a*, P 2764*e*.
fluorine compd. (org.) removal from, P 1557*g*, P 6643*c*.
fluorocarbon sepn. from, P 7035*d*.
force consts. and interaction consts. in unsatd., 6512*f*.
forces between mols of, 3677*e*.
formation of, in cyclooctatetraene prepn., 6201*c*.
from diene synthesis with tetraphenyl cyclopentadienones, 2585*d*.
in geol. formations, 2409*e*.
in reaction of MeCl with Si, 1716*e*
fragmentation by electron impact, 5280*g*.
friction at m.p. and reaction with metals of satd., in lubrication tests, 2417*g*.
friction (interfacial) of, chem. constitution and, 2060*a*.
of gas and oil condensate reservoirs, analysis and mol. compn of, 7672*e*
by gasification of solid fuels, P 6397*c*.
from gasoline (Thermofor) $C_5$ fraction, 4453*b*.
gas partition between water and liquid, 7297*f*.
for gas turbine fuels, 7662*g*.
gelation inhibition of acrylonitrile vinylidene chloride polymer solns in 2-butanone by aromatic or chlorinated, P 7755*h*
geodes contg. liquids, in limestone of Aniche, 2903*e*.
glycosylation of, P 7507*cd*
Grignard reaction in prepn of, 3773*g*.
Grignard reagent reaction with 1,4-dibromo-2-butenes in prepg. unsatd., 2579*b*.
gum and peroxide formation and improving gum stability of, 8656*a*
haloalkyl aromatic, reaction products with halomethane derivs., for lubricant improvement, P 5586*a*.
haloalkylation of aromatic, with $Al_2O_3$-$SiO_2$ gel or coconut charcoal catalyst, P 5583*e*.
halogenated, 9353*a*
aliphatic, as vulcanizing agents for butadiene elastomers, P 8196*e*.
amination of, P 3440*i*.
app. for collecting, 6869*e*.
condensation products with aromatic compds., lubricant additives by solvent refining of, P 2424*b*.
condensation with polyalkylated benzenes, lubricating oils by, P 1176*c*.
detection in air, 974*e*, 4602*c*.
effect on bacteria and yeast, 3885*d*.
flame quenching in exhaust gases by, 1984*c*.
fluorination of aliphatic, P 2628*e*.
heat capacities of, 30*a*.
H halide removal from, P 2216*e*, P 5424*a*.
insecticides contg., 9331*g*.
mixts. with N heterocycles for insulating and dielec. purposes, P 2217*e*.
nutritional factors affecting toxicity of, 733*h*.
paraffin-wax soly. in aromatic, 8126*d*.
prevention of H halide formation in elec. insulators contg., P 4402*c*.
reaction with CO, P 6650*f*.
reaction with Si alloys, P 4685*ac*.
reaction with Si, catalyst for, P 5517*b*.
rotenone sprays contg., P 9357*b*.
stabilization of, P 4682*e*, P 5887*g*.
halogenated and unsatd., polarography of, 8916*f*.
halogenation of aromatic, P 5799*a*.
halogenation of unsatd., 109*h*, P 1433*d*, P 3436*h*.
halogen compd. (org.) and HF removal from, P 4006*cd*.
health hazards of, and of halogen derivs., 787*f*.
heat capacities and contents of vapors of, chem. constitution and, 6068*i*.
heat-capacity-correlation factor for, 8775*e*.
heat capacity ratio of vapors of, 6068*h*.
heat contents of light, 6903*f*.
heat of dissocn. into free radicals, 1230*g*.
heats of vaporization of, calcn. of, 2758*g*.
heat-treatment of, P 4908*a*, P 6010*i*.
herbicidal properties of petroleum, 1895*c*.
high-mol.-wt. unsatd., by oxidation of paraffins, P 1433*a*.
hydrofluoric acid removal from alkylated, P 4002*c*.
hydrogenation and mol. structure of, 3775*c*.
by hydrogenation and polymerization of CO and $C_2H_4$, 108*a*, 4829*f*.
hydrogenation of aromatic, in liquid paraffins, P 6819*i*.
by hydrogenation of $CO_2$, P 4447*ac*, 4448*fi*.
of CO, P 839*c*, P 1170*i*, P 1171*b*, P 1551*h*, 2397*ehi*, 2398*bdeghi*, 2399*ace*, P 3175*bdf*, P 4446*g*, P 1836*h*, P 5573*bd*, 5574*a*, P 6810*hi*, P 6811*b*, P 7213*ac*, P 8120*gi*, P 8121*a*, 9416*c*, P 9420*f*.
of CO and formation from $Fe_2C$ there in, 1636*b*.
of CO, catalysts for making, P 827*a*, P 1448*e*, P 5928*b*, P 6397*a*, P 9419*i*.
of CO, heat control in making, P 4908*c*.
of CO, heat transfer in app. for synthesis of, 2313*a*.
of CO, FeO catalysts in manuf. of, P 6762*h*.
of CO, mechanism of formation of, 2081*a*, 6003*i*, 9415*h*.
of CO, regeneration of catalysts from, P 9420*bdh*.
of CO with Ni-$ThO_2$-kieselguhr catalyst, 3167*gh*.
of coal, 2404*f*, 8641*ac*
of thiol esters, P 3445*c*.
by hydrogenation of CO, and recovery of oxygenated compds. from products, P 8650*h*.
by hydrogenation of CO and synthesis gas manuf from hydrocarbons, P 7253*a*.
by hydrogenation of CO and their conversion, P 4447*h*
hydrogenation of, in vapor phase with Group VI metal or sulfide catalyst to high-octane fuels, P 4843*i*
hydrogenation of monocyclic aromatics, Co as catalyst in, 6172*c*.
hydrogenation of pentamethylenic, 6560*e*
hydrogenation (partial) of aromatic, P 7510*g*.
hydrogenation (selective) of, and detn. of aromatic hydrocarbons, 7673*g*
identification and detn. of aliphatic, and their halogen derivs., crit. mixing temps. of aniline, benzyl alc., in cresyl phosphate and HCOOH as, 8309*a*.
identification in gasolines from Dutch East Indies, 8124*bc*.
identification in organosilicon compds. and polymers, 3317*d*.
identification of groups of, 3743*e*, 6308*i*
ignition and oxidation of, in gas-oil range and their mixts., 7209*i*.
ignition pressure and temp. relations of 7209*e*.
ignition temps. of, 5658*b*.
as insecticides, 9329*e*.
ions (neg.) of, 8848*a*.
isomerization of, 3343*g*, 3371*g*, P 3833*e*, P 5174*e*, 6153*h*.
isomerization of $C_4$, regeneration of $AlCl_3$ catalyst from, P 3733*e*.
isomerization of, with HCl-activated $AlCl_3$ catalyst and $AlCl_3$-contg. charcoal bed, P 844*e*.
isoprene sepn. from, by extractive distn., P 3453*c*.
from ketones, P 7496*g*.
Lebedev's, 5621*g*.
liquid, by explosion of gaseous hydrocarbons with elec. discharge, P 9429*i*.
in lubricating oils, 1172*g*, 6400*h*.
lubricating properties of solid, 8799*i*.
magnesium-dust sepn. from, electrophoretic separator for, P 7*h*.
magnetooptic rotation and refractive dispersion of, 4911*a*.
magnetooptic rotation of, 8838*h*.
manuf. of, evolution of org. chem. industry in relation to, 2155*f*.
manuf. of pure, from naphtha and other hydrocarbons, P 1958*i*.
mass spectra of, doubly charged ion spectra in, 8259*b*.
mass spectra of, metastable transitions in, 8896*h*.

mass spectrometer in identification and detn. of gaseous, 4971*h*.
mast cell (skin) reaction to aromatic, 3109*d*.
metal colloids in, 4926*a*.
methanol purification by azeotropic distn. with aromatic, P 7274*i*.
methylated, mol. diagrams of, 5733*e*.
methylation of aromatic, P 679*h*, P 1058*h*.
from methyl ether, P 3435*f*.
methyl group removal from, in prepn. of branched-chain paraffins, P 1049*f*.
2-methylpropene distn. from, foaming prevention in, P 5582*g*.
mixts. with A and He, starting potential of discharge in Geiger-Müller tube contg., 1646*b*.
mixts. with H, thermal diffusion in, 7281*d*.
mol. structure, sensitivity and PbEt$_4$ response of, engine knock and, 839*h*.
mol. structures of petroleum, effect on cracking, octane ratings and petroleum products, 7217*c*.
as Newtonian liquids, 842*e*.
nitration of, P 1561*g*, 3352*e*, 5012*h*.
nitration of satd., and their derivs., 4216*c*, 6584*d*.
nitro, as catalysts in polymerization of olefins, P 8666*h*.
reaction with aldehydes, P 3438*h*.
as solvents for crystn. of anhyd. crystal violet, P 3206*b*.
nomenclature of cis and trans isomers of, contg. olefin double bonds, 107*c*, 4909*d*.
nomenclature of, history of, 2923*g*, 7405*g*
olefin recovery from, P 385*i*, P 386*b*, P 1432*h*, P 1557*i*, P 1955*gh*, P 2216*f*, P 7275*a*.
olefin removal from aromatic, P 1558*c*, P 2421*e*.
of olive and teaseed oils, 1582*g*.
optically active, effect of $H_2SO_4$ on, 1247*g*.
optical rotation of, 4680*e*.
oxidation (aut-) of, 2196*f*.
oxidation (aut-) of, in gasoline deterioration, prevention by amine or phenolic antioxidants and metal deactivators, 5932*b*.
oxidation (explosive) of satd., 7896*i*.
oxidation of, P 1433*b*, 1711*c*, P 2236*f*, 7798*ef*, P 7949*h*.
with air, catalysis of, 5133*e*.
by bacteria, enzyme mechanism of, 6281*h*.
deactivators for Cu catalysts in, 6063*d*.
in fat-product prepn., 7241*d*.
fractional sepn. of fatty acids from mixts. obtained by, P 884*h*.
HBr as catalyst in controlled, P 669*a*.
initiated by atomic H, 1309*c*.
kinetics of, 927*d*, 6565*h*.
at low temp., 7807*b*.
with N compd.-activated HBr catalysts, P 2219*c*.
soap manuf. from products from, 3218*c*.
in $H_2SO_4$, 5275*b*.
oxidation of cyclic, and lubricant additives from oxidation products, P 1959*b*.
oxidation of natural-gas, chemical manuf. by, 8643*e*.
oxidation of polycyclic aromatic, 4211*i*, 9060*g*.
oxidation (partial) of alicyclic, and their halo derivs., P 5422*b*.
oxidation (partial) of alkyl derivs. of aromatic, P 5421*g*.
oxidation (partial) of aromatic, or their derivs., P 5421*i*.
oxygenated and sulfonated, mixts. with sulfonated beeswax, leather and textile processing agents from, P 1989*i*.
oxygenated org. compd. sepn. from, P 6643*b*, P 7213*f*.
oxygen detn. in gaseous, 3314*g*.
in ozocerite mines, toxicity of, 9297*h*.
from ozocerite production and treatment, effect on nervous system, 9297*g*.
in paraffin-cracking distillate, 8124*e*.
Perbunan swelling by aromatic, in safety fuel, 2801*g*.
in petroleum as indication of catalytic action, 5929*h*.
petroleum as source of pure, 3603*c*.
in petroleum of Ponca field, Okla., 9422*f*.
petroleum (Ponca-) 177–200°-fraction aromatic, 5176*c*.
piperylene sepn. from, P 3023*g*.
polar constituent adsorption by silica gel from solns. of, 1951*h*.
polar derivs. of, evapn. of monolayers of, 7767*d*.
polycyclic, 5389*d*.
polycyclic aromatic, 2610*d*.
polycyclic, in tar oils from fir stumps, 3182*f*.
polymerization of, alkyd-resin manuf. from catalysts from, P 5997*c*.
polymerization of monoalkenyl-aromatic, with drying oils and divinylbenzene, P 5608*a*.
by polymerization of olefins with TiO$_2$-contg. silica catalysts, P 2764*d*.
polymerization of unsatd., resinous products by, P 903*ab*, P 5630*g*.
polymers of, C blacks coated with, 1196*f*.
compns. with cyclic diolefin polymers, P 8742*i*.
decolorization of, P 3233*g*.
pyrolysis of, and mass spectrometry and mol. wt. detn. of fractions, 7742*e*.
polymers of unsatd.—see also *Rubber, substitute and synthetic*.
polymers of unsatd., mixts. with resinous products, P 5228*h*.
prepn. of, 2156*g*, 3357*c*, 6151*c*.
purification of aromatic, P 1802*f*, P 5798*i*.
purification of petroleum, with aluminate catalyst, P 3191*a*.
pyrolysis of cracked residual, P 9428*f*.
pyrolysis of satd., 7895*hi*.
Raman spectra and rotational isomerism of, 2866*g*.
Raman spectra of aromatic, 8888*h*.
reaction of alkylated aromatic, with aliphatic carboxylic acids, P 7967*f*.
reaction of aromatic, with acid chlorides in presence of $HgCl_2$, 183*b*.
with ales. in presence of $AlCl_3$, 5759*g*.
with alkenyl nitriles in Friedel Crafts reaction, P 7968*d*.
with allylamines, P 3455*i*.
with $NH_3$ to give nitriles, P 3439*be*.
with ethylene oxide, 2182*d*.
with I, 7824*h*.
with mixed anhydrides of silicic and org. acids, 1742*i*.
with oxalyl chloride, 2603*b*.
with phthalic anhydride in presence of $HgCl_2$, 183*g*.
with 1-substituted 1-desoxy sugars in presence of $AlCl_3$, P 3448*a*.
with $\alpha,\beta$-unsatd. ketones in presence of $AlCl_3$, 5761*i*.
reaction of $C_4$, with S, P 1066*g*.
reaction of $C_3$ and $C_4$, with S, P 1067*a*
reaction of polycyclic, with maleic anhydride, 2190*c*.
reactions (catalyzed gas-phase) of aromatic, 2197*a*, 3377*b*.
reactions of, app. for effecting catalytic, P 2048*c*.
catalysts for, P 6013*e*.
equil. in, 8246*h*.
under hydrogenating conditions over Fischer-Tropsch Co catalyst, 7663*i*.
labile mols. in kinetics of, 5269*c*.
reactions of unsatd., with acrylonitrile, 7411*d*
with $NH_3$ and air in HCN manuf., P 9396*h*.
with $H_2NCOCl$, 6183*c*.
with $H_2S$, S and thiols, 5932*c*
with HF in formation of polyolefins, P 5788*h*.
with hydroxyl (free radical), kinetics of, 8820*g*.
with methylene (free radical), 5732*i*.
with O and $PCl_3$, 8366*b*.
with S, 2847*b*, P 7201*i*
reactivities of, toward styrene radical, 5731*g*.
recovery and analysis of gaseous, adsorbed in geochem. prospecting for petroleum, P 385*i*.
recovery of aromatic, by adsorption, P 386*d*.
recovery of aromatic, from liquid hydrocarbons, P 4002*g*.
recovery of aromatic unsatd., from satd. aromatic hydrocarbon mixt., P 5929*c*.
recovery of, from bituminous sandstones, hot-water process in, 381*f*.
from oil shale, P 4457*b*.
from petroleum-refinery acid sludge, P 5183*a*.
from petroleum tarry cracked residues, P 389*b*.
from phytosterols from sulfate soap, P 9447*g*.
*recovery of*, in sulfuration of hydrocarbons, P 4792*i*.
recovery of gaseous, at Arkansas City refinery, 9428*e*.
recovery of liquefiable, from high-pressure distillate or condensate well fluids, P 8662*g*.
recovery of liquid, from natural gas at Silsbee, Tex., 7220*g*.
reduction potentials of, on dropping-Hg electrode, 5328*d*.
reforming mixts. of, Co, Cu or Ni complex catalysts for, P 9430*a*.
resonance energies in radicals of, dissocn. energies of C bonds and, 6479*c*.
resonance energy of polycyclic aromatic, 8221*c*.
from rosin catalytic and thermal treatments, P 4873*e*.
rubber cracked low-distillate aromatic, 5983*i*.
from rubber pyrolysis at high pressure, 5169*d*.
rubber swelling in, 4554*b*.
sampling and measuring gaseous, app. for, 8749*i*.
sepn. and identification of petroleum, 2409*i*.
sepn. for testing, identification of groups and plasticization of rubber with petroleum, 4044*g*.
sepn. of aromatic, by selective adsorption on silica gel, P 679*a*.
sepn. of, by adsorption, 2839*i*, P 6011*f*.
sepn. of gaseous, P 379*h*.
sepn. of gaseous, by expansion, liquefaction and fractionation, P 3176*f*.
sepn. of straight-chain from branched, by diffusion through synthetic-rubber diaphragm, P 7223*c*.
sepn. of unsatd., P 2763*d*.
sepn. of unsatd., from oils from pyrolysis of bituminous limestones, 4841*g*.
shale-oil-naphtha aromatic, 4453*g*.
silicon tetrafluoride removal from alkylated, P 4006*b*.
soly. of, 1241*g*.
solubilization by soaps, 7780*g*, 9491*i*.
solubilization of, and chlorinated derivs. with Na alkyl secondary sulfates, 465*i*.
sound velocity in, chem. constitution and, 6879*a*.
sources (future) of aromatic, 4637*i*.
spectra of, and detn. in gasoline and mixts. with ketones, 3715*f*.
spectra of aromatic, 4569*g*.
spectra of cata-condensed, 7818*e*, 7819*a*.
spectra of cyclic, 8890*a*.
in spindle-oil-fractions, identification, phys. properties and lubricating value of aromatic, 4001*g*.
standards for, 4399*c*, 4786*i*.
strained, properties of, 4059*i*.
structure of aromatic, condensation principle of, 1359*h*.
sulfochlorination of, P 5033*c*.
sulfochlorination of, in detergent manuf., 3636*c*.
sulfonated, manuf. of, and cleaning compns. from satd. hydrocarbons, oxalic acid and, P 3640*b*.
sulfonation of alkylated aromatic, P 394*f*, P 685*a*.
sulfonation of aromatic, in acetonitrile solns., P 394*c*.
sulfuration of, P 4792*gh*.
sulfur detn. in aromatic, lamp method for, 1685*f*.
sulfur extn. with aromatic, P 2382*b*.
sulfur (free) detn. in aromatic, 1685*d*.
sulfur removal from aromatic, HF in, P 4295*i*.
as suppository bases, 3563*f*.
synthesis-gas manuf. from gaseous, P 4836*b*.
synthesis of, control of particle size of Fe catalysts in, P 3832*i*.
in elec. arc, P 4589*a*.
in fluidized beds, heat removal in, P 6478*c*.
fluidized catalyst in, 9414*g*.
at high pressure, 3170*g*.
systems: Al soap–, effect of additives on, and metathesis of, 3633*i*.
systems: hexadecane–, countercurrent extn. with aniline, 4840*i*.
systems: metallic soaps–, thixotropy of, 2002*f*.
systems of, 3274*ac*, 6052*i*, 6498*e*.
above atm. pressure, vapor-liquid equil. of, 8775*b*.
with Chlorex, 4937*g*.
at low temps., x-ray study of, 2410*g*.
terpenic—see *Terpenes*.

tertiary hydrocarbon sepn. from non-tertiary, P 7223*d*.
theory of nonbenzenoid, 5650*i*.
thermochemistry of aromatic, 8654*i*.
thermodynamics in processing of, 2758*f*, 5576*ac*, 7215*i*, 7216*b*, 8653*h*.
thermodynamics in processing of, and Joule-Thomson coeffs. of pure and mixed hydrocarbons, 3178*h*.
thiol extn. from, regeneration of aq. alk. soln. used in, P 1793*i*.
thiophene removal from aromatic, P 3605*c*.
tubercle-bacillus metabolism and, 9141*c*.
in tufa of Casale, 2552*f*.
ultrasonic velocity in, 7782*i*, 8780*e*.
vaporization of mixts. of, 2758*g*.
vapor pressure at crit. point, 4063*c*.
vapor pressure data on aliphatic, 3255*c*.
vapor pressure of petroleum, temp. and, 3179*e*.
viscosities of mixts. of, 8777*h*.
viscosity of solns. of polynuclear aromatic, 1629*g*.
viscosity-temp. characteristics and relative viscosity-temp. no. of, 3602*c*.
volumetric behavior of solns. of gaseous, 4531*c*.
water detn. in gaseous, 8119*i*.
water dew point in, detn. of, 6398*f*, 9422*h*.
in wood preservation, 3962*a*.
xylene sepn. from, by azeotropic distn., P 3454*b*, P 4007*b*.

**Hydrocardiolipin***, sodium deriv., 1321*i*.

**Hydrocardol**, and dimethyl ether*, 1348*f*.

**Hydrocellulose**, detection of, 2777*c*.
volatile matter from distn. of, 1976*d*.

**Hydrocephalus**, folic acid and vitamin A in incidence of, 1471*a*.

**Hydrochalcone**. See *Propiophenone, β-phenyl-*.

**Hydrochloric acid**. (See also *Aqua regia; Hydrogen halides*.)
absorption by water and detn. in air, 8971*d*.
absorption by water, rate of, 3270*e*.
acetic acid sepn. from, 8948*i*.
activity coeffs. of, 6049*b*.
adsorbed, titration of, 6883*c*.
adsorption by charcoal, 8796*h*.
by charcoal, effect of O on, 2840*e*.
by mica, 462*h*.
in air, max. allowable concn. of, 4401*a*.
anhyd. liquid, P 3983*e*.
azeotrope, water-activity correlation in, 2058*g*.
azeotrope with $B_2H_6$ and systems: $BCl_3$–, and $BCl_3$–$B_2H_6$–, 5247*b*.
bond moment of, 5240*i*.
buffer systems with $Na_4P_2O_7$, 6895*i*.
casein heat of wetting by, effect of HCHO on, 7787*c*.
as catalyst in acetal formation from butyl vinyl ether and phenols, 3783*e*.
in acylation of olefins, P 2634*d*.
in condensation of coconut fatty acid anilide with *N*-methylol chloroacetamide Na sulfonate, P 886*h*.
in condensation of 2-furaldehyde with phenols, 5225*bceh*.
in ether formation from acetals, P 1050*a*.
in HCHO reaction with PhOH, 5223*h*, 8737*df*.
in isomerization of olefins, P 3604*i*.
catalyst of $AlCl_3$ and, in isomerization of pentane, 1712*d*.
catalyst of $AlCl_3$ and, in reactions of alkanes, effect of H on, 1712*h*.
catalyst of CuCl and, in partial hydration of myrcene, P 6219*g*.
catalysts of $NH_4Cl$, $Cu_2Cl_2$ and, in vinylacetylene manuf., 3225*d*.
cell, $H_2$|HCl|AgCl|Ag, and soly. of AgCl in HCl, 6061*h*.
cement resistant to, 5132*i*.
for cleaning heating coils, 4905*e*.
compds. with $NH_3$, 8807*g*.
copper anodic behavior in, 7792*f*.
copper(I) chloride soly. in solns. of,
corrosion by, of alloys, 2151*b*.
of Al, prevention of, 4622*d*.
of Al, products of, 7309*i*.
of boiler steel, 1305*h*.
of Cu, 550*a*.
of Cu and Ni foils, 8327*f*.
in petroleum refineries Monel in prevention of, 8128*c*.
of steel, wetting agents and, 986*c*.
dehydration of, and sepn. from gases of Deacon process, P 4525*a*.
detn. of, in electroplating baths, 961*g*.
in mixts. with $SO_2$, 8970*c*.
detn. of, with NaOH and elec. oscillator, 8944*a*.
diffusion through glass diaphragms, 8773*g*.
through polyvinylbutyral resin contg. $SiO_2$, 6490*a*.
through porous membranes, 7778*f*.
dropping-Hg electrode in, polarization of, 2875*d*.
dropping-Hg electrode in, tube formation on, 48*g*.
effect on activation of C from rice husks, 4834*f*.
on antioxidant power of gasoline, 2414*g*.
on bentonite, 7607*f*.
on bile flow, 304*i*.
on color of $Co(NO_3)_2$ solns. in EtOH, 4970*g*.
on $CuCl_2$ solns., 3278*c*.
on cornea, 771*c*.
on decarboxylation of isoquinaldinic acid in quinoline, 7310*d*.
on desoxyribonucleic acid, 8415*b*.
on dialysis of $Cb^{95}$, $La^{140}$ and $Zn^{65}$ in $VO_2(NO_3)_2$ soln., 7814*c*.
on elec. cond. of aq. dodecylammonium chloride, 8810*d*.
on electrolysis of slightly sol. salts, 8905*e*.
on $HCO_3H$ oxidation by Cl, 2406*b*.
on 3-β-hydroxy-17-keto steroids, 7059*a*.
on Hg catalysts in sulfonation of anthraquinone, 617*i*.
on photolysis of aq. solns. of Cl, 6515*h*.
on polymerization of styrene with $SnCl_4$ catalyst, 7295*h*.
on Ag mirrors, 2388*a*.
on stomach lining and skin, 3106*c*.
surface tension of $HNO_3$, NaCl solns. and water, 7299*i*.
on wool digestibility by pancreatin and x-ray pattern, 2778*i*.
elec. cond. in $H_2O$, 4544*d*.
electrolysis of, Cl recovery in, P 4964*h*.
electroösmosis of, 8245*b*.
force consts. of bonds in, effect of solvation on, 6876*i*.
formation in chlorinated paraffin wax, inhibition by triethanolamine, P 1179*d*.
gaseous, in hydrolysis of cellulosic material, P 6414*i*, P 6415*b*.
generator for, 2043*b*.
glass attack by, 2385*cf*.
halochromic reactions with ketones, 7911*b*.
heat of formation of, 6071*a*.
heat of reaction with $Co(HCO_3)_2$ and $Ni(HCO_3)_2$, 2830*b*.
heats of soln. of liquid $NH_3$ and $Mg_3N_2$ in, 8836*i*.
hydration of, activity and, 7302*b*.
in hydration of isobutene and hydrolysis of EtOAc, 7302*i*.
hydrogen overvoltage in, 503*e*, 8285*a*.
on Hg cathode, 6494*b*.
on metals, 4585*d*.
in inhibition of oxidation of CO, 3592*f*.
as inhibitor of C combustion, 9417*b*.
injection into make-up water, app. for, P 3250*g*.
interatomic distances and moments of inertia of, 8838*h*.
iron electrolytic soln. in, 6519*i*.
iron oxide films on Fe in, 6931*c*.
iron passivation against, 8246*d*.
in isomerization of abietic, *l*-pimaric and *d*-sapinic acids, 3809*e*.
isomerization of PrCl in presence of, 5734*c*.
magnesium carbides heat of soln. in, contg. NaCl, 1671*a*.
manuf. of, 2743*c*.
app. for, P 8623*b*.
furnaces for, 8631*b*.
from $FeCl_3$, P 6375*i*.
in Karbate falling-film-type absorber, 9391*e*.
from NaCl and $H_2SO_4$, P 9396*c*.
mixts. with $CuCl_2$ solns., refractive index of, 6049*f*.
with glucose, dialysis of, 2486*h*.
with hydrocarbon from isomerization, dehydration of, P 4007*f*.
with KCNS, pH of, 2074*h*.
with propene, distn. of, P 6010*c*.
with $Na_2S_2O_3$, pH of solns. of, 2074*g*.
nickel soln. in, active centers and, 6028*c*.
in paraldehyde depolymerization, 7801*f*.
penicillin G inactivation by, effect of NaCl on rate of, 3697*g*.
phase transitions in, 4136*i*.
for photographic use, Am. standard specifications for, 6930*b*.
for pickling steel, 8329*g*.
pigment-caking inhibition in nitrocellulose lacquers by, 7719*a*.
platinum polarization in, 2100*e*.
poisoning by, 5514*f*.
polarization of iridized and platinized Pt in, 2522*a*.
potassium chloride soly. in solns. of, 6889*d*.
potential functions and, 7276*g*.
potential of antimonous-antimonic half cell in, 8286*c*.
in precipitating org. substances from sulfite waste liquor, 7227*e*.
as promoter, for $CoBr_2$ or $CoCl_2$ catalyst in polymerization of rosin, P 1906*g*.
for CuCl-$NH_4Cl$ catalysts, in mono vinylacetylene prepn., 1598*d*.
in isomerization of paraffins, P 1559*i*, P 4006*f*.
in isomerization of paraffins, recovery of, P 7077*h*.
purification with $UCl_3$, 7853*f*.
reaction (addn.) with $C_2H_2$ and removal from 1,2-dichloroethane, P 664*a*.
reaction products with high-mol. poly unsatd. compds., P 2804*d*.
reaction with acetylene, P 1433*c*, P 3024*ef*, P 6044*i*, 6969*g*, P 7951*bd*.
with $C_2H_2$ and HCHO, P 4685*g*, P 5035*b*.
with $C_2H_2$ in presence of $HgCl_2$ and $Al(OH)_3$, P 3437*h*.
with $C_2H_2$, Hg compds. as catalysts in, P 5790*a*.
with alcs., 3776*i*.
with $NH_3$, periodic ppts. from, 7788*g*.
with $NH_4OH$, catalysis by water, 1634*h*.
with 2-(9-anthryl)furan derivs., 2198*i*.
with benzyl fluoride derivs., rates of, 2079*a*.
with *p*-bis(2,3-epoxypropoxy)benzene, 2181*c*.
with 1-buten-3-yne, 7899*a*.
with $CH_2$:CHCl to give $CH_2ClCH_3$, P 5410*e*.
with dialkylethynylcarbinols, 3352*f*.
with 5,5-dichloro-6-hydroxy-6-methylhydrouracil, 2170*b*.
with ethylenimine ketones, 3388*i*, 3389*a*.
with ethyl (trimethylsilyl)acetate, 562*g*.
with hide powder and wattle tanned hide powder, effect of drying on, 7731*h*.
with isoprene, 5362*c*.
with 17-ketosteroid II, 1048*f*.
with mannitol, 2940*a*.
with $Me_2O$ and Si, P 3025*e*.
with 5-methyl-1,4-heptadien-3-one, 2576*a*.
with $Ni(OH)_2$, 8809*h*.
with organosilanes, 8366*d*.
with paraffins, P 660*h*.
with rubber, 1594*h*, 7739*d*, 8728*k*.
with styrene, $SnCl_4$ as catalyst in, 2966*h*.
with γ-trimethylene cyanohydrin, 2579*d*.
with unsatd. alcs., 113*i*, 114*h*.
with unsatd. compds. in $SO_2$, P 3024*a*.
recovery from chlorosulfonic acid, 8075*d*.
in regeneration of Dowex 30, 6872*f*.
removal from air, 6760*h*.
from 2-alkyl-3-chlorotetrahydropyran, 2994*b*.
from chlorinated fatty acids or their esters, P 7502*e*.
from chlorinated hydrocarbons, P 3023*b*, 7407*ch*, 7408*c*, P 7759*h*.
from chlorinated soybean oil and chlorinated Me esters of soybean fatty acids, 5204*g*.
from chloromethylcyclopentanes, 2172*a*.
from 2-(chloromethyl)-*p*-dithiane, 7030*d*.
from 1-chloro-3-pentanone, 564*i*.
from cyclohexylalkanoyl chloride, 2964*e*.
from DDT spray deposits, and its control, 5148*f*.
from α,α′-dichlorobibenzyl, 1755*d*.
from $ClCH_2CH_2Cl$, P 1793*e*, P 3024*f*, P 3335*b*, 4628*k*.
from α,β-dichloroisobutyronitrile, P 3357*b*.
from dichloro paraffins, P 662*c*.

*removal* from halogenated-hydrocarbon solvents, P 5940*k*.
from hexachlorocyclohexane isomers, rates of, 7311*b*.
from methyl α,β-dichloropropionate, P 7502*d*.
from olefinic alcs., P 5410*h*.
from tetrahydrofurfuryl α,β-dichloropropionate, P 3466*a*.
from 1,1,1-trichloro-2,2-bis(*p*-chlorophenyl)ethane, P 5424*a*.
from 1,1,2 - trichloro - 2,2 - difluoroethane, 2465*c*.
salt soly. in aq., calcn. of, 2844*i*.
secretion by stomach or gastric mucosa, 2688*i*, 4360*c*, 4753*g*.
degenerative gastritis of fundus in relation to, 2309*g*.

with $CCl_4$ and with $CCl_2F$, P 660*b*
with cyclic ethers, 6163*b*
with fiber-glass fabric for bonding with phenolic resins, P 8208*i*
with hexachloropropene in the presence of $SbCl_5$, P 8397*i*
with olefins in presence of FSO$_3$H, P 3834*i*.
with satd. hydrocarbons in formation of polyolefins, P 5788*s*.
recovery of, P 914*b*, P 1159*j*, P 5182*a*
removal from alkylated hydrocarbons, P 4006*de*, P 6218*d*.
from 1,1-difluoroethane, P 6645*a*
from hydrocarbons, P 661*a*, P 2764*b*, P 4002*c*.
from org. compds., regeneration catalysts for, P 5518*c*.
from polyfluoro paraffins, P 3437*b*
removal from gases and chlorofluorocarbon treatment with, agents for, P 9300*f*.
safety with, 367.
sepn. from $CHClF_2$, $CHCl_2F$ and HCl, P 661*h*.
sepn. from $CCl_2F_2$, $CCl_3F$ and HCl, P 662*b*.
silicon detn. in, 967*a*
silver resistance to, 4991*i*
storage of, P 6373*i*.
system: $KHF_2$–KF–, thermodynamics of, 8763*d*.
tantalum potential in, 2101*f*.
thermodynamics of, 7790*e*
toxicity of inhaled, 8530*i*.
water detn. in liquid, 971*g*.

**Hydrofluorination**. See *Hydrofluoric acid*.
**Hydroforming**. See *Aromatization; Dehydrogenation; Petroleum refining, Ring closure;* for hydrocarbon oil studies see *Hydrocarbon oils*.
**Hydrogels**. See *Colloids*.
**Hydrogen**. (See also *Dehydrogenation; Deuterium; Deuterons; Hydrogenation; Protons; Tritium*.)
absorption by steel during and after acid pickling, 1301*h*.
absorption by steel in cathodic polarization in $H_2SO_4$, effect of Te on, 952*b*.
absorption by steels during electrolytic pickling, fragility from, 6962*a*.
accelerator for, and its target current, 2087*b*.
adsorption of, by Co, 3688*e*.
by Cu oxides in films, effect on elec resistance, 474*h*.
effect on floatability of minerals, 3325*c*.
by Fe and Fe-kieselguhr catalysts in gasoline synthesis, 2412*i*, 2413*ab*.
by metals, 6028*e*.
by Ni catalysts, effect of sintering on, 2079*f*.
by powd. W, 3263*g*.
alloys and elements with, crystal structure of, 7885*e*.

alpha-ray-bombarded, ultraviolet light from, 4580*h*.
in aluminum and Al alloys, 982*i*.
as antioxidant in butter, 2337*d*.
atomic function and viscosity of, 8774*f*.
atomic, in electrodeposition of Ni, 2519*g*.
in hydrocarbon oxidation, 1309*c*.
measurement of fast reactions of, 6053*e*.
reaction with $C_2H_2$, 472*i*.
reaction with $C_6H_6$ and $CH_4$, 3725*e*.
reaction with $O_2$ at low pressures, 2079*i*.
reaction with paraffins, 5270*e*.
recombination of, 8819*h*.
recombination on catalysts, 8251*c*.
recombination on solids, 1635*i*.
reduction by, anionic intermediates in, 6058*b*.
thermal conduction in flame of, 8253*f*.
in blast-furnace gas, control of, 6552*g*.
bonds, 3671*g*, 8220*h*.
in acetone mixts. with nitrocellulose, 4928*g*.
in adsorption by bauxite, 6497*g*.
in aminopyrimidines, 6487*f*.
between $PhNH_2$ or PhNHMe and *p*-dioxane, 7438*c*.
with Sb, energy of, 8764*c*.
with C and H, 8764*a*.
with C and N, in dimethylhydrazines, 1314*c*.
with C, dipole moment of, in $C_6H_6$ derivs., 3714*h*.
with C, force const. of, 6895*a*.
with C, force const. of, relation to HCH angle for CH radical, $C_2H_6$, $C_2H_4$ and $C_2H_2$, 4059*i*.
with C, free energy of, 3276*g*.
with C, Ge and Si, in $CH_3Cl$, $GeH_3Cl$ and $SiH_3Cl$, 8275*f*.
with C in hydrocarbons, energies of, 452*g*, 2052*h*
with C in hydrocarbons, reaction rates with Cl and, 5270*c*.
with C in $CH_2$ radical, 5241*h*.
with C, length of, 2478*f*.
with C, polarity of, 3252*h*.
with C, sound velocity increment of, 3256*g*.
in carboxylic and sulfinic acids, 7451*d*.
catalytic activity and formation of, 8251*f*.
in cellulose chains in amorphous regions of rayon, 3202*g*.
in contraction and permanent set of wool, 5955*h*.
in crystals, 8783*c*.
in cyclic compds., molar sound velocity and molar refraction increments for, 4532*c*.
in *o* derivs. of PhOH, 7300*h*.
dielec. consts. of substances with, 4529*i*.
effect on spectrum of carboxyl group, 3713*h*.
effect on stability of flavanones, 5396*b*.
in Et *p*-cymenecarboxylates, 1351*e*.
formation of, at peptide links in tanning, modified lignosulfonates in, 7732*h*.
formation of, between dihydric phenols and collagen, 7736*h*.
formation of, by benzene derivs. adsorbed on vitreous $SiO_2$ gel, 7344*a*.
formation of, effect on spectra of hydroxyl group-contg. quinones, 2094*c*.
formation of, with OH groups of silicic acid-Celite mixts. in adsorption of centralite and 4-nitro triphenylamine, 8946*b*.
in 4-glycosidamino derivs. of pyrimidines, 3422*i*.
in hardening of polycondensation resins, 4509*e*.
with H, energy of, 8763*b*.
intermol. reactions and, 1243*a*.
in keratin, 2810*e*.
in methylenediphenols, P 4698*h*.
in methyl salicylate, 2868*f*.
mol. assocn. and viscosity in relation to, 2059*f*.
mol. interactions in solns. and, 2490*g*.
mol. refraction and, 604*g*.
with N in $NH_3$, dissocn. energy of, 7797*i*.
in *o*-nitrophenol and salicylic acid, 8766*a*.
in org. compds., elec. moments and, [illegible].
org.-liquid penetration and solvation of rayon in relation to, 2777*f*.
*bonds*, overpotential and, 48*a*.
with O, elec. moment of, 5240*i*.
of 2,4-pentanedione and its derivs., 7343*c*.
in peonol, 1350*d*.
in polymers, 9455*h*.
in $KHF_2$, 8763*d*.
properties of solns. and, 7298*h*.
in quinhydrone, 452*a*.
Raman spectra of higher alcs. and, 7345*f*.
review on, 107*a*.
in salicylaldehyde and derivs., 943*d*.
spectra of mols. assocd. with, 7340*d*.
in 4-substituted cyclohexanols, 6174*b*.
with S in sulfinic acids, 5245*g*.
swelling of wood in org. liquids and, 8763*c*.
thermodynamics of, 8765*h*.
in $H_2O$, strength of, 4527*c*.
bonds (bifurcated) in $\alpha$-$HIO_3$, 6479*b*.
books: in Metals, 988*b*; Mekhanizm Okislemiya i Goreniya Vodoroda, 8256*f*.
carbon ratios of coal and petroleum, 2109*d*.
carriers of, formation by hematin-catalyzed peroxidations, 6259*d*, 9104*g*.
as catalyst in calcination of limestone, 8621*i*.
cathodic, excited state of, 2874*h*.
cathodic, passage through metal films, 4913*i*.
cell, $H_2$|HCl|AgCl|Ag, and H electrode, 6051*h*.
cell with O, 4146*f*.
in chromium plate (hard), effect of heat-treatment on, 9014*e*
in chromium plates from sulfate baths, 8901*h*.
combustion of, in gaseous mixts., 7063*d*.
combustion on Pd plate, 4087*c*.
complex-ion reduction with mol and at., 2854*g*
[illegible]d, oly fo
studies, 41*i*.
correlated mol. orbitals for, 2827*c*.
covalent and packing radii of, relation between, 9*h*.
crystals of, interat. distances in, 3671*f*.
cylinders of, charts of compressibility factors and quantities delivered by, 3156*g*.
designation of "extra," in naming cyclic compds., 4909*c*.
desorption of, from Pt plate by impact of slow electrons, 5279*e*.
detonation of, effect of tube width on, 5188*i*.
diffusion and soln. in polystyrene at high pressures, 2811*d*.
diffusion of para- into ortho-, 3253*b*.
diffusion of, through Al tubes, 6021*c*.
in Fe during annealing, 1701*c*.
into metals, effect of metallic and org. films on, 6139*i*.
with N, thermoeffect in, 6875*g*.
in steel, 2559*f*.
dissocn. of, kinetics of, 7797*c*.
Doppler effect of, in canal rays, 4135*b*.
effect on acidity and elec. cond. of $As_2S_3$ sols, 5321*a*.
on action of $AlCl_3$ catalysts on alkanes, 1712*f*.
on adsorption of $CH_4$ by Ni Fischer catalysts, 6064*a*.
on cathodic polarization, 8285*c*.
on cohesion of steel, 8331*g*.
on color formation by org. reagents, 4174*f*.
on decompn. of $CaCO_3$, 2078*d*.
on deformation and ductility of steel at subzero temps., 5717*a*.
on elec. cond. of oxides and spinels at high temps., 4534*a*.
on elec. resistance of Ni films, 8771*f*.
on mech. properties of steel, 4200*h*.
on N fixation by *Azotobacter*, 8591*h*.
on nitroglycerin susceptibility to explosion by impact, 4468*a*.
on Si reaction with Cl, 8931*b*.
on Ti, 7882*c*.
on x-ray diffractions, 2507*e*.
on welds, 4996*h*.
effusion of, 4531*a*.
effusion of, at crit. velocities, mol. wt. and, 2056*a*.
elec. discharge in, effect of magnetic field on, 4060*d*.
elec. fields in cathode dark space in, 4095*d*.
hertzian waves from, 1640*g*.
initiation of, 4902*e*.
secondary electron production in, 4941*i*.
electrode—see *Electrodes*.
electrodeposition of, catalyst poisons and inhibitors in, 8907*d*.
electron scattering by, 8849*g*.
electron tube contg., electronic intensity regulator for, 942*a*.
embrittlement of steel—see *Steel*.
energy absorption in ionized, 480*f*.
energy level (ground state) of, 7338*e*.
energy level (ground state) of, hyperfine structure of, 5302*h*.
energy levels in, 4953*d*.
energy levels of, displacement of, 4953*a*.
energy levels, spectrum, ionization potentials and magnetic splitting factors of, 8883*f*.
equation of state for, 8773*d*, 8774*b*.
equil. with metals, 4917*e*.
equil. with TH and dissocn. of $T_2$ and TH, 476*b*.
-evolution potentials, cathodes with lowered, 504*e*.
-exchange catalysis by oxygenic contact, 6497*e*.
exchange of, of butanes in $H_2SO_4$, 7897*c*.
of octenes, 6150*g*.
of paraffins in presence of $AlCl_3$-$Al_2O_3$, 7897*f*.
with Na on carbonaceous exchangers in chlorides, 2848*b*.
exchangers—see *Base-exchanging compounds*.
exchange with D—see *Deuterium*; and "heavy" under *Water*.
excitation of, in upper atm., 3289*h*.
explosion of mixts. with Br, 4084*e*, *g*.
explosions in O-balanced, prevention with combustibles with low upper limit of flame propagation, 7231*a*.
flame propagation limits of, and its mixts. with N and $N_2O$, effect of promoters, inhibitors and phys. properties on, 3617*h*, 3618*d*.
flames of, 7282*a*.
heat transfer from, 7805*c*.
with O, spectrum of, 4141*i*.
with O, structure of rising, 3254*c*.
temp. of, 1231*i*.
flow in zeolites, 6489*a*.
flow through porous $SiO_2$, 6883*d*.
formation of, from catalytic decompn. of coal light oil, 7664*f*.
by electrolysis of salts in $Ac_2O$, 2876*h*.
from graphite, O and steam, 2076*h*.
in hexane oxidation, 7897*c*.
in Hg-photosensitized reactions of $Me_4C$, 6516*h*.
in $CH_4$-filled Geiger-Müller counters, 484*b*.
from MeOH on ZnO catalyst, 7314*a*.
from methylcyclopentane, 6567*c*.
from $HNO_3$ and Cd or Zn, 6101*i*, 6102*b*.
in petroleum cracking and distn., steel attack by, 6401*g*.
by *Rhodospirillum rubrum*, 6698*e*, 8440*c*.
in sugar manuf., 9502*h*.
by tartrate-fermenting *Clostridium*, 274*a*.
by thermophilic cellulose-fermenting bacteria, 720*c*.
gamma-ray bombardment of, threshold for reaction in, 4115*e*.
generator (electrolytic) for, for gas analyzer, P 8758*c*.
generator for, 6869*d*, 8214*h*.
heat of adsorption by active C, 6903*g*.
heat of dissocn. from $CH_4$, 1250*a*.
heat of soln. in Ti, 7770*i*.
hexane isomerization in presence of, or its mixts. with methylcyclopentane, P 4007*a*.
in hydrogen sulfide from FeS, 5319*i*.
ignition by elec. sparks, 407*c*.
ignition of mixts. of O and, 1246*d*.
by elec. sparks, effect of org. vapors on, P 406*i*.
by shock wave, 5951*e*.
in ignition retarding of Diesel fuels, 6805*d*.
inflammability limits for mixts. of $CF_2Cl_2$ or MeBr and, 3619*b*.
inflammability of, effect of dilg. gas on, 8249*c*.
inflammability of mixts. of air with, effect of solid particles on, 6806*d*.
ionization by electrons in, 34*d*.
ionization chamber filled with, under high pressure, 5292*i*.
ionization cross sections of D and, 2862*h*.
ionization in, 4095*a*.
ions (electrolytic)—see *Hydrogen ion*.
and ions (gaseous) ($H_3^+$) in interstellar

space, continuous absorption by, 5662e.
ions (gaseous neg.), in sun's atm., 4134b.
ions (gaseous neg.) of, mass-charge ratio of, 8848a.
ions (gaseous) of, effect on passivity of Mg, 2076f.
ions (gaseous) of, in catalytic hydrogenation, 7802k.
iron brittleness and, 7395g.
iron embrittlement by, fractography of, 8326e.
in irrigation water, 3951d.
isotope of mass 2, water contg.—see "heavy" under *Water*.
isotopes of, electrophilic substitution and exchange of, in heterocyclic systems, 6876d.
exchange reactions of, 7809f.
in fossil ice, 2050f.
in spring waters of Japan, 5889e.
in study of pathol. processes, 8519c.
Joshi effect in, 2858c.
Joshi effect in, and its mixt. with Br, 7322k.
liberation at Hg cathode from buffer solns., kinetics of, 6055c.
in lightning spectrum, 7334k.
light scattered by, depolarization of, 7281i.
liquid, ionization by α-rays in, 1257h.
liquid, sound velocity in, 6024g.
lyoparachor of, 2834c.
in magnetic field, ratio of resonance frequency to proton frequency of, 8262g.
magnetic moment and gyromagnetic ratio of, 5303f.
magnetic susceptibility and polarizability of, 3252g.
manuf. of, 378e.
from CO and steam, P 840b.
from coke-oven gas, 7650i.
by electrolysis, 4146e.
electrolytic cell for, P 4587i.
from hydrocarbon gases, P 8063f.
from Fe and steam, P 9398f.
from low-grade fuels, P 4836f.
from $CH_4$, 9415g.
from $CH_4$ and CuO in fluidized bed, 7199i.
from natural gas and steam, 5171a.
from peat, P 6796b.
reformed natural gas for, 3594f, P 6398a.
from sea water, P 6926b.
by water-gas conversion, plant design for, 5571b.
manuf. of, and oxide reduction by, in fluidized bed, app. for, P 6873g.
manuf. of high-pressure, P 369g.
mass difference between neutrons and, 4947a, 7328i.
detn of, 8264k.
ionization produced by $He^3(n,p)$ and $N^{14}(n,p)$ nuclear reactions and, 8865f.
mass photoelec. absorption coeff. of, 843c.
media contg., neutron diffusion in, 4096a.
in mercaptobenzothiazole activity as rubber vulcanization accelerator, 2022i.
metabolism by bacteria, N fixation and, 9155c.
metabolism of mol., by microörganisms, 5445i.
in metal heat-treatment, 9001d.
in metals, 6553b.
mixing with A, $CO_2$ or N, temp. effects in, 8773c.
mixts. with air and O, elec. resistance of, 3591i.
with $NH_3$, inversion spectrum of, 3716k.
with CO and O, conjugated oxidation in, 4548a.
with CO, manuf. by $CO_2$ reaction with $CH_4$, 1944i.
with CO, manuf. from coke oven, 3595b.
with CO, manuf. from $CH_4$, 7200b.
with CO, $CH_4$ and N, sepn. in reflux condenser, 6022g.
with hydrocarbons, thermal diffusion in, 7281d.
with $CH_4$, oxidation of, 2403d.
with N, compressibility of, 6021d.
with N, thermal diffusion of, 8224e.
mobile, in cleavage of Schiff bases, 2209d.
mobility in methylene group of 1,4-hendecadiene and 1,4-hexadiene, 3774c.
mol. beam, production and measurement of intense, 8259e.
mol. stopping power of, 4004a.
mol. with D, prepn. and mass spectra of, 4967b.
mol. with D (HD), mass spectrum of, 8889b.
naphthalene vaporization into, from fixed and fluidized beds, 5647a.
in nebulae, 938c, 1651i, 2509b, 4133d, 5302g, 8877e.
neutron-bombarded, γ-rays and deuterium from, 1259h.
neutron cross section of, 3282k.
ortho-para conversion of, on Cu-Pt mixed crystals, 4088b.
by metallic catalysts, rate of, 26g.
on Ni catalyst, 7313i.
overvoltage—see *Overvoltage*.
oxidation of, on Pt catalysts, 6062c.
parachor and thermochor of, 2923f.
partition functions of, 8838k.
penetration into Fe, 7304k.
photon scattering on, 4796b.
polarity of, in $C_6H_5$ ring in hydroxybenzoic acids, 8809c.
polarizability of, internuclear distance and, 1264h.
potassium-atom-ray scattering by, 2478d.
potassium chloroplatinate-soln. reduction by, 6038k.
pressure of, effect of hydrogenation on sulfide-coated Ni catalyst, 7802k.
pressure-vol. relations of, 8772d.
proper functions for, in Dirac theory, 4554i.
proton scattering by, 4106i.
pumps (diffusion) for, speeds of, 2043b.
purification of, 7853a.
quiescent filaments of incandescent, assocd. with sunspots, 7334a.
radius of bonded atoms of, 3252c.
rays—see *Deuterons; Protons;* and "ions" above.
reaction of, with aldehydes or ketones and $NH_3$ or amines, P 5412a.
with $BeCl_2$, 4967e.
with Br, kinetics of, 8816h.
with $CO_2$, in MeOH manuf., P 7036d.
with C in metals in vacuum, 29f, 6053f.
with CO and HCHO, P 673d.
with CO and olefins, P 4685d, P 5031i.
with CO, formals and alcs., P 675a.
with Ce and La, 4122d.
with Cl, surface in, 474b.
with films of Cu and Cu oxide, 6531i.
with free radicals, 5270e.
with halogens, kinetics of, 5266e.
with $Fe_2N$, 4169c.
with FeS, MnS and $Cu_2S$, equil. in, 2558g.
with methylene free radical, 5732i.
with $MoO_3$, kinetics of, 8820b.
with Ni catalyst, 7802g.
with Ni Fischer catalysts, rate of, 26i.
with O, $H_2O_2$ in, 7305h.
with O in liquid Fe, 8822e.
with O, review on, 6894c.
with Ag-S alloys, 8834b.
with S on bauxite catalyst, P 7201k.
with Ti, kinetics of, 9006h.
with vinyl radicals, 3694d.
with zirconium, kinetics of, 8817b.
recovery from coke-oven gas, 7211d, 8118i.
in reduction of oxide coating on Si steel, P 7893g.
removal from Cl, P 4822g.
from cyclohexane under hydrogenating conditions over Fischer-Tropsch-Co catalyst, 7864b.
from liquid metals, 980g, 7877b
from reversible gas reactions, P 5031c.
from steel ingots and castings, P 104i.
as sintering atm., effect on soft Fe, 2142e.
soly. and retention in Mg and Mg alloys, 5355i.
soln. in liquid Fe and its alloys with Cb, Ti and Ta, 2490a.
sorption by, 6489c.
in space (interstellar), 1263i.
spectra of, and of its mol. with T, 8884d.
spectrum of, 3290a, 3712i, 4135a, 4567d, 7338e, 8880h.
afterglow of Balmer, 491b.
Balmer lines in, from spark channels, 4135b.
calcn. of transition probabilities in, 480d.
effect of nuclear motion on the fine structure of, 1653a.
fine structure of, 4135c.
observed by means of electronic projection system, 8272g.
from oxide cathode, 7324k.
wave-length shifts in, 8272k.
